

2025 Fourth Quarter

# **Surveillance Technology Determination Report**

Seattle Information Technology

## Summary

The Privacy Office received 69 total requests for privacy reviews during Q4 of 2025. 69 technologies and projects were applicable for this report. 2 of the technologies reviewed during Q4 of 2025 were determined to be surveillance technology. Both are exempt due to exclusion criteria.

## About This Report

The Seattle City Council passed [SMC 14.18](#) ("Surveillance Ordinance") to provide greater transparency to City Council and the public when the City acquires technology that meets the City's criteria of surveillance. In addition to review and approval requirements for new and existing technologies, the Surveillance Ordinance requires the CTO to submit a quarterly report to Council of all technology acquisitions. This report provides a list of all such technology acquisitions, the process followed, and the determinations for each of the technologies reviewed.

## Ordinance Requirement

This document is prepared pursuant to SMC 14.18.020.B.3, which states:

*The CTO shall, by no later than 30 days following the last day of each quarter, submit to Council, by filing with the City Clerk and providing an electronic copy to the chair of the committee responsible for technology matters, the co-chairs of the Working Group, the City Auditor, the Inspector General for Public Safety, and the Director of Central Staff, a surveillance technology determination list that includes all technology from that quarter that was reviewed under the process established in subsection 14.18.020.B.1, along with supporting information to explain the justification for the disposition of items on the list. The CTO shall also post the list to the City's website.*

## How This List Was Compiled

City staff must submit a Privacy and Surveillance Assessment (PSA) before new non-standard technology may be acquired. The assessment is used to determine if a given technology meets the City's definition of "surveillance technology" as defined by the City's Surveillance Policy. City staff were informed of this new process through an all-City email, engagement meetings with critical stakeholders such as IT Client Solutions Directors, financial leadership, and project managers. The report includes technologies and projects reviewed through the PSA process between October 1, 2025 and December 31, 2025. If a technology is discovered to have been acquired outside of this process, the CTO will inform Council. Inapplicable requests for review (for example requests for standard software, redundant requests, consultant contracts, etc.) were removed.

## Table of Department Acronyms

The following department acronyms are used in this report and are provided as a reference:

Acronym	Department
ARTS	Office of Arts and Culture
CEN	Seattle Center
CITYWIDE	Citywide
DEEL	Department of Education and Early Learning
DON	Department of Neighborhoods
SDOT	Seattle Department of Transportation
FAS	Finance and Administrative Services
ITD	Information Technology Department
LAW	Law Department
MOS	Mayor's Office
OCR	Office for Civil Rights
OED	Office of Economic Development
OEM	Office of Emergency Management
PKS	Seattle Parks and Recreation
RET	Seattle City Employees' Retirement
SDCI	Seattle Department of Construction & Inspections
SCL	Seattle City Light
SFD	Seattle Fire Department
SPD	Seattle Police Department
SPU	Seattle Public Utilities

## Surveillance Technologies

Two technologies reviewed and closed during Q4 2025 were determined to be surveillance technologies. Both are exempt due to exclusion criteria.

Department	Case No.	Reviewed Item
Citywide, FAS	6091	Live View Technologies (LVT)
Inclusion criteria		

The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

### Description

Live View Technologies (LVT) provide advanced mobile and cloud-based security solutions designed to enhance safety and security across various industries. These technologies integrate intelligent security features like real-time alerts and multi-system compatibility into user-friendly platforms.

Approval only for FAS technology purchase. FAS to handle blanket contracts:  
PIA will be posted publicly on [seattle.gov](https://seattle.gov).

### Exclusion Criteria:

Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.

Cameras installed on City property solely for security purposes.

Department	Case No.	Reviewed Item
Citywide, ITD	6330	Darwin AI Pilot
Inclusion criteria		

The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

### Description

The Darwin Govern™ platform supports state and local government agencies in securely adopting Generative AI (GenAI) technologies by providing comprehensive visibility and policy enforcement for AI usage across organizations. Govern™ includes a suite of tools that ensure AI applications align with agency standards, policies, and regulatory frameworks.

### Exclusion Criteria:

Technologies for everyday office use.

Technology that monitors only City employees in their performance of their City functions.

## Non-Surveillance Technologies

---

Technologies that were reviewed and were not determined to be surveillance technologies have their reviews detailed in the supplemental materials appendix.

# Surveillance Technology Criteria Review

10/1/2025

## Technology Description

<b>Technology Name</b>	ScribeAI		
<b>Description</b>	<p>Scribe turns any process into a step-by-step guide to be used for developing training and instructional documents. This software is a tool that automatically generates step-by-step guides by taking and using screenshots. It also generates instructions as users perform a task in their web browser or from their desktop. It transforms the information gathered into a visual document.</p> <p>Can also be used to analyze workflows and suggest ways to improve it for speed and efficiency.</p>		
<b>Department</b>	SDCI	<b>Case No.</b>	6236

## Criteria

### Does the technology meet the definition a Surveillance Technology?

**No** Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

### Do any of the following exclusion criteria apply?

<b>N/A</b>	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
<b>N/A</b>	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
<b>N/A</b>	Technologies used for everyday office use.
<b>N/A</b>	Body-worn cameras.
<b>N/A</b>	Cameras installed in or on a police vehicle.
<b>N/A</b>	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
<b>N/A</b>	Cameras installed on City property solely for security purposes.

N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
-----	---

N/A	Technology that monitors only City employees in the performance of their City functions
-----	---

**Do any of the following inclusion criteria apply?**

N/A	The technology disparately impacts disadvantaged groups.
-----	--

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
-----	--

N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
-----	---

N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.
-----	---

## Result

**Does the technology meet the criteria for surveillance technology and require a review?**

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

# Surveillance Technology Criteria Review

10/1/2025

## Technology Description

<b>Technology Name</b>	Scribe with Scribe AI feature		
<b>Description</b>	<p>Scribe (accessible at scribehow.com) is a documentation tool that enables users to create step-by-step guides by recording their screen activities. It automatically captures actions like clicks and keystrokes, generating annotated screenshots and written instructions to produce clear, shareable guides.</p> <p>Scribe software incorporates artificial intelligence through its feature known as Scribe AI. This AI-powered functionality enhances the documentation process by automating the creation of comprehensive process documents, such as standard operating procedures (SOPs), onboarding guides, and help center articles</p>		
<b>Department</b>	SDOT	<b>Case No.</b>	6133

## Criteria

### Does the technology meet the definition a Surveillance Technology?

**No** Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

### Do any of the following exclusion criteria apply?

<b>N/A</b>	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
<b>N/A</b>	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
<b>N/A</b>	Technologies used for everyday office use.
<b>N/A</b>	Body-worn cameras.
<b>N/A</b>	Cameras installed in or on a police vehicle.
<b>N/A</b>	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
<b>N/A</b>	Cameras installed on City property solely for security purposes.

N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
-----	---

N/A	Technology that monitors only City employees in the performance of their City functions

## Technology Description

Technology Name	Gooley AI		
Description	<p>This request is for a limited internal pilot of a voice-based virtual agent using the Gooley.AI platform. The pilot is expected to be 2-4 weeks in duration. Gooley.AI is a low-code orchestration platform designed to simplify the development and deployment of AI-powered assistants across multiple communication channels, including voice, chat, SMS, and web. It supports multilingual natural language processing, retrieval-augmented generation (RAG) to ground responses in approved knowledge sources, and seamless integration with speech recognition and text-to-speech technologies. The platform is flexible, modular, and well-suited for government and enterprise environments where accuracy, accessibility, and security are critical.</p> <p>The virtual agent will allow users to speak their questions aloud, with the system transcribing the audio using speech-to-text, retrieving accurate information from a predefined knowledge base, and delivering the response using natural-sounding text-to-speech.</p>		
Department	ITD	Case No.	6210

## Criteria

### Does the technology meet the definition a Surveillance Technology?

**No** Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

### Do any of the following exclusion criteria apply?

## Technology Description

<b>Technology Name</b>	AWS Bedrock AI		
<b>Description</b>	<p>This project would duplicate the scope of the C3AI POC. The purpose is to compare the results of the product to the C3 product.</p> <p>Self-service policy guidance to employees based on the SPD policy manual</p> <p>Self-service summary of technical documentation associated with SPD's Data Analytics Platform (DAP)</p> <p>Summarization of survey responses</p> <p>Data repair – improving offense classification transcription for historical offense reports</p> <p>SPD has confirmed that the use case around data repair, which may include historical offense data will only be used for statistical analysis, and would not alter police reports or otherwise be involved in the prosecution (decision to or prosecution of) a crime. The aim of this use case is to assess the feasibility and accuracy of a LLM annotation of offense reports. Data resulting from the repair project will only be used to assess the precision, accuracy and operational viability of LLM technology to improve offense classification and transcription. No probabilistically identified offense will be associated with a criminal history record in the system of record.</p>		
<b>Department</b>	SPD	<b>Case No.</b>	5643

## Criteria

### Does the technology meet the definition a Surveillance Technology?

**No** Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

### Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

**Do any of the following inclusion criteria apply?**

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

## Result

**Does the technology meet the criteria for surveillance technology and require a review?**

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

## Technology Description

<b>Technology Name</b>	2 Intel Forensic Workstations / 2 Intel Xeon W5-2465X 3.1 GHz processors		
<b>Description</b>	Two Intel Forensic Workstations. These workstations offers USB 3.2 Gen 1 ports with an independent PCIe card to give each port its own controller chip for maximum throughput. This workstation has an industry-leading 16 USB ports. They use a processor that supports all available lanes on the motherboard so you can expand the workstation after purchase and extend the life of the workstation.		
<b>Department</b>	SPD	<b>Case No.</b>	6378

## Criteria

### Does the technology meet the definition a Surveillance Technology?

**No** Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

### Do any of the following exclusion criteria apply?

<b>N/A</b>	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
<b>N/A</b>	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
<b>N/A</b>	Technologies used for everyday office use.
<b>N/A</b>	Body-worn cameras.
<b>N/A</b>	Cameras installed in or on a police vehicle.
<b>N/A</b>	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
<b>N/A</b>	Cameras installed on City property solely for security purposes.
<b>N/A</b>	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
<b>N/A</b>	Technology that monitors only City employees in the performance of their City functions

**Do any of the following inclusion criteria apply?**

<b>N/A</b>	The technology disparately impacts disadvantaged groups.
<b>N/A</b>	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
<b>N/A</b>	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
<b>N/A</b>	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

**Result****Does the technology meet the criteria for surveillance technology and require a review?**

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

11/13/2025

## Technology Description

<b>Technology Name</b>	Consultation Manager		
<b>Description</b>	Consultation Manager is a purpose-built Stakeholder Relationship Management (SRM) platform designed to act as a single source of truth for all engagement activities. It centralizes stakeholder contact details, property data, interactions, tasks, issues, and communications across projects, giving staff and consultants one secure environment to capture, analyze, and report on stakeholder engagement. Unlike spreadsheets or generic CRMs, CM is tailored for transportation and infrastructure projects where compliance, transparency, and trust with the community are critical.

## Technology Description

<b>Technology Name</b>	Excel Add-ins for Advanced Formula Environment		
<b>Description</b>	Excel add-ins for Advanced Formula Environment, which gives the ability format custom formulas in excel (like a text editor with auto formatting, but it works inside of Excel). Microsoft Visio Data Visualizer, which gives the ability to create a visio chart based on a table of data.		
<b>Department</b>	ITD	<b>Case No.</b>	6408

## Criteria

### Does the technology meet the definition a Surveillance Technology?

**No** Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

### Do any of the following exclusion criteria apply?

<b>N/A</b>	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
<b>N/A</b>	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
<b>N/A</b>	Technologies used for everyday office use.
<b>N/A</b>	Body-worn cameras.
<b>N/A</b>	Cameras installed in or on a police vehicle.
<b>N/A</b>	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
<b>N/A</b>	Cameras installed on City property solely for security purposes.
<b>N/A</b>	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
<b>N/A</b>	Technology that monitors only City employees in the performance of their City functions

**Do any of the following inclusion criteria apply?**

<b>N/A</b>	The technology disparately impacts disadvantaged groups.
<b>N/A</b>	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
<b>N/A</b>	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
<b>N/A</b>	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

**Result****Does the technology meet the criteria for surveillance technology and require a review?**

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

## Technology Description

<b>Technology Name</b>	Claude Instance: Bedrock		
<b>Description</b>	<p>Claude is a next generation AI assistant built by Anthropic and trained to be safe, accurate, and secure to help you do your best work.</p> <p>This request is for the app pilot. ClaudeAI would be used internally by authorized SPD personnel to quickly access and summarize information from SPD-approved internal sources such as policies, procedures, and training materials. Use cases are: summarization, information retrieval and analysis, writing assistance. Similar functionality to Amazon Q.</p> <p>The app will be accessible by SPD users only.</p>		
<b>Department</b>	SPD	<b>Case No.</b>	6348

## Criteria

### Does the technology meet the definition a Surveillance Technology?

**No** Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

### Do any of the following exclusion criteria apply?

<b>N/A</b>	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
<b>N/A</b>	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
<b>N/A</b>	Technologies used for everyday office use.
<b>N/A</b>	Body-worn cameras.
<b>N/A</b>	Cameras installed in or on a police vehicle.
<b>N/A</b>	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.

<b>N/A</b>	Cameras installed on City property solely for security purposes.
<b>N/A</b>	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
<b>N/A</b>	Technology that monitors only City employees in the performance of their City functions

**Do any of the following inclusion criteria apply?**

<b>N/A</b>	The technology disparately impacts disadvantaged groups.
<b>N/A</b>	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
<b>N/A</b>	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
<b>N/A</b>	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

## Result

**Does the technology meet the criteria for surveillance technology and require a review?**

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

<b>N/A</b>	Technologies used for everyday office use.
<b>N/A</b>	Body-worn cameras.
<b>N/A</b>	Cameras installed in or on a police vehicle.
<b>N/A</b>	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
<b>N/A</b>	Cameras installed on City property solely for security purposes.
<b>N/A</b>	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
<b>N/A</b>	Technology that monitors only City employees in the performance of their City functions

### Do any of the following inclusion criteria apply?

<b>N/A</b>	The technology disparately impacts disadvantaged groups.
------------	--

<b>N/A</b>	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
<b>N/A</b>	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
<b>N/A</b>	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

## Result

### **Does the technology meet the criteria for surveillance technology and require a review?**

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

# Surveillance Technology Criteria Review

## Technology Description

<b>Technology Name</b>	Mill Food Waste Recyclers		
<b>Description</b>	<p>In collaboration with King County, SPU wishes to conduct a pilot study testing the use of Mill Food Waste Recyclers with multifamily customers.</p> <p>These "smart" devices dry and grind food waste that is placed in the container, but they also record the weight of all food waste additions and when the lid of the container was opened. Data is shared with customers/users via the Mill app.</p> <p>The company, Mill, would aggregate and anonymize all data before sharing it with the City and County.</p>		
<b>Department</b>	SPU	<b>Case No.</b>	6259

## Criteria

### Does the technology meet the definition a Surveillance Technology?

**No** Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

### Do any of the following exclusion criteria apply?

<b>N/A</b>	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
<b>N/A</b>	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
<b>N/A</b>	Technologies used for everyday office use.
<b>N/A</b>	Body-worn cameras.
<b>N/A</b>	Cameras installed in or on a police vehicle.
<b>N/A</b>	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
<b>N/A</b>	Cameras installed on City property solely for security purposes.

N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
-----	---

N/A	Technology that monitors only City employees in the performance of their City functions
-----	---

**Do any of the following inclusion criteria apply?**

N/A	The technology disparately impacts disadvantaged groups.
-----	--

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
-----	--

N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
-----	---

N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.
-----	---

## Result

**Does the technology meet the criteria for surveillance technology and require a review?**

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

# Surveillance Technology Criteria Review

## Technology Description

<b>Technology Name</b>	Transit App		
<b>Description</b>	Transit App is a tool for planning trips for transit and micromobility (bikes, scooters, etc.). Transit App, much like the preloaded Google Maps, uses the location of the user to show nearby transit stops such as bus, light rail, and streetcar. The user may interact with these stops to see when the next bus or other mode will arrive/leave. The app also allows a user to see the real time location of their bus or other mode on the map. Transit app, just like Google or Apple Maps, allows the user to plan a trip between two points for the best possible transit route, the app claims to “make it easy to identify trips that have squeaky-tight transfers or long walks” which is often true and greatly helpful to those who would like to know that information when Google and Apple maps often does not point it out. The app also offers more than just planning for transit trips, but also for biking/scootering. The app will do its best to find a trip that is both efficient and safe.		
<b>Department</b>	SDOT	<b>Case No.</b>	6261

## Criteria

### Does the technology meet the definition a Surveillance Technology?

**No** Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

### Do any of the following exclusion criteria apply?

<b>N/A</b>	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

## Technology Description

<b>Technology Name</b>	Ivanti Neurons iPaaS Connector		
<b>Description</b>	The Integration Platform as a Service (IPaaS) is an integration framework embedded within Ivanti Neurons for IT Service Management (ITSM). It enables seamless, two-way communication with external applications through pre-built connectors. These connectors are centrally managed and monitored within the existing ITSM configuration tool, making them easy to integrate with core business objects and IT processes. Examples include Incident Management, Service Requests, Asset Management, and Change Management.		
<b>Department</b>	ITD	<b>Case No.</b>	6425

## Criteria
