

SEATTLE URBAN FORESTRY COMMISSION

Julia Michalak (Position #1 – Wildlife Biologist), Co-chair
Joshua Morris (Position #7 – NGO), Co-Chair
Elby Jones (Position #2 – Urban Ecologist - ISA) • **Stuart Niven** (Position #5 – Arborist – ISA)
David Moehring (Position # 8 – Development) • **Blake Voorhees** (Position # 9 – Realtor)
Jessica Hernandez (Position #11 – Environmental Justice) • **Jessica Jones** (Position # 12 – Public Health)

The Urban Forestry Commission was established to advise the Mayor and City Council concerning the establishment of policy and regulations governing the protection, management, and conservation of trees and vegetation in the City of Seattle

Meeting notes

April 6, 2022, 3:00 p.m. – 5:00 p.m.
Via Webex call
(206) 207-1700
Meeting number: 2480 020 1397
Meeting password: 1234

In-person meeting are not being held at this time due to the pandemic. Meeting participation is limited to access by joining the meeting through a computer or telephone conference line.

Attending

Commissioners

Josh Morris – Co-Chair
Julia Michalak – Co-Chair
Blake Voorhees
Stuart Niven
David Moehring
Jessica Jones

Staff

Patti Bakker – OSE

Guests

Laura Keil
Hao Liang
Toby Thaler

Public

Steve Zemke
Michael Oxman

Absent- Excused

Elby Jones
Jessica Hernandez

NOTE: Meeting notes are not exhaustive. For more details, listen to the digital recording of the meeting at: <http://www.seattle.gov/urbanforestrycommission/meetingdocs.htm>

Call to order: Julia called the meeting to order and offered a land acknowledgement. She took roll call and introduced incoming Commissioner Hao Liang, who will be appointed to Position 6 – Landscape Architect and is awaiting confirmation by City Council. Hao offered information about himself and his interest in serving on the Commission.

Public comment:

Steve Zemke – regarding the tree service provider registration bill and the noticing requirements, that is not a permit system, doesn't help gather data related to tree loss, and can give the impression that the work the tree service provide is doing is legal when that is not guaranteed to be the case. So it still remains a complaint based system where the public is required to understand the regulations and report on violations. Secondly, the draft letter on this ordinance doesn't address the issue of maximizing tree retention. This wasn't included in the bill. Without it, there is nothing to address maximizing retention during the development process.

Chair, Committees, and Coordinator report:

Patti shared two items related to recruitments:

- Laura Keil is still waiting for confirmation as the Get Engaged member, and the two appointees for Positions 4 and 6 (Becca Neumann and Hao Liang) are waiting for confirmation by Council.
- Josh, Julia and Patti conducted interviews with three candidates for Positions 2, 3 and 13 this week. The interviews went well and all three applicants are solid candidates. We will proceed with decisions on those soon and work on processing those appointments.

Julia reported that Stuart, David, Josh and she participated in a meeting with Marco Lowe, Chief Operating Officer in the Mayor's Office, who has urban forestry in his portfolio. It was an informative meeting with him and his team, learning of their priorities and perspectives. They seem open to hearing new ideas and meeting with Commissioners regularly. There is a strong priority placed on building affordable housing. As the Commission presented examples of solutions and continues to try to find solutions to both trees and affordable housing, that will be important moving forward with their administration. The Mayor's office may benefit in requesting the tree loss assessment from SDCI in order to provide UFC informed inquiry relative to tree loss within non-developed properties.

Josh reported that he is working to set up a meeting with some Commissioners and new OSE Director Jessyn Ferrell.

Approval of February 24, March 2 and March 9 meeting notes

ACTION: A motion to approve the February 24 meeting notes as written was made, seconded, and approved.

ACTION: A motion to approve the March 2 meeting notes as written was made, seconded, and approved.

ACTION: A motion to approve the March 9 meeting notes as amended was made, seconded, and approved.

Community engagement goals and actions – recap of needs

Julia and Patti provided a recap of the discussions and work this year regarding community engagement. One point of clarification is to identify what are the actions and goals for the Commission and/or Commissioners individually versus what is community engagement the urban forestry community in the city can or should do. There are great ideas that are more broad listed already by Commissioners in the initial padlet Jessica Hernandez developed, as well as more specific suggestions. As a Commission, what are the steps that can be taken and what are the things the Commission can advocate for the larger UF community doing.

Commissioners discussed slide decks that the UFC has used in the past that could be updated and shared with different communities; that can potentially be refreshed and utilized again. There could be a set of slide decks that are aimed at getting input from community as well as educating community. Introducing interactive options for engaging folks during presentations is also recommended.

The UFC will take this topic up again after more feedback is received on the goals through the survey.

2021 annual report final design and transmission letter

Patti shared the final design of the 2021 annual report, which was prepared with the text as approved by the UFC earlier.

ACTION: A motion to approve the final design of the 2021 annual plan as prepared was made, seconded, and approved.

Commissioners reviewed the draft letter transmitting the annual report to the Mayor and City Council, and made edits to update the draft letter.

ACTION: A motion to approve the transmittal letter for the annual plan as amended was made, seconded, and approved.

2022 Work plan

Patti shared the final draft of the work plan, as updated subsequent to the last discussion on it. With UFC concurrence, this will be the plan for the year and posted to the website. Commissioners can continue providing input on and updating it, and can revisit during the second quarter to start tracking progress. Patti walked through the updates made since the last discussion:

- The description at the bottom of the overview page was edited to reflect recent discussions on how actions are prioritized and the lenses through which UFC work is done.
- A new column was added to most of the action areas in order to track responses. There are drop-down options to note whether no response is necessary for an action, whether a response is requested, and whether it has been received.

Commissioners made edits and additions to the work plan. As new Commissioners come on board, they can sign up to work on tasks.

Action: A motion to adopt the 2022 work plan as amended was made, seconded, and approved.

Canopy cover assessment

Patti presented on the city's canopy cover assessment work, starting with background on the 2016 assessment, the technology used and the research questions addressed, and then updating on the current assessment effort using the 2021 LiDAR data.

Questions covered included how zoning changes impact the canopy goals and how the goals were created initially. Changes that have been made in the city's zoning may impact what we see with canopy distribution (e.g., canopy cover change in areas that changed from single family to multi-family zone); the consultant team performing the analyses should take that into account.

The current timeline for this work is for the assessment to be complete by the end of June. There is an initial list of comments and questions developed by Julia related to the research questions; this topic will be on the April 20 agenda as well for Commissioners to continue to consider recommendations.

Ordinance 120207 re: tree service provider registration

Julia provided an overview of the draft recommendation letter she provided on this ordinance. Content includes appreciation for this ordinance moving forward, some aspects the Commission believes will be important, and concerns around the duration for notice posting included in it, noting that three days is not long enough given that burden is placed on members of the public to notice tree postings and spend the time to submit concerns and other input on them.

Commissioners discussed the letter and made edits to add to and strengthen the recommendations included.

Action: A motion to adopt the letter regarding Ordinance 120207 as amended was made, seconded, and approved.

NOTE: Meeting notes are not exhaustive. For more details, listen to the digital recording of the meeting at: <http://www.seattle.gov/urbanforestrycommission/meetingdocs.htm>

Public comment:

Steve Zemke noted it was his understanding that the posting by the tree service provider on the site didn't require them to get a permit, which is the flaw since it puts the responsibility on the public and details are not included in the notices and by the time the work is evident it's too late to do anything about it.

Michael Oxman had five points to make: 1) regarding the duties of each Commissioner, the job description gives that particular member that expertise and they should report on the work of the Commission from that perspective, 2) the canopy cover assessment requires ground truthing that wasn't funded, 3) regarding the work plan, the city budget has gone up a half a billion dollars in the last five years and the tree budget has not gone up, 4) regarding the tree czar position that is to be developed, the Commission should have that on their work plan to help develop the job description and not leave it up to staff, 5) the arborist registration bill includes fee in lieu based on tree appraisal; the city's method of tree appraisal is not flexible and doesn't jive with the Council of Tree and Landscape Appraisers tree appraisal method.

Adjourn: The meeting was adjourned at 5:04 PM.

Meeting Chat:

from Stuart Niven to everyone: 2:58 PM

hHi

from Stuart Niven to everyone: 2:59 PM

Currently finishing a call to my parents in the UK so cannot chat yet

from Joshua Morris to everyone: 3:03 PM

Welcome Hao!

from Joshua Morris to everyone: 3:28 PM

<https://padlet.com/jessica1267/v6zzsm5a9m6qcbiw>

from Joshua Morris to everyone: 3:28 PM

^link to padlet

from David Moehring Pos 8 to everyone: 3:29 PM

Great to have you as a Commissioner, Hao!

from Hao Liang to everyone: 3:30 PM

Thank you all! I'm humbled and honored by this coming appointment.

from David Moehring Pos 8 to everyone: 3:31 PM

Thanks Patti for the survey. I believe I completed it some time ago but do remind me know if I have not completed the survey.

from Laura Keil to everyone: 3:32 PM

I'm in the same boat as David - please remind me if I have in fact not completed the survey Patti!

from Joshua Morris to everyone: 4:03 PM

Yay!

from Toby Thaler to everyone: 4:12 PM

Key question: How do zoning changes impact these goals?

from Steve Zemke to everyone: 4:14 PM

Need to take into account in current analysis, changes in size of land use units, eg MHA legislation added some single family zone to multifamily.

from Michael Oxman to everyone: 4:16 PM

Canopy Cover assessment requires ground-truthing with a Natural Capital Assessment

from Angela Ginorio to everyone: 4:17 PM

How is the 30% goal affected by current information about climate change? Should it be increased in proportion to the increased temperature?

from Steve Zemke to everyone: 4:17 PM

Should also consider raising some goals to existing 2007 goals, to preserve current canopy in areas with higher canopy.

from Michael Oxman to everyone: 4:18 PM

The goal for canopy cover listed in the city Comprehensive Plan is 40%

from Toby Thaler to everyone: 4:20 PM

Timing?

from Steve Zemke to everyone: 4:20 PM

Also should be looking at any change in canopy volume by looking at canopy cover change not just a 8 feet high but also at different heights like 20 , 50 and 100 feet?

from Steve Zemke to everyone: 4:24 PM

Canopy goals were set in 2007 when city canopy was assessed at 18% Goals are somewhat arbitrary I think.

from David Moehring Pos 8 to everyone: 4:28 PM

Update the tree canopy online layer on SDCI GIS ; as currently provided

<https://web6.seattle.gov/DPD/Maps/dpdgis.aspx>

from Steve Zemke to everyone: 4:29 PM

What is current timeframe for release of current analysis? Will it be available in time for consideration of new tree ordinance update?

from Toby Thaler to everyone: 4:32 PM

Thanks very much for info!

from Michael Oxman to everyone: 4:34 PM

The UFC recommended changing the goal of a 1% increase in canopy cover per year to a "net increase in canopy cover" in 2012.

from Steve Zemke to everyone: 4:36 PM

Portland - <https://www.wweek.com/news/2022/03/17/portlands-tree-canopy-has-shrunk-over-the-past-five-years-hitting-residential-areas-hardest/> 30.7% to 29.8% decrease over 5 years

from David Moehring Pos 8 to everyone: 4:36 PM

Regarding work plan updating Quarterly, it would be good to obtain or provide the Commissioners with monthly updates to more specific action items.

For example, some past UFC letters or meetings with open items:

- (a) UFC commission meetings hybrid;
 - (b) UFC December letter to City Attorney;
 - (c) Follow-up to mayor's COO questions of March 31;
- etc...

from Toby Thaler to everyone: 4:37 PM

I have a thought on implementation of registry ordinance...

from David Moehring Pos 8 to everyone: 4:40 PM

Thank you Steve, "The city didn't study why..." missed in negotiating the professional services provided by the City of Portland. We should learn from that foopa.

from Steve Zemke to everyone: 4:41 PM

Tree work needs to be by permit and posting also on line, not just on site as people do not travel around neighborhood every 3 days.

from Steve Zemke to everyone: 4:42 PM

Agree with joint registry as good idea for SDCI and SDOT

from Joshua Morris to everyone: 4:44 PM

The Urban Forestry Commission (UFC) thanks you for adopting Council Bill 120207,

from Joshua Morris to everyone: 4:45 PM

The UFC extends extra thanks to CMs Pedersen and Strauss for drafting and championing CB120207.

from Joshua Morris to everyone: 4:46 PM

The UFC urges you to maintain and build on the momentum of CB 120207 by prioritizing improving SDCI's proposed tree protections code update. Please do not hesitate to use the UFC as a resource in this endeavor; you are always welcome to request a meeting with commissioners or to attend any regular UFC meetings on the first and third Wednesdays of each month between 3-5 p.m

from Toby Thaler to everyone: 4:46 PM

BTW, it's now hard to find the CB on Legistar. Here's the Ord number: Ord 126554 Signed by Mayor Harrell yesterday.

from Toby Thaler to everyone: 4:47 PM

<https://seattle.legistar.com/LegislationDetail.aspx?ID=5186907&GUID=0ADFBA84-6472-4CFE-9E9C-6E2619C11B38&Options=ID|Text|Attachments|Other|&Search=>

from Toby Thaler to everyone: 4:47 PM

Searches of CBs on Legistar get weird after they turn into ordinance.

from Steve Zemke to everyone: 4:51 PM

Now is time to set up on line posting. Do not believe tree work being done is by permit. Issue i raised was that it needs to be a permit in order to gain tree loss data. Something Harrell believes we need - more data

from Michael Oxman to everyone: 4:53 PM

Public Comment: 1) Each member should submit a report on annual effect on constituency. 2) Canopy Cover Survey: A) Needs Natural Capital Assessment funding restored. B) Grund-truthing is needed. 3) Wrok Plan: Budget hasn't been tabulated for ALL forestry administrative costs per year. 4) Tree Czar: Develop job description. 5) 120207: Appraosal method doesn't jive with method by Council Of Tree And Landscape Appraisers {CTLA}. Thank you!

from David Moehring Pos 8 to everyone: 4:54 PM

[https://seattle.gov/sdci/permits/permits-we-issue-\(a-z\)/tree-removal](https://seattle.gov/sdci/permits/permits-we-issue-(a-z)/tree-removal)

from Blake Voorhees - UFC 9 to everyone: 4:55 PM

<http://www.seattle.gov/trees/regulations#removingtrees>

from Steve Zemke to everyone: 4:57 PM

Maybe reference SDOT permit system with posting requirement in place for 9 years

Public input: (see next page and posted notes):

To: Bakker, Patricia <Patricia.Bakker@seattle.gov>

Subject: Please Strengthen Seattle's Tree Ordinance

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

It's time to end the delay by the Seattle Department of Construction and Inspections (SDCI) in presenting the Seattle City Council with an updated draft Tree and Urban Forest Protection Ordinance. Over the last

12 years, the Seattle City Council has repeatedly asked successive Seattle Mayors and SDCI for an updated workable and effective ordinance draft to consider, and it is obvious that SDCI is not responding as requested. In its most recent 2019 Resolution 31902, the Council gave specific issues for SDCI to address.

SDCI, once again, has not responded in a timely manner with a comprehensive tree-protection ordinance update. It's been delay after delay. Please remove tree and urban forestry protection from their Department. In 2009, the Seattle City Auditor proposed transferring tree and urban-forestry oversight and authority to an independent entity that does not have a conflict of interest. The Auditor proposed that the oversight be moved to the Office of Sustainability and the Environment.

Much has changed since 2009, and it is time to create an independent Department with authority over environment, urban forestry, and climate issues. SDCI has a conflict of interest in tree oversight – their priority mission has been to help developers build, not to protect trees. Years of inaction regarding effective oversight and protection of trees by SDCI demands that a separate, independent entity take over the city's responsibility to protect and enhance our urban forest. We propose that an Urban Forestry Division be created within a new Department of the Environment and Climate.

Seattle's trees and urban forest are vital to keeping our city healthy and livable. Trees and the urban forest comprise vital green infrastructure needed to keep our city and people healthy. Trees reduce air pollution, storm water runoff, and climate impacts like heat island effects, while providing essential habitat for birds and other wildlife. They are important for the physical and mental health of our residents. A robust urban forest is critical for climate resilience and tree equity.

Seattle's rapid growth and an outdated tree ordinance are reducing these beneficial effects as trees are removed and not even replaced. It is urgent to act now to stop this continued loss of existing trees, particularly large mature trees and tree groves. It is imperative to promote environmental equity by retaining as many trees as possible and replacing those removed.

Please update Seattle's Tree Protection Ordinance as recommended in the latest draft by the Seattle Urban Forestry Commission.

Here are the key provisions that need to be in an updated tree ordinance:

1. Expand the existing Tree Removal and Replacement Permit Program, including 2-week public notice and posting on-site, as used by the Seattle Department of Transportation (SDOT) – to cover all Significant Trees (6" and larger diameter at breast height (DBH)) on private property in all land use zones, both during development and outside development.
2. Require the replacement of all Significant Trees removed with trees that in 25 years will reach

equivalent canopy volume lost – either on site or pay a replacement fee into a City Tree Replacement and Preservation Fund. Allow the Fund to also accept fines, donations, grants, purchase land and set up easements.

3. Expand current protections for Exceptional Trees and reduce the upper threshold for Exceptional Trees to 24" DBH, protect tree groves and heritage trees and prohibit Significant Trees being removed on undeveloped lots.
4. Allow removal of no more than 2 Significant non-Exceptional Trees in 3 years per lot outside development.
5. Establish one citywide database for applying for Tree Removal and Replacement Permits and to track changes in the tree canopy.
6. Post online all permit requests for 2 weeks prior to removal and all permit approvals for public viewing. Establish and maintain a city-wide database and inventory of existing trees, trees removed, and trees planted. Post on-line quarterly reports.
7. Expand SDOT's existing tree service provider's registration and certification to register all Tree Service Providers (arborists) working on trees in Seattle.
8. Require developers throughout the development process to maximize the retention of existing trees with adequate space for trees to grow and survive.
9. Require a Tree Inventory and Tree Landscaping Plan prior to any development permits being approved.
10. Provide adequate funding in the budget to implement and enforce the updated ordinance.

Subject: Please pass Council bill 120207 to require registration of Tree Service Providers

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut,

Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

Subject: Please pass Council bill 120207 to require registration of Tree Service Providers

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

Subject: Please pass Council bill 120207 to require registration of Tree Service Providers

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

We have so many trees that die because of a poor start when planted or poor care and maintenance. Trees are planted with unnecessarily staked and girdled with plastic ties that eventually kill the trees as people forget to remove them and creates plastic waste.

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Our North Seattle neighborhood was an urban oasis when we bought our house in 2014. Unfortunately, a handful of neighbors have removed large evergreen trees without any recourse or restoration. Our neighborhood is significantly hotter in the summer because of this. We have also lost critical urban habitat when these trees were illegally cut. Please take this first step in implementing Council Resolution 31902. Your support and vote is desperately needed to help bugger our community from the worst effects of climate change.

Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

Subject: Please pass Council bill 120207 to require registration of Tree Service Providers

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Help Seattle truly be the Emerald City! It is waaaay past time to strengthen tree regulations in Seattle. City government--Mayor, Council, SDCI-- have not doing their jobs to make that happen. Now, as an important step in the right direction, please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

Subject: Please pass Council bill 120207 to require registration of Tree Service Providers

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Subject: Please pass Council bill 120207 to require registration of Tree Service Providers

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Seattle City Council should be doing everything in their power to preserve our tree canopy and to add to it. Sadly, over the last decade or so, the lack of green space with trees has decreased in favor of development. Please do all you can to stop this trend.

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

Subject: Please Strengthen Seattle's Tree Ordinance

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

It's time to end the delay by the Seattle Department of Construction and Inspections (SDCI) on presenting the Seattle City Council with an updated draft Tree and Urban Forest Protection Ordinance. Over the last 12 years, the Seattle City Council has repeatedly asked successive Seattle Mayors and SDCI for an updated workable and effective ordinance draft to consider and it is obvious SDCI is not responding as requested. In its most recent 2019 Resolution 31902, the Council gave specific issues for SDCI to address.

SDCI, once again, has not responded in a timely manner with a comprehensive tree protection ordinance update. It's been delay after delay. Please remove tree and urban forestry protection from their Department. In 2009 the Seattle City Auditor proposed transferring tree and urban forestry oversight and authority to an independent entity that does not have a conflict of interest. The Auditor proposed oversight be moved to the Office of Sustainability and the Environment.

Much has changed since 2009 and it is time to create an independent Department with authority over environment, urban forestry, and climate issues. SDCI has a conflict of interest in tree oversight – their priority mission has been to help developers build, not protect trees. Years of inaction on effective oversight and protection of trees by SDCI demands that a separate independent entity take over the city's responsibility to protect and enhance our urban forest. We propose that an Urban Forestry Division be created within a new Department of the Environment and Climate.

Seattle's trees and urban forest are vital to keeping our city healthy and livable. Trees and the urban forest comprise vital green infrastructure needed to keep our city and people healthy. Trees reduce air pollution, storm water runoff and climate impacts like heat island effects, while providing essential habitat for birds and other wildlife. They are important for the physical and mental health of our residents. A robust urban forest is critical for climate resilience and tree equity.

Seattle's rapid growth and an outdated tree ordinance are reducing these beneficial effects as trees are removed and not even replaced. It is urgent to act now to stop this continued loss of existing trees, particularly large mature trees and tree groves. It is important to promote environmental equity by retaining as many trees as possible and replacing those removed.

Please update Seattle's Tree Protection Ordinance as recommended in the latest draft by the Seattle Urban Forestry Commission.

Here are the key provisions that need to be in an updated tree ordinance:

1. Expand the existing Tree Removal and Replacement Permit Program, including 2-week public notice and posting on-site, as used by the Seattle Department of Transportation (SDOT) – to cover all Significant Trees (6" and larger diameter at breast height (DBH)) on private property in all land use zones, both during development and outside development.
2. Require the replacement of all Significant Trees removed with trees that in 25 years will reach equivalent canopy volume lost – either on site or pay a replacement fee into a City Tree Replacement and Preservation Fund. Allow the Fund to also accept fines, donations, grants, purchase land and set up easements.
3. Expand current protections for Exceptional Trees and reduce the upper threshold for Exceptional Trees to 24" DBH, protect tree groves and heritage trees and prohibit Significant Trees being removed on undeveloped lots.
4. Allow removal of no more than 2 Significant non-Exceptional Trees in 3 years per lot outside development.
5. Establish one citywide database for applying for Tree Removal and Replacement Permits and to track changes in the tree canopy.
6. Post online all permit requests for 2 weeks prior to removal and all permit approvals for public viewing. Establish and maintain a city-wide database and inventory of existing trees, trees removed, and trees planted. Post on-line quarterly reports.
7. Expand SDOT's existing tree service provider's registration and certification to register all Tree Service Providers (arborists) working on trees in Seattle.
8. Require developers throughout the development process to maximize the retention of existing trees with adequate space for trees to grow and survive.
9. Require a Tree Inventory and Tree Landscaping Plan prior to any development permits being approved.
10. Provide adequate funding in the budget to implement and enforce the updated ordinance.

Subject: Laurelhurst Community Club urges the city of Seattle to update its Tree Protection Ordinance

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Laurelhurst Community Club strongly supports the CB 120207 and the resolution below by the Seattle Urban Forestry Commission.

This is an important and tangible step to protect the City's significant and heritage trees from being removed by unqualified tree service providers who previously claimed "they do not know the regulations". Now, this bill will require them to be educated about tree preservation regulations, and perform tree work. The tree business days notice also ensures a level of transparency for impacted agencies.

WHEREAS Seattle is losing not only its biggest trees, but much more of its green cover, as developers frequently scrape properties clean of trees to maximize their buildable area; and
WHEREAS Seattle has failed to require developers to replace all "exceptional" trees and trees over 24" DBH (diameter at 54" high) as prescribed by SMC 25.11.090; and
WHEREAS Seattle, unlike Portland and other major cities, has not instituted a permit system to govern

tree removal on developed property or property being developed, but relies instead on a complaint-based system that is applicable only to already-developed property and does not protect trees even there; and WHEREAS the Seattle City Council voted in 2009, and again by Resolution 31870 in March 2019, to support an updating of its Tree Protection Ordinance; and

WHEREAS the City concluded, in its 2017 Tree Regulations Research Report, that “Current code is not supporting tree protection” and that “we are losing exceptional trees (and groves) in general”; and

WHEREAS Seattle’s trees and urban forest comprise a vital green infrastructure that (a) reduces air pollution, stormwater runoff, and climate change impacts like heat-island effects, while providing essential habitat for birds and other wildlife, and (b) is important for the physical and mental health of Seattle residents: and

WHEREAS the Seattle Urban Forestry Commission has drafted, at the suggestion of several City Council members, an updated Tree and Urban Forest Protection Ordinance consistent with the eight recommendations specified by the Council in Section 6 of its Resolution 31870, which would:

- a. increase protections for Seattle trees and tree canopy volume by requiring, in each land-use zone in the city, a permit for removal and replacement of any tree over 6” DBH, whether on developed property or property being developed;
- b. require two-week on-site posting of tree removal and replacement applications (as SDOT already requires);
- c. require on-site tree replacement equivalent, in 25 years, to the tree canopy volume removed, or payment of a fee into a Tree Replacement and Preservation Fund for planting and 5-year maintenance of trees elsewhere in the city;
- d. retain current protections for exceptional trees and reduce the definitional upper threshold for exceptional trees to 24” DBH;
- e. allow no more than two significant non-exceptional trees to be removed over 3 years on developed property;
- f. require registration of all tree services providers with the city;
- g. track all significant tree loss and replacement; and
- h. provide adequate funds to administer and enforce the ordinance.

Therefore, be it resolved that, in recognition of the environmental importance of trees and the urgent need to update and strengthen Seattle’s current ordinance, we urge the Seattle City Council to enact, and the

Mayor to sign and enforce, the Seattle Urban Forestry Commission's June 14, 2019 draft Tree and Urban Forest Protection Ordinance.

Subject: Please pass Council bill 120207 to require registration of Tree Service Providers

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city, which I have witnessed occurring in my neighborhood, and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. This is an important step in saving existing trees and our city's tree canopy.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated, and will make a difference in conserving our city's tree canopy and making Seattle more climate resilient and livable for all residents.

Subject: Please Strengthen Seattle's Tree Ordinance

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

It's time to end the delay by the Seattle Department of Construction and Inspections (SDCI) on presenting the Seattle City Council with an updated draft Tree and Urban Forest Protection Ordinance. Over the last 12 years, the Seattle City Council has repeatedly asked successive Seattle Mayors and SDCI for an updated workable and effective ordinance draft to consider and it is obvious SDCI is not responding as requested. In its most recent 2019 Resolution 31902, the Council gave specific issues for SDCI to address.

SDCI, once again, has not responded in a timely manner with a comprehensive tree protection ordinance update. It's been delay after delay. Please remove tree and urban forestry protection from their Department. In 2009 the Seattle City Auditor proposed transferring tree and urban forestry oversight and authority to an independent entity that does not have a conflict of interest. The Auditor proposed oversight be moved to the Office of Sustainability and the Environment.

Much has changed since 2009 and it is time to create an independent Department with authority over environment, urban forestry, and climate issues. SDCI has a conflict of interest in tree oversight – their priority mission has been to help developers build, not protect trees. Years of inaction on effective oversight and protection of trees by SDCI demands that a separate independent entity take over the city's responsibility to protect and enhance our urban forest. We propose that an Urban Forestry Division be created within a new Department of the Environment and Climate.

Seattle's trees and urban forest are vital to keeping our city healthy and livable. Trees and the urban forest comprise vital green infrastructure needed to keep our city and people healthy. Trees reduce air pollution, storm water runoff and climate impacts like heat island effects, while providing essential habitat for birds and other wildlife. They are important for the physical and mental health of our residents. A robust urban forest is critical for climate resilience and tree equity.

Seattle's rapid growth and an outdated tree ordinance are reducing these beneficial effects as trees are removed and not even replaced. It is urgent to act now to stop this continued loss of existing trees, particularly large mature trees and tree groves. It is important to promote environmental equity by retaining as many trees as possible and replacing those removed.

Please update Seattle's Tree Protection Ordinance as recommended in the latest draft by the Seattle Urban Forestry Commission.

Here are the key provisions that need to be in an updated tree ordinance:

1. Expand the existing Tree Removal and Replacement Permit Program, including 2-week public notice and posting on-site, as used by the Seattle Department of Transportation (SDOT) – to cover all Significant Trees (6" and larger diameter at breast height (DBH)) on private property in all land use zones, both during development and outside development.
2. Require the replacement of all Significant Trees removed with trees that in 25 years will reach equivalent canopy volume lost – either on site or pay a replacement fee into a City Tree Replacement and Preservation Fund. Allow the Fund to also accept fines, donations, grants, purchase land and set up easements.
3. Expand current protections for Exceptional Trees and reduce the upper threshold for Exceptional Trees to 24" DBH, protect tree groves and heritage trees and prohibit Significant Trees being removed on undeveloped lots.
4. Allow removal of no more than 2 Significant non-Exceptional Trees in 3 years per lot outside development.
5. Establish one citywide database for applying for Tree Removal and Replacement Permits and to track changes in the tree canopy.
6. Post online all permit requests for 2 weeks prior to removal and all permit approvals for public viewing.

Establish and maintain a city-wide database and inventory of existing trees, trees removed, and trees planted. Post on-line quarterly reports.

7. Expand SDOT's existing tree service provider's registration and certification to register all Tree Service Providers (arborists) working on trees in Seattle.

8. Require developers throughout the development process to maximize the retention of existing trees with adequate space for trees to grow and survive.

9. Require a Tree Inventory and Tree Landscaping Plan prior to any development permits being approved.

10. Provide adequate funding in the budget to implement and enforce the updated ordinance.

Subject: Please pass Council bill 120207 to require registration of Tree Service Providers

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Dear council members

It is long past time for the city to step up to its responsibilities to protect our precious urban forest. This dire situation must be understood in face of climate crisis, quality of life, health and survival of all species . We need our trees! Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Subject: Please pass Council bill 120207 to require registration of Tree Service Providers

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Dear Councilmembers, I worked for two solid years trying to help save our trees in Seattle. I've lived and worked in the Seattle area for 35 years and continue to work here. But the housing market and situation has been unaffordable and unlivable for a single person to own a home or even rent. I had to move out of the Seattle area to find a livable place to rent.

Most rentals in Seattle now have no trees left-- it's remarkably sad how the city continues to remove not only mature trees and green spaces but are not replacing the trees that are removed.

This bill is a start-- there has been so many illegal cuttings of trees and groves of trees in the city. Protecting our trees and green spaces make a city not only livable but quieter and beautiful.

Please do something to make our city livable. Developers and big businesses have run this town into a cement hotbox and seem to make the rules for our environment and our future.

Without trees we can't breathe, the planet gets hotter, and the soil becomes depleted and people lose connection to the natural world.

Thanks for your help in this matter.

Sincerely,
Annie Thoe

Subject: Please pass Council bill 120207 to require registration of Tree Service Providers

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

Subject: Please pass Council bill 120207 to require registration of Tree Service Providers

CAUTION: External Email

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Dear Seattle City Council Member's and City Seattle Mayor:

Please pass Council bill 120207 to require registration of Tree Service Providers who do tree work in Seattle. Seattle's ordinance long overdue update is needed and necessary to curb not only illegal tree cutting and removal but also to ensure that those who are doing tree work in the city do so according to rules and regulations set forth. And to ensure that Tree Care Providers are knowledgeable of the existing tree codes and these regulations! Additionally, tree care and work can be very dangerous and hazardous, it is vitally important contractors

prove and carry adequate insurance, bonding and licensing requirements and show that they are covering all aspects of compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies (they are familiar with), Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work done on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is just the first step forward. There needs to be follow up this summer with passage of the comprehensive update of Seattle's tree code as (recommended by Council Resolution 31902 and Seattle's Urban Forest Commission). The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

And thank you for all the work your doing to help us help protect and preserve Seattle's Emerald City!!!

I've lived on Capitol Hill since 1969. Sadly, I have on occasion seen beautiful, old shade giving and pleasure giving trees hacked down. And while many trimmers have done excellent work maintaining

and helping

restore the health of "injured" trees, some have not. I urge to support Resolution 31902.

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has

produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

I don't know if this bill will stop the sometimes flagrant violations of our Urban Forest or GreenSpace statutes. During the 44 years I've lived in Seattle reports of wealthy (one a judge!!!) landowners who mowed down trees on city or other privately held property, for their "view." West Seattle had a large stand destroyed a few years ago by a conspiracy of neighbors.

These violations continue to occur because perpetrators know they can get away with it--only a fine, at best.

Their reprehensible uncivic behavior reflects the attitude of "anything goes"-- if the City gets a cut; either by fines or MHA, where developers pay into an "affordable housing fund" in order for their tree-killing and ugly market rate projects destroy this city.

Take a stand for preserving what's left. Pass a bill with teeth, take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

Sincerely,

Laura Schaack

Subject: Please Update Seattle's Tree Ordinance

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

I have lived in the Leschi neighborhood for more than 30 years. I retired three years ago and since then I have spent countless hours pursuing my favorite activity, walking the streets of Seattle. As I walk and observe, it's hard to miss new construction of multi-housing units sprouting up throughout the city. These units are designed for urban density, with nearly all of the space on the lot dedicated to increasing the interior square-footage of the housing. But this increased density has squeezed out any place left for the growth of vegetation, especially trees. Now with increased urban temperatures brought on by climate change, we need urban trees more than ever before! A city's urban tree canopy has numerous benefits, including reducing summer peak temperatures and air pollution, enhancing property values, providing wildlife habitat, providing aesthetic benefits, and improving social ties among neighbors. A robust tree canopy can also attract businesses and residents.

It's past time to end the delay by the Seattle Department of Construction and Inspections (SDCI) on presenting the Seattle City Council with an updated draft Tree and Urban Forest Protection Ordinance. Over the last 12 years, the Seattle City Council has repeatedly asked successive Seattle Mayors and SDCI for an updated workable and effective ordinance draft to consider and it is obvious SDCI is not responding as requested. In its most recent 2019 Resolution 31902, the Council gave specific issues for SDCI to address.

SDCI, once again, has not responded in a timely manner with a comprehensive tree protection ordinance update. It's been delay after delay. Please remove tree and urban forestry protection from their Department. In 2009 the Seattle City Auditor proposed transferring tree and urban forestry oversight and authority to an independent entity that does not have a conflict of interest. The Auditor proposed oversight be moved to the Office of Sustainability and the Environment.

Much has changed since 2009 and it is time to create an independent Department with authority over environment, urban forestry, and climate issues. SDCI has a conflict of interest in tree oversight – their priority mission has been to help developers build, not protect trees. Years of inaction on effective oversight and protection of trees by SDCI demands that a separate independent entity take over the city's responsibility to protect and enhance our urban forest. We propose that an Urban Forestry Division be created within a new Department of the Environment and Climate.

Seattle's trees and urban forest are vital to keeping our city healthy and livable. Trees and the urban forest comprise vital green infrastructure needed to keep our city and people healthy. Trees reduce air pollution, storm water runoff and climate impacts like heat island effects, while providing essential habitat for birds and other wildlife. They are important for the physical and mental health of our residents. A robust urban forest is critical for climate resilience and tree equity.

Seattle's rapid growth and an outdated tree ordinance are reducing these beneficial effects as trees are removed and not even replaced. It is urgent to act now to stop this continued loss of existing trees, particularly large mature trees and tree groves. It is important to promote environmental equity by retaining as many trees as possible and replacing those removed.

Please update Seattle's Tree Protection Ordinance as recommended in the latest draft by the Seattle Urban Forestry Commission.

Here are the key provisions that need to be in an updated tree ordinance:

1. Expand the existing Tree Removal and Replacement Permit Program, including 2-week public notice and posting on-site, as used by the Seattle Department of Transportation (SDOT) – to cover all Significant Trees (6" and larger diameter at breast height (DBH)) on private property in all land use zones, both during development and outside development.
2. Require the replacement of all Significant Trees removed with trees that in 25 years will reach equivalent canopy volume lost – either on site or pay a replacement fee into a City Tree Replacement and Preservation Fund. Allow the Fund to also accept fines, donations, grants, purchase land and set up easements.
3. Expand current protections for Exceptional Trees and reduce the upper threshold for Exceptional Trees to 24" DBH, protect tree groves and heritage trees and prohibit Significant Trees being removed on undeveloped lots.
4. Allow removal of no more than 2 Significant non-Exceptional Trees in 3 years per lot outside development.
5. Establish one citywide database for applying for Tree Removal and Replacement Permits and to track changes in the tree canopy.
6. Post online all permit requests for 2 weeks prior to removal and all permit approvals for public viewing. Establish and maintain a city-wide database and inventory of existing trees, trees removed, and trees planted. Post on-line quarterly reports.

7. Expand SDOT's existing tree service provider's registration and certification to register all Tree Service Providers (arborists) working on trees in Seattle.
8. Require developers throughout the development process to maximize the retention of existing trees with adequate space for trees to grow and survive.
9. Require a Tree Inventory and Tree Landscaping Plan prior to any development permits being approved.
10. Provide adequate funding in the budget to implement and enforce the updated ordinance.

Subject: Please Strengthen Seattle's Tree Ordinance

CAUTION: External Email

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Hello:

As a longtime Seattle resident I am very concerned about the loss of urban trees. Please take

the following points seriously and update Seattle's Tree Protection Ordinance as recommended in the latest draft by the Seattle Urban Forestry Commission.

It's time to end the delay by the Seattle Department of Construction and Inspections (SDCI) on presenting the Seattle City Council with an updated draft Tree and Urban Forest Protection Ordinance. Over the last 12 years, the Seattle City Council has repeatedly asked successive Seattle Mayors and SDCI for an updated workable and effective ordinance draft to consider and it is obvious SDCI is not responding as requested. In its most recent 2019 Resolution 31902, the Council gave specific issues for SDCI to address.

SDCI, once again, has not responded in a timely manner with a comprehensive tree protection ordinance update. It's been delay after delay. Please remove tree and urban forestry protection from their Department. In 2009 the Seattle City Auditor proposed transferring tree and urban forestry oversight and authority to an independent entity that does not have a conflict of interest. The Auditor proposed oversight be moved to the Office of Sustainability and the Environment.

Much has changed since 2009 and it is time to create an independent Department with authority over environment, urban forestry, and climate issues. SDCI has a conflict of interest in tree oversight – their priority mission has been to help developers build, not protect trees. Years of inaction on effective oversight and protection of trees by SDCI demands that a separate independent entity take over the city's responsibility to protect and enhance our urban forest. We propose that an Urban Forestry Division be created within a new Department of the Environment and Climate.

Seattle's trees and urban forest are vital to keeping our city healthy and livable. Trees and the urban forest comprise vital green infrastructure needed to keep our city and people healthy. Trees reduce air pollution, storm water runoff and climate impacts like heat island effects, while providing essential habitat for birds and other wildlife. They are important for the physical and mental health of our residents. A robust urban forest is critical for climate resilience and tree equity.

Seattle's rapid growth and an outdated tree ordinance are reducing these beneficial effects as trees are removed and not even replaced. It is urgent to act now to stop this continued loss of

existing trees, particularly large mature trees and tree groves. It is important to promote environmental equity by retaining as many trees as possible and replacing those removed.

Please update Seattle's Tree Protection Ordinance as recommended in the latest draft by the Seattle Urban Forestry Commission.

Here are the key provisions that need to be in an updated tree ordinance:

1. Expand the existing Tree Removal and Replacement Permit Program, including 2-week public notice and posting on-site, as used by the Seattle Department of Transportation (SDOT) – to cover all Significant Trees (6” and larger diameter at breast height (DBH)) on private property in all land use zones, both during development and outside development.
2. Require the replacement of all Significant Trees removed with trees that in 25 years will reach equivalent canopy volume lost – either on site or pay a replacement fee into a City Tree Replacement and Preservation Fund. Allow the Fund to also accept fines, donations, grants, purchase land and set up easements.
3. Expand current protections for Exceptional Trees and reduce the upper threshold for Exceptional Trees to 24” DBH, protect tree groves and heritage trees and prohibit Significant Trees being removed on undeveloped lots.
4. Allow removal of no more than 2 Significant non-Exceptional Trees in 3 years per lot outside development.
5. Establish one citywide database for applying for Tree Removal and Replacement Permits and to track changes in the tree canopy.
6. Post online all permit requests for 2 weeks prior to removal and all permit approvals for public viewing. Establish and maintain a city-wide database and inventory of existing trees, trees removed, and trees planted. Post on-line quarterly reports.
7. Expand SDOT’s existing tree service provider’s registration and certification to register all Tree Service Providers (arborists) working on trees in Seattle.
8. Require developers throughout the development process to maximize the retention of existing trees with adequate space for trees to grow and survive.
9. Require a Tree Inventory and Tree Landscaping Plan prior to any development permits being approved.
10. Provide adequate funding in the budget to implement and enforce the updated ordinance.

Subject: Please pass Council bill 120207 to require registration of Tree Service Providers

CAUTION: External Email

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

I live near Windermere neighborhood and have watched three separate neighbors remove tree after tree after tree in the past three years to accommodate new buildings. It is staggering to witness. The lot behind me and the one next door used to be surrounded in trees and all of them were removed.

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Thank you for your hard work this year. These are indeed challenging times.

Today , I'm asking you to please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

As a member of an HOA, we have had experience with both highly skilled care providers and ones that are not. Good tree care provides for the long term health of the trees and provide much needed shade and habitat, especially important in neighborhoods that are become so much more dense in population.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and

acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Over the past few years, I have seen and read about some egregious tree cutting around the city. Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle.

This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. The ordinance will also better protect those doing this often hazardous work by requiring the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward.

I would add that it needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

My goodness there are a lot of gypsies out there hyping their work to residents and making quick bucks because most people dont know how to care for trees. They are flimflam artists (and the tree maintenance business is not profession scamming in this way in Seattle. Where is tge Department of Licensing when you need them?). The rampant evidence of these tree bandits remains a shameful monument for ever more. Tge only cure is to cut the trees down altogether, and the owners may never realize theyve been had. It's sad this happens so much to intelligent, conscientious people who only want to do right by their trees. Citizens are paying a lot of money to have the centerpieces of their landscaping destroyed. Drive around the neighborhoods and see. Check out plantamnesty.org. This must be stopped!

Youre not endorcng your tree codes youve already got. People illegally cut down trees and there are no consequences.

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. It's important that our City departments have consistent policies and practices regarding tree protection. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a

great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance. I strongly encourage that the Council pass an updated ordinance that includes the provisions recommended by the UFC.

Please take this first step in implementing Council Resolution 31902. Your support and vote are appreciated.

Subject: I Urge You to Please pass Council bill 120207 to require registration of Tree Service Providers

CAUTION: External Email

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Once again, I'm asking that you pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers. This is a commonsense amendment that is a small step in helping to stop the ongoing destruction of our mature trees in Seattle. It's time to put saving our tree canopy front and center and put the developers' needs on the back burner since they now take advantage of every loophole to be able to cut down trees with impunity.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

It's important that you pass Council Resolution 31902 as a first step towards updating Seattle's lax tree codes. The trees and I thank you for your support and vote. Politicians claim to want to curb climate chaos, yet too often it is just empty words. The time for meaningful action is NOW!

Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. Additionally, as tree care work can be hazardous, it is important that the contractors carry adequate insurance and have workers compensation for their workers.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws

and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. This ordinance update is needed to help stop illegal tree removal in the city and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations. I have lived in Seattle since 1986 and am dismayed at the loss of trees in the city, including in my neighborhood in Eastlake. I support the benefits that large and many trees provide as wildlife habitat, a natural means to reduce air and noise pollution and cool too warm temperatures, and an asset that improves overall human wellbeing.

I strongly urge you to increase protection for our trees and urban forest. Requiring Tree Service Provider Registration should be followed this summer by passage of a comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance to use as a guide for your efforts.

Thank you for taking this important step to protect our natural environment.

CAUTION: External Email

Urban Forestry Commission Coordinator Urban Forestry Commission c/o Patti Bakker,

Please pass Council bill 120207 to require registration of Tree Service Providers doing tree work in Seattle. As a longtime inner city resident, I believe this ordinance update is needed to help stop illegal tree removal and to ensure that Tree Care Providers are knowledgeable of the existing tree code and regulations.

Eight states already require Tree Service registration for major tree work - California, Connecticut, Louisiana, Maine, Maryland, Minnesota, New Jersey, and Rhode Island. Seattle's Department of Transportation since 2011 has been requiring registration and acknowledgement by tree companies that they are familiar with Seattle's tree protection laws and regulations. Spokane, Washington also requires Tree Service Providers registration for all tree work on public property.

This legislation is one of the 8 provisions in Council Resolution 31902 passed in 2019 to increase protection for Seattle's trees and urban forest. Tree Service Provider Registration is a great first step forward. It needs to be followed this summer by passage of the comprehensive update of Seattle's tree code as recommended by Council Resolution 31902 and Seattle's Urban Forest Commission. The Urban Forestry Commission has been urging Council action to update the code since it was created in 2009. The Urban Forestry Commission has produced numerous recommended updates and in 2019 produced a draft Tree and Urban Forest Protection Ordinance.

Please take this first step in implementing Council Resolution 31902. Your support and vote is appreciated.

Thank you,
Daniel R Smith

Subject: 1421 Harvard -- Tree removals for UFC records

CAUTION: External Email

Hi Patti,

A grove of big leaf maples and a large red oak are being removed next week at 1421 Harvard Ave, project 3034049-LU. I went to the site today.

The big leaf maples are nearly 100 percent leafed out although the arborist report states they are dead or dying, and the trunks appear to be completely intact without injury although the arborist report states they have evident basal wounds and decay. I counted 25 trees leafed out with DBH 8" or larger (more than the arborist report notes), and 4 small dead saplings in the grove.

The northern red oak has a DBH of 29.6" and is against the sidewalk; SDOT wanted this tree saved given its location at the lot line and good health per arborist report, as noted by Cindy Kozak at SDOT:

"I would say the large one in the Right of Way is in good shape for a street tree and we tried to save it, but we don't have authority over private property and the approved building construction will remove half of the canopy and the roots making it a hazard tree."

The replacement plan trees are all small scale, non-natives: parrotia, styrax japonica, magnolia stellata planted very close together in an interior courtyard.

Thank you for making a record of it.

Sandy Shettler
