Seattle Public Utilities Water System Synopsis as of May 10, 2021

Note: WY = Water Year, which is defined as the 12-month period October 1, for any given year through September 30 of the following year. The water year is designated by the calendar year in which it ends. Thus, the year ending September 30, 2021 is called water year 2021 (WY 2021). Long-term water consumption data uses the most recent 10-years of data in order to better capture recent reductions in demand due to SPU’s conservation program efforts.

All data is provisional and subject to revision.
