B. Actions for Spill Response			
Case Type	Date	Problem Cause	Case Summary
SPILL	1/7/2015	Illegal Dumping	Report from SPU field crew about grease being dumped into CB. Checked reported CB and found that cooking oil had indeed been dumped into it. Created work order to have CB cleaned. Unable to find responsible party.
WQ	1/8/2015	Construction	City Worker contacted Inspector regarding sediment/water leaving a likely permitted construction site. Inspector provided contact info for DPD.
SPILL	1/13/2015	Construction	SCL was working in a vault for the Thornton Creek Confluence Project. Groundwater in the vault was pumped to the street, entered 2 CB's and discharged to Thornton Creek. Turbid water entered the creek, and the pumping was stopped. A vacor truck was brought in later to vacor up the water on the street and continue pumping groundwater out of the vault while work continued in the vault.
SPILL	1/15/2015	Construction	Report of white paint coming off of building through roof drains. Arrived at site and observed white liquid coming from roof drains and going to nearby CB. Spoke to building owner to try to determine source, they said they did not know. Requested that building owners find source and control it. Referred to SWQ team for follow up. Inspector spoke with contractor who had applied roof coating the previous day and was taking responsibility of cleaning up spill. Spill was cleaned up from sidewalk, gutter, inlet, and CB.
SPILL	1/13/2015	Leaking Vehicle (no repair)	Report of oil dumped to gravel. Arrived onsite and observed that approx. 10 gallons of product had been dumped to gravel. Some made it to a CB also. Called in contractor to come and clean up the impacted areas and structures. Also advised SDOT that gravel needed to be filled back in after removal of contaminated material.
WQ	1/31/2015	Heating Oil Tank Leak	Received report of sheen on Thornton Creek from the prior weekend. Conducted site visits and did not see any sheen. Received another call about sheen, conducted site visit and found sheen entering creek from retaining wall. Source was leaking heating oil tank. Issued NOV and homeowner had tank pumped out and repaired.
WQ	2/2/2015	Mobile business not implementing BMPs	Received report of concrete slurry entering drain at SDOT project. Educated about code and documented. Issued internal compliance letter.
SPILL	1/30/2015	Fixed business not implementing BMPs	Gas station had a spill of gasoline at the pump island. Station did not report of clean up the spill. The spill was observed by SPU inspector and called into ORC & ECY. Station employees did not clean up the spill in the catch basin (about 1 gallon) until advised to do so by SPU. Spill was cleaned by contractor that afternoon.

SPILL	2/3/2015	Broken/Blocked side sewer or pipe	On 2/2/15 Approximately 400 gallons of sewage diluted by groundwater reached Puget Sound just south of 1940 Harbor Ave SW. SPU Spill responders were not notified of the spill for approximately a day after the sewer break. SPU field crews contact Dept. of Ecology and ERTS'ed the release. The broken sanitary line was diverted to a downstream sanitary maintenance hole. No further sewage reached Puget Sound. On 2/3/14 Seattle/King Dept. of Health and WA State Dept. of Health were notified of the release. After conferring with Seattle/King Dept. of Health, due to time lag of spill response, posting and sampling of beach was not required. Further phone calls regarding the issue took place on 02/04/14 further clarifying initial responses and actions. No further actions necessary- Case closed.
SPILL	2/6/2015	Construction	Received report of turbid water leaving construction site. Spill response asked responsible party to clean curb line and CB's, task completed that day. Made referral to DPD due to construction permit. Filed ERTS
SPILL	2/5/2015	Unknown	Received report of sewage overflowing from SPU mainline to storm CB. Conducted site visit, documented actions, alerted proper authorities. Sewage discharged to Lake Washington via the MS4.
WQ	2/17/2015	Potable Water Line Break	Due to an SPU drinking water repair crew no implementing proper BMP's at a repair sediment was released to the right of way. This sediment reached the MS4 via a catch basin A local private contractor next to the release cleaned sediment from the right of way. An SPU spill responder also swept sediment from the right of way. Internal Compliance letter sent to City Permit Coordinator. Director of Water Ops sent NOV explanation letter and process to mitigate sediment to MS4 moving forward.
SPILL	2/19/2015	Construction	Spill responder received call of green dye at Stone Ave N/Northlake Way. Stormwater at outfall was gray, likely concrete washwater and not green dye. Attempted to locate cause of discharge but could not locate.
WQ	3/11/2015	Fixed business not implementing BMPs	Referral of illicit discharge complaint from Stormwater Facilities, contacted responsible party to discuss. Issued NOV.
WQ	3/4/2015	Broken/Blocked side sewer or pipe	Complaint that sewage surfacing in alley. Apartment at 6206 has broken side sewer leaking in alley and flowing into a storm drain at corner of 11th Ave NW & NW 62nd St. SPU issued NOV with deferred penalty requiring side sewer repair. On 3/26/15 side sewer repair completed and penalty was not issued.
SPILL	3/19/2015	Illegal Dumping	FOG discharged to a CB from an unknown source. Cleanup done by SPU DWW Crews. Did not make it to the water way.

WQ	3/6/2015	Construction	Complaint stated concrete truck washed out onto street. New remodel 2 days previous poured concrete driveway and stairs stain in curb line from remodel into inlet at N 87th St. Gutter and inlet was cleaned by contractor. An NOV and penalty will be issued.
WQ	3/30/2015	Fixed business not implementing BMPs	Complaint of recycle cart being dumped into storm drain. SPU determined that company dumped putrid water from illegally dumped recycle cart into storm drain. Contents had foul odor and maggots. Company was directed to clean out the catch basin.
SPILL	4/8/2015	Illegal Dumping	Report of dumped oil in type 2 CB. Found old oily material. City spill contractor activated to clean. No source found.
SPILL	4/9/2015	None	Received report of fish kill. Observed three fish in creek. Determined these were spawning deaths.
WQ	1/27/2015	Mobile business not implementing BMPs	On January 27 2015, Inspector received complaint from SPU SWAMP team detailing evidence of soap suds in MS4. After investigating issue, Inspector found Responsible Party who was improperly washing building roof to MS4. Business inspection undertaken. NOV with suspended penalty, contingent on responsible party acquiring a spill kit and plan. Plan detailed proper building exterior maintenance. Responsible party complied with stipulations of NOV. Documents detailing case are stored both in Complaint database and Business Inspection database.
WQ	4/14/2015	Illegal Dumping	Received referred direct report from crews. Contacted renter and property owner, neither claimed responsibility. Crews will repair.
SPILL	4/20/2015	Broken/Blocked side sewer or pipe	SPU DWW crew reported a broken side sewer at 2821 S Walden St. DWW setup a pump & bypass because the overflow was going to the MS4. DWW made contact with the property mgmt and contractor was hired to make the repair. Work started on 4-20-15 with excavation of the side sewer line to make the repair. On 4-21-15, contractor stopped the flow but work continued.
SPILL	4/20/2015	Broken/Blocked side sewer or pipe	SPU DWW crew reported a broken sewer at 3201 & 3211 SW Avalon way. The side sewer was overflowing from a cleanout and then flowing downhill to the east onto the West Seattle Golf Course. SPU diverted the flow away from a CB that was being impacted onto the golf course grass to infiltrate. Property mgmt at 3201 & 3211 SW Avalon Way hired contractor, who arrived quickly (that afternoon) to make the repair by snaking the line and clearing the blockage. The contractor also CCTV'd the line and it showed no significant defects in the line. The side sewer is now functioning.
SPILL	4/22/2015	Construction	Received report of dirty water being dumped. Conducted site visit. Unknown what was dumped, when and by whom. Some stain on the street, but looked as though sweeper or spill efforts had already been used. Filed ERTS. Case Closed. Reporting party referred to DPD.

WQ	4/28/2015	Construction	Complaint that construction company had discharged concrete slurry to the street and drains. A homeowner contracted work to put in an exposed aggregate driveway and contractor spilled slurry to drainage. Contractor immediately cleaned street and drainage. Contractor was issued a NOV and penalty.
SPILL	4/28/2015	Illegal Dumping	Observed spill in CB of oil. Had spill cleaned up by DWW crew an hour later and before rains. Unknown when spill occurred. No follow up needed, unknown who dumped it. Found during routine CB screening.
SPILL	5/1/2015	Accidental Spill	Call of concrete washed to ditch. Observed concrete runoff in ditch, none downstream. Code education given as concrete was hardened and actually repaired ditch potholes.
SPILL	5/2/2015	Accidental Spill	Received report of spill at Port Terminal. Site visit and drain assessment. Spill contractor cleaned impacted structure.
WQ	6/2/2015	Unknown	Source traced elevated bacteria and dye tested all homes w/possible cross-connections. We did not see dye in storm system. Exercised all possible sources and did not find anything. Source could likely be infiltration from a leaking sewer.
WQ	6/2/2015	Illicit Connection	Elevated bacteria led inspectors to 3540 S Kenyon St. where a cross connection was confirmed. An NOV was sent & the repair was made within the NOV timeframe.
WQ	5/19/2015	None	Received elevated potassium (6.94 mg/L) in MH (Feakey 1889431). Source traced to apartments building which has lots of planters and vegetation. Source is most likely from nearby irrigation.
WQ	5/19/2015	Illicit Connection	Discovered illicit connection in garbage corral area of nursing home. Business Inspection program is working with business to have repair made.
WQ	5/19/2015	Illicit Connection	Elevated bacteria led inspectors to 4454 S Thistle Pl where a cross connection was observed. A NOV was sent and the homeowner had the appropriate repair made.
WQ	6/2/2015	Illicit Connection	Source traced elevated bacteria to 6773 37th Ave S. Where a cross connection was discovered. Homebuilder took responsibility & paid to have the repair made.
WQ	6/8/2015	Broken/Blocked side sewer or pipe	Report of leaking side sewer. Initially believed to be ground water but later determined to be wastewater from the lower portion of the building.
WQ	5/5/2015	Construction	Received report of messy concrete work, conducted site visit, wasn't able to confirm responsible party. Called ORC to have drain cleaned.
WQ	4/29/2015	Broken/Blocked side sewer or pipe	House on beach had its side sewer broken and sewage was discharging onto beach. After site visit confirmed broken side sewer NOV was issued to repair broken pipe. Pipe was fixed and discharge was stopped.
WQ	5/12/2015	None	Received elevated fluoride value which was attributed to irrigation water.
WQ	5/27/2015	Other	Received elevated conductivity in MH which was attributed to moss killer being placed on the roof of 8349 39th Ave S. Spoke to homeowner & educated him that this is not permissible in the City of Seattle.

WQ	6/17/2015	Construction	Received referral from spills to verify cleaning of street. Contacted responsible party to reiterate need to clean, verified completion.
SPILL	7/9/2015	Broken/Blocked side sewer or pipe	Sewer overflow to ROW & street and into inlet. SPU field crew cleaned drainage, plumber fixed blockage in side sewer.
SPILL	7/10/2015	Accidental Spill	Spill of liquid water based asphalt sealant entered drain and into river. Responsible party capped drain, hired contractor to clean drain & outfall line.
WQ	7/11/2015	Broken/Blocked side sewer or pipe	Report of broken side sewer leaking into ROW. Property owner repaired issue.
SPILL	7/13/2015	Illegal Dumping	Grease spill in alley from vendors at the West Seattle Street Fair. Grease on street surface and in drain. Requested vactor truck from ORC to clean up drain.
SPILL	7/13/2015	Accidental Spill	Hydraulic spill from construction equipment onto roadway and dock surface. Some oil spilled to shore and Duwamish River spilling partly cleanup up placed boom on river but only sheen present.
WQ	6/30/2015	Other	Elevated fecal & K values led inspectors to an apartment building where the dog run area from the building was determined to be discharging to the MS4. The repair was made by the apartment complex.
WQ	7/14/2015	Broken/Blocked side sewer or pipe	Broken internal sewer line discharging to a parking area. Repaired by the property owner. Affected private CB cleaned.
WQ	7/26/2015	Fixed business not implementing BMPs	Report of mop bucket dumping at a business. Confirmed that it occurred.
SPILL	7/29/2015	Unknown	Report of milky substance in detention pond. Arrived at site and observed that pond had a milky appearance. I source traced the area but was unable to find the source.
SPILL	7/9/2015	Illicit Connection	Resident reported sewer odors to ORC. SPU Field crew responded and identified a discharge from interior bathrooms and onsite storm catch basin. Dye applied to CB showed positive in downstream drainage pipe. Property owner was notified by phone to correct the illicit connection.
WQ	8/4/2015	None	Received elevated fluoride (0.7 mg/L) in MH (Feakey 7112998). Source traced flow to a building complex with lots of vegetation on the grounds. The source is most likely groundwater from a detention system.
WQ	8/4/2015	None	Received elevated fluoride (0.68 mg/L) in MH 668365. Source traced to a nearby building with lots of vegetation/roof-garden, source is most likely irrigation.
WQ	7/14/2015	Unknown	
WQ	7/14/2015	Unknown	Investigated source of high potassium (7.2 mg/L) in MH 856722_E. We checked numerous times for flow at this MH & 3 upstream. There has not been flow each time we checked w/in the past month. Source was most likely an irrigation event.

WQ	7/21/2015	Unknown	Received elevated bacteria (8360 cfu/100mL) in MH 671389. Re-sampled several times and always got low results. Trigger was most likely due to an isolated incident or laboratory error.
WQ	8/12/2015	None	Received elevated potassium (6.69 mg/L) in MH (Feakey 662991_E). All other parameters had low results. Source is most likely groundwater.
SPILL	8/29/2015	Motor Vehicle Accident	Truck overturned on roadway and spilled diesel. SFD put spill control under fuel tank and plugged leak. About 1 gal of diesel entered drain. Trucking company hired contractor to clean fuel. Outfall was boomed as precaution. No fuel entered storm lines and was held in CB.
SPILL	9/3/2015	Mobile business not implementing BMPs	A mobile food truck was improperly washing the interior of the truck and allowing the wash water to discharge to the street and separated sewer. Educated staff and owner about proper BMP's and will follow up with a normal business inspection.
SPILL	9/4/2015	Motor Vehicle Accident	Spill of sewage from an RV involved in a motor vehicle accident. No sewage reached the MS4. The spill was cleaned up by SPU field crews. A small amount of wash water reached a catch basin along Northrup Way; this basin was also cleaned.
SPILL	9/4/2015	Broken/Blocked side sewer or pipe	Side sewer blockage as caused sewage to surface through an inlet/cleanout in the sidewalk. Sewage impacted a planting strip bioswale area but had not made it to the stormwater catch basin. The property manager hired a contractor to clear the blockage.
SPILL	9/9/2015	Unknown	Inspector with SPU Spill Response received a spill page on Wednesday, Sept 9th at 12:46pm from Port of Seattle's, Marine Maintenance Division. According to the report, a Port of Seattle employee had observed on Friday, September 4th at 9:15am a discharge coming from a pipe into Shilshole Bay Marina/Puget Sound. The Port employee took a photo, and checked back an hour later and observed that the discharge had stopped. No source tracing was done to find the source of the spill and no ERTS was filed by the Port, and no report was made to SPU until Sept 9th when it was discovered that it was an SPU owned pipe.
SPILL	9/11/2015	Construction	Midday on 9/10/15 around 3:00pm reporting party observed plume at outfall, source traced to Washington Street, nothing. 80 S Main was pouring concrete and spilled some on sidewalk and was using hose to clean sidewalk. SPU notified 9/11/15, spill cleaned up by contractor, waterway not impacted by this spill. Business need spill plan, kit and SMC rules on concrete pouring.
WQ	9/1/2015	Other	Source of elevated fluoride is determined to be irrigation as no other parameters were elevated, closed.
WQ	8/25/2015	None	Source traced high potassium from MH (Feakey 1258598_N) to Feakey 1252890. Most likely source of high potassium is groundwater, Closed.
WQ	9/8/2015	Unknown	

WQ	9/8/2015	None	Received elevated potassium which was attributed to natural processes in the groundwater in this area.
WQ	9/8/2015	Other	Elevated potassium was source traced back to a rooftop garden.
SPILL	9/14/2015	Unknown	Received report of paint spill in pond 6 of Thornton Creek. Inspectors did source tracing upstream in system and talked to businesses and crews in the area. Never observed source upstream and unknown what caused spill or what it was. Checked downstream and hand not moved downstream much if at all by the time we left site. Case referred to SWQ Complaint Program to follow-up and keep an eye out.
SPILL	9/17/2015	Motor Vehicle Accident	Semi truck was in an accident on I-5 & spilled ~50-100 gallons of diesel into the catch basins on I-5 which drains to an outfall at E Garfield St & Fairview Ave E. SPU & spill contractor conducted the cleanup.
SPILL	9/27/2015	Leaking Vehicle (no repair)	SPD reported that a tow truck attempted to tow a RV and it leaked 10 gallons of sewage to the street and impacted catch basins. I responded and observed sewage on the street around the RV, a smell of sewage odor, and 3 impacted CB's. I called NRC for cleanup and they subcontracted with Flohawks, who pressure washed the street and cleaned 4 CB's (one was adjacent to the RV and we were uncertain if it had been impacted and cleaned as a precaution).
WQ	10/21/2015	Broken/Blocked side sewer or pipe	Side sewer overflowing onto sidewalk and down to SD on 14th Ave. Inspector contacted property owner to have blockage repaired.
SPILL	10/15/2015	Accidental Spill	Spill of a few gallons of diesel to pavement and adjacent catchbasin at a gas station. Spill appears to be from an unattentive pump operator. The spill only impacted a single catch basin. The gas station hired a contractor to clean up the spill.
WQ	10/29/2015	Construction	Received report of turbid water in creek. Investigated and found construction site that was dewatering to ditch that was causing turbid conditions. Had site put in proper BMP's and also issued NOV.
WQ	11/2/2015	Mobile business not implementing BMPs	SPU DWW Crew caused illicit discharge of sediment to creek. Issued internal compliance letter.
SPILL	11/5/2015	Leaking Vehicle (no repair)	Spill of diesel to parking lot of diesel. Only sheen into catch basins. Spill Cleaned by property manager.
SPILL	11/9/2015	Illegal Dumping	On 11/9/15 Inspector responded to report of Illegal Dumping/automotive fluid spill at intersection of 23rd Ave NE & NE 105th St. Inspector secured remaining unspilled waste & cleaned recoverable product from street & ditch line. DOE was ERTS'd photos taken. Illegal dumping also notified to remove waste.
WQ	11/11/2015	Construction	Received first report after hours of turbid water. Spill call the following day about issue. Spill response found contractor de-watering, instructed them to stop.

SPILL	11/12/2015	Construction	Construction site practices lead to a turbid water discharge to Kramer Creek. Site referred to Ecology and SDOT. Corrective Action Internal Compliance Letter sent to SDOT on 12/8/15
SPILL	11/12/2015	Leaking Vehicle (no repair)	Spill of motor oil to roadway in combined area from King Co Metro Coach. Spill cleaned up by King Co Metro Crew.
SPILL	11/13/2015	Accidental Spill	Several small spills caused considerable sheen and small impacts to catch basins at QFC. Poor training and initial cleanups contributed to spill impact. Heavy rain and traffic also spread sheen. The responsible party hired a contractor to cleanup spill.
SPILL	11/15/2015	Broken/Blocked side sewer or pipe	Combined sewer blockage caused discharged of combined sewage and stormwater surfacing onto right-of-way at Orchard, Delridge, and Myrtle Ave. Flow impacting Longfellow creek. Surface flooding onto Delridge Ridge Way and Myrtle street. SPU Field Crews removed the blockage and rerouted the flow. SPU Spills posted warning signs.
SPILL	11/17/2015	Accidental Spill	Spill of less than an ounce of fuel from dropping a tiki torch. All fuel either flushed by rain or evaporated. No cleanup or recovery possible. Homeowner explained that the torch is secure and no further risk of spills.
SPILL	12/3/2015	Leaking Vehicle (no repair)	Vehicle leaked oil onto the street & into nearby inlet. Contracor cleaned the street & drains.
SPILL	12/5/2015	Unknown	Received a report of sheen coming down the roadway but the sheen was gone upon arrival. It was most likely washed away by the heavy rain.
SPILL	12/5/2015	Unknown	Received a report of sheen on the roadway but by the time I arrived the sheen was gone. It was most likely washed away by the rain.
SPILL	12/15/2015	Broken/Blocked side sewer or pipe	Responded to report of sewage from side sewer break. Talked to crews and property manager. Notified we would send NOV.
SPILL	12/17/2015	Unknown	The KC Environmental Lab reported a 2500' x 40' sheen on the ship canal coming from the direction of the Fremont Bridge. They also reported that they see the sheen periodically. Spill response inspector responded and the sheen had dissipated upon arrival and the source was not able to be identified. The cause of the sheen is unknown.
SPILL	12/21/2015	Motor Vehicle Accident	A semi truck crashed into multiple cars at S Spokane St & 6th Ave S. Diesel and oil spilled to the ground and impacted multiple stormwater CB's (Diagonal Outfall). SDOT and SPU coordinated on the spill cleanup and a contractor cleaned 4 CB's and pressure washed some portions of the street where the crash occurred. SPU deployed soft boom at the outfall in case any spilled fluids made it to the outfall.
SPILL	12/27/2015	Other	Boat fell off trailer and into water while being off loaded at boat ramp. Ecology & Coast guard will be handling follow up for this incident. Material was directly in the water, MS4 was not impacted.

SPILL	12/29/2015	Broken/Blocked side sewer or pipe	Property had a sewer overflow that went into drainage system and into the Sound. Crews contained sewage to property and the property owner is hiring a plumber to have the problem fixed.
SPILL	12/29/2015	Leaking Vehicle (no repair)	Metro bus had a coolant leak that went to drains. KC had a vactor onsite when I arrived and they cleaned impacted structures and surfaces.
