Parking Occupancy Study

In October 2022, SDOT conducted a parking occupancy study of the Eastlake neighborhood. The study area included all blocks with parking from the north end of Eastlake Ave E where Fairview Ave E meets I-5, down to the southern end of the neighborhood around the E Galer St/Eastlake Ave E area.

To see the results of the parking study please visit www.seattle.gov/transportation/EastlakeRPZ.

Proposal

After reviewing the results of the parking occupancy data and existing curbside restrictions, we are proposing to make the following changes in the area (please see the map for more details):

- New RPZ 8 restrictions (2 hours except by permit, 7AM – 6PM Monday-Saturday) on currently unrestricted blocks around residential parcels
- New 2-hour time limits around businesses and commercial parcels
- New paid parking blocks on the southern end around dense commercial office and business parcels
- Standardize RPZ restrictions to 2 hours except by permit (7 AM – 6 PM Monday-Saturday) throughout the area
- Standardize general time limits to 2 hours where signed throughout the area

Remove the “No Parking, except by Zone 8” evening restrictions

New RPZ blocks will help increase the supply of available parking for residents, while new time limited and paid parking blocks will help increase turnover for businesses and improve short-term access for customers. This proposal represents a balance between many competing needs at the curb. In addition, standardizing restrictions across the area will help make parking enforcement more efficient and effective, as well as make restrictions clear for customers and visitors to the area.

Next Steps

July 2023: Release proposal and collect feedback through our website

August 2023: Hold virtual public hearing on RPZ changes at 6 PM on August 15

September 2023: Release final plan
