

City of Seattle Public Utilities Notice of Rule Revision

Under the authority of the Seattle Municipal Code 3.02 and 3.32.020, Seattle Public Utilities proposes to revise Director's Rule ENG-430, Utility System Improvement Dispute Process, and invites the public's review and comment.

SPU establishes utility system improvements during building and land-use permitting. System improvements apply to water, drainage and wastewater infrastructure, which include the public sanitary sewer, public combined sewer, and public storm drain systems. Last revised in 2021, ENG-430 specifies the procedure for builders and developers who intend to dispute utility system improvements required by SPU.

The revisions:

- Establish SPU as the department responsible for determining the drainage and wastewater points of discharge.
- Streamline and clarify language and terminology.

The full text of the rule change can be found at www.seattle.gov/utilities/about/policies. Print copies available on request.
