Jurisdictional Department's estimated market value:

FAS determines value based upon the following factors:

1. Previous one year vacant property sales within 2 miles of the subject property
2. Adjacent King County assessed land value on per square foot basis
3. Either positive or negative factors for unique topography, property dimensions and shape
4. Evaluation of potential added development capacity if combined with adjacent property.
5. Perpetual easements or reservations for slope easements or native vegetation.

A review has been conducted as summarized below:

1. The value of separate vacant building lots ranges from between \$27.50 and \$80 per square foot.
2. The adjacent lot is valued by the King County Assessor at \$31.00 per square foot.
3. This property is not large enough to build a separate house. The property contains slopes, is triangle shape, and is adjacent to a busy road with limited direct access.
4. If combined with the adjacent lot no increase in development is probable.
5. A perpetual reservation for a slope easement is retained over the west 20 feet of the property.

The 2014 value of this property is based upon a review of the above factors:

A value of \$8.85 per square feet reflects a fair market value of the property that includes a partial slope easement.

A value of 15 per square feet reflects a fair market value if sold without any slope or easement.

Destination of funds upon sale: Street Fund and Cumulative Reserve Fund

Current easements, covenants and restrictions: none

Recommended easements, covenants and restrictions upon Transfer: Include on title a reservation of the City of the right to construct and maintain cut and fill slopes in the reasonable grading and maintenance of Northwest Market Street.

Potential problems with property and possible measures to mitigate their recurrence: Some of the slope could be replaced with structured retaining wall, or remain vegetated.
