

**HING HAY PARK – INTERNATIONAL**

**DISTRICT**

**ADDRESS: 423 MAYNARD AVE S**

**PROPOSED WATER BOTTLE FILLING**

**STATION**

**Project Overview**

The purpose of this project is to provide clean, accessible drinking water to both the local community and visiting tourists during the FIFA World Cup. The park currently contains only the base of a former drinking fountain. We are proposing to temporarily remove this existing base and install a water bottle filling station in its place.

Given the high number of expected visitors throughout June, this temporary station will help ensure that everyone has convenient access to drinking water during the event.

This installation is intended to be fully temporary. We can remove the filling station and restore the existing fountain base back to its original condition by July 10th.

Below, you will find an image of the current base, an image of the previous fountain, our site plan, and an image of the proposed bottle-filling station (in the color Evergreen).

Previous fountain from 2019

**MOUNTING INSTRUCTIONS and PLUMBING CONNECTIONS**

Refer to diagrams for plumbing rough-in. Provide solid, well-drained smooth, flat, finished surface to mount pedestal fountain (concrete pad recommended) with adequate support (300 lb. load minimum). To secure unit, use (6) 3/8" minimum fasteners (not provided).

A service supply stop must be installed at the fountain inlet line.

Trap and service stop not included.

Position pedestal over plumbing and secure base to fasteners. Remove access panels and connect supply and water lines. Turn on water supply and check for leaks. Refer to owner's manual for detailed instructions. Reassemble access panels to pedestal.

**OPERATING PRESSURES:**  
Supply water 20 – 105 psi maximum
