

**City of Seattle  
Public Utilities  
Notice of Rulemaking**

Under the authority of the Seattle Municipal Code 3.02 and 3.32.020, Seattle Public Utilities (SPU) proposes to create a new rule, DWW-110, Drainage and Wastewater Availability, and invites the public's review and comment.

This Director's Rule would establish the requirements to receive drainage and wastewater service. The requirements are documented in Water, Wastewater, and Drainage Availability Certificates (WACs) in response to certain applications for building or land use permits within SPU's direct service area, and new side sewer connections requests.

The full text of the rule can be found at [www.seattle.gov/utilities/about/policies](http://www.seattle.gov/utilities/about/policies). Print copies available on request.
