CITY OF SEATTLE
DETERMINATION OF NON-SIGNIFICANCE BY
THE DEPARTMENT OF PLANNING AND DEVELOPMENT

Applicant Name: The Department of Planning and Development

Address of Proposal: Twenty-Third & Jackson node of the 23rd Ave. @ S Jackson-Union Urban Village

SUMMARY OF PROPOSED ACTION

This proposal is to adopt rezones and amend the Land Use Code to add area-specific development standards to implement the Comprehensive Plan Neighborhood Planning Element and the 23rd Avenue Action Plan (Union-Cherry-Jackson) recommendations. The rezones will encourage new pedestrian-friendly mixed-use development, increase housing density and opportunity including affordable housing in and around the 23rd Avenue and Jackson Street commercial area, and expand retail choices. The proposal includes changing existing Neighborhood Commercial 3 (NC3P-65) zones to NC3P-85 (4.25).

The proposed rezones include 17 parcels on approximately 9 acres of land. The proposed rezones could increase the amount of growth over the next 20 years by about 314 housing units, 78,101 commercial square footage, and 260 new jobs.

The following approval is required:

SEPA - Environmental Conditions - Chapter 25.05, Seattle Municipal Code.

SEPA DETERMINATION: [ ] Exempt [X] DNS [ ] MDNS [ ] EIS

[ ] DNS with conditions

[ ] DNS involving non-exempt grading, or demolition, or involving another agency with jurisdiction.
BACKGROUND DATA

Background

The proposed rezones are located within the 23rd Ave. @ S Jackson-Union Urban Village. In 2013, Central Area residents, business interests, property owners, and local institutions began work with the City to create the 23rd Avenue Action Plan (Union – Cherry – Jackson). The purpose of the planning process was to create a focused set of priorities and actions ripe for implementation. The mayor’s office is leading an interdepartmental effort for continued collaboration and coordination with implementation of the Action Plan, development of an economic development plan, and creation of a Central Area Cultural and History District.

The Department of Planning and Development (DPD) is recommending rezones and land use code amendments to implement the Comprehensive Plan Central Area Neighborhood Planning Element and carry out priorities identified by the community during the 23rd Avenue Action Plan (Union-Cherry-Jackson) and Urban Design Framework process. The 23rd Avenue Action Plan (Union–Cherry–Jackson) is not a replacement of the previous Central Area action plans, instead, it intends to confirm and update priorities in previous Central Area Action Plans with focus on 23rd Ave at Union, Cherry and Jackson, and identify implementation mechanisms to help make this great neighborhood a healthier, more equitable and viable destination for all people who call the Central Area home.

The rezones are intended to achieve the community’s vision and goals to strengthen the Central Area’s unique identity and community character. These rezones are the product of a two year community development process that engaged a broad cross section of the community through hands-on and interactive workshops, focus group meetings, individual workshops, in-person interviews, business canvassing, and online surveys. All of the proposed rezones are within or abutting the 23rd Ave. @ S Jackson-Union Urban Village and are within areas designated as Commercial/Mixed Use or Multi-Family Residential on the Comprehensive Plan’s Future Land Use Map. The analysis in this decision focuses specifically on rezone Area 8 within the 23rd & Jackson node of the 23rd Ave. @ S Jackson-Union Urban Village.

Proposal Description

This proposal is to rezone 17 parcels on approximately 9 acres of land in the 23rd & Jackson node of the 23rd Ave. @ S Jackson-Union Urban Village.

The proposed rezones could increase the amount of growth over the next 20 years by about 314 housing units, 78,101 commercial square footage, and 260 new jobs.

Proposed rezones are as follows:

Area 8:
  o Area 8a: Rezone from Neighborhood Commercial 3 with a Pedestrian (P) designation and structure height limit of 65 feet (NC3P-65) to Neighborhood
Commercial 3 with a Pedestrian (P) designation and structure height limit of 85 feet with Incentive Zoning base floor area ratio of 4.25 (NC3P-85(4.25))

- Area 8b: Rezone from Neighborhood Commercial 3 with a Pedestrian (P) designation and structure height limit of 65 feet (NC3-65) to Neighborhood Commercial 3 with a Pedestrian (P) designation and structure height limit of 85 feet and Incentive Zoning base floor area ratio of 4.25 (NC3P-85(4.25))

In addition to the proposed rezones, the Land Use Code is proposed to be amended as follows:

- Setback Requirements. Along South Jackson Street property lines as shown on proposed Map C for 23.47A.009, a minimum upper level setback of 10 feet is required for all portions of a structure above a height of 45 feet as measured from average sidewalk elevation. This requirement aims to provide more light onto the street and reduce the perceived bulk of buildings to create a more pedestrian-friendly environment. This upper level setback requirement is applied to South Jackson Street to promote a stronger main street and promenade character.

- Maximum length of street facing facade. The maximum length of a facade that is parallel to South Jackson Street or 23rd Avenue is 250 feet. Setbacks or separation can be considered as a break in the maximum length of the street facing façade when requirements described below are met. This requirement aims to achieve massing and scale more compatible with the existing neighborhood context, achieve a human scale, and ensure more light penetration to the street level.

  - A portion of the street-facing facade shall project or be recessed from abutting facade planes by a minimum depth of 15 feet and a minimum width of 15 feet; or
  - A separation with a minimum width of 15 feet between principal structures at any two points on different interior facades.

- Pedestrian connection requirement. A proposal that includes new development between South Main Street and South King Street within 400 feet east of 23rd Ave S shall provide an improved north-south pedestrian connection on the block in which it is located, subject to the following requirements. This requirement aims to connect existing and future commercial and residential development in the surrounding area with pedestrian access. This is consistent with the community vision for a pedestrian-friendly environment at this key community node.

  - The connection may be located to adjoin existing right-of-way with a minimum width of 6 feet. The connection is not required to bisect a project site, but may be located on the perimeter of the site.
  - The connection shall be located within the block (including adjoining right-of-way) between S. Main Street and S. King Street on which the development is proposed and should make provision for connection to the adjoining block, either north or south, on which the connection would be intended to continue.
The connection shall include at least one of the following: entries to retail stores; seating areas for pedestrians; street furniture; art; bicycle parking; landscaping; pedestrian scale lighting; water features; overhead weather protection.

The connection may be located between structures, or may be located in a parking area if the pedestrian area is separated from the parking area.

**Incentive Zoning**

The extra height and floor area allowed through the proposed rezone could only be obtained by providing affordable housing on site or off-site within the Central Area through the incentive provisions described in the Seattle Municipal Code Chapter 23.58A.

An amendment to the Land Use Code Chapter 23.58A Incentive Provisions is proposed (in a separate rezone ordinance for the 23rd and Union node of the 23rd Ave. @ S Jackson-Union Urban Village) to require development within the rezone area to provide off-site affordable housing within the Central Area Neighborhood Plan Boundary. This will provide more affordable housing to off-set displacement in the Central Area and promote equitable growth. This will allow people of all races, ethnicities and abilities to access more housing and to stay within the Central Area.

**Public Comments**

Proposed changes to the Land Use Code require City Council approval. Public comment will be taken on the proposed amendments at a future scheduled Council public hearing.

**ANALYSIS - SEPA**

The initial disclosure of the potential impacts from this project was made in the environmental checklist dated June 10, 2015. The information in the checklist, the information and analysis in the Director’s Report and Recommendation, a copy of the proposed text amendments to the Land Use Code, and the experience of the lead agency with review of similar legislative actions form the basis for this analysis and decision.

As noted above, all of the proposed rezones are located within the 23rd Ave. @ S Jackson-Union Urban Village and are intended to align these areas with the Comprehensive Plan’s Future Land Use Map. Potential impacts of the rezone proposal are analyzed below.

**Short-term Impacts**

As a non-project action, the proposed amendment will not have any short-term impact on the environment.
Long-term Impacts

Most long-term impacts of these proposed actions are expected to be minor. Impacts to noise, light and glare, shadows, water, air quality (including greenhouse gas emissions), toxic/hazardous substances, and use of energy, natural resources, and most public services and facilities may slightly increase, due to larger structures and greater levels of activity on various sites, but are not expected to be significant. Projects developing pursuant to these proposed actions would be subject to environmental review if they meet or exceed environmental review thresholds. In addition, projects would need to comply with existing codes and regulations, including the Land Use Code, Environmentally Critical Areas regulations, the Stormwater Code, and the Grading Code.

Increased housing density in the type of mixed use environment envisioned by the 23rd Avenue Action Plan (Union-Cherry-Jackson) in the Jackson core area may, in certain cases, reduce demands for energy and natural resources. This concentration of residential commercial uses in the vicinity of frequent transit service and bike facilities can reduce energy consumption by clustering services and having a good land use mix, increasing the convenience and likelihood that people will walk, bike and use transit for work and pleasure trips. The proposed changes do not alter any regulations directly related to energy or natural resources such as energy performance standards in new development. Projects would continue to be required to comply with the existing Energy Code and standards for sustainable development.

The most likely adverse impacts of the proposed actions would be to land use; height, bulk, and scale; traffic and transportation, and public services/utilities. These topics are discussed further below:

Land Use

The Land Use SEPA policy states, in part, that “it is the City’s policy to ensure that proposed uses are reasonably compatible with surrounding uses and are consistent with any applicable, adopted City land use regulations, the goals and policies set forth in Section B of the land use element of the Seattle Comprehensive Plan regarding Land Use Categories, and the shoreline goals and policies set forth in section C-4 of the land use element of the Seattle Comprehensive Plan for the area in which the project is located.” The proposal would result in no direct impacts to land and shoreline use as it is a non-project proposal. The proposal would represent a moderate change in the types and density of land use allowed within the area. The rezone proposal will encourage future development consistent with the intent of the 23rd Avenue Action Plan (Union-Cherry-Jackson), Central Area Neighborhood Plan and Comprehensive Plan policies. The rezone will encourage new pedestrian-friendly mixed-use development, increase housing density and opportunity in and around the 23rd Avenue and Jackson Street commercial area, and expand retail choices. No portion of the proposed rezones is within the City’s Shoreline District.

The proposed rezone would support the goals of the Comprehensive Plan Urban Village Element to focus housing and jobs in areas where they can support existing neighborhood centers,
maximize transportation and utility investments, and create walkable, pedestrian-friendly communities. These goals are described, in part, through the following goals and policies:

- **UVG3** Promote densities, mixes of uses, and transportation improvements that support walking, use of public transportation and other transportation demand management (TDM) strategies, especially within urban centers and urban villages.

- **UVG4** Direct the greatest share of future development to centers and urban villages and reduce the potential for dispersed growth along arterials and in other areas not conducive to walking, transit use, and cohesive community development.

- **UVG8** Use limited land resources more efficiently and pursue a development pattern that is more economically sound, by encouraging infill development on vacant and underutilized sites, particularly within urban villages.

- **UVG11** Increase public safety by making villages places that people will be drawn to at all times of the day.

- **UVG27** Promote the development of residential urban villages, which function primarily as compact residential neighborhoods providing opportunities for a wide range of housing types and a mix of activities that support the residential population. Support densities in residential urban villages that support transit use.

- **UVG29** Encourage growth in locations within the city that support more compact and less land-consuming, high quality urban living.

- **UV1** Promote the growth of urban villages as compact mixed-use neighborhoods in order to support walking and transit use, and to provide services and employment close to residences.

The proposed rezone is consistent with existing growth targets for the 23rd Ave. @ S Jackson-Union Urban Village and Vision 2040. Urban village policy 40 provides guidance on the intent of the 20 year growth targets:

- **UV40** Use 20-year growth targets for urban villages as a tool for planning for the growth that may occur in each urban village. Use these targets as a guide for City plans for development and infrastructure provision. Recognize that the growth targets do not represent the maximum amount of growth that could occur in a village. Recognize also that the private sector builds most housing units and creates most jobs, and, therefore, the growth targets impose no obligation on the City to ensure that those numbers of households or jobs actually occur.
This rezone would also support the following goals and policies of the Comprehensive Plan Neighborhood Planning Element for the Central Area:

- **CA-G18** The three community nodes along 23rd Ave at Jackson, Union and Cherry are each distinct with a different niche, but together they exhibit or demonstrate the shared identity of the Central Area. These community nodes together serve the diversity of cultures in the Central Area and continue to be home to those businesses and institutions that are central to the African American community.

- **23rd and Jackson** - The largest of the three community nodes with larger scaled mixed use developments. It is the community’s center for general goods and services including education, arts, places of worship and gathering, parks, a library, housing, social services and places to shop for daily household needs. It is a local and regional destination that draws a broad mix of people.

- **23rd and Union** - A medium sized community-serving node with mixed use developments. This node has locally owned businesses and institutions and continues to serve as the center of the African American community. It is a neighborhood scale destination that builds on existing assets and draws customers from the larger neighborhood.

- **23rd and Cherry** - This is a smaller scaled community-serving node with finer grained mixed use developments. This node has an abundance of community assets including parks/open space, Garfield High School and Community Center, teen center, arts programs, and small businesses, in particular ethnic restaurants, that create a unique identity for this node. It draws a broad mix of people, especially youth.

- **CA-P63** Encourage new pedestrian-friendly mixed-use development and increased housing density in and around the 23rd Avenue and Jackson Street commercial area. Include small and large businesses, opportunities for startup businesses, and affordable housing while preserving existing gathering spaces.

- **CA-G1** The Central Area is a community proud of its culture, heritage, and diversity of people and places. This richness derives from the fact that this neighborhood has always been a place of welcome and it has been, and continues to be the center of the African American community.

- **CA-P6** Create an appealing environment that enhances the historic character while providing opportunities for existing and new development to grow, and serve the emerging needs of the diverse community.

- **CA-P7** Create a vibrant commercial district, encouraging dense urban development in the commercial areas and encouraging housing supportive of
the community through land use tools, such as rezones, design guidelines and incentives.

- **CA-G7** The Central Area is a culturally and ethnically diverse and economically strong community. Its business districts provide the goods and services needed for the multicultural community who live, work, worship and shop there.

- **CA-P38** Support vibrant, diverse and distinct commercial districts that provide a range of goods and services for the entire community.

Development on parcels proposed to be rezoned will be subject to design review, assuming they exceed thresholds for design review established in the Land Use Code. Design review considers the context and character of surrounding development in applying City design guidelines, thus providing an additional opportunity to address any potential incompatibilities between new development and development on adjacent parcels. It is not anticipated that the proposed text amendments will result in significant land use impacts, pursuant to SMC 25.05.675 J.

The proposed rezones are consistent with the land use designations on the Future Land Use Map, as amended by City Council in 2014 and 2015.

**Height, Bulk, and Scale**

Overall, the additional height proposed for the rezoned areas (outlined above) could result in blockage of some private views. The proposed development standards adding upper level setback, maximum façade length, and pedestrian connection requirements, will reduce such impacts. Individual development projects that utilize the proposed legislation’s zoning changes will be subject to environmental review (if they meet or exceed thresholds for environmental review) for height, bulk and scale impacts.

Bulk and scale impacts of projects developed pursuant to the proposed rezones may also be addressed by the City’s design review process. Specific height, bulk and scale impacts of proposed development will be determined at the time of project review. The proposed rezones are not expected to have a significant impact on height, bulk, and scale, pursuant to SMC 25.05.675 G.

**Transportation**

The affected area is approximately 9 acres and it is not possible to determine the location and/or intensity of individual projects that may use the proposed Land Use Code provisions. As described previously, the proposed rezones could increase the amount of growth over the next 20 years by about 314 housing units, 78,101 square feet of commercial use, and 260 new jobs compared with what would occur under the current zoning. This potential increase to the 20-
year growth estimate provides the basis for analyzing the level of impacts the neighborhood could experience due to the proposed rezones.

In general, the 23rd Ave. @ S Jackson-Union Urban Village is part of the City’s urban center and urban village strategy that seeks to focus Seattle’s share of the region’s growth in areas that can be efficiently served by urban infrastructure. Much of the area is already served by needed infrastructure – roads, sidewalks, water and sewer, schools and parks. Where there are deficiencies, they are localized and can generally be addressed by individual developments.

In total, a potential increase of 260 more jobs (of the type expected in a mixed-use area) would generate about 2,912 – 3,328 new daily trips, with 166-191 of these trips occurring in the AM peak hour and 246-281 occurring the PM peak hour. Assuming development over 2 acres, this adds up to about 1,456-1,664 new daily trips/acre, with 83-96 AM peak hour trips/acre, and 123-141 PM peak hour trips. The additional residential units would generate roughly 1,253-1,463 new daily trips, 97-113 AM peak hour trips, and 116-135 PM peak hour trips.

The affected areas are located along 23rd Avenue, and South Jackson Street. Twenty-Third Avenue is a north-south principal arterial that connects a variety of users to businesses, institutions and residences. Seattle Department of Transportation is working on the 23rd Avenue Corridor Improvement Project to improve transit speed and reliability and enhance the pedestrian environment. In addition to 23rd Avenue improvements, a neighborhood greenway will be built generally parallel to 23rd Avenue that will prioritize bicycle and pedestrian travel by providing a more comfortable environment for people to walk and bike. South Jackson Street is a minor arterial and is recommended to include protected bicycle lanes as indicated in the Seattle Bicycle Master Plan. Overall, all improvements mentioned above will serve increased volumes of pedestrians, bike riders, and transit users and support alternatives to driving. Additionally, the proximity of residential and commercial uses within the Jackson core may mean more people complete trips by foot, bike or bus.

Based on the 2011 Gap Report Update of An Assessment of Gaps in Seattle’s Open Space Network, the 23rd Ave. @ S Jackson-Union Urban Village has met the Population-based Goals. There are 33.48 acres of existing parks and open space within and abutting the Urban Village, which exceed the anticipated 5.78 acres needed to meet 2035 growth projections.

It is unlikely that the proposal will result in significant indirect or cumulative impacts related to transportation.

Public services/utilities

A review by Seattle Public Utilities staff indicates that the overall water, sewer and drainage utility systems are likely to be adequate to serve future demand levels. While some specific improvements may be needed, these improvements will be identified at the time of the future development. New development projects in this area could be required to perform analysis of development-related impacts on utility system infrastructure and, where necessary, to construct improvements that increase capacity and avoid service degradation. New development will also be required to provide storm water control as required under the Stormwater Code.
There are no known capacity constraints within the area’s substation and electrical system that could be exacerbated by this rezone. Minor site-specific feeder line improvements may be needed to accommodate future development, but would be coordinated at the time of future development.

The amount of growth introduced by the proposed rezone is within the range covered by the City of Seattle’s Comprehensive Plan for Fire Protection and Police Services.

Consequently it is unlikely that this proposal will result in significant indirect or cumulative impacts related to public services/utilities, other public services, including fire and police services, parks, and schools relative to already existing needs served by existing facilities and opportunities.

Conclusion

The proposed rezones in the 23rd & Jackson node of the 23rd Ave. @ S Jackson-Union Urban Village are not expected to have significant adverse impacts. The allowed height, bulk, and scale of development on the affected parcels are not expected to substantially increase over what is allowed by current zoning. Design review will be required of projects over the size threshold, reducing potential height, bulk, and scale impacts. Increased trips will be accommodated by the existing arterial capacity and existing and future transit service and the mixed-use nature of the area are likely to reduce levels of auto traffic from development projects in the rezoned areas.
DECISION – SEPA

This decision was made after review by the responsible official on behalf of the lead agency of a completed environmental checklist and other information on file with the responsible department. This constitutes the Threshold Determination and form. The intent of this declaration is to satisfy the requirements of the State Environmental Policy Act (RCW 43.21C), including the requirement to inform the public agency decisions pursuant to SEPA.

[X] Determination of Non-Significance. This proposal has been determined to not have a significant adverse impact upon the environment. An EIS is not required under RCW 43.21C.030 2c.

[ ] Determination of Significance. This proposal has or may have a significant adverse impact upon the environment. An EIS is required under RCW 43.21C.030 2c.

RECOMMENDED CONDITIONS – SEPA

None.
