Jurisdictional Department's estimated market value:

FAS determines value based upon the following factors:

1. Previous one year vacant property sales within 2 miles of the subject property
2. Adjacent King County assessed land value on per square foot basis
3. Either positive or negative factors for unique topography, property dimensions and shape
4. Evaluation of potential added development capacity if combined with adjacent property.
5. Perpetual easements or reservations for slope easements or native vegetation.

A review has been conducted as summarized below:

1. The value of separate vacant building lots sold at \$17 per square foot.
2. The adjacent lot is valued by the King County Assessor at \$ 51 per square foot.
3. This property is not large enough to build a separate house. The property contains slopes, is triangle shape, and is adjacent to a busy road with limited direct access.
4. If combined with the adjacent lot, it change the development capacity of the lot
5. A slope easement will be retained, and a notice regarding existence of the critical area on site will be recorded with the land

The 2014 value of this property is based upon a review of the above factors:

A value of \$8.50 per square feet would reflect a fair market value of the property

Destination of funds upon sale: A portion to the Facility Services Sub-fund for expenses relating to sale of property, the remainder to general fund.

Current easements, covenants and restrictions: Steep slope.

Recommended easements, covenants and restrictions upon Transfer: FAS proposes that the property be transferred with a Covenant on the Deed stipulating that the steep slope be maintained to be maintained to prevent

slides, and to maintain vegetation according to current best management practices and if needed under permit from the Department of Planning and Development or their successor organization.

Potential problems with property and possible measures to mitigate their recurrence:
