

# TERRY PETTUS PARK RENOVATION REVIEW SCHEMATIC DESIGN

Please join Seattle Parks and our design team Jones & Jones Architects and Landscape Architects to review the proposed schematic design and provide final input for Terry Pettus Park. This incorporates the newly acquired property to the south, allowing for a new expanded park design.

At the last meeting, the design team heard from the community that they preferred the two concept alternatives Terraces and Restoration.

The design team combined the features of these two concepts along with other public input, and developed the proposed schematic design. The proposal improves universal access across the site and includes multi-level terraces for sitting and picnicking, restored upland habitat areas, a new dock, and a new beach.

The design team is eager to share this plan with you! Please use the link below to register for an online Zoom public meeting, where you will hear about the proposed schematic design, have an opportunity to provide final feedback, and ask the design team questions.

Terry Pettus Park is located at 2001 Fairview Ave E.
