Connecting parks and public space to enhance mobility and livability in First Hill.

WHY FIRST HILL?
The First Hill neighborhood benefits from its close proximity to downtown Seattle and hosts some of the city’s largest major institutions. The 1998 neighborhood plan recognized the need to improve existing transportation infrastructure for car, bus, bike and pedestrian travel on First Hill and the need to increase the amount of open space.

Both the 2000 Pro Parks Levy and the 2008 Parks & Open Space Levy identified First Hill as a priority area for development of a neighborhood park and funds were allocated for land acquisition. In 2005, a “First Hill Urban Village Park Plan” was developed to offer a strategic approach for identifying potential sites for a new park through the Pro Park Levy acquisition project.

Despite significant efforts in securing an appropriate site(s) for park use, land acquisition has proven challenging and the Levy money remains unspent. A new approach has been taken to consider street right of way as a means to achieve not only connectivity, but also park space that serve the working and residential populations of First Hill.

The Public Realm Action Plan includes the development of near term implementation strategies to expand the public space network through right of way reallocation, private development partnership and strategic site selection for potential acquisition. This Public Realm Action Plan has identified key streets to be developed into street concept plans for adoption into the Right of Way Improvement Manual.

WHAT IS A STREET CONCEPT PLAN
Street Concept Plans give a vision, not a complete design. There are many additional steps and further design refinements along with community input in order to bring them to implementation. There is also the additional requirement of adoption into the City of Seattle Rights of Way improvement manual to leverage the ideas into future development.

According to the Seattle Department of Transportation’s Street Design Guidelines Chapter 6.1: “Concept Plans solidify a vision for the street or streets included and can tie that vision back to other planning and design documents that the neighborhood or City may have developed. Concept Plans are also useful as a vehicle for discussion between the proponent and the City about appropriate streetscape elements given the adjacent land use and the street’s operational characteristics. Typically, the Concept Plan provisions are implemented over time by multiple property owners as parcels on the block re-develop. The provisions in a Concept Plan are voluntary. However, property owners are encouraged to follow them in order to achieve their intent."

For more information on Street Concept Plans, visit SDOT’s website at http://www.seattle.gov/transportation/rowmanual/manual/6_1.asp.

PLANNED STREET IMPROVEMENTS:

2015
- Broadway Streetcar
- Madison Bus Rapid Transit Concept Design Phase
- Construction start date TBD

2017
- Neighborhood Greenway - Terry Ave / Melrose Ave E / Franklin Ave E (From Broadway to Eastlake Ave E)
- Neighborhood Greenway - Union St (From Broadway to 9th Ave)

2018
- Neighborhood Greenway - Marion St (From 7th Ave to Broadway)

Neighborhood greenways are a combination of small improvements that make residential streets safer and calmer for people of all ages and abilities.

Madison Street Bus Rapid Transit service will be fast, reliable and frequent. It will serve densely developed neighborhoods in First Hill, the Central Area, and downtown Seattle, connecting dozens of bus routes, the First Hill Streetcar, and ferry service at the Colman Dock Ferry Terminal.
Existing Site Photos + Character

University Street, 8th Avenue, Terrace Avenue and Terry Street are adequate streets, but with future upgrades and neighborhood development they could be a special element in the neighborhood. These streets could benefit from upgrades to the landscape, increased pedestrian lighting for safety, narrow street width to calm traffic and consistent ADA elements.

## Park and Open Space Criteria

<table>
<thead>
<tr>
<th>Park Types</th>
<th>Example</th>
<th>Definition</th>
<th>National Criteria</th>
<th>Local Criteria</th>
</tr>
</thead>
</table>
| **Parklet**        | ![San Francisco pocket park](San Francisco pocket park.jpg)               | Parklets convert on-street parking spots into public spaces. Cost-effective tool for increasing our city’s public open space | - permitted on streets with speed limits of 25 mph or less  
- streets with grade less than 5%  
- at least 20 ft long and no wider than 6 ft  
- 4 ft buffer on either side | - built in lanes already with parking  
- street with grade less than 5%  
- at least 20 ft long and no wider than 6 ft  
- 4 ft buffer on either side |
| **Minipark/pocketpark** | ![San Francisco pocket park](San Francisco pocket park.jpg) | Miniparks/pocket parks consist of small cultural or natural areas with recreational, reflective or City beautification potential | - 2500 sq. ft to 1 acre  
- serve as a recreational or beautification space where acquisition of larger parks is not possible  
- linked to community pathways or sidewalks | - 2500 sq. ft to 10,000 of usable park area  
- surrounded by residences, small commercial and non-arterial streets  
- serves immediate neighborhood, less than 1/4 mile in distance |
| **Active Zone**    | ![Seattle Occidental Park](Seattle Occidental Park.jpg)                   | Park Active Zones in the Public Right or Way that provide areas for exercise and outdoor activity        | No Equivalent Classification                                                                          | - between 500 - 1000 square feet  
- serves the surrounding neighborhood and also provides a network of active zone openspaces  
- provides activity to potential adjacent uses |
| **Downtown Park**  | ![Seattle BellStreet](Seattle BellStreet.jpg)                            | Small islands within the urban downtown that present opportunities to enhance the city’s character. The current determined boundary and definition of “downtown” may shift as the city changes | No Equivalent Classification                                                                       | - 4300 sq ft to 22,000 sq ft.  
- current boundaries: south lake union to international district, Elliot Bay to I5.  
- programming could include, buskers, food carts, events |
| **Neighborhood Park** | ![Seattle Cal Anderson](Seattle Cal Anderson.jpg)           | Larger than pocket parks and serve the surrounding neighborhoods for multiple uses                     | No Equivalent Classification                                                                       | - between 10,000 - 40,000 square feet  
- serves surrounding neighborhood between 1/4 to 1/2 mile  
- multiple uses including play areas, small fields, benches, picnic tables & paths |
| **Boulevard/ Green Streets**  | ![Seattle BellStreet](Seattle BellStreet.jpg) | legally designated as an extension of expansion of a dedicated street with continues to serve as right-of-way in addition to being park land | - size varies  
- location dependent on resource availability and opportunities  
- effectively tie park systems together to form a continuous park environment | - size varies  
- linear parks that typically serve as an aesthetically pleasing transportation corridor  
- location along arterials roads favoring places with views |
Proposed First Hill Open Space Network is a total of ~50,000 Square Feet

Existing Open Space 235,224 sf
- Freeway Park (226,512 sf)
- First Hill Park (8,712 sf)

Potential Additional Open Space ~50,000 sf

Park and Open Space Criteria
What is an Active Zone?

Park Active Zones are areas in the Public Right of Way that provide areas for exercise and outdoor activity. These can range from elements with prescribed uses to more flexible, open ended use design options.
Park and Open Space Criteria

What is a Prototype Park?

An interim or prototype design can serve as a bridge to community, helping to build support for a project and test its functionality before going into construction. This type of pilot project would offer real-world reactions, including the level of engagement of property owners and street users. The Prototype Park is a way to test ideas and gather research that can inform the long term thinking and strategies needed to design for the long term use.

Neighborhood Greenways

What is a Neighborhood Greenway?
Seattle Neighborhood Greenways are residential streets generally one off of main arterials with low volumes of cars going slowly enough so that people who walk or ride bicycles feel safe and comfortable.

Existing and Future First Hill Greenway Network

GREENWAY DESIGN ELEMENTS

**Slow Speeds and Stop Signs**
- Calm traffic entering and crossing the greenway
- Drivers better able to stop and prevent collisions

**Safer Crossings at Busy Streets**
- Easier for seniors and children to cross
- Make motorists aware of people walking and biking

**Speed Humps**
- Slow motorists and people riding bikes
- Reduce cut-through traffic

**Placemaking**
- Promote the activation of public space

**Signs and Markings**
- Direct people walking and biking to and along the greenway
- Help motorists know people walking and biking are present

**Smooth Sidewalks and Pavement**
- Safer for you and your family to walk and ride bikes
- Help people in wheelchairs or with strollers

University / Union / Boylston Street Prototype Park
Engagement Activity - August 2014

To assist in engaging the First Hill Community in the First Hill Public Realm Action Project, Seattle Department of Transportation, Seattle Parks, Seattle Department of Planning along with the First Hill Neighborhood Association, Framework, The Better Block, and Fehr and Peers hosted a Street Scrabble Event in the intersection of Union, University and Boylston. This event created buzz in the neighborhood for the project and had an estimated 200 people in attendance throughout the night.

- ~ 970 likes from all those photos on Instagram and Facebook

Quotes from Social Media and Surveys
“Sometimes people in Seattle get together and play a giant game of Scrabble! - Oh how cool! - Yeah it was pretty awesome!”

“I really really love my job” - First Hill Association Coordinator

“Over posting because I love that I live here and want to brag”

“I love my City! Someone set up a giant scrabble board in an intersection on capitol hill! WOW!”

“It’s cool that they, the department of transportation, did it to raise awareness on lack of open space. I’d argue they should have them in a variety of neighborhoods to kick into action some park initiatives.”

“I’ve lived in the neighborhood 20 years, it’s a dangerous spot, so this ideas is great”

“Can I vote yes several times!” in response to the question on if this intersection should be a park.

“Though I drive through this park often, I really endorse this concept.”
University / Union / Boylston Street Prototype Park
Interim Concept

- Extend epoxy 2 x 2 grid
- 11 tables
- 32 chairs
- Double striped line
- Bollards or planters every 6'
- Umbrellas
- Bicycle entry markings
- Extend and enhance sidewalk planting
- 15 small planters
- 8 large planters

TERRACE STREET
Terry Avenue - Spring to Terrace

First Hill Public Realm Action Plan
2014

Existing Open Space: 0 square feet

New Open Space: ~40,000 square feet dependent on desired options
The goals of Terry Avenue heard from the community stakeholder group include:

- A multi-use street with primarily pedestrian focus
- A green, lush environment in the streetscape
- Moments to sit and enjoy be an active participant in the public realm
- Safety throughout the street and intersections
- Leverage special blocks for redevelopment
- A complete full street focused on pedestrian as a grand gesture along Terry from Yesler Terrace to Pine St.

Block locations titled Phase 1 references areas that have the potential to be developed sooner in the future. These blocks are referenced as focal areas for Terry Avenue in this document.

Terry Avenue - Spring to Terrace
Approach to Pedestrian Priority Street
Terry Avenue - Spring to Terrace
Approach to Pedestrian Priority Street

Two design options are provided for incremental development along Terry Avenue including pedestrian pockets and parking pockets with up to 12 stalls per block. This pocket approach will allow development to occur in response to adjacent land use and desires, incrementally leading to the whole community vision of this street.

The community goals for the vision of Terry include:

- Shared-use street with focus on pedestrian experience
- Street zoned for continuity of emergency access with flex zone for contextual response
- Material selection to be consistent to create cohesive pedestrian experience
- A material palette of simple hardscape, an abundance of plantings, unique paving binding together both sides of the street, and the possibility to close off portions of the street for special occasions.

Example Diagram of Terry Avenue Phased Implementations:

1. Terry Avenue pedestrian pocket
2. Terry Avenue parallel parking pocket

Typical Material Examples
Terry Avenue - Spring to Terrace
Overall Concept Plan - Future Vision

1. Turnaround and Vista
2. Curbless, Pedestrian Street (Phase 1)
3. 18’ setback at potential future BRT station stop
4. BRT development, options: stop along curb or center street
5. Potential Future Open space
6. Move bike share to Columbia

PUBLIC ACCESS
