This program develops and implements a Project Tracking System to allow SPU to effectively manage its portfolio of capital projects in a single, coherent repository. The system will include information, such as the list of projects planned and underway, component tasks for each project, budget and schedule estimates, and actual cost and schedule for completed work. This project enhances SPU's ability to deliver the highest-value infrastructure projects on schedule and within budget.

This ongoing program sets aside funds for future technology investments in years 2010-2014 currently not yet identified, with the recognition that technologies and technology demands continue to evolve and have a shorter life cycle than do public works investments. Funds will be spent only after the development and approval of specific projects through the 2010-2014 budget processes.
