2026 Third Quarter

Surveillance Technology Determination Report

Seattle Information Technology

Summary

The Privacy Office received 103 total requests for privacy reviews during Q3 of 2026. 103 technologies and projects were applicable for this report. 0 of the technologies reviewed during Q3 of 2026 were determined to be new surveillance technology. Five technologies were identified as technologies falling under existing SIRs, or that met the ordinance-defined exemption criteria.

About This Report

The Seattle City Council passed SMC 14.18 ("Surveillance Ordinance") to provide greater transparency to City Council and the public when the City acquires technology that meets the City's criteria of surveillance. In addition to review and approval requirements for new and existing technologies, the Surveillance Ordinance requires the CTO to submit a quarterly report to Council of all technology acquisitions. This report provides a list of all such technology acquisitions, the process followed, and the determinations for each of the technologies reviewed.

Ordinance Requirement

This document is prepared pursuant to SMC 14.18.020.B.3, which states:

The CTO shall, by no later than 30 days following the last day of each quarter, submit to Council, by filing with the City Clerk and providing an electronic copy to the chair of the committee responsible for technology matters, the co-chairs of the Working Group, the City Auditor, the Inspector General for Public Safety, and the Director of Central Staff, a surveillance technology determination list that includes all technology from that quarter that was reviewed under the process established in subsection 14.18.020.B.1, along with supporting information to explain the justification for the disposition of items on the list. The CTO shall also post the list to the City's website.

How This List Was Compiled

City staff must submit a Privacy and Surveillance Assessment (PSA) before new non-standard technology may be acquired. The assessment is used to determine if a given technology meets the City's definition of "surveillance technology" as defined by the City's Surveillance Policy. City staff were informed of this new process through an all-City email, engagement meetings with critical stakeholders such as IT Client Solutions Directors, financial leadership, and project managers. The report includes technologies and projects reviewed through the PSA process between July 1, 2026 and September 30, 2026. If a technology is discovered to have been acquired outside of this process, the CTO will inform Council. Inapplicable requests for review (for example requests for standard software, redundant requests, consultant contracts, etc.) were removed.

Table of Department Acronyms

The following department acronyms are used in this report and are provided as a reference:

Acronym	Department
ARTS	Office of Arts and Culture
CBO	City Budgets Office
CEN	Seattle Center
Citywide	Citywide
DEEL	Department of Education and Early Learning
SDOT	Seattle Department of Transportation
FAS	Finance and Administrative Services
HSD	Human Service Department
HXM	Office of Hearing Examiner
ITD	Information Technology Department
LAW	Law Department
MOS	Mayor's Office
OSE	Office of Sustainability and Environment
OPCD	Office of Planning & Community Development
PKS	Seattle Parks and Recreation
SDCI	Seattle Department of Construction & Inspections
SCL	Seattle City Light
SFD	Seattle Fire Department
SPD	Seattle Police Department
SPU	Seattle Public Utilities

Surveillance Technologies (New)

No technologies reviewed and closed during Q3 2026 were determined to be new surveillance technologies.

Surveillance Technologies (Existing SIR or Exclusion Applies)

Five technologies reviewed and closed during Q3 2026 were determined to meet the definition of surveillance. Exclusion criteria and determination details are listed below

Department	Case No.	Reviewed Item
SPD	8189	Magnet Review

Inclusion criteria

There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

Description

This is a cloud based case management tool and chain of custody system for digital forensic extractions. This is similar to Cellebrite Guardian which is already an approved technology, but this is Magnet Forensics version to go with their digital forensic extraction technology.

Surveillance Determination:

This project/technology is associated with an existing Surveillance Impact Report, but does not constitute a material change as defined in POL-203, the City's Surveillance Policy. Material changes include new capabilities and uses of the technology, not included in the Surveillance Impact Report (SIR) approved by Council.

Extraction Tool Legislation found here.

Department	Case No.	Reviewed Item
SPD	8193	AXON INTERVIEW ROOM 2 CAMERA

Inclusion criteria

The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

Description

Interview Room 2 Camera Standard - Bundle Software, Service; Warranty 5yrs
No new features or functionality - lifecycle replacement

Exclusion Criteria:

Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

Surveillance Determination:

This project/technology meets the definition of a surveillance technology but falls under exclusion criteria. Therefore, this technology will not require a Surveillance Impact Report. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Department	Case No.	Reviewed Item
SPD	8194	TALINO MULTI-GPU

Inclusion criteria

The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

Description

These are laptops that are customized to do digital forensics.

Surveillance Determination:

This project/technology is associated with an existing Surveillance Impact Report, but does not constitute a material change as defined in POL-203, the City's Surveillance Policy. Material changes include new capabilities and uses of the technology, not included in the Surveillance Impact Report (SIR) approved by Council.

Extraction Tool legislation found here.

Department	Case No.	Reviewed Item
SPD	7659	SaferWatch

Inclusion criteria

The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

Description

This is a panic button technology that the Seattle Public Schools (SPS) has purchased as part of a State mandate to deploy the tech and work with local law enforcement and 911 centers. The panic button will integrate with Fusus (Real-Time Crime Center software) and 911 phone system. While the Fusus integration is covered under the Fusus purchase, there is a new webapp that both SPD and CARES would use in addition to integrated functionality. The panic button also sends and alert toa Browser based interface, what we will want to do Single Sign on with.

Surveillance Determination:

This project/technology is associated with an existing Surveillance Impact Report, but does not constitute a material change as defined in POL-203, the City's Surveillance Policy. Material changes include new capabilities and uses of the technology, not included in the Surveillance Impact Report (SIR) approved by Council.

Legislation link found here.

Department	Case No.	Reviewed Item
SPD	8430	SPOT - RADeCO

Inclusion criteria

The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

Description

This request is for a remotely operated robotic system based on the Spot platform, configured for explosive ordnance disposal (EOD) and hazardous device inspection operations. The system allows trained operators to inspect, manipulate, and assess potentially dangerous devices at a distance, reducing risk to sworn personnel and the public.

Surveillance Determination:

This project/technology is associated with an existing Surveillance Impact Report, but does not constitute a material change as defined in POL-203, the City's Surveillance Policy. Material changes include new capabilities and uses of the technology, not included in the Surveillance Impact Report (SIR) approved by Council.

Legislation link found here.

Non-Surveillance Technologies

Technologies that were reviewed and were not determined to be surveillance technologies have their reviews detailed in the supplemental materials appendix.

Seattle IT

Surveillance Technology Criteria Review

7/2/2026

Technology Description

Technology Name	Samsung 75" Class U8000F Series Crystal TV		
Description	Samsung 75" Class U8000F Series Crystal TV, with Gabor Tilting Wall Mount		
Department	SPD	**Case No.**	8123

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

7/2/2026

Technology Description

Technology Name	CLiq v.3.0		
Description	Geotechnical engineering software to estimate liquefaction potential and post-earthquake settlement: Main Characteristics Concise results based on the Youd et al. (2001) CPT procedure Latest assessment procedure based on Robertson (2009) applicable to all soil types (cyclic liquefaction and cyclic softening) Additional analysis option according to Boulanger & Idriss (2014), Idriss & Boulanger (2008) or Moss et al. (2006) Imports raw CPTU data from any ASCII text file Supports input and output in both the SI and Imperial unit systems Basic interpretation results based on the comprehensive review by Lunne, Robertson, Powell (1997) and Robertson (2009, 2010) Tabular presentation of all steps of the liquefaction assessment procedure Graphical presentation of all steps of the liquefaction assessment procedure Parametric analysis tool 2D plain map creation feature for LPI or vertical settlements Analytic reports		
Department	SPU	**Case No.**	8179

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

N/A Technology that is used to collect data where individuals were presented with a clear

	and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

7/2/2026

Technology Description

Technology Name	Pulsara		
Description	The Pulsara application allows EMS and hospital staff to seamlessly communicate event-based patient information, including one-tap team notifications, image sharing, audio/video calls, and ETA, right from the Pulsara app. EMTs/Paramedics can start a case, share important details (like an ECG or images from the field), and receive instant feedback as soon as the case is closed. Pulsara simplifies workflows, supports/replaces the radio report, and enables EMS to be a connected part of every patient. This software is already being utilized by SFD's supporting hospitals (e.g. Harborview Medical Center, etc.)		
Department	SFD	**Case No.**	8112

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.

N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

7/14/2026

Technology Description

Technology Name	NICE Advanced Process Automation		
Description	The NICE Robotic Process Automation tool was implemented by an SPU Technology CIP Project called CIS Workflow. The current effort to upgrade from prior version.		
Department	SCL, SPU	**Case No.**	8201

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

7/14/2026

Technology Description

Technology Name	Network Solutions		
Description	Network Solutions provides an easy-to-use DNS management platform with support for all major DNS record types (A, CNAME, MX, TXT, SRV, CAA, etc.) and flexible nameserver control. Their interface is user-friendly, offers advanced configuration tools, and includes guided setup for services like Microsoft 365.		
Department	ITD	**Case No.**	8200

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

7/22/2026

Technology Description

Technology Name	UltraBay 4 Portable		
Description	UltraBay 4 Portable; 5pc PCIe SSD Adapter Bundle (TKA-PCIE-5PC) The UltraBay 4 Portable is an integrated, high performance combination write-blocker packaged into a protective black, aluminum, actively ventilated enclosure. UltraBay 4 Portable connects to a host computer via SuperSpeed USB 3.0 and supports forensic acquisitions of SATA, SAS, USB 3.0, PCIe, FireWire 800/400, and IDE storage devices.		
Department	SPD	**Case No.**	8161

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

Surveillance Technology Criteria Review

8/7/2026

Technology Description

Technology Name	Claude Desktop Enterprise		
Description	We'd like to review Claude Enterprise as a choice for an agentic AI coding tool. This request is specifically to review as a pilot program Claude AI for use within application development teams. Claude is a trusted, secure, and collaborative AI expert that integrates with organizational knowledge and workflows to support high-quality work. Claude enhances productivity and creativity across various business functions with		
Department	ITD	**Case No.**	8154

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

8/11/2026

Technology Description

Technology Name	SpotHero IQ Platform and Mobile		
Description	SpotHero, Inc., owns and maintains websites and mobile apps through which it provides marketing services to owners and/or operators of parking facilities and through which end users (customers) may reserve parking spaces electronically in such parking facilities, whether through a computer or using their mobile phone.

Surveillance Technology Criteria Review

8/20/2026

Technology Description

Technology Name	BikeLink Bike Lockers by eLock		
Description	SDOT's Commute Trip Reduction (CTR) and bike project development team are planning to purchase bike lockers for installation in the ROW as a pilot project. Bike lockers provide secure and weather-protected parking spaces for bikes that are accessible to the general public to lock and unlock via a phone app or a physical card. The pilot would plan to provide 18 secure bike parking spaces in bike lockers with a $200k budget. Bike lockers are intended to be purchased from BikeLink by eLock in the G7 dual elocker model. There are 100 existing BikeLink locations (with 989 parking spaces) in the Puget Sound region, including large deployments in Seattle at Metro and Sound Transit stations. In 2025, 87% of users unlocked a bike parking space via the bikelink app.

Technology Name	Internet Protocol Video Market (IPVM) Subscription		
Description	In the short term, it provided a tool (IPVM Design Calculator) to assist in deciding which cameras and locations would be best suited for camera placement programs. During build outs, it allows us to “see” the view in advance of hanging a camera, and experiment with lenses, resolutions, height, field of view, angle, etc. Long term it provides insight into the surveillance camera market. Trends, legal cases and precedents, vendor offerings, in depth research and more.		
Department	ITD	**Case No.**	8292

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

8/25/2026

Technology Description

Technology Name	FuelCloud Fuel Management System		
Description	Fleets currently administers a fuel management system (FMS) called FuelFocus, offered by the vendor AssetWorks. We are looking to upgrade to a new system called FuelCloud. The FMS provides several solutions: 1. Authorizes fuel dispensing at our 34 city-owned fuel islands. 2. Authenticates fuel access through vehicle and user IDs. 3. Collects data to allow tracking of how much fuel is dispensed and to who (dept, low org, user). 4. Allows Fleets to bill back fuel dispenses to the end users.		
Department	FAS	**Case No.**	8324

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

9/3/2026

Technology Description

Technology Name	Twilio Verify Pro		
Description	Cloud communications platform that lets businesses add communication features to their websites and apps through APIs.		
Department	ITD	**Case No.**	8342

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

9/3/2026

Technology Description

Technology Name	OpenView Lite		
Description	OpenView Lite is a lightweight, web-based visualization interface often embedded in programmable controllers or SCADA systems, designed for responsive, customizable monitoring and control. In the context of Open Systems International (OSI), it refers to the OSI OpenView platform — a part of AspenTech's Digital Grid Management suite — that provides real-time monitoring, alarm handling, and data visualization for utilities and industrial operations AspenTech		
Department	SCL	**Case No.**	8330

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Seattle IT

Surveillance Technology Criteria Review

9/8/2026

Technology Description

Technology Name	IBM Maximo Mobile		
Description	Maximo is already an approved One Trust technology. SPU is upgrading to the latest commercial release and as part of that release there is now an included mobile solution for which SPU is already licensed which we would take advantage of for the warehouse users to issue materials, receive goods received against a PO, and perform cycle counting of the warehouse bins. This will complement but not replace the existing DataSplice solution for the field Crews that is approved in one trust. That mobile solution will continue to be used with the upgraded version of Maximo.		
Department	SPU	**Case No.**	8291

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Seattle IT

Surveillance Technology Criteria Review

9/10/2026

Technology Description

Technology Name	BikeLink		
Description	BikeLink by eLock Technologies Bike lockers provide secure and weather-protected parking spaces for bikes that are accessible to the general public to lock and unlock via a phone app or a physical card. BikeLink's G7 dual bike locker provides space for 2 bikes and are 36" x 85". BikeLink has ADA, PCI, and SAQ-Q compliance. The lockers are powered by 10-year batteries (no power line is needed). Lockers have cellular connectivity to be compatible with the mobile app used to lock and unlock bike lockers. BikeLink operates a mobile app that users can sign up for in order to access the bike lockers. Signing up for access requires that users create an account, enter payment information, install an app or procure a card, and in some cases provide their ID. BikeLink operates this application that is used to lock and unlock the physical bike lockers.

N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

9/15/2026

Technology Description

Technology Name	ChargePoint's cloud-based management software - CMS Suite – Enterprise Cloud Plan (DC Stations)		
Description	Purchase of 1x ChargePoint Express Solo EV charging system for installation at the Waterfront Seneca St EV charging station. Includes EV charging hardware, activation/commissioning services, cloud platform subscriptions, and warranty services.		
Department	SCL	**Case No.**	8408

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

9/17/2026

Technology Description

Technology Name	TraCS Training Software		
Description	The State is replacing its custom-built e-ticketing system, SECTOR with a COTS solution called TraCS. The first step is to install training software on machines in the SW Precinct training room for initial training sessions.		
Department	SPD	**Case No.**	8434

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

No	Cameras installed in or on a police vehicle.
No	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
No	Cameras installed on City property solely for security purposes.
No	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

No	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

No	The technology disparately impacts disadvantaged groups.
No	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
Yes	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
No	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology is associated with an existing Surveillance Impact Report, but does not constitute a material change as defined in POL-203, the City's Surveillance Policy. Material changes include new capabilities and uses of the technology, not included in the Surveillance Impact Report (SIR) approved by Council.

Seattle IT

Surveillance Technology Criteria Review

9/18/2026

Technology Description

Technology Name	Tomorrow.io		
Description	Seattle Public Utilities (SPU) is evaluating a one-year Weather Intelligence Platform pilot to centralized weather and compound flood analytics in a single operational decision-support (dashboard) environment. Tomorrow.io will provide access to its Weather Intelligence Platform, including weather monitoring and forecasts, an operational dashboard, configurable alerts, user administration, integration of compound flood datasets provided by The Water Institute, training, technical support, and quarterly reviews. The pilot is intended to improve situational awareness, preparedness, operational planning, and proactive resource allocation during weather-driven events affecting utility infrastructure and public services. The 12-month pilot term begins upon contract execution.		
Department	SPU	**Case No.**	8439

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

Seattle IT

Surveillance Technology Criteria Review

9/29/2026

Technology Description

Technology Name	API for The National Highway Traffic Safety Administration (NHTSA)		
Description	Request to Transition from VinQuery to NHTSA for VIN Lookup Services The National Highway Traffic Safety Administration (NHTSA) provides a publicly accessible API that allows users to decode VINs and retrieve related vehicle information such as year, make, and model. The API is accessed through HTTPS using a simple GET request and returns structured vehicle data in XML or JSON formats. This functionality is similar to the existing VinQuery service currently used by VSID. The functionality remains the same, the implementation is straightforward, and the change improves reliability and reduces cost. Business stakeholders and the EPIC team support this transition Summary: This request seeks approval to transition from the paid VinQuery service to the free NHTSA VIN decoding service. The functionality remains the same, the implementation is straightforward, and the change improves reliability and reduces cost.

Technology Name	Westlaw Advantage		
Description	Westlaw is an online legal research service and proprietary database owned by Thomson Reuters that provides lawyers and legal professionals with access to a vast collection of legal documents and tools. It includes case law, statutes, administrative codes, law journals, and more. Will include Deep Research functionality which was piloted in 2025/2026		
Department	LAW	**Case No.**	8470

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Technology Description

Technology Name	Grafana		
Description	Grafana Open Source Software (OSS) enables you to query, visualize, alert on, and explore your metrics, logs, and traces wherever they're stored. Grafana data source plugins enable you to query data sources including time series databases like Prometheus and CloudWatch, logging tools like Loki and Elasticsearch, NoSQL/SQL databases like Postgres, CI/CD tooling like GitHub, and many more. Grafana OSS provides you with tools to display that data on live dashboards with insightful graphs and visualizations.

Surveillance Technology Criteria Review

9/30/2026

Technology Description

Technology Name	Akismet		
Description	Akismet is a WordPress plugin that automatically detects and filters spam comments and form submissions. It checks incoming content against a large, continuously updated database of known spam patterns and malicious behavior, helping keep your site's comments, contact forms, and user-generated content clean without requiring manual moderation. It's lightweight, widely used, and built to run quietly in the background with minimal setup.

Seattle IT

Surveillance Technology Criteria Review

9/30/2026

Technology Description

Technology Name	eFax Digital Faxing		
Description	eFax Digital Faxing is a cloud-based faxing platform that replaces the existing Virtual RightFax system. It provides electronic faxing through email and a secure web portal, eliminating the need for on-premises fax servers and associated maintenance. eFax converts inbound and outbound faxes into secure digital files, supports encrypted transmission, offers detailed delivery logs, and integrates cleanly with the existing VoIP/SIP environment. This solution provides a more reliable, secure, and centrally managed alternative to the legacy Virtual RightFax platform.
