Re: **2015 Annual Progress Report
Seattle Bicycle Master Plan**

The Seattle Bicycle Advisory Board (SBAB) has reviewed a draft of SDOT's 2015 Annual Progress Report for the Seattle Bicycle Master Plan (BMP). The ordinance enacting the 2014 update of the BMP calls for SBAB to review and endorse annual progress reports.

The Bicycle Advisory Board endorses the 2015 BMP progress report and offers the following comments:

- Add mileage to the project tables so it is easier for readers to track the overall mileage of each facility type
- Identify which projects were not in 2015 implementation plan (projects that shifted up)
- Show which projects (and mileage) slipped into 2016 or beyond for completion.
- Consistently use project completion date to derive mileage totals.
- The Board would like to work with SDOT to identify additional metrics around safety, equity and connectivity that better reflect what SBAB would like to see in these areas.
 - Include measures of progress for Race and Social Justice Initiative, tracking progress using mapping of projects and methods of outreach.
 - Work with SPD to include measures of enforcement.
 - Clarify the meaning of and provide a map to illustrate "key travel sheds" as a measure of connectivity.
- Include a summary which describes in a narrative:
 1. This is what we have done. This is what we still need to do.
 2. This is what we have learned from each delivered project.
 3. Based on what we have learned, this is what we need to do to meet our goals of a truly multi-modal transportation system

The Seattle Bicycle Advisory Board shall advise the City Council, the Mayor, and all departments and offices of the city on matters related to bicycling, and the impact which actions by the city may have upon bicycling; and shall have the opportunity to contribute to all aspects of the city's planning processes insofar as they relate to bicycling.

- City Council
Resolution 25534

implemented with Equity and Connectivity, safe and healthy for all people and our environment.

4. Do we have momentum? What is needed to accelerate progress?"

Sincerely,

Kristi Rennebohm-Franz
