Michael Mattmiller, Director & Chief Technology Officer (206) 684-0600

http://www.seattle.gov/doit

Department Overview

The Department of Information Technology (DoIT) manages the City's information technology infrastructure and performs strategic information technology (IT) planning to help City government serve Seattle's residents and businesses. DoIT is organized into four major divisions: Technology Infrastructure; Technology Leadership and Governance; Office of Electronic Communications; and Finance and Administration.

The **Technology Infrastructure** division builds and operates the City's communications and computing assets, which include the City's telephone, radio, and e-mail systems, and the networks and servers. The City's technology and network infrastructure, as operated by DoIT, is used by every department to deliver power, water, recreation, public safety, and human services to the people of Seattle. DoIT also develops, supports, and oversees systems and policies that increase the convenience and security of the City's technology systems.

The **Technology Leadership and Governance** division provides strategic direction and coordination on technology for the City, including information security policy and management, development of a multi-year strategic plan for information technology, development of common standards and architectures to deliver City services more efficiently and effectively, and IT project management and monitoring.

The **Office of Electronic Communications** division oversees and operates the City's government-access television station (the Seattle Channel) and websites (seattlechannel.org and seattle.gov). Services provided include: new television and on-line programming, live Web streaming, indexed videos on demand, web-based applications, and other interactive services aimed at improving access to government services, information, and decision makers. It also oversees the City's cable television franchises with Comcast and Wave Division I and it manages the department's community outreach programs, including the Technology Matching Fund (TMF) program, which supports community efforts to close the digital divide and encourage a technology-healthy city.

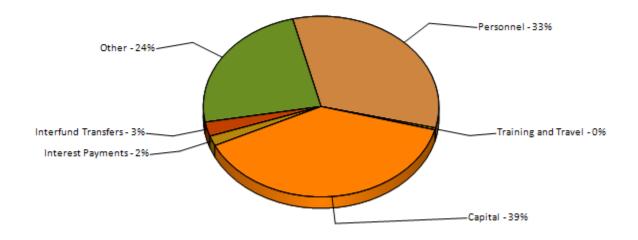

The **Finance and Administrative Services** division provides finance, budget, accounting, human resources, administrative, and contracting services for DoIT.

DoIT provides services to other City departments that in turn pay DoIT for those services they purchase. As such, DoIT receives revenue from most of the major fund sources within the City, including the General Fund, Seattle City Light, Seattle Public Utilities, Seattle Department of Transportation, Seattle Department of Planning and Development, and the Retirement Fund. DoIT also receives funds from the City's Cable Television Subfund, as well as from grants, and from other government agencies external to the City (e.g., the Seattle School District, the Port of Seattle, etc.) that buy DoIT services for special projects.

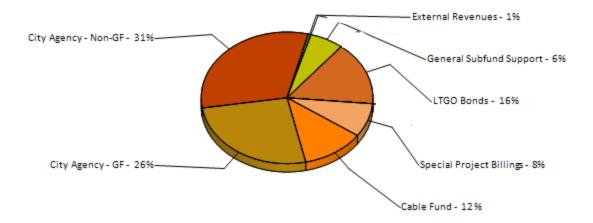

| Budget Snapshot | | | | |
|-----------------------------|----------------|-----------------|-----------------|------------------|
| Department Support | 2013 Actual | 2014 Adopted | 2015 Adopted | 2016 Endorsed |
| General Fund Support | \$4,656,927 | \$3,974,938 | \$4,464,489 | \$6,498,844 |
| Other Funding - Operating | \$36,782,027 | \$37,807,032 | \$46,495,139 | \$49,262,340 |
| Total Operations | \$41,438,954 | \$41,781,970 | \$50,959,628 | \$55,761,184 |
| Other funding - Capital | \$12,706,919 | \$37,807,362 | \$31,695,129 | \$11,185,363 |
| Total Appropriations | \$54,145,873 | \$79,589,332 | \$82,654,757 | \$66,946,547 |
| Full-time Equivalent Total* | 192.25 | 193.25 | 198.25 | 198.25 |

^{*} FTE totals are provided for information purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here.

2015 Adopted Budget - Expenditure by Category

2015 Adopted Budget - Revenue by Category

Budget Overview

As an internal service department, the Department of Information Technology (DoIT) bills other City departments for the services it provides. In the 2015 Adopted and 2016 Endorsed Budget, DoIT prioritizes the successful completion of high value, critical initiatives that are underway as well as ongoing support for core technology services that are critical to the operation of other City departments. The critical initiatives include: completing the transition to a new Next Generation Data Center environment, upgrading information systems security to meet more stringent regulatory and compliance requirements, completing the City's transition to Microsoft Office 365 and supporting the regional effort to replace the critical countywide 800Mhz radio system.

Citywide Information Technology Coordination

The Mayor has indicated that he would like DOIT to help review all IT projects throughout the City and develop a Citywide vision for how best to provide IT services. DOIT will be reaching out to all departments to develop a coordinated approach to reviewing, developing, approving and funding IT projects using multiple strategies and organizations. The Mayor's Office will chair a new IT Subcabinet executive group that will meet regularly to discuss IT strategy, direction and investments for the City, and will be staffed by the City's Chief Technology Officer. The Subcabinet will also identify opportunities to streamline and better coordinate the delivery of existing IT services throughout the City. In addition DOIT will revise the City's Municipal IT Investment Evaluation (MITIE) committee, which will serve as a review and recommendation board for evaluating all major IT projects across the City.

Online Interactive Budget Information

Working with the City Budget Office, DoIT has expanded a current contract with a local data and information firm to help make the City's budget more accessible to the public. The Mayor's 2015 Adopted and 2016 Endorsed Budget will be partially displayed through an online interactive tool, showing budget information down to a program level for all departments. In future budgets, DoIT intends to explore implementing additional functionality, including things like Citywide expense reporting and dash-boarding of performance data.

Implementing the Next Generation Data Center

In 2013, work began on moving the City's primary data center and other information technology infrastructure out of the Seattle Municipal Tower as it no longer meets the City's IT needs. The City is shifting to a consolidated data center with a primary location in the Puget Sound region and a secondary recovery site outside the region to maximize options for data recovery in the event of a disaster.

In 2015, the project will build-out the new facilities and relocate the City IT systems into a new facility. As part of this process, an interdepartmental team is developing principles and governance rules for how departments will share network services, storage, management services and physical space in the new data center. The project budget includes resources for departments requiring additional staffing or backfill to complete their portion of the project. The project is anticipated to be completed by the end of 2015 and it will result in a new more resilient and modern data center environment for the City.

Increasing Information Security

DoIT's Information Security Office is tasked with managing the Information Security program for the entire City which includes managing security threats to the City's IT systems, monitoring potential security breaches and regulatory compliance. In order to keep up with the increasing number and complexity of security threats, DoIT is adding additional staff to manage the increase in workload. In addition, the City's number of annual credit card transactions has increased to a level that requires new reporting requirements and security upgrades to meet the regulations governing credit card payments. The Finance and Administrative Services Department will meet the annual reporting requirements and DoIT will provide the upgrades to existing systems to comply with the standards.

Replacing the Public Safety Radio Network

In 1992, voters approved a levy that funded a public safety radio system for all police, fire and emergency medical service agencies within King County, including Seattle. The system is jointly owned and governed by the Regional Communication Board with DoIT maintaining Seattle's portion of the system. Due to the end of vendor support for most of the existing system in use, the owners agreed to start a project to replace the radio system by 2018. The King County Executive will be proposing a regionwide measure funding the replacement of the entire system and related radios to be placed on a ballot.

Increasing Diverse Programming on the Seattle Channel and Public Access Channel

In 2015 DolT will work with the Seattle Channel and the Public Access Channel, managed by the Seattle Community Colleges District (SCCtv) to increase programming to reflect the diverse communities in Seattle. This may result in new Seattle Channel programming, expanding existing programs such as Community Stories, expanding existing educational outreach programs to disadvantaged communities and providing more training programs to allow community members to produce their own programs. The Seattle Channel is managed by DolT and provides programming on cable television and via the Internet to help citizens connect with their City, including series and special features highlighting the diverse and cultural landscape of Seattle. In addition, the City supports the Public Access Channel that is managed by the SCCtv. The Public Access Channel allows community members to create an array of programs including broadcasts specific a specific focus on youth, politics or in a

particular language that can be seen by a wide audience throughout King County and the Internet.

Cable Television Franchise Fee

The Cable Television Franchise Fund (Cable Fund) receives franchise fees from cable television providers. Over the last several years, the department used these revenues to support technology access programs previously funded by the General Fund. The 2015 Adopted and 2016 Endorsed Budget continues previous uses of the Cable Fund for project management for the Web Team, web application support service to City departments, and administrative support for community outreach.

For the near future, the Cable Fund continues to have enough revenue growth to offset inflationary impacts on expenditures. DoIT will know more about future revenue projections after the current franchise agreements are renegotiated in 2015-2017.

Broadband Initiative

In 2014, the Mayor discussed plans to provide more and better broadband service in Seattle by reducing regulatory barriers, exploring public/private partnerships and exploring municipal broadband. As a result of these initial steps, CenturyLink announced that it plans to bring one-gigabit fiber internet access to tens of thousands of single-family homes in Beacon Hill, Central District, Ballard and West Seattle by the end of 2015.

City Council Changes to the Proposed Budget

During the City Council's review process, the Cable Fund support for the Technology Matching Fund (TMF) program was increased due to a grant received at the end of 2014 for community technology purposes, freeing up fund balance to spend in 2015 on the TMF program. In addition, Cable Fund support was increased for the public access channel run by Seattle Colleges Cable Television for operations and one-time equipment replacement.

Descriptions of Incremental Budget Changes

Baseline Changes

Increase for Maintenance Costs - \$256,103

This baseline item adjusts the budget to cover increased maintenance costs for the public safety radio system and other equipment.

Adjustment for Wireless Charges - \$364,693

This item provides DoIT appropriation to pay for the increase in wireless bills directly to the service vendor. The increased costs are recovered from the affected departments through DoIT rates.

Citywide Adjustments for Standard Cost Changes - (\$1,783,334)

Citywide technical adjustments made in the "Proposed Phase" reflect changes due to inflation, central cost allocation, retirement, healthcare, workers' compensation, and unemployment costs. These adjustments reflect updates to preliminary cost assumptions established in the "Baseline Phase." This also includes adjustments to DoIT's Capital Improvement Program (CIP) budget. DoIT runs their CIP through their operating budget and these adjustments reflect aligning funding from the 2014-2019 Adopted CIP with the 2015-2020 Adopted CIP. The majority of the CIP change is reduced funding for the Next Generation Data Center project, set for completion in 2015.

Adjustment for One-time Adds or Reductions - \$661,597

This item includes budget reductions in the 2015-16 Biennium for one-time salaries, equipment or expenses added in the 2014 Adopted Budget. It also includes one-time budget reductions taken in 2014.

Technical Adjustments - \$9,507

Changes reflected in this category include: adjustments within or between Budget Control Levels that align funding with spending requirements, corrections to baseline adjustments made during Executive phase, and other technical changes to staffing and program funding requirements. These changes are considered technical in nature because they do not significantly affect approved department service delivery or require new or additional policy decisions.

Proposed Changes

Next Generation Data Center - \$1,092,641/2.00 FTE

In 2013, the City funded a project to replace and consolidate the City's existing data centers and server rooms. In 2015, the project will begin migrating the IT infrastructure and applications to the new location. This item provides funding for the project to support this work and funding for City departments to complete their portion of the move with temporary staffing. Fund balance will be used to fund this one-time expense.

Additional full-time staffing is also necessary for DoIT to manage the new data center and sustain an increased level of service and larger customer base than currently exists. These ongoing costs will be part of the cost allocation for the new data center.

Information Security Changes - \$1,248,295/2.00 FTE

DoIT is implementing many changes to improve the security of the City's networks in 2015-2016 to comply with new higher level Payment Card Industry Data Security Standards due to the City's increased number of credit card transactions. These changes include:

- Adding staff to DoIT's Information Technology Security Office to implement the new security standards;
- Upgrading and enhancing existing various IT security systems; and
- Purchasing new specialized preventative and detective cybersecurity devices to improve security.

Public Safety Radio System - \$276,853/1.00 FTE

The City is a joint owner of the 800 MHz Public Safety Radio System used by the Seattle Police and Fire Departments for communication in emergencies. In 2013, the Regional Communication Board that collectively oversees the system, voted in favor of replacing the outdated system starting in 2015. The King County Executive intends to propose a regionwide measure funding the replacement of the entire system and related radios to be

placed on a ballot. This item provides \$182,000 for a term-limited project manager for the City's portion of this project and will not be staffed nor funded if the project does not move forward.

The radios used by the Police and Fire Departments for communications in emergencies are due to be replaced in 2019. As the regional project is planning to fund the replacement of these radios, the City is reducing the amount of reserves set aside annually for this purpose. In addition, this item funds \$90,000 for the replacement of test equipment at the end of its lifecycle to keep the City's portion of the existing system maintained until it is replaced.

Increase Diversity Programming - \$78,000

This item provides funding to increase the diversity of programming on the Seattle Channel and the public access channel to reflect the communities in Seattle. DoIT will work with the Office of Immigrant and Refugee Affairs and the Seattle Office of Civil Rights to develop specific activities.

Upgrade Backup Alerting System for Seattle Fire Department - \$88,700

The Seattle Fire Department's back-up system for alerting stations to emergencies is out of date and needs to be replaced. The main 9-1-1 alerting system is wired to each station and is fully operational, but in cases where the network is down the back-up system is used to alert the fire stations from the Fire Alarm Center. A new system will ensure the critical alternative communication structure is in place for the 9-1-1 system.

Increase Funding for Public Access Channel - \$61,704

This item provides a \$36,000 increase in the annual contract with the Seattle Community Colleges District (SCCtv) to manage the Seattle Public Access Channel due to inflation. Also, there is \$25,000 in one-time funding to replace aging equipment and support the upgrade to high-definition television.

Upgrade Project Portfolio Management System - \$91,276

This proposal replaces DoIT's software system to track and manage the City's current IT projects that the Chief Technology Officer is required to monitor. The current software is out of date and no longer supported by the vendor. The new system is easier to use and should reduce training time and facilitate more frequent updates to project information

Complete Office 365 Implementation - \$200,000

This item funds the final implementation stages of the City's transition to Microsoft Office 365 for completion in 2016. Office 365 will provide both local and cloud licensing for key office products including email, calendaring, Office, Lync and Sharepoint. As part of this work, DoIT will replace the City's aging email infrastructure with Microsoft Exchange Online, a cloud-based email service that will reduce costs by reducing the need for on premise infrastructure while increasing security and service availability

Upgrade Reporting System - \$146,974

A data reporting system currently in use by DoIT for customer service reports is at the end of its useful life. This funding provides temporary staffing to transition the data into a different reporting system. It is more efficient for DoIT to convert the data for reporting into an existing licensed system than to invest in upgrading the other outdated system.

Reduce Funding for Coordination of Senior Peer Computer Training - (\$22,333)

In 2011, funding from the Cable Franchise Fund was directed to fund a half-time position in the Human Services Department (HSD) to coordinate senior peer computer training for a limited time. This item reduces that funding

by half and HSD will use existing resources in 2015-2016 to continue to fund this half-time position.

Install IT Testing Tools

This item provides funding in 2016 (\$310,000) to implement a new suite of technology testing tools which will allow the City to more efficiently mitigate risks from rapid technology changes that are driven by IT service providers. Routine upgrades to operating systems will occur more frequently as the City moves toward increased use of cloud computing. Previously, the City controlled the upgrade timelines and the impacts could be managed manually. These automated IT testing tools will allow rapid and efficient management of the upgrade impacts to other systems.

Delay Interactive Voice Response Upgrade Project

The software upgrade for the City's Interactive Voice Response project planned for 2016 will be delayed until 2017. The current system continues to function well with planned routine maintenance and does not need to be upgraded at this time.

Proposed Technical Changes

Adjustments for Inflation and Debt Service Costs - (\$632,602)

This item adjusts DoIT's budget due to double counting of inflation factors during the baseline development and reduction of debt service payments for 2015 and 2016.

Technical Adjustments - (\$94,063)

Changes reflected in this category include: adjustments within or between Budget Control Levels that align funding with spending requirements, corrections to baseline adjustments made during Executive phase, and other technical changes to staffing and program funding requirements. These changes are considered technical in nature because they do not significantly affect approved department service delivery or require new or additional policy decisions.

Transfer of Electronic Records Management Project - (\$69,525)

This item reflects the transfer of the debt service for the Electronic Records Management Project to the Finance and Administrative Services Department (FAS). This project was originally in the DoIT CIP, but has been managed by FAS and will replace the current email archive system that is no longer supported by the vendor.

Align Budget for Personnel Costs - \$323,492

This item aligns DoIT's budget for salaries and other personnel services to match what is actually spent and where in the organization the expenses are occurring.

Final Citywide Adjustments for Standard Cost Changes - \$523,153

Citywide technical adjustments made in the "Proposed Phase" reflect changes due to inflation, central cost allocation, retirement, healthcare, workers' compensation, and unemployment costs. These adjustments reflect updates to preliminary cost assumptions established in the "Baseline Phase."

Council Changes

Increase Technology Matching Fund Grants - \$150,000

This item provides a one-time increase in appropriation for the Technology Matching Fund (TMF) program in 2015. This is due to a grant received by DoIT at the end of 2014 for community technology purposes freeing up fund balance to be allocated to the TMF program for 2015.

Increase Funding for Public Access Channel - \$94,296

This item increases Cable Fund support for the public access channel managed by Seattle Colleges Cable Television. Included is an annual increase of \$68,296 for operations and a one-time increase of \$26,000 for new equipment acquisition. This is in addition to the increases provided in the Proposed Budget.

City Council Provisos

There are no Council provisos.

Appropriations By Budget Control Level (BCL) and Program

Finance and Administration Budget Control Level

The purpose of the Finance and Administration Budget Control Level is to provide human resources, contracting, finance, budget, and accounting services (planning, control, analysis, and consulting) to the Department, and to manage funding associated with Citywide initiatives.

| | 2013 | 2014 | 2015 | 2016 |
|------------------------------|-----------|------------|------------|------------|
| Program Expenditures | Actual | Adopted | Adopted | Endorsed |
| Finance and Administration | 2,607,984 | 2,724,395 | 3,793,632 | 3,403,302 |
| General and Administration | 5,349,477 | 28,047,250 | 28,679,940 | 12,961,346 |
| Total | 7,957,461 | 30,771,645 | 32,473,572 | 16,364,648 |
| Full-time Equivalents Total* | 21.00 | 21.00 | 25.00 | 25.00 |

^{*} FTE totals are provided for information purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here.

The following information summarizes the programs in Finance and Administration Budget Control Level:

Finance and Administration Program

The purpose of the Finance and Administration Program is to provide human resources, contracting, finance, budget, and accounting services (planning, control, analysis, and consulting) to the Department.

| | 2013 | 2014 | 2015 | 2016 |
|-----------------------------|-----------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Finance and Administration | 2,607,984 | 2,724,395 | 3,793,632 | 3,403,302 |
| Full-time Equivalents Total | 21.00 | 21.00 | 25.00 | 25.00 |

General and Administration Program

The purpose of the General and Administration Program is to provide general administrative services and supplies to the Department's internal programs.

| | 2013 | 2014 | 2015 | 2016 |
|----------------------------|-----------|------------|------------|------------|
| Expenditures | Actual | Adopted | Adopted | Endorsed |
| General and Administration | 5,349,477 | 28,047,250 | 28,679,940 | 12,961,346 |

Office of Electronic Communications Budget Control Level

The purpose of the Office of Electronic Communications Budget Control Level is to operate the Seattle Channel, Cable Office, Web sites, and related programs so that technology delivers services and information to residents, businesses and visitors.

| | 2013 | 2014 | 2015 | 2016 |
|--------------------------------|-----------|-----------|-----------|-----------|
| Program Expenditures | Actual | Adopted | Adopted | Endorsed |
| Citywide Web Team | 2,019,504 | 2,279,791 | 2,156,449 | 2,170,692 |
| Community Technology | 1,285,646 | 1,344,485 | 1,503,971 | 1,366,670 |

| Seattle Channel | 3,108,019 | 3,269,938 | 3,434,041 | 3,449,325 |
| Total | 7,061,896 | 7,623,907 | 7,970,245 | 7,817,536 |
| Full-time Equivalents Total* | 35.00 | 36.00 | 35.00 | 35.00 |

^{*} FTE totals are provided for information purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here.

The following information summarizes the programs in Office of Electronic Communications Budget Control Level:

Citywide Web Team Program

The purpose of the Citywide Web Team Program is to provide leadership in using Web technology and a Web presence for residents, businesses, visitors, and employees so that they have 24-hour access to relevant information and City services.

| | 2013 | 2014 | 2015 | 2016 |
|-----------------------------|-----------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Citywide Web Team | 2,019,504 | 2,279,791 | 2,156,449 | 2,170,692 |
| Full-time Equivalents Total | 12.75 | 13.75 | 12.75 | 12.75 |

Community Technology Program

The purpose of the Community Technology Program is to provide leadership, education, and funding so that all residents have access to computer technology and online information.

| | 2013 | 2014 | 2015 | 2016 |
|-----------------------------|-----------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Community Technology | 1,285,646 | 1,344,485 | 1,503,971 | 1,366,670 |
| Full-time Equivalents Total | 4.25 | 4.25 | 4.25 | 4.25 |

Office of Cable Communications Program

The purpose of the Office of Cable Communications Program is to negotiate with and regulate private cable communications providers so that residents receive high-quality and reasonably priced services.

| Expenditures/FTE | 2013 Actual | 2014 Adopted | 2015 Adopted | 2016 Endorsed |
|--------------------------------|----------------|-----------------|-----------------|------------------|
| Office of Cable Communications | 648,727 | 729,693 | 875,784 | 830,849 |
| Full-time Equivalents Total | 2.75 | 2.75 | 2.75 | 2.75 |

Seattle Channel Program

The purpose of the Seattle Channel Program is to inform and engage residents in Seattle's governmental, civic, and cultural affairs by using television, the Web, and other media in compelling ways.

| | 2013 | 2014 | 2015 | 2016 |
|-----------------------------|-----------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Seattle Channel | 3,108,019 | 3,269,938 | 3,434,041 | 3,449,325 |
| Full-time Equivalents Total | 15.25 | 15.25 | 15.25 | 15.25 |

Technology Infrastructure Budget Control Level

The purpose of the Technology Infrastructure Budget Control Level is to build and operate the City's corporate communications and computing assets so that the City can manage information more effectively, deliver services more efficiently, and make better informed decisions.

| | 2013 | 2014 | 2015 | 2016 |

^{*} FTE totals are provided for information purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here.

The following information summarizes the programs in Technology Infrastructure Budget Control Level:

Communications Shop Program

The purpose of the Communications Shop Program is to install, maintain, and repair the dispatch radio infrastructure and mobile and portable radios for City departments and other regional agencies for common, cost-effective communications.

| | 2013 | 2014 | 2015 | 2016 |
|-----------------------------|-----------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Communications Shop | 2,168,040 | 1,893,256 | 1,809,549 | 1,831,265 |
| Full-time Equivalents Total | 11.20 | 11.40 | 10.50 | 10.50 |

Data Network Services Program

The purpose of the Data Network Services Program is to provide data communications infrastructure and related services to City employees so that they may send and receive electronic data in a cost-effective manner and residents may electronically communicate with City staff and access City services.

| | 2013 | 2014 | 2015 | 2016 |
|-----------------------------|-----------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Data Network Services | 3,702,468 | 4,027,052 | 4,176,486 | 4,130,951 |
| Full-time Equivalents Total | 14.75 | 15.00 | 14.95 | 14.95 |

Enterprise Computing Services Program

The purpose of the Enterprise Computing Services Program is to provide a reliable production computing environment that allows departments to effectively operate their technology applications, operating systems, and servers.

| | 2013 | 2014 | 2015 | 2016 |
|-------------------------------|-----------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Enterprise Computing Services | 7,474,825 | 8,469,845 | 8,055,838 | 7,723,804 |
| Full-time Equivalents Total | 24.25 | 24.25 | 22.75 | 22.75 |

Messaging, Collaboration and Directory Services Program

The purpose of the Messaging, Collaboration and Directory Services Program is to provide, operate, and maintain an infrastructure for e-mail, calendar, directory, and related services to City employees and the general public so that they can communicate and obtain City services.

| | 2013 | 2014 | 2015 | 2016 |
|--|-----------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Messaging, Collaboration and Directory | | | | |
| Services | 2,602,865 | 3,566,472 | 2,847,715 | 2,894,519 |
| Full-time Equivalents Total | 12.25 | 12.25 | 12.25 | 12.25 |

Radio Network Program

The purpose of the Radio Network Program is to provide dispatch radio communications and related services to City departments and other regional agencies so that they have a highly available means for mobile communications.

| | 2013 | 2014 | 2015 | 2016 |
|-----------------------------|-----------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Radio Network | 4,120,510 | 2,602,167 | 1,528,751 | 1,378,226 |
| Full-time Equivalents Total | 1.00 | 0.00 | 0.85 | 0.85 |

Service Desk Program

The purpose of the Service Desk Program is to provide an initial point of contact for technical support, problem analysis and resolution, and referral services for customers in non-utility departments.

| | 2013 | 2014 | 2015 | 2016 |
|-----------------------------|-----------|-----------|-----------|-----------|

| Full-time Equivalents Total | 9.75 | 9.25 | 9.25 | 9.25 |

Technical Support Services Program

The purpose of the Technical Support Services Program is to provide, operate, and maintain computer services for City employees so that they have a reliable computing environment to conduct City business and to provide services to other government entities and the public.

| | 2013 | 2014 | 2015 | 2016 |
|-----------------------------|-----------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Technical Support Services | 1,983,142 | 2,032,829 | 2,239,556 | 2,564,229 |
| Full-time Equivalents Total | 14.25 | 13.75 | 15.25 | 15.25 |

Technology Engineering and Project Management Program

The purpose of the Technology Engineering and Project Management Program is to engineer communications systems and networks, to manage large technology infrastructure projects for City departments, and to facilitate reliable and cost-effective communications and technology.

| Expenditures/FTE | 2013 Actual | 2014 Adopted | 2015 Adopted | 2016 Endorsed |
|--|----------------|-----------------|-----------------|------------------|
| Technology Engineering and Project Management | 2,963,623 | 4,881,909 | 5,216,198 | 5,407,704 |
| Full-time Equivalents Total | 6.00 | 6.00 | 7.00 | 7.00 |

Technology Infrastructure Grants Program

The purpose of the Technology Infrastructure Grants Program is to display expenditures related to technology projects funded by City and non-City sources and where appropriations for such projects are often made outside of the budget book.

| | 2013 | 2014 | 2015 | 2016 |
|----------------------------------|---------|---------|---------|----------|
| Expenditures | Actual | Adopted | Adopted | Endorsed |
| Technology Infrastructure Grants | 781,745 | 0 | 0 | 0 |

Telephone Services Program

The purpose of the Telephone Services Program is to provide, operate, and maintain a telecommunications infrastructure, and to provide related services to City employees so that they have a highly available means of communication.

| | 2013 | 2014 | 2015 | 2016 |
|-----------------------------|-----------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Telephone Services | 9,113,125 | 8,747,424 | 9,769,775 | 9,399,083 |
| Full-time Equivalents Total | 27.05 | 27.60 | 26.70 | 26.70 |

Warehouse Program

The purpose of the Warehouse Program is to acquire, store, and distribute telephone, computing, data communications, and radio components to the Department so that equipment is available when requested.

| | 2013 | 2014 | 2015 | 2016 |
|-----------------------------|---------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Warehouse | 943,504 | 1,273,481 | 1,258,020 | 1,282,182 |
| Full-time Equivalents Total | 3.00 | 3.00 | 3.00 | 3.00 |

Technology Leadership and Governance Budget Control Level

The purpose of the Technology Leadership and Governance Budget Control Level is provide strategic direction and coordination on technology for the City, including information security policy and management, development of common standards and architectures, development of a multi-year strategic IT plan, and IT project management and monitoring.

| | 2013 | 2014 | 2015 | 2016 |
|---|-----------|-----------|-----------|-----------|
| Program Expenditures | Actual | Adopted | Adopted | Endorsed |
| Citywide Technology Leadership and Governance | 2,010,283 | 1,852,633 | 2,075,900 | 2,092,098 |
| Information Security Office | 0 | 637,472 | 1,755,726 | 1,811,168 |
| Total | 2,010,283 | 2,490,105 | 3,831,626 | 3,903,266 |
| Full-time Equivalents Total* | 12.75 | 13.75 | 15.75 | 15.75 |

^{*} FTE totals are provided for information purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here.

The following information summarizes the programs in Technology Leadership and Governance Budget Control Level:

Citywide Technology Leadership and Governance Program

The purpose of the Citywide Technology Leadership and Governance Program is to establish strategic directions; identify key technology drivers; provide project management, oversight and quality assurance services; and provide information, research, and analysis to departments' business and technology managers.

| | 2013 | 2014 | 2015 | 2016 |
|------------------------------------|-----------|-----------|-----------|-----------|
| Expenditures/FTE | Actual | Adopted | Adopted | Endorsed |
| Citywide Technology Leadership and | | | | |
| Governance | 2,010,283 | 1,852,633 | 2,075,900 | 2,092,098 |
| Full-time Equivalents Total | 12.75 | 11.75 | 11.75 | 11.75 |

Information Security Office Program

The purpose of the Information Security Office is to manage the Information Security program for the City including the creation and enforcement of policy, threat and vulnerability management, monitoring, and response, and regulatory compliance.

| Funes diames /FTF | 2013 | 2014 | 2015 | 2016 |

| Ending Unreserved Fund Balance | 7,035,424 | 613,431 | 4,397,913 | 429,921 | 464,138 | |

Capital Improvement Program Highlights

The Department of Information Technology (DoIT) builds, manages, and maintains City government information technology infrastructure including radio, data, communications, and computer networks. DoIT also manages the Seattle Channel, the City's central data center, and the development of computer application projects on behalf of the City. The central data center houses most of the City's computer servers and computing architecture. DoIT's Capital Improvement Program (CIP) provides new technology investments and also upgrades, maintains and improves to the City's existing technology networks and systems.

The Next Generation Data Center project work continues in 2015 with a build out of the new facilities and relocation of the City IT systems into these facilities. As part of the process, an interdepartmental team is developing principles and governance rules for how departments will share network services, storage, management services and physical space in the new data center. The project budget includes resources for departments requiring additional staffing or backfill to complete their portion of the project. DoIT expects to complete this project in 2015 which will result in a new more resilient and modern data center environment for the City.

The DoIT CIP includes various systems upgrades in the IT Security Project and enhancements to meet new security requirements due to the City's increased number of credit card transactions. In addition, the project started in 2014 to update software systems that track help desk tickets and changes to the network system continues in 2015. Both systems are outdated and are in need of upgrades. The Technology Management Tools project will replace both of these systems with a new integrated tool suite. Also in 2015, as part of the Computing Services Architecture program, DoIT will acquire a new suite of testing tools to allow City IT organizations to address rapid technology changes in a more effective manner.

Additional capital project work in 2015 includes:

- fiber optic cable link installation;
- planning, repair, replacement, and modification of software, hardware, and electronics in the City's data and communications infrastructure;
- equipment replacement and upgrades in the 800 MHz radio network program;
- computing services architecture environment software and hardware replacement and upgrades; and
- replacement of Seattle Channel equipment.

Additional information on DoIT's CIP can be found in the 2015-2020 Adopted CIP.
