

WEST SEATTLE AREA ACCESS STUDIES

Fall 2017

SHARE YOUR FEEDBACK UNTIL OCTOBER 31 – <http://bit.ly/westseattleparking>

PROJECT OVERVIEW

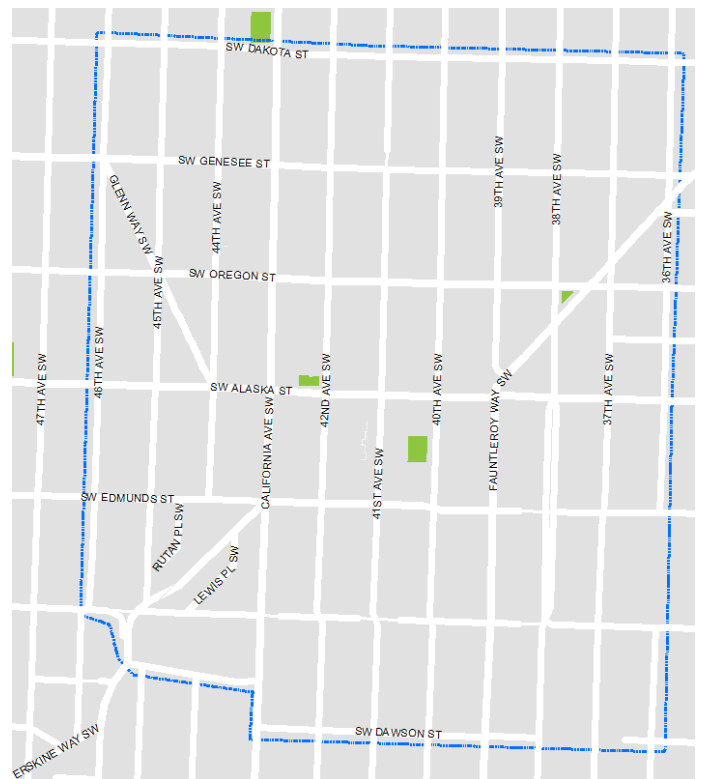

As Seattle continues to grow, so too does the demand for reliable access in the City's busiest areas, including our urban villages and neighborhood business districts like West Seattle. SDOT is in the process of conducting comprehensive area parking and access studies in residential and commercial areas near West Seattle Junction and West Seattle Triangle. These studies will document how people currently access the business area today (car, transit, bike, walking), how commercial and residential parking is used, and inform potential future changes to improve access.

STUDY AREA MAP

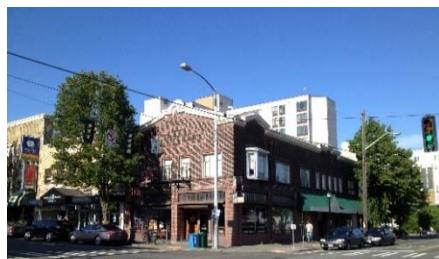

The project area includes the West Seattle Junction and Triangle areas and is bounded by 36th Avenue Southwest to the east, southwest Dakota street to the north, 46th Avenue Southwest to the west and Southwest Dawson Street to the south.

WHAT YOU CAN EXPECT

- SDOT will conduct a commercial area parking study and a Residential Parking Zone (RPZ) study this fall to better understand the parking usage in the area.
- SDOT will collect feedback on area parking and access from residents, businesses and visitors through an online survey in the fall.
- SDOT will also conduct an intercept survey in the fall to determine how and why customers, visitors, and employees are traveling to and parking in the West Seattle Junction area.
- Data from these studies and surveys will inform parking and access improvement strategies for the West Seattle area.
- If there are identified changes, SDOT will develop a proposal and collect feedback in early 2018.

Parking at Junction Plaza Park at 42nd SW and SW Alaska St

Parking at California Ave SW and SW Alaska St

Parking at Fautleroy Way SW and SW Oregon St
