## Overview

The Department of Parks and Recreation's (Parks) mission statement is: "Seattle Parks and Recreation will work with all citizens to be good stewards of our environment, and to provide safe and welcoming opportunities to play, learn, contemplate, and build community." Parks carries out this mission with a park system consisting of more than 430 parks and open areas totaling over 6,200 acres of property throughout the City, amounting to almost 11% of the City's land area. It includes approximately 488 buildings and 430 parks that feature 185 athletic fields, 130 children's play areas, 26 community centers, 151 outdoor tennis courts, 25 miles of boulevards, an indoor tennis center, two outdoor and eight indoor swimming pools, five golf courses, performing and visual arts studios, boat ramps, moorages, fishing piers, trails, camps, viewpoints, open spaces, a rock climbing site, a conservatory, a state-of-the-art zoo, a classical Japanese garden, and a waterfront aquarium.

## 2014-2019 CIP Highlights

The 2014 Adopted CIP includes \$37 million from a wide variety of funding sources: \$7.9 million from the 2008 Parks Levy; \$17.6 million in Real Estate Excise Tax (REET) revenue; \$3 million from the Cumulative Reserve Subfund; \$5.6 million in bond revenue to implement the Golf Master Plan; \$1.2 million in federal Community Development Block Grant Funds; and \$1.6 million from the recently approved 2014 King County Parks Levy.

Asset management is a vital component of Parks' Capital Improvement Program. The 2014 Adopted CIP includes \$31.3 million for asset management with funding coming from REET, the 2008 Parks Levy, grants, and other sources. Asset management projects address basic infrastructure across the Parks system, such as electrical system replacement, environmental remediation, landscape restoration, synthetic ballfield replacement, irrigation system replacement, and replacing major roof and HVAC systems.

The 2014 Adopted CIP Budget includes \$2 million for the Urban Forestry-Green Seattle Partnership project (GSP) through a combination of REET funding (\$1.6 million) and 2008 Parks Levy funding (\$426,000). This combined funding will ensure that the program will be able to maintain current reforestation goals.

The Adopted CIP includes \$4 million over the next two years to renovate the South Leschi Moorage. This project may include replacing the pilings, floats, docks, electrical system, and related repairs within the existing moorage footprint/boundaries. Parks is forming a project advisory team to help shape the scope of the improvements which will be done in accordance with environmental and regulatory requirements.

Parks will continue to use federal Community Development Block Grant (CDBG) funds for the Seattle Conservation Corps. The Seattle Conservation Corps (SCC) executes Parks improvement projects in low to moderate-income neighborhoods while at the same time providing training and employment for formerly homeless adults. In 2014, the SCC will use \$808,000 in CDBG funds to improve approximately 25 parks.

Parks will use \$600,000 in REET funds and \$400,000 in CDBG funds to remove architectural and material barriers that restrict the mobility and accessibility in public facilities in parks throughout the City to comply with the American's with Disabilities Act (ADA). A portion of this funding will be used to hire a new ADA capital projects coordinator who will focus on ADA compliance issues during the initial

## Department of Parks and Recreation

stages of project funding, design and construction. The coordinator will also oversee accessibility improvements to existing Parks facilities.

In 2014, Parks will continue implementation of the Golf Master Plan which will provide major improvements at three City-owned golf courses (Jackson, Jefferson, and West Seattle), including building replacements, driving ranges, cart path improvements, and course and landscaping renovation. Future revenue from the golf courses will cover associated debt service payments. These improvements began in 2010 and will continue through 2015.

The 2014 Adopted CIP includes \$1.1 million of funding for major maintenance at the Seattle Aquarium as called for in the 2010 transition agreement between the City and the Aquarium. The agreement requires City funding of \$8 million of agreed-upon capital maintenance projects through 2015. Through a separate part of the agreement, the Aquarium reimburses the City for some of the debt service associated with replacing Pier 59 and redeveloping the Aquarium (\$1.6 million paid via CRS Unrestricted in 2014).

The 2008 Parks and Green Spaces Levy projects continue to comprise a significant portion of Parks CIP. Highlights to date include:

- Parks has completed eight neighborhood parks acquisitions, 15 green space acquisitions and two opportunity fund acquisitions totaling 11 acres. In addition, Parks has taken over ownership of 48.7 of acres of land from other City departments. Parks pays maintenance costs on these properties but incurred no costs for acquiring the properties.
- Parks has completed 42 of the 59 development projects; most of the remaining projects will be underway in 2014. The Seattle Department of Transportation manages the three trail projects.
- Parks' continued implementation of the environmental projects with restoration of forests, development of community gardens and increased shoreline access.

The levy allocated approximately \$20.6 million for Opportunity Fund projects through 2013. The first round of the Opportunity Fund included 13 development projects and two acquisitions. Two play field renovations were funded with savings from the Playfield sub-category and 17 major maintenance projects were funded with \$9.8 million in inflation reserves reallocated from the development category. The City Council approved the second round of the Opportunity Fund in August 2013. These appropriations total \$8 million and include 11 development and three acquisition projects.

## Funding Sources

Funds for Parks' CIP come from a variety of sources, including three levies, real estate excise taxes, the Shoreline Park Improvement Fund, bond financing, and other special fund sources, grants, and private donations. The funding sources used to cover annual debt service vary depending on the projects being debt financed: golf revenues are used to repay all golf related debt; Aquarium revenues pay for a portion of the debt service on the bonds used to renovate Pier 59; revenue from Magnuson Park rentals is expected to pay most of the debt service for the renovations of Buildings 11 and 30; and the General Fund covers debt service for the rest of the Pier 59 bonds and on other Parks-related bond funds.

### *2008 Parks and Green Spaces Levy*

The most recent levy is the 2008 Parks and Green Spaces Levy, which is a six-year \$145.5 million levy intended "to acquire, develop, or restore, existing or new, parks, recreation facilities, cultural facilities, green spaces, playfields, trails, community gardens, and shoreline areas." The levy package provides for acquisition of new parks and green space and for development and improvement of the various parks

## Department of Parks and Recreation

throughout the City. This includes renovation of 23 play areas, park development atop lidded reservoirs, renovation of several existing neighborhood and major parks, significant investments in the Langston Hughes Performing Arts Institute, and an environmental category to provide funding for the Green Seattle Partnership, community gardens, trails, and improved shoreline access at street ends. An Opportunity Fund Category funds other community-identified projects. Through 2013, \$110 million has been appropriated from this Levy. The 2014 Adopted CIP Budget includes \$7.9 million of 2008 Levy Funds.

The City is working with the Seattle Art Museum and the 2008 Levy Oversight Committee to repurpose the \$9 million in 2008 Levy funds dedicated to renovating the Seattle Asian Art Museum in Volunteer Park. These funds require a match from private funds. Due to the Great Recession, the Seattle (Asian) Art Museum was unable raise matching funds. Once the City and the Seattle Art Museum reach an agreement, the funds will be used to address immediate major maintenance issues at other Parks facilities. The City will keep its commitment to funding the Seattle Asian Art Museum renovation at Volunteer Park in the future when private matching funds are available.

### ***Real Estate Excise Tax (REET)***

The main source of funding for Parks' capital improvement program is real estate excise tax (REET) revenue. Parks uses these funds primarily for asset management purposes such as boiler replacement, electrical system upgrades, small irrigation upgrades, ballfield improvements, roofing replacement, paving restoration, landscape and forest restoration, and others. Parks also uses the funds to replace of aging ball field lighting systems and certain Aquarium infrastructure projects.

### ***LTGO Bond Financing***

The 2014 Adopted CIP allocates \$5.6 million in bond funding to implement the Golf Master Plan. The Golf Master Plan will provide major improvements at three of the City-owned golf courses (Jackson, Jefferson and West Seattle), including a clubhouse building replacement, driving ranges, cart path improvements, and course and landscaping renovation. General obligation bonds will fund the projects and future revenue from the golf courses will cover associated debt service payments.

## **Summary of Upcoming Budget Issues and Challenges**

The amount of funding available for ongoing asset management of the Seattle Parks system is inadequate to keep pace with the growth and aging of the system. The Parks Asset Management Plan identifies \$270 million in needed improvements over the next six years, much of which is a backlog due to deferred maintenance over the years. The park levies provided some reinvestment in park facilities, but many critical infrastructure needs, such as roofs and water and sewer systems, have gone unaddressed.

Several large assets are in need of attention but are beyond typical REET funding levels. Waterfront Park has deteriorated and load limits restrict its use. The metal reinforcement of the concrete promenade are seismically unsound (note: these are the platforms that previously formed the bridge abutment to Pier 57 at the south end and the area that supports the fountain and other spaces near the Aquarium adjacent Pier 59). Parks staff has proposed removing most of this structure and re-building areas adjacent to the Aquarium while also improving near shore marine habitat. The Seawall Bond issue includes partial funding for renovating Piers 62 and 63, which deteriorated to the point that the popular Summer Nights on the Pier concert series were cancelled after the 2004 season.

The multiple large and aging buildings at Magnuson Park were once part of the Sand Point Naval Air Station, and they represent an ongoing challenge for Parks. Tenants occupy several buildings while other building space remains empty. The Seattle Conservation Corps uses only a small part of Building 2 while the two large hangars are empty. Parks is working to stabilize Building 18 in 2013 but the building is

currently empty; Parks would need additional funding to make the renovations needed for re-use of the building. Several tenants occupy Building 138, but it is in deteriorated condition. Parks would need over \$38 million to address code deficiencies in these buildings.

### Project Selection Criteria

Parks' project selection process for the capital improvement program uses two approaches. First, for the various levy projects, projects are implemented as described in the ballot measure. In most cases, the project scope and budget have been determined during the planning for the ballot measure but in some cases allowances are made that allow for choices to be made within a programmatic direction. An example of this includes the current levy's allowance for acquisition of neighborhood park sites in urban villages that are deficient in open space. Second, Parks uses the Asset Management Plan to identify needed capital improvement projects that are funding by CRS.

The Parks Asset Management Plan (AMP) is a compendium of projects to address facility needs. Parks identifies projects through ongoing condition assessments, consultant studies, six-year facility plans, work order analyses (to identify key problem areas), and intradepartmental information sharing of facility maintenance issues and needs. Every two years, Parks reviews and updates the AMP. While Parks planning staff prepares and coordinates the Asset Management Planning process, they work collaboratively with staff throughout the department to develop project scopes and budget estimates.

Typically, all of the projects included in the asset management plan are scored and ranked with the six overarching criteria that most closely match the need for the project. Parks uses the following six criteria to rank the projects:

***Priority 1 – Code Requirements (100 points)*** The project brings a facility or element up to federal, state, and Seattle code requirements (such as ADA, water quality, fire suppression, and seismic), or meets other legal requirements. (Note: Projects that primarily are ADA-focused fall under this priority. ADA elements will be completed as part of projects that fall under other priorities.)

***Priority 2 – Life Safety (35 points)*** The project will eliminate a condition that poses an imminent threat of injury. Examples of safety hazards are lack of seismic elements, failing piling, outdated play equipment, emergency management, or a documented environmental health hazard.

***Priority 3 – Facility Integrity (30/25/20 points)*** The project will keep the facility operational and extend its life cycle by repairing, replacing, and renovating systems and elements of the facility, including building envelope (roof, walls, windows), electrical, plumbing, storm and sewer line replacement, and synthetic turf replacement.

30 points: Extends life cycle, high usage/heavily programmed, underserved area, community center, emergency shelters.

25 points: Extends life cycle, high usage/programmed.

20 points: Extends life cycle.

***Priority 4 – Improve Operating Efficiency (25 points)*** The project will result in the reduction of operating and maintenance costs, including energy and water savings.

***Priority 5 – Other (5 Points)*** Projects that have a unique element (e.g., leverage other funds) and/or are known needs that do not fit the other priorities.

## Department of Parks and Recreation

*Priority 6 – Project Necessary in Next Biennium (5 points)* Projects identified in plans and other documents that require being done in the upcoming biennium (e.g., scheduled synthetic turf replacement or regulatory deadlines).

### **Anticipated Operating Expenses Associated with Capital Facilities Projects**

As part of the CIP budget process, Parks identifies operating and maintenance (O&M) costs for new facilities. When Parks proposes new projects in the CIP, operations staff develop the associated O&M costs. Parks adds the O&M costs to the operating budget through the budget development process for projects expected to be completed in the upcoming budget cycle. The amount and timing of these O&M costs change as project scopes and schedules change. Examples of projects with O&M expenses incorporated into the 2014 operating budget include Maple Leaf Reservoir Park Development, Montlake Playfield Play Area Renovation, and West Seattle Reservoir Development.

### **City Council Provisos to the CIP**

There are no Council provisos.

This project provides for replacement of all play equipment, addresses fall zone area deficiencies, adds new safety surfacing and containment, installs access and use improvements, including a new ADA path connecting the separate play pods to each other and to the sidewalk, bus stop, and to the parking by the tennis courts, and other associated work at the existing play area which was built in 1994. The scope of this project brings the play area into compliance with current play area safety standards and guideline efforts of the American Society of Testing and Materials (ASTM) and the Consumer Product Safety Commission (CPSC) as well as meets Federal ADA requirements. This project is funded out of the King County 2013 Levy.

<b>Neighborhood Plan:</b>	Central Area	<b>Neighborhood Plan Matrix:</b>	NA-16
<b>Neighborhood District:</b>	East District	<b>Urban Village:</b>	12th AV

This project, part of the 2008 Parks Levy Opportunity Fund, converts an existing street and sidewalk into a park boulevard which invites and accommodates joint pedestrian and vehicular use. It will serve as a park-like extension of the adjacent, newly-acquired 12th Ave Park which is in the planning stage. The additional open space will provide green space and enhance neighborhood circulation in this dense neighborhood.

This project provides for ADA improvements at a number of parks facilities. Work will be focused on selected community centers (e.g., Bitter Lake, Delridge, Garfield, Jefferson, Meadowbrook, Miller and others) and will consist of adjustments to signage, door closures, restroom fixtures, and other features. Signage will be added where needed as well. Similar work will be undertaken at Discovery Park Environmental Learning Center and other facilities to the degree that funding allows.

This project supports debt service payments on 20-year Limited Tax General Obligation (LTGO) bonds that were issued in 2005 to pay for the replacement of the entire pier piling system of Pier 59, interior infrastructure improvements, and development of portions of the Aquarium by the Seattle Aquarium Society. The pier and Aquarium work was part of an overall plan to repair and redevelop the Aquarium and the Central Waterfront area, and to construct a new Aquarium entrance, exhibits, and visitor services on a portion of the pier. This work enhanced and extended the useful life of Pier 59 and the Aquarium.

This project provides for capital maintenance to the building envelope, roof, pier supports and decking, HVAC, sewer, water, and electrical systems, elevator, structural elements to the exhibits, fire alarm and suppressions systems, emergency lighting, safety improvements, and other related work at the Aquarium on Piers 59 and 60 which will extend the useful life of the facility. This project funds the remaining portion of the City obligation to provide \$8 million for agreed capital maintenance at the Seattle Aquarium. This agreement between the City of Seattle and the Seattle Aquarium Society was authorized by Ordinance 123205. Consistent with the agreement, this project is expected to be carried out by the Seattle Aquarium Society and funding will be transferred to the Seattle Aquarium Society for that purpose via an agreement with the Department of Parks and Recreation.

This project replaces the finger pier X-braces and deficient piles; repairs damaged concrete deck panels, beams, and selected wood decking; adds cathodic protection; and other related repairs. This project extends the useful life of the pier. Consistent with the agreement authorized by Ordinance 123205 between the City of Seattle and the Seattle Aquarium Society for the operation and management of the Seattle Aquarium, this project is expected to be carried out by the Seattle Aquarium Society and funding will be transferred to the Seattle Aquarium Society for that purpose via an agreement with the Department of Parks and Recreation.

In conjunction with this project the Aquarium will renovate the Harbor Seal Exhibit at a projected cost of \$3 million with funds raised by the Seattle Aquarium Society. Approval of this project in the CIP is intended to satisfy the requirement in section 7.2.4(b) of the Operations and Management Agreement between the City and the Seattle Aquarium Society that "Any Capital Improvement projected to cost more than three million dollars (\$3,000,000), measured in 2008 dollars, shall require the City's approval, by ordinance."

This project provides funding to conduct core testing of wood light poles at various ballfields, replace deteriorated wooden poles with metal poles, install new electrical systems, and perform other related work. The new lighting systems will reduce light spillover and energy efficient. This is a long-term program to replace all deteriorated wood light poles over the next several years at a total estimated cost of \$6 million. Future funding for this program depends on available resources.

This project replaces the 100,000 square foot synthetic turf field surfacing which was installed in 2005, and performs related work. The surfacing material is near the end of its lifecycle. This improvement allows the continued use and scheduling of the playfield for soccer, baseball, and other activities.

This project provides ongoing monitoring efforts to ensure the measures constructed for remediation of soils at Gas Works Park were effective. Monitoring activities include maintenance and operation of the air sparging, SVE systems, soil cap, and other institutional controls; groundwater testing; quarterly reports; and other related work. The project also provides for ongoing monitoring for as long as 20 years from installation, effectively until 2021. All measures of the Compliance Monitoring Project must be executed in accordance with the Consent Decree established in 1998, requiring the Seattle Department of Parks and Recreation, Puget Sound Energy, and the Department of Ecology to implement a Cleanup Action Plan. REET funds are to be used to reimburse the trust fund for expenses already incurred and to pay for state required air monitoring and other costs not considered eligible expenses under rules governing the Gas Works Contamination Remediation Trust Fund (10220).

This project demolishes the existing roofs at the community center and pool and replaces it with a rubberized membrane roofing/EPDM system and solar panels on the flat section for solar hot water heating for the pool, and related work. It is anticipated that the solar panels will supplement the pool water heating, which may reduce operating costs at the pool.

This project treats Green Lake with Alum to continue to maintain water quality and control algae growth. The water quality of the lake has remained stable since the first alum treatment was done in 2004. The treatment will help Parks meet the adopted goal to maintain an average summer Secchi depth of eight feet.

This project provides for acquisition of properties to fill gaps in existing public ownership and preserve continuity in existing public ownership. The project scope targets acquisitions in the following designated green spaces: Arroyos Natural Area, East Duwamish Greenbelt, Northeast Queen Anne Greenbelt, Ravenna Woods, Thornton Creek Watershed, and West Duwamish Greenbelt. These acquisitions will enhance livability and increase opportunities for the public to enjoy nature. They also implement the Parks Strategic Action Plan by encouraging long-term stewardship of natural resources. Levy funds are expected to be supplemented by grants and funds from other sources for these acquisitions. This project is part of the 2008 Parks Levy.

In 2010, \$305K was added to the project to provide funding to cover costs associated with the acquisition of real property within the City's designated green spaces. These funds are derived from excess interest earnings in the Open Spaces and Trails Fund, which was created in 1989 and has been inactive since 2006.

This ongoing project funds engineering and other studies of the Department's park irrigation and outdoor infrastructure systems (e.g., water mains, irrigation and drainage lines, sanitary and storm sewers, electrical utilities, roads, paths, trails, retaining walls, bridges, and related infrastructure); associated cost estimating; related staff and consultant support for developing and prioritizing projects within the Department's Asset Management Plan; and implements replacement projects at various sites. Specific projects are determined by the study and operational considerations.

This project provides conservation benefits by reducing water loss due to leaking systems, allocating water flow more efficiently through improved technology, and implementing other related work. It also extends the useful life of the infrastructure.

This project replaces the Built Up Roofing (BUR) system with a rubberized/EPDM roofing system with 20KW photovoltaic panels. The system will supply power into the electrical system for the building, which will reduce the amount of utility power used. At certain times, the system may produce more power than is being used by the building, resulting in a credit for power used.

This project provides for new park development on the Maple Leaf Reservoir. Seattle Public Utilities will develop a new covered reservoir in the footprint of the existing open reservoir during 2010-2011. The scope for this project includes the development of a master plan for the new park space and the existing Maple Leaf Playground, and implementation of the plan as funding allows. This project is part of the 2008 Parks Levy.

This project provides for investment in more energy efficient building systems and other facility efficiency improvements. By making these investments the City expects future savings in utility and labor costs, and significant progress toward carbon neutrality. This program is intended to fund facility retrofit projects identified by energy audits conducted in 2010 (funded by the City's Energy Efficiency and Conservation Block Grant) and similar projects identified by the department. Depending on project demand and available funding, additional resources may be added in the future.

This project provides for acquisition of property to create new urban parklands in Seattle's most densely-developed neighborhoods as identified in Seattle Parks and Recreation's 2006 Gap Analysis. New park land acquisition enhances livability and increases opportunities for the public to enjoy the outdoors. The acquisitions also implement the Parks Strategic Action Plan. Levy funds are expected to be supplemented by grants and funds from other sources and are not expected to be sufficient to complete acquisitions in all the targeted areas. This project is part of the 2008 Parks Levy.

Projects address requests which are typically under \$50,000, and may be used for major maintenance activities performed in conjunction with development-oriented Neighborhood Matching Fund (NMF) projects. This program enables the Department to respond quickly to community requests for repairs in neighborhood parks. This project was formerly project number K73508. A new project number has been created for this project to comply with new accounting procedures, therefore life to date and 2009 revised dollar amounts do not appear in the table below.

This project funds debt service payments on 20-year bonds issued in 2002 to pay for the acquisition of the Westbridge Building, a facility that replaced the Department's primary maintenance facility at Roy Street. The replacement of the Roy Street facility assures a safe and efficient location for the Department's professional trades and a portion of the maintenance crews and management staff.

This ongoing program provides minor capital improvements to low-income area parks throughout the City. Conservation Corps Program staff perform this work, providing training opportunities for low-income, homeless, and other at-risk community members. Program elements include provision of ADA improvements to parks and park restrooms, accessible drinking fountain installation, basketball court construction, bench and picnic table installation, tree purchase and planting, and other small-scale capital projects. Funding is also targeted to projects that can be integrated with other community-identified amenities. This project was formerly project number K73861. A new project number has been created for this project to comply with new accounting procedures, therefore life to date amounts do not appear in the table below. For 2013-2014, this program is funded with federal Community Development Block Grant funds.

This ongoing project funds various project activities, including, but not limited to, seal-coats to new pavement to extend its lifespan, pavement patching, sub-grade repairs, overlays to small areas, and repairs associated with pavement failures (e.g., heaving, sinking, cracking, and root invasion.) Improvements reduce damage to asphalt, lengthen pavement lifespan, and reduce safety hazards such as uneven pavement. This project was formerly project number K3512. This ongoing program renovates play areas, makes ADA improvements, installs safety upgrades, and performs other related work. The program focuses on addressing safety issues at two to four play areas per year. Primarily, the program is focused on installing proper safety surfacing at children's play areas throughout the parks system. Future funding for this program depends on specific projects and available resources, including grants. This program extends the useful life and improves the safety of the play areas. This project replaces pool plaster liners at five pools: Pop Mounger, Southwest, Ballard, Evans, and Evers. Pool plaster liners typically last approximately 15 to 20 years, depending on the specific conditions at a pool. New pool liners protect the pool shell, make the pool brighter, and improve underwater visibility. They also have smoother finishes than older ones, which can minimize potential abrasions for the users.

This project provides for planning, preliminary design, and redevelopment of a new facility to replace the existing Rainier Beach Community Center and swimming pool. This project was developed by Parks in response to the Seattle School District's decisions about the future of Southshore Middle School, since the school shares a building with the existing community center and pool. A new facility will provide the public with improved and updated recreational opportunities and will complement the two new schools on the site. The specific scope of work for this project is being developed through a community process.

The project renovates shorelines, docks, piers, and boat ramps, and performs related work at selected sites in the park system. Work includes, but is not limited to, repairs of the piles, caps, stringers, decking, breakwater structures, and boat ramp structures. It also provides for shoreline improvements such as laying sand and gravel to replenish beaches that have eroded and planting to protect the shoreline. These improvements extend the useful life of these facilities, many of which generate revenues to the Department each year. The funding source for this project is SPIF funding.

This project, part of the 2008 Parks Levy Opportunity Fund, creates a sustainable park space in the Aurora Avenue N. (adjacent to the Aurora Bridge) on the north side of N. 36th St. Proposed sustainable design features include the use of recycled materials, native plants, tree retention, pedestrian paths, storm water management, and other related work. These improvements will provide better pedestrian access and promote the use of "green" infrastructure.

This project, part of the 2008 Parks Levy Opportunity Fund, creates a multi-use open space, a performance area/plaza for the public rain gardens to accept storm water runoff, and performs other related work. These amenities will increase the public use of this site which is located in a dense part of the City.

This program develops forest and vegetation management plans, implements restoration projects at sites throughout the City's park system, removes hazardous trees, and performs other related work. Restoration projects, with much of the work being performed by citizen volunteers, may include removal of invasive plants, such as English ivy and Himalayan blackberry, followed by replanting with native plants. Future funding for this program depends on available resources. This project enhances Seattle's urban forest and supports the Green Seattle Partnership to increase overall City tree canopy and the Restore Our Waters Strategy to improve Seattle's aquatic environments. This project was formerly project number K732410. A new project number has been created for this project to comply with new accounting procedures, therefore life to date and 2009 revised dollar amounts do not appear in the table below.

This ongoing project is a collaborative effort between the City of Seattle and the Cascade Land Conservancy to restore 2,500 acres of forested park lands in Seattle by 2025. Restoration for each acre occurs over a three-year period and includes clearing invasive plants, replanting the area with native plants, caring for the plants through establishment, and other related work. This project supports the Green Seattle initiative.

This ongoing project implements energy conservation projects in collaboration with Seattle City Light, Seattle Public Utilities, and Puget Sound Energy. Projects may include lighting, heating, and water use renovations at various facilities throughout the Parks system. These projects result in energy savings and better air and water quality, and support the Climate Protection Initiative by reducing greenhouse gas emissions. The cost of these projects is expected to be recovered within approximately five years through reduced utility costs and rebates from the three utilities. Rebates and other additional resources will be pursued to fund future conservation projects.
