							Flagging, Traffic Control	Demolition, Remediation	Excavation, Grading, Site Work	Trucking	Carpentry	Finishes	Landscaping	Concrete	Concrete - Roadway	Electrical – Facilities	Electrical – Utilities	Mechanical, HVAC, Plumbing	Park Development	Shoring, Dewatering	Channelization, Signage, Wayfinding	Shoreline, Marine Construction	Fencing, Site Security
Finance and Administrative Services	PW#2024-047	Seattle Municipal Tower 44-50 SPU Tenant Improvements	\$14,623,323	Q2 2025	Nigel Horton 867-0531	This project is located in the Seattle Municipal Tower at 700 5th Avenue in Seattle, and includes tenant improvements to the Seattle Public Utilities Offices on floors 44-50. The work comprises an area of approximately 140,000 sf and includes demolition, structural reinforcement, new partitions, doors and frames, hardware, glazing, built-in casework, finish work, ceilings, mechanical, electrical, sprinkler and fire alarm modifications.		X				X	X				X						
Finance and Administrative Services	PW#2024-066	Haller Lake Electric Vehicle Charging Hub	\$777,390	Q2 2025	Erik Turner 532-1733	This project, located at N 125th St and Stone Ave N in Seattle includes installation of (3) dual corded level 3 direct current fast charger (DCFC) electric vehicle (EV) charging stations, and associated electrical and civil infrastructure to support. Work will take place in an existing parking lot. Minimal paving work is anticipated, limited to patching where conduit and drainage piping is needing to be added. Primary work is electrical to provide routing for SCL main conductors for new service. Scope to include transformer pad for SCL transformer, electrical gear for feeding EV chargers and associated equipment. Significant civil work will be required to trench main SCL power as well as power to EV chargers and ancillary re-routing of existing circuits in the vicinity.									X		X		X				
Finance and Administrative Services	PW#2024-069	Seattle Municipal Tower 28 SCL Tenant Improvement	\$2,977,471	Q2 2025	Jessie McClurg 386-9155	This project, located on floor 28 of the Seattle Municipal Tower,at 700 5th Ave in Seattle involves demolition of existing spaces followed by rebuilding of offices, conference rooms, and break rooms, including all construction, finishes, furniture and equipment.		X				X	X				X		X				
Finance and Administrative Services	PW#2025-007	Fire Station 18 Sewer Replacement	\$240,000	Currently Under Review Prior to Advertisement	Zain Aldahlaki 617-4286	This project, located at 1521 NW Market St #5212 in Seattle, will demolish the existing main storm and sewer lines from the building to the main at the street and replace both pipes with new and repave the concrete pavement. Project scopes include demolition of selected areas at the South parking lot/ concrete pavement; trench to expose the existing storm and sewer pipes; demolish both sewer and storm pipes and replace with new pipes; demolish and replace storm catch basin; backfill and compact the trench area; repave the construction area with concrete pavement; some work at the ROW to replace sidewalk as necessary.	X	X	X	X					X	X			X			X	
Finance and Administrative Services	PW#2025-020	Seattle Fire Dept. HQ Passenger Elevator Modernization	\$1,300,000	Q3 2025	Alex Parry 561-5797	This project located SFD Headquarters, 301 2nd Ave S in Seattle includes upgrades to the existing passenger elevator equipment, cab and call lights, to bring the unit up to current codes and reduce the frequency of maintenance calls. This project will include: removal of existing elevator cab finishes, mechanical equipment and deteriorated elements within the elevator shaft; installation of new elevator system including but not limited to interior cab finishes, door finishes and call lights on all X levels, roof top equipment, access into the equipment room, electrical room elevator control equipment and HVAC supply; upgrade to miscellaneous doors and hardware to meet current ADA codes on all floors.						X	X				X		X				
Finance and Administrative Services	PW#2025-021	Seattle Justice Center OH Coiling Fire Door Repair	\$381,682	Q3 2025	Duncan Thieme 425-902-2030	This project is located at Seattle Justice Center, 600 5th Avenue in Seattle. The motors that deploy the overhead coiling fire doors throughout the Seattle Justice Center are nearing the end of their serviceable life and are no longer repairable. This project will replace them with new equipment in an occupied building. The primary goal is to complete the work with minimal impact to the work of the Seattle Police Department and the Seattle Municipal Court. Work will be conducted outside of the primary business hours of the building. For areas that are occupied 24/7, special care will be taken to avoid disruption. As the building is secured, all workers will be subject to security screening, and all materials and tools must be stored in locked rooms when not in use. The work is confined to the following CSI technical specification sections: 02 41 19 – Selective Demolition, for cutting of ceilings to provide access for the work. 05 40 00 – Cold Formed Metal Framing, for miscellaneous infill framing at ceilings. 08 31 16 – Access Panels, for installation of new ceiling access doors to facilitate future maintenance of coiling doors. 08 33 23 – Overhead Coiling Doors, for retrofitting of new controllers and motors. 09 21 00 – Gypsum Board Assemblies, for ceiling repairs at points of access. 09 90 00 – Painting, for final finish of repaired ceilings. Seattle Department of Transportation	PW#2021-053	Georgetown South Park Trail	\$4,229,410	Q2 2025	MariLyn Yim 684-3190	This project builds a 1.6 mile shared use path between the Georgetown and South Park neighborhoods in the Duwamish Valley. The path will be made of asphalt with concrete bus pads, and builds new curb and vegetative buffer along E Marginal Way between 16th Ave S and Ellis Ave S, along Ellis Ave S between E Marginal Way and S Albro Pl, A Albro Pl, and 13th Ave S between S Albro Pl and S Bailey st. New pedestrian lights will be installed along S Albro pl between 13th Ave s to Ellis Ave S. Modifications to the Signal at E Marginal Way and 16th Ave S will add pedestrian and bike signal heads	X		X	X	X	X	X		X	X	X	X			X		X
Seattle Department of Transportation	PW#2022-023	Emerson St & Galer Flyover Bridge Painting Projects	\$2,950,000	Q2 2025	Tonnie Roberts 256-5455	The Emerson St Viaduct Extension has been identified for bridge painting. Emerson St Viaduct Extension is a steel I-girder bridge with a cast-in-place concrete deck that is 526-ft bridge located South of the Fisherman’s Terminal and built in 1949. This bridge crosses over BNSF railroad track, Southbound 15th Ave W, 16th Ave W, and the South Ship Canal Trail. Roadway structures has determined that this bridge will receive full lead abatement which will require 100% lead containment during construction. The W Galer Flyover has also been identified for bridge painting. It is a steel I-girder bridge with a cast-in-place concrete deck that is 815-ft bridge and was built in 2002, located in West Queen Anne. Roadway structures determined after site visit to reduce scope from spot painting entire bridge to only spot painting the pedestrian ramp. The pedestrian ramp is located adjacent to W Galer Street and Precision Motorworks.	X	X			X												X
Seattle Department of Transportation	PW#2023-036	Fortson Square Renovation	\$650,000	Q2 2025	Ryan Moore 256-5478	Demolition of existing hardscape and landscape improvements, and construction of a new community gathering space with walkways, seating areas, stairs, and landscaping. All improvements are in the right of way at SE corner of intersection of Yesler Way and 2nd Ave.	X	X	X	X	X	X	X	X									X
Seattle Department of Transportation	PW#2023-069	2024 Sidewalks & Greenways	\$6,025,675	Q2 2025	Bill Clark 375-4404	Construct new sidewalks on key arterials, walking routes to schools and transit, and new neighborhood greenways (NGW). This project will increase mobility and offer safe, comfortable, accessible, and convenient connections for pedestrians and advance the City’s Bike & Pedestrian Master Plan goals. New sidewalks will be constructed on Greenwood Ave N from N 112th St to N 117th St, N 133rd St to N 134th St, and N 136th St to N 137th St. Seven neighborhood greenways will be constructed across the City at Central Ridge Phase 2 NGW, Beacon Hill Elementary School SRTS NGW, Garfield to Leschi SRTS NGW, Lafayette & Madison Connection SRTS NGW & Stevens Elementary School SRTS NGW. Seattle Public Utilities	PW#2022-029	Tolt Dam Early Warning System Other Project Components	\$1,850,000	Currently Under Review Prior to Advertisement	Josh Campbell 684-5257	The Tolt Early Warning System (TEWS) provides audible and/or visual indications to people downstream of a current or impending breach of the Tolt dam, allowing time for evacuation. The total work for the Tolt Early Warning System upgrade is split between 3 packages – The Siren Replacement project (SRP), the Microwave Work (MW), and the Other Project Components (OPC). This package only covers the OPC project. The existing Tolt Early Warning System (EWS) is upgraded by installing new: 1) System controllers, 2) Remote unit warning systems to include 4 outdoor warning sirens, 1 indoor warning siren, and 9 highway message signs, and 3) A siren alerting data network. The work primarily occurs in the City of Carnation, WA and at the Tolt Watershed which is located east of Carnation. There is also one site in Fall City which is south of Carnation, and one site located in Duvall, WA, which is north of Carnation.	X									X	X			X		X	
Seattle Public Utilities	PW#2024-006	Tolt Reservoir Debris Boom Replacement	\$6,260,000	Q2 2025	Ian Fitz-James 914-9310	This project is located in the Tolt Watershed, approximately 30 miles east of Seattle, approached through a controlled access gate at 12900 NE Kelly Road, Duvall, WA. The existing debris boom spans the South Fork Tolt Reservoir east of the South Fork Tolt Dam. The project consists of the following major elements of work: Demolition of the existing debris boom system in the South Fork Tolt River Reservoir; construction of a single-span debris boom system to completely replace the existing debris boom; construction of two micropile-supported concrete shore anchor blocks for the debris boom system; the construction of permanent access roads to each anchor block assembly; the structural and electrical seismic modifications of the foot bridges which span the dam crest, spillway, and the intake tower; and final landscaping restoration. Seattle Public Utilities	PW#2024-023	Taylor Creek Outfall Improvements	\$700,000	Q2 2025	Katie Wilson 615-1159	This project is located in southeast Seattle near the Taylor Creek ravine at Lakeridge Park. The two existing outfall pipes are located near 1) Rustic Road S; and 2) near Crestwood Drive S. The work includes: Abandon existing storm drainage outfall pipe and replace with a new tightline system consisting of ductile iron pipe and high-density polyethylene (HDPE), ranging from 8 to 18-inches in diameter, including associated storm drainage structures. Additional elements of work include: construction stormwater and erosion control, installation of a diffuser tee and pad at the downstream end of the outfall, vegetation clearing, tree protection, post installation CCTV inspection, and surface and landscape restoration.			X				X	X		X		X					
Seattle Public Utilities	PW#2024-036	Sewer Rehab Pike-Dakota-107th	\$2,250,000	Q2 2025	Samantha Menathy 615-1953	This Project is located at three separate locations in the City of Seattle: 1) E Pike St & 12th Ave; and 2) SW Dakota St & 26th Ave SW and SW Yancy St & 26th Ave SW; and 3) NE 107th St & Lake City Way NE, and consists of the following elements of Work: Replacement of approximately 200 linear feet of sanitary sewer mainline pipe (vitrified clay pipe (VCP) ranging from 8” to 12” in diameter); 500 LF of storm drainage mainline pipe (ductile iron pipe (DIP) ranging from 6” to 12” in diameter); and 200 LF of sanitary side sewer pipe (ranging from 2” – 6” in diameter). Additional elements of work include: traffic control, temporary sewer bypass, abandon existing sewer mainline pipes, assist SPU Water Crew with cut & cap of watermain pipe and temporary water service installation, side sewer reconnections, post installation CCTV inspection, and surface restoration (pavement, stairs, landscaping, and ADA curb ramps).	X		X	X			X	X	X			X					
Seattle Public Utilities	PW#2024-044	Bitter Lake Reservoir Improvements	\$50,000,000	Q3 2025	Andrew Karch 684-4643	The project, located within SPU property at the Bitter Lake Reservoir, Linden Ave. N. and N 143rd St, in Seattle will construct a new 21-million gallon concrete prestressed water reservoir, partially buried and with a roof covering, to replace the existing open air water reservoir location. The scope of work includes civil, landscaping, structural, mechanical, electrical, instrumentation and controls, process and controls, erosion control and tree protection, and traffic control. Upcoming Construction Contracts – City Wide Public Works Projects

JOC Work Orders under PW#2024-005A (2024-2025) - Forma Construction Company				
Department	Work Order No.	Project Name	Engineer's Estimate	Project Description
Seattle Department of Transportation	WO#2024-101	55th Ave S Sidewalk Project - Drainage	\$109,957	The project is located at the intersection of 55th Ave S and Renton Ave S. The project will install bioretention facilities with underdrains and overflow structures which will connect to public storm drains.
Seattle Public Utilities	WO#2024-103	122 S Jackson St Hydrant Removal	\$75,120	The project is located NE of the intersection of S Jackson St and Occidental Ave S in Seattle. The project will include excavation to expose and remove the existing fire hydrant, site restoration and panel replacement.
Seattle Department of Transportation	WO#2024-114	6th Ave W Shoreline Street End Improvement Project	\$183,969	The project, located at 3601R 6th Ave W in Seattle will construct improvements related to public assess and habitat including removing paving and gravel and contaminated soil, adding a gravel beach, installing native plants along the shore and swale, and installing sidewalk and seating elements. Street improvements include repaving the intersection to reduce ponding and creating a pedestrian path from South Ship Canal Trail to the beach.
Seattle Department of Transportation	WO#2024-118	11th Ave NW Street End Shoreline Improvements	\$162,915	At the 11th Ave NW shoreline street end, green armoring erosion and sediment control measures are needed to protect the shore from wake action as it has been greatly eroded by industrial boat traffic resulting in significant recession of the bank line and undermining of existing deck footings. Asphalt and other man-made debris along the shoreline will be removed along the OHW line to prepare the site to improve the shoreline. Cobble, boulders, logs, and native landscaping planted in the adjacent uplands are proposed to hold the shoreline in place. The existing wood deck railing is deteriorating and will be replaced with a concrete plaza and walkway with a metal railing. The gravel walkways along the shore will be replaced with concrete to meet ADA access requirements. All in-water work will be at or above elevation +17.
Parks and Recreation	WO#2024-119	Jefferson Park Playfield Accessibility Improvements	\$241,554	The project, located at 4165 16th Ave S in Seattle will add (2) accessible parking stalls and an accessible ramp at Jefferson Park Playfield. The scope includes concrete and asphalt paving, concrete walls, handrails, pavement markings, wheel stops, accessibility parking signs, storm utilities, and plantings.
Seattle Center	WO#2024-122	Armory Grease Interceptor - West	\$333,117	This project, located at Seattle Center Armory, 305 Harrison St in Seattle will install grease waste piping and a grease interceptor tank to serve the west side Armory food merchants.
Finance and Administrative Services	WO#2024-124	FS 36 Officer Bunk Room	\$62,432	This project, located at 3600 23rd Ave SW in Seattle will address excessive noise in the Officer's Bunk Room due to its close proximity to adjacent arterial roads and freeway. The room is to be modified with acoustic elements to minimize the sound transmission. Construction activities include demolition, new furred and insulated acoustic walls/ceiling, window, electrical, lighting, mechanical, door sound proofing, casework, and finishes.
Finance and Administrative Services	WO#2024-126	SCH 2-3 TI & Security Upgrades	\$194,855	This project, located at Seattle City Hall, 600 4th Ave in Seattle, will construct a partial height wall with a new door and sub-divide an existing copy / work room to create a smaller work room and a separate office
Seattle Center	WO#2024-127	Longfellow NDS - Kenyon Site Completion	\$350,000	This project, located at the intersection of SW Kenyon St and 24th Ave SW will complete installation of drainage and landscaping improvements at the project location associated with the Longfellow NDS project. Work includes installation of drainage structures, a bioretention cell (BRC), plant installation and hardscape restoration.

City of Seattle
Purchasing and Contracting
Upcoming Construction Contracts – City Wide Public Works Projects

Seattle Public Utilities	WO#2024-128	Lk Youngs Lime Bldg Demo	\$222,635	This project is located at 16205 SE Old Petrovitsky Road in Renton. The Utility treats domestic water departing the Lake Youngs Water reservoir. Adjacent to a pipeline/pump station, one building adds trace amounts of chlorine, a second structure built in the 1980s injected small amounts of lime. This vertical steel tank and mixing equipment has been abandoned for over 20 years. The building is unstable and will be taken down by this contract. Work includes hazardous material removal followed by the demolition of what is primarily steel for recycling, leaving only the slab.
Seattle Public Utilities	WO#2024-129	OCC Meter Shop Canopy Repairs	\$71,804	This project is located at 2700 Airport Way S in Seattle includes removal of a structural metal deck and internal gutter system from two canopies, and installation of its structural replacement with a single-ply membrane roof draining to a new external gutter system. Project includes painting restoration of the existing canopy system
Seattle Center	WO#2024-130	Seattle Center Campus Paving 2025	\$342,503	This project is located at 305 Harrison St in Seattle and will resurface vacated streets on the Seattle Center Campus: Harrison St between 2nd Ave N and 3rd Ave N and 2nd Ave N between Thomas St and August Wilson Way. Additives may include extruded asphalt curb.
Seattle Public Utilities	WO#2024-131	Landsburg Fish Ladder Pond 1 Exclusion Panel	\$18,870	This project, located at the Landsburg Fish Passage Facility at28700 SE 252nd Pl in Ravensdale, WA, will fabricate and install a new aluminum guide channel and isolation panel (collectively the fish isolation panel assembly) at the Fish Ladder Pond 1.
Seattle Public Utilities	WO#2024-132	South Park Pump Station Fence Modi	\$201,340	This project, located at 640 S Riverside Dr in Seattle, modify and redesign the security fence at the South Park Pump Station.
Seattle Center	WO#2024-133	KEXP Pipe Reroute	\$241,900	This project is located at the Seattle Center, 305 Harrison St, Seattle, WA 98109, Northwest Tunnel and Northwest rooms currently occupied by KEXP and The VERA Project. The work will abandon an inaccessible section of heating water piping that had developed a leak assumed to be caused by a failed Vitalic fitting. The route determined to be ideal utilizes the basement storage area of the Northwest rooms below the breezeway between the spaces occupied by KEXP and VERA. To minimize future cost impacts and allow for the future removal of the breezeway canopy, the chilled water piping will also be rerouted.
