

Husky Soccer FIFA Field Renovation

Project Overview

- > **Client: ICA**
- > **Location: Husky Soccer Stadium**
- > **Project Type: Renovation**
 - 150,000 sq. ft.
- > **Budget: \$3,900,000**
- > **Project Delivery: DBB**
 - Design Team: DA Hogan
- > **Target Sub Comp: August 1, 2025**

Scope of Work

- > Improvements to the University of Washington Husky Soccer Stadium necessary to serve as one of two Venue Specific Training Site (VSTS) locations in Seattle for the 2026 FIFA World Cup.
- > The project scope includes several essential upgrades to meet FIFA's standards/requirements for World Cup training facilities including pitch, maintenance equipment, and other fixtures.
- > These requirements are intended to ensure players have consistent, high quality training facilities across the 16-city tournament footprint.

Scope of Work

- > **Full renovation of the existing soccer pitch**
 - including new subgrade subsurface drainage system
 - irrigation system,
 - Natural grass playing surface
 - Synthetic turf perimeter
 - Raising the level of the pitch
 - Adding new concrete stub walls/fencing at grade transitions.
- > **Upgrade stadium lighting to LED**
- > **New ball control netting**
