

## 3rd Ave Improvements: Paving and Water Main Replacement

### What's happening?

Starting summer 2024, we will:

- Repave 3rd Ave between Virginia St and Pine St and rebuild accessible curb ramps
- Work with Seattle Public Utilities to replace a 100-year-old water main between Virginia St and Pine St

### What to expect

Construction is expected to take about 6 months. During construction there will be:

- Short-term water shut offs with notifications provided in advance
- Temporary travel lane, sidewalk, and crosswalk closures and detours
- Temporary driveway impacts
- Noise, dust, vibrations, and construction equipment staged in the work area
- Temporary bus stop closures and relocations. Bus service will be maintained during construction.

### Stay informed

Visit our project webpage to learn more and sign up for email updates. We will update our webpage and send emails with more information about project schedule, construction activities, and what to expect during construction.

webpage and learn more  
about these 3rd Ave  
improvements

### Other changes to 3rd Ave

Once paving and water main replacement are complete, we plan to extend the 6 AM - 7 PM bus only restrictions 3 blocks north from Stewart St to Blanchard St. This change will improve bus travel times and help buses travel more efficiently. In 2025, we'll work with King County Metro to replace real-time bus arrival signs at bus stops on 3rd Ave and Westlake Ave.
