1 Introduction

- 1.1 Purpose of the SBE 1-1
- 1.2 Using the SBE 1-1
- 1.3 Organization of the SBE 1-2

2 Permitting and Consultation

- 2.1 Corps of Engineers Permitting 2-1
- 2.2 Consultation with the Services 2-3
- 2.3 What to Submit to the Corps 2-4

3 Description of Proposed Action: Construction Methods

- 3.1 Method #1: Delineation of Work Areas and Project Startup 3-2
- 3.2 Method #2: Clearing, Grubbing, Grading and Placement of Temporary Fill 3-4
- 3.3 Method #3: Work Area Isolation and Fish Removal in Streams, Large Waterbodies and for Pipe Bypass 3-6
- 3.4 Method #4: Pipe, Culvert and Outfall Installation, Removal and Replacement 3-11
- 3.5 Method #5: Vactoring, Jetting and Excavating Accumulated Sediments; Debris, Sediment Test Boring; and Pipe, Culvert and Bridge Maintenance 3-13
- 3.6 Method #6: Bank Stabilization 3-17
- 3.7 Method #7: Habitat Addition and Maintenance 3-24
- 3.8 Method #8: Beach Nourishment and Substrate Addition 3-29
- 3.9 Method #9: Boat Launch Improvement, Repair and Maintenance 3-31
- 3.10 Method #10: In-water and Overwater Structure Repair and Replacement 3-34
- 3.11 Method #11: Seawall Repair and Maintenance 3-52
- 3.12 Method #12: Site Restoration 3-55
- 3.13 Method #13: Landscaping and Planting 3-57

4 Conservation Measures

- 4.1 Approved Work Windows, CM 1 4-3
- 4.2 Stormwater Pollution Prevention, CM 2 - 30 4-5
 - A. Develop Temporary Erosion and Sediment Control Plan, CM 2
 - B. Ensure Contractor/City Crew has SPCP, CM 3 & 4
 - C. Minimize Site-Preparation-Related Impacts, CM 5 - 14
 - D. Avoid Heavy Equipment Fuel/Oil Leakage, CM 15 - 18
 - E. Minimize Earthmoving-Related Erosion, CM 19 - 24
 - F. Minimize Stream Crossing Sedimentation, CM 25 & 26
 - G. General Restoration in Open Waters, CM 27 - 29
 - H. Temporary Dewatering Plan Requirements, CM 30

4.3	Work Area Isolation, CM 31	4-8
4.4	Fish Handling, CM 32	4-9
4.5	Overwater Structure Size, CM 33 - 44	4-12
	A. Floats, Docks, or Piers, CM 33 - 40	
	B. Floating Breakwaters, CM 41 & 42	
	C. Anchoring Buoys, Floats and Floating Breakwaters, CM 43 & 44	
4.6	Piling Installation and Noise Abatement, CM 45 - 56	4-13
	A. Piling Installation, CM 45 – 51	
	B. Piling Installation Noise Abatement, CM 52 - 56	
4.7	Shoreline and Aquatic Habitat Protection, 43 - 74	4-14
	A. All Projects/All Structures, CM 57 – 65	
	B. Beach Nourishment/Substrate Addition, CM 66 & 67	
	C. Boat Launch, CM 68 & 69	
	D. Bulkhead Repair/Replacement, CM 70 - 72	
	E. Riprap Addition, CM 73 & 74	
4.8	Pesticides, CM 75 - 78	4-16
5	Status of the Species	
5.1	Puget Sound Chinook Salmon	5-7
5.2	Coastal-Puget Sound Bull Trout	5-24
5.3	Southern Resident Killer Whale	5-35
5.4	Steller Sea Lion	5-39
5.5	Humpback Whale	5-41
5.6	Marbled Murrelet	5-43
5.7	Puget Sound Steelhead	5-48
5.8	Eulachon	5-54
5.9	Bocaccio	5-57
5.10	Canary Rockfish	5-58
5.11	Yellow Rockfish	5-60
6	Environmental Baseline	
6.1	North Lake Washington and South Lake Washington Action Areas	6-2
6.2	Lake Washington Ship Canal Action Area	6-20
6.3	Lower Green/Duwamish Action Area	6-32
6.4	North Seattle /Puget Sound, Elliot Bay, South Seattle /Puget Sound Action Areas	6-47
7	Effects of the Action	
7.1	Effects of the Action on the Species	7-5
7.2	Effects of the Action on Critical Habitat	7-55
8	Cumulative Effects	8-1
9	Essential Fish Habitat	
9.1	Essential Fish Habitat	9-1
9.2	Identification of Essential Fish Habitat	9-2
9.3	Proposed Actions	9-2
9.4	Effects of Proposed Actions	9-4
9.5	Essential Fish Habitat Conservation Measures	9-4
10	References	10-1
Appendix A: Specific Project Information Forms (SPIFs)		<i>unique page numbers</i>
Appendix B: Effects Template		<i>unique page numbers</i>
Appendix C: Bald and Golden Eagle Protection Act		C-1

List of Figures

1	Seattle action areas	2-2
2	Seattle Biological Evaluation receiving surface waterbodies	5-3
3	Critical habitat for Southern Resident killer whale, Chinook salmon and bull trout around the City of Seattle	5-9
4	Lake Washington basin winter steelhead escapement estimates	5-51
5	Green/Duwamish River steelhead escapement estimates	5-53
6	Thornton Creek Watershed	6-12
7	Dissolved oxygen and temperature in Thornton Creek	6-13
8	Taylor Creek Watershed	6-18
9	Longfellow Creek Watershed	6-40
10	Dissolved oxygen and temperature in Longfellow Creek	6-43
11	Fauntleroy Creek Watershed	6-62
12	Piper's Creek Watershed	6-65
13	Dissolved oxygen and temperature in Piper's Creek	6-69

List of Tables

3-1	Stream flow diversion technique	3-9
4-1	Approved Freshwater Work Windows for ESA-Listed Fish Species in the Seattle Action Areas	4-3
4-2	Approved Marine/Estuarine Work Windows for Puget Sound Chinook Salmon, Bull Trout, Steelhead, Rockfish, and Forage Fish in Seattle Action Areas	4-4
4-3	Work Area Isolation	4-8
4-4	Fish Capture and Handling General Procedures	4-9
4-5	Fish Capture Methods	4-9
4-6	Fish Handling Methods	4-11
4-7	Typical Seattle Parks and Recreation Marine Structure Size	4-12
5-1	Summary status of the species for Seattle action areas	5-4
5-2	Designated critical habitat subbasins for Puget Sound Chinook salmon	5-10
5-3	Quick reference for ESA-listed species and critical habitat in the Seattle action areas	5-62
6-1	Smaller streams and fish present within the North Lake Washington and South Lake Washington action areas	6-3
6-2	Summary of 303(d) listings for Lake Washington	6-4
6-3	Migratory and freshwater fish of the Lake Washington basin	6-6
6-4	Lake Washington residency findings for juvenile salmon predation	6-9
6-5	Summary of 303(d) listings for Thornton Creek (including S.F. Thornton Creek and Maple Leaf Creek)	6-10
6-6	Summary statistics for conventional water quality parameters in Thornton Creek near mouth	6-11
6-7	Summary of 303(d) listings for Taylor Creek	6-16
6-8	Smaller streams and fish present within the Lake Washington Ship Canal action area	6-21

6-9	Summary of 303(d) listings for Lake Washington Ship Canal and Lake Union	6-22
6-10	Aquatic species inhabiting or migrating through Hiram M. Chittenden Locks	6-28
6-11	Smaller streams and fish present within the Lower Green/Duwamish action area	6-33
6-12	Summary of 303(d) listings for the Duwamish River/Duwamish Waterway	6-34
6-13	Summary of 303(d) listings for Longfellow Creek	6-41
6-14	Summary statistics for conventional water quality parameters in Longfellow Creek	6-42
6-15	Smaller streams and fish present within the North Seattle/Puget Sound, Elliott Bay, and South Seattle/Puget Sound action areas	6-48
6-16	Summary of 303(d) listings for Longfellow Creek	6-50
6-17	Summary of 303(d) listings for Puget Sound/Elliott Bay	6-51
6-18	King County marine sediment monitoring locations in Puget Sound offshore of Seattle	6-54
6-19	Fish present in the nearshore of Elliott Bay	6-58
6-20	Summary of 303(d) listings for Fauntleroy Creek	6-60
6-21	Summary of conventional water quality parameters in Fauntleroy Creek near mouth	6-61
6-22	Summary of 303(d) listings for Piper's Creek	6-66
6-23	Summary statistics for conventional water quality parameters in Piper's Creek	6-68
7-1	Effects of action and corresponding methods and conservation measures on Chinook salmon, bull trout, and steelhead for the Seattle Biological Evaluation	7-2
7-2	Effects of action and corresponding methods and conservation measures on killer whales and Stellar sea lions for the Seattle Biological Evaluation	7-4
7-3	Effects of action and corresponding methods and conservation measures on designated critical habitat for the Seattle Biological Evaluation	7-5
7-4	Maximum percentage of fines corresponding to 50% emergence for salmonids	7-13
7-5	Summary of effects of DC electroshocking on fish	7-16
7-6	Rating system to identify and rate severity of electroshocking injuries	7-18
7-7	Acoustic concepts and terminology	7-23
7-8	Bubble curtain effectiveness for different projects	7-30
7-9	Typical structures for bank stabilization	7-40
9-1	Fish species with designated Essential Fish Habitat in the Seattle action areas	9-3
9-2	Quick reference for Essential Fish Habitat species within the Seattle action areas and selected watersheds	9-5
