Background:

An application for a Certificate of Approval was initially submitted in 2017. The application is incomplete and in corrections.

Staff has provided feedback on façade composition and materials on prior application submissions and briefing drafts. In 2018, staff suggested that the applicant submit a context study, showing influence and references from the District and requested a study of façade composition alternatives, noting that some of the materials, such as the stone veneer, and forms are not characteristic of scale, proportions and/or materials found elsewhere in the District.
