Hydrant Rental Permit Application

Any customer seeking temporary use of a City owned hydrant must have a valid Hydrant Rental Permit.

PREPARE A COMPLETE APPLICATION: This application is valid for one hydrant or one tanker truck only. If you will be using multiple hydrants or tanker trucks, submit a separate application for each.

- Complete and return Hydrant Rental Permit Application to the Development Services Office (DSO).
- [Provide a map](#) and a detailed description of the of the requested hydrant location.
- For film permits only, provide proof of Master Filming Permit per [SMC 15.35.010](#).

A HYDRANT RENTAL PERMIT WILL NOT BE ISSUED FOR THE FOLLOWING CONDITIONS:

- The project site has an existing water service.
- The hydrant use for the project exceeds six months.
- At SPU's discretion.

SIGN & SUBMIT YOUR APPLICATION – Use one of the following options:

- Email signed pdf copy: SPU_DSO@seattle.gov
- Mail: Development Services Office, Seattle Public Utilities, PO Box 34018, Seattle, WA 98124

WHAT HAPPENS NEXT

Once you submit your application, we will perform a review. If approved, you are required to complete the following prior to use:

1. [Pay the invoice](#). Once the payment posts, we will issue your permit.
2. Sign the permit and return a copy to SPU. Your permit is not valid until we receive a signed copy.
3. If SPU has authorized use of a hydrant meter assembly:
 - Schedule a pick-up appointment by contacting the SPU Meter Shop: (206) 423-6259 or (206) 615-0635.
 - Pick up/drop offs may only be done Tuesday through Friday between the hours of 7:00 am – 11:30 am. The SPU Meter Shop is closed on Mondays.
 - The SPU Meter shop is located at 2700 Airport Way South.
4. **Required Backflow Protection, Inspections, and Documentation:**
 - At all times, provide and install a State approved and successfully tested Reduced Pressure Backflow Assembly (RPBA) or approved and successfully inspected Air Gap (AG) before flowing any water.
 - All backflow protection installations must be inspected and approved by SPU's Utility Service Inspections (USI) before initial hydrant use. Inspections are typically completed within one business day. Installations are subject to re-inspection by SPU at any time.
 - AGs are required to be approved by USI prior to hydrant connection. Proof of a recent AG approval from another local backflow protection program may be accepted by USI.
 - Successful backflow testing is required after the RPBA connection is approved by SPU. All backflow assembly testing must be completed by a State certified Backflow Assembly Tester (BAT). Submit passing test reports to USI within two-days of testing.
 - To request a backflow inspection or to submit a successful test report, contact SPU_Backflow@seattle.gov or (206) 684-3536.

APPLICANT AND PROJECT INFORMATION

Work Site Address	Application Date	Desired Start Date	Total days/months
Onsite Contact Name	Email	Phone	

Hydrant Location: Refer to the [Water and Sewer Map](#) for hydrant location (Ex: Hydrant Location: HYDRANT 800 3RD AVE - E10). For tanker trucks only, hydrants are limited to SPU pre-authorized low impact hydrants.

PURPOSE OF USE:

- | | | |
|---------------------------|-----------------------------|---------------------------------------------------------------------|
| Event (fun run, etc.) | Film Production | Water Main Extension (Seattle Standard Plan 300a) |

REQUEST TYPE: Select one. Hydrant OR Tanker Truck

Hydrant

Max. Gallons Per Minute	
Max. Gallons Per Day	

Tanker Truck

Tank Capacity	
Fills Per Day	
Vehicle License Number	

If water consumption is less than 10 CCF/day or 30 consecutive days of use, you will be charged the [daily rate](#).

Water Discharged to: Ground Public Combined Sewer Public Sewer System Public Storm Drain

ACKNOWLEDGEMENT

The Property Owner or Financially Responsible Party:

- Is responsible for payment of all fees associated with this Hydrant Rental Permit.
- Has reviewed the Hydrant Rental Permit Requirements, Operation Rules, and Hydrant Meter Assembly Rules.
- Must notify SPU's Development Services Office of any change in contact information which may occur at any time prior to payment of all fees associated with this Hydrant Rental Permit.

I, the undersigned Property Owner or Financially Responsible Party, agree to comply with all rules and regulations of Seattle Public Utilities relating to this Hydrant Rental Permit. If I am the Authorized Agent, I certify that I am authorized by the Property Owner to sign this Hydrant Rental Permit application on their behalf.

HYDRANT RENTAL PERMIT REQUIREMENTS

- **It is the responsibility of the hydrant user to use a reduced pressure backflow assembly (RPBA) or approved air gap at all times.**
- Customers are required to install and maintain an approved air gap or reduced pressure backflow assembly (RPBA/RPDA) on each hydrant meter connection at all times. For answers to specific cross-connection control questions or to request an inspection, please contact SPU Backflow at SPU_Backflow@seattle.gov.
- Hydrant permits, passing backflow assembly test reports, and satisfactory tanker fill inspection reports (if applicable) must always be in the possession of the hydrant user.
- Fire Department and SPU access to the hydrant must be unobstructed at all times.
- Approved barricades must be used to prevent hydrant hoses from coming in contact with vehicle and/or pedestrian traffic.
- This Hydrant Rental Permit is effective until the expiration date. Any subsequent use is illegal and subject to a fine.
- One specific hydrant must be identified and approved by SPU prior to use.
- Failure to comply with any hydrant rules or requirements may result in the cancellation of Hydrant Rental Permit(s).

HYDRANT OPERATION RULES

- Hydrant Rental Permit customers operate hydrants at their own risk and assume all responsibility for personal injury or damage to SPU equipment.
- Any improper use of the hydrant resulting in damage will result in a damage claim initiated by SPU.
- Check all engine port caps to insure they are tightly secure before operating the hydrant.
- Using a hydrant builds pressure that can blow out loose fittings. Never bend or hunch over the hydrant when you are operating and always stand to the back of the hydrant while charging.
- Operate the hydrant with a hydrant wrench only. Never operate using a pipe wrench – it strips the operating nut.
- Never open or close a hydrant rapidly. Opening or closing a hydrant too fast can send a water hammer through the water main that can cause it to rupture and/or damage the hydrant. It also disturbs the sediment in the water main affecting water quality and causing dirty water complaints.
- To control flow, use the valve on the SPU hydrant meter. If private equipment is used, connect a 2-inch ball valve or gate valve to the engine port. Never throttle a hydrant from the operation nut. Operate the hydrant to the fully open or fully closed positions. Leaving partially open or closed burns the main rubber valve.
- If a hydrant is not operating properly, call SPU Operations Response Center at (206) 386-1800 to report the problem.
- All discharges must meet [Federal National Pollutant Discharge Elimination System \(NPDES\) regulations](#).

HYDRANT METER ASSEMBLY RULES

- SPU's hydrant meter assembly (HMA) must be returned in same-as-issued condition. If you return equipment that is damaged, SPU will assess charges equal to the cost of the damaged equipment or parts, including overhead cost. If there is any evidence of hydrant meter tampering or damage to the hydrant meter prohibiting SPU to accurately determine the amount of water used, the [daily rate](#) will be assessed for the entire term of the Hydrant Rental Permit.
- It is the Hydrant Rental Permit holder's responsibility to keep the HMA secure. Any lost or stolen HMA must be reported immediately. The replacement cost of the HMA will be assessed, as well as the daily rate from the start of the Hydrant Rental Permit to the date that it was reported stolen or missing.
- It's the Hydrant Rental Permit holder's responsibility to return the HMA by the Hydrant Rental Permit expiration date. If it is not returned, the permit holder will be charged the daily rate until the HMA is returned.
