

## Current Limits: Weatherization Program

**Effective Date: May 15, 2026**

The Office of Housing uses a variety of fund sources for weatherization assistance for a broad range of household income levels. Income-eligible households with homes located within Seattle city limits can apply for assistance regardless of the way the home is heated. Income-eligible households who live outside of Seattle city limits but are both a Seattle City Light customer and have an electric-heated home can also apply for assistance.
