

Complete all fields in this application to request a Contract for a Utility System Improvement and, Latecomer Agreement, if applicable. Property Owners required to make utility system improvements, as outlined in the Water, Drainage, and Wastewater Availability Certificate (WAC), must provide the information requested below to initiate the Contract and Latecomer Agreement process. For more information, please review the additional information on page three of this application.

Note: Only one Contract/Agreement may be issued per utility; water, drainage, or wastewater system improvement. If your project involves system improvements for multiple utilities, a separate application must be submitted for each.

1. COMPLETE APPLICATION

Applicant & Project Information

↓	Property Owner ¹	Financially Responsible Party (If different from Property Owner)	Project Contact (If different from Property Owner)
Name			
Company			
Mailing Address			
Telephone			
Email			

¹ All Contracts and Agreements must be signed and executed by the **current** Property Owner.

Project Address	
Parcel Number(s)	
WAC Number	
Building Permit Number(s)	
Land Use Record Number	
Street Improvement Permit (SIP) Number	
Project Description	
System Improvement Requirement Description as Outlined in the WAC	
Utility Type (Select one)	☐ Water ☐ Drainage ☐ Wastewater ☐ Combined (Drainage and Wastewater)
System Improvement Type (Select one)	☐ Main Extension ☐ Water Valve(s) ☐ Other Water System Improvements (Appurtenances)

Latecomer Agreement Information

Latecomer Agreements help offset the cost of utility system improvements required for development. When a Property Owner is required by Seattle Municipal Code (SMC) to construct and pay for water, drainage, and/or wastewater utility system improvements, they may be eligible to recover a portion of the costs through future connections made by designated benefiting parcels or Seattle Public Utilities (SPU).

There are two types of [Latecomer Agreements](#):

- **Developing Property Owner Latecomer Agreement (DLA):** A Latecomer Agreement where the cost of construction or improvement is borne solely by the Developing Property Owner who may recover costs from future designated benefiting parcels.
- **Participatory Latecomer Agreement (PLA):** A Latecomer Agreement where the cost of the water, drainage, and/or wastewater main extension is shared between SPU and the Developing Property Owner, with future reimbursement provided to the Developing Property Owner by SPU.

Note: Valves and other appurtenances are not eligible for a PLA, but a DLA is permitted.

Important: The deadline to apply for a Latecomer Agreement is PRIOR to the execution of the Construction Contract (water, drainage, and, or wastewater main extensions) or System Improvement Contract (water valves and/or other appurtenances).

Latecomer Agreement Type (Select one)	☐ Developing Property Owner ☐ Participatory (Water, Drainage, and/or Wastewater Main Extensions Only) ☐ N/A – No Latecomer Agreement Requested

2. PROVIDE DOCUMENTATION

To complete your application, please provide the following documentation for Proof of Property Ownership:

- ☐ **Individual Property Owner:** Provide either:
 - Documentation from the [King County Department of Assessments](#) confirming ownership, OR
 - Documentation of property ownership (e.g., copy of title insurance, title report, deed, etc.).
- ☐ **Property Owner is a Business:** Provide the company/entity name, the name of the authorized contract signatory (shown as the “Governing Person” on the [Secretary of State website](#)), and documentation from the Secretary of State website confirming the signatory is the “Governing Person.”
- ☐ **Property Owner is a School or Government Entity:** Provide Document of Signing Authority.

3. SUBMIT APPLICATION

Use one of the following options to submit your application:

- Email signed PDF to SPU_DSO@seattle.gov.
- Mail signed application to:
Development Services Office
Seattle Public Utilities
PO Box 34018
Seattle, WA 98124

4. PAY INVOICE

Once this application is submitted and approved, SPU begins internal processing. You will receive an invoice via email for the Contract and Latecomer Agreement fees, if applicable. Additional costs (beyond what this application describes) include: engineered plans, materials, installation, permits, fees, street restoration, and new water service taps. For more information about charges, refer to the [DSO Charge Menu](#).

ADDITIONAL INFORMATION

Water, Drainage, and/or Wastewater Main Extension Contracts are administered in two parts:

Step 1: Commitment Contract

- SPU will prepare a Commitment Contract and an invoice and email them to you (for Water Main Extensions (WMEs) only). Contracts for drainage and wastewater main extensions do not have an associated invoice.
- To finalize the Commitment Contract, the current Property Owner must **sign** the contract and **pay** the invoice, if applicable.
- Once all parties have signed and payment is received, if applicable, SPU will issue a new WAC with an "Approved with Contract" status for the applicable utility, allowing you to move forward with your building or land use permit.

Step 2: Construction Contract

- As your main extension plans approach approval, SPU will send you the Construction Contract and an invoice (for Water Main Extensions (WMEs) only).
- For WMEs only:
 - Your payment is treated as a deposit; after construction, SPU will reconcile actual costs against the deposit, and either refund overpayment or require additional payment.
 - Payment of the Construction Contract invoice is required before a pre-construction meeting can be scheduled.
 - The Construction Contract invoice typically includes estimated costs for SPU's construction management, the connection to the existing water system, and related support work.

Valve & Other Water System Improvement Contracts are administered through a single contract. SPU crews install the water valve(s) and/or other water system improvements; the Property Owner is responsible for final street restoration and all associated costs.

- SPU will prepare a Water System Improvement Contract and an invoice and email them to you.
- Once all parties have signed and payment is received, SPU will issue a new WAC with an "Approved with Contract" status for the applicable utility, allowing you to move forward with your building or land use permit.

Latecomer Agreements are administered through a single agreement. SPU will email you invoices for the applicable fees, which include a non-refundable application fee and King County recording fees.

- **Pre-Construction:** The following must be completed prior to finalizing the Construction or System Improvement Contract.
 - Provide an estimate of the total projected cost of the system improvements using the [Utility System Improvement Cost Estimating Worksheet](#).
 - Review and approve the list of parcels identified within the assessment reimbursement area provided by SPU in the Benefiting Parcels Pro-rata Shares Worksheet.
- **Post-Construction:** Final costs must be submitted within 120 days of completion of the system improvements, including final street restoration.
 - Submit final costs to SPU using the [Utility System Improvement Final Costs Worksheet](#), along with the [Latecomer Agreement Engineer Stamped Final Cost Form](#).
 - **If final costs are not submitted within 120 days, the Latecomer Agreement is void, along with any future reimbursement eligibility.**
 - Once all parties have signed the Latecomer Agreement and payment is received, an encumbrance on each benefiting parcel will be recorded with the King County Recorder's Office.
 - Once executed, the Latecomer Agreement is active for 20 years. The Property Owner must provide and maintain their current contact information with SPU every two years of the Latecomer Agreement.
