## Overview of Facilities and Programs

The Department of Information Technology (DoIT) builds, manages and maintains City government information technology infrastructure – radio, data, communications, and computer networks – used by other City departments to serve constituents. DoIT also manages the Seattle Channel and the City's central data center, which houses most of the computer servers and the computing architecture that operates software applications on behalf of other departments. DoIT also directs the development of certain computer applications projects on behalf of the City or of other departments.

The Capital Improvement Program (CIP) supports DoIT's mission by providing for major technology upgrades and improvements to the City's existing networks, computing architecture, and systems. This includes: enhancements and upgrades to the data and communications infrastructure, build out of fiber optic links, upgrades and improvements to the public safety radio network, the enterprise computing system, and the television channel infrastructure.

### Highlights

The Department's 2010-2015 Adopted CIP provides for the following projects:

- Planning, repair, replacement and modification of software, hardware, and electronics in the City's data and communications infrastructure to introduce improved service and features for City employees and constituents;
- Replacement of current radio technology with a new digital switch for voice and data traffic and new digital consoles for dispatching and managing the network;
- Replacement of hand-held and vehicle radios and infrastructure upgrades in the 800 MHz radio network program;
- Replacement of enterprise computing platform assets in the data center to meet storage capacity for critical Citywide applications;
- Replacement and upgrades of software and hardware in the City's computing services architecture environment;
- Replacement and upgrades of equipment for the Seattle Channel, including a transition to digital equipment; and
- Installation of additional fiber optic cable links and spurs to various locations.

## Project Selection Process

DoIT selects infrastructure projects based upon the following process:

**Project Identification:** DoIT staff work with departmental program directors as well as Citywide governing boards such as the Technology Board and the Urban Area Security Initiative Grant Steering Committee to identify potential projects. The criteria for project selection include opportunities to: enhance public safety departments' response to emergencies, improve the reliability of technology systems, increase the availability of services to constituents, update the City's major hardware and software systems, and implement technology projects using grants awarded by the federal government.

## Department of Information Technology

**Project Selection:** DoIT's program directors work with guidance from citywide and regional governance boards to review the list of potential projects and determine which projects best fit the CIP project criteria.

**Project Scheduling and Budgeting:** After the project list is refined, DoIT staff work with the Department of Finance to enter the selected projects into the capital budget system. The budget system tracks each project and allows staff to cross-check projects against Mayor and Council priorities.

### **Anticipated Operating Expenses Associated with Capital Facilities Projects**

A significant portion of DoIT's operating budget is devoted to operating and maintaining CIP projects.

### **City Council Provisos to the CIP**

There are no Council provisos.

This project upgrades and replaces software and hardware for the City of Seattle's portion of the King County Regional 800 MHz radio system. The 800 MHz radio system provides the communication infrastructure required for public safety operations such as 911, Medic One, Fire, and Police.

The City's vendor is making major design changes in the radio system because cellular services from the telecommunications company Nextel have interfered with public safety radio system frequencies (a nationwide issue.) The Federal Communications Commission has ordered Nextel and the City to move to two new and separate radio frequencies. Nextel is incurring the cost of this change by providing the City with replacement radio units to work with the City's new frequency band. The City is purchasing additional new units as needed to operate on the frequencies the City is now obligated to use. Additionally, in 2010, the City will be replacing the old consoles in the Police and Fire dispatch centers with new digital consoles for dispatching on and managing the radio network.

This project regularly replaces server and data storage equipment operated on behalf of City departments by DoIT's computing services group. Timely replacement of this equipment provides stable infrastructure for the City. Equipment is replaced when it reaches the end of its useful life, which is typically no more than 5 years per industry standards.

This project provides funds to maintain, replace, and upgrade software and major hardware for the City's data and telephone switching systems. Updated technology and mandated manufacturer requirements often require changes to software and hardware. The selected projects focus on preventing unscheduled service disruption and system failures and also work to minimize the City's overall costs, increase reliability, and provide features that improve end-user productivity. In 2010, the CIP includes the funding needed to complete a 2-year project to upgrade the City's Interactive Voice Response (IVR) hardware and software from a 12-year-old technology platform to a more robust and flexible service.

### Fiber-Optic Communication Installation and Maintenance

This project provides for the installation and maintenance of a high-speed fiber-optic communication network for the City and its external fiber partners. The fiber network includes sites such as libraries, public schools, fire and police stations, community centers, and other City facilities. The use of fiber optics in communications increases the volume of transmission - the amount of data and video, the use of two-way radios for public safety, and the number of telephone calls - that can be conveyed. A fiber-optic network also allows for interconnectivity in the event of an emergency to other agencies and executives at the federal, state and local levels, increases the efficiency of City staff, and provides residents greater access to the City and external agencies that contribute to the network.

This project provides funds to maintain, replace, and upgrade the systems for the Seattle Channel. This includes a five-year effort to replace the Seattle Channel's video server, main routing system (N-vision), graphics generator, web interface, studio control components, and asset management system with a digital, High Definition (HD)-compliant integrated system. This digital upgrade provides for the acquisition of replacement components which will shift the Seattle Channel to an all-digital and eventually high-definition (HD) format.

# **FLEETS & FACILITIES**

## Overview of Facilities and Programs

The Fleets & Facilities Department (FFD) is responsible for building, operating, and maintaining general government facilities. Examples include the City's core public safety facilities, such as fire stations and police precincts, the City's vehicle maintenance shops and other support facilities, and the City's downtown office buildings. In addition, FFD maintains some of the community-based facilities owned by the City, such as senior centers and community service centers.

The Department's 2010-2015 Adopted Capital Improvement Program (CIP) is FFD's plan for maintaining, renovating, expanding, and replacing its extensive inventory of buildings. The Department's CIP is financed by a variety of revenue sources, including the Cumulative Reserve Subfund (Unrestricted, REET I, and FFD Asset Preservation subaccounts), voter approved levy proceeds, general obligation bonds, proceeds from property sales, and grants.

The neighborhood fire station projects of the Fire Facilities and Emergency Response Levy are managed as a program, and appropriations are transferred between projects from time to time.

Highlights of the FFD capital program include:

## Highlights

- ◆ **2003 Fire Facilities and Emergency Response Levy Program:** A \$167 million property tax levy was approved by voters in November 2003. This levy, together with approximately \$117 million from other sources, funds more than 40 projects to improve the City's firefighting and emergency response capabilities, including carrying out various emergency preparedness initiatives (for example, upgrading the City's water supply system for firefighting purposes); constructing new support facilities for the Fire Department (including a new joint training facility); constructing a new Emergency Operations Center and Fire Alarm Center; procuring two new fireboats and rehabilitating the Chief Seattle fireboat; and upgrading, renovating, or replacing most of the City's fire stations. FFD has completed seven levy program projects worth \$92 million, including the two new fireboats and the Emergency Operations Center. These completed projects no longer appear in the CIP. In 2010, FFD expects to begin or be in construction on nine neighborhood fire stations, continue design on five stations, and begin design work on three more. A temporary fire station program sites, designs, and constructs temporary fire stations for those projects in which station construction displaces firefighters. In 2010, six active fire stations will be housed in temporary facilities consisting of tents for apparatus and trailers for living quarters and support functions so that firefighters can continue to provide full emergency services to their neighborhoods.
- ◆ **Asset Preservation Program:** The Asset Preservation Program preserves and extends the useful life and operational capacity of existing FFD-managed facilities and is funded by facility space rent paid by City departments. Typical work includes, but is not limited to: the repair and replacement of building envelope components such as roofs, windows, and exterior doors; the repair and replacement of core building systems such as HVAC equipment, water distribution systems, and electrical power distribution systems; and the repair and replacement of other equipment in the building due to age or prolonged substandard performance. Projects planned for 2010 include restoring fireproofing and fire safety systems at the end of their useful service lives in the Seattle Municipal Tower; replacing degraded and aged roofs at various fire stations; replacing critical safety systems at civic core facilities, and replacing failing and substandard mechanical equipment at several shop facilities.
- ◆ **Municipal Jail:** King County houses most City inmates under an intergovernmental agreement which King County plans to extend to 2015. FFD, in partnership with other cities in northern and eastern King County, is conducting a site selection and environmental impact statement process for construction of a new 640-bed jail for misdemeanor inmates. No decisions have been made on the siting, timing, or management of a new facility.

### Project Selection Process

The following process is used to identify and prioritize potential CIP projects:

**Project Identification:** For asset preservation and major maintenance projects, FFD maintains and annually updates a plan based on its maintenance and facility assessment efforts, balanced with input from various sources including community groups, customer departments, and elected officials. Crew chiefs, property agents, architects, engineers, and project managers provide technical guidance on major maintenance and building system replacement. Other projects, including new facilities, are typically identified through special analyses or major Citywide initiatives.

**Project Selection:** Regardless of category, federal- and state-mandated projects are automatically placed in the plan. Asset preservation projects are selected based on urgency and available funds. The Executive prioritizes new development and planning projects based on demand and responsiveness to the public's well-being.

**Project Funding and Schedule:** Each project listed in the plan is reviewed to determine viable funding sources, including the Asset Preservation Subaccount, the Community Development Block Grant, other grants, bond funds, or other Cumulative Reserve Subfund funds. FFD establishes the timeframe and estimates the cost of each planned project prior to review and approval by the Department of Finance, Mayor, and the City Council.

### Anticipated Operating Expenses Associated with Capital Facilities Projects

Operating and maintenance costs for expanded and new facilities coming on-line in 2010 are expected to increase existing budget levels, due to both increases in square footage maintained by FFD and inflationary increases in the cost of utilities, labor, and security. For facilities that entail a substantial increase in occupied space, operating and maintenance costs are expected to increase consistent with average current costs for similar space, plus inflation. New and substantially renovated facilities (such as fire stations) are expected to be more efficient to operate and maintain than similar older facilities, which mitigates the increased operations costs of new facilities. Asset preservation projects are generally anticipated to have minimal impact on operating and maintenance costs, although in some instances they may lower or increase operating costs. In the case of fire station projects, projected changes in operating costs capture the impacts on both FFD and the Fire Department's operating budgets.

This ongoing project provides for the long-term preservation and major maintenance of the FFD-owned shop and yard complexes, including Charles Street, Haller Lake, Airport Way Center (formerly Park 90/5), Sunny Jim, and the West Seattle Maintenance Yard. This work ensures the long-term preservation of the operational use of these facilities. Funding for this project is derived from departmental space rent.

This project, part of the 2003 Fire Facilities and Emergency Response Levy Program, renovates 18,800 square feet at Fire Station 2, which is a historic landmark. In addition to a seismic retrofit and complete renovation to support modern firefighting equipment and functions, the building will house a new wellness and fitness center in 15,400 square feet previously occupied by the Emergency Operations Center and Fire Alarm Center. The project also provides temporary quarters for firefighters while the fire station is under construction. The renovated building will protect firefighters in the event of an earthquake and allow them to provide high-quality emergency services to the Belltown community.

This project, part of the 2003 Fire Facilities and Emergency Response Levy Program, rebuilds Fire Station 6 at a new site. The existing Fire Station 6 is a historic landmark, seismically vulnerable, and cannot feasibly be renovated to provide the space necessary to support modern firefighting equipment and emergency functions. The project protects firefighters in the event of an earthquake and allows them to provide high-quality emergency services to the Central District community. The City intends to sell the old Fire Station 6 property on the open market and use the resulting proceeds to fund this and/or other Levy work.

This project, part of the 2003 Fire Facilities and Emergency Response Levy, provides a major renovation and expansion of Fire Station 41, which has been designated a historic landmark. The project addresses current structural and systems inadequacies, and expands and remodels the station to support modern firefighting operations. It also provides temporary quarters for firefighters while the fire station is under construction. The project ensures that firefighters will not be hurt in an earthquake and can provide high-quality emergency services to the Magnolia community.

This project provides planning, programming, and design of a new correctional facility for the City of Seattle and other partner jurisdictions. Municipal misdemeanants are primarily housed by King County under an interlocal agreement. King County has notified many cities, including Seattle, that the County will not renew the agreement when it expires in 2015. The current funding supports initial planning and design, including site selection and preparation of an Environmental Impact Study. Funding for design and construction will be determined after a site is selected. No decisions have been made on the siting, timing, or management of a new facility.
