### Reader's Guide to the 2013-2018 Adopted Capital Improvement Program

The City of Seattle's 2013-2018 Adopted Capital Improvement Program (CIP) includes an introduction, departmental sections, appendix, an index, and a glossary. The introduction provides information on the CIP, allocations, funding sources for capital projects, significant initiatives, support for neighborhoods and neighborhood plan projects, and policies guiding the City's capital investments.

Departmental sections comprise the majority of the CIP document, and contain detailed information on approximately 622 individual projects. The following departments have sections in this book: Parks and Recreation, Seattle Center, Seattle Public Library, Seattle Department of Transportation, Seattle City Light, Seattle Public Utilities (divided into four sections: Drainage and Wastewater, Solid Waste, Technology Projects, and Water), Department of Information Technology, and Finance and Administrative Services. The Appendix is comprised of a listing of new or expanded capital facilities, as required by the Growth Management Act.

### Reading CIP Project Pages

CIP project pages, located in the departmental sections of the CIP, provide the most detailed information about a project. The project pages contain the following information:

**BCL (Budget Control Level):** A grouping of similar projects into department-specific programs. Also reflects the level at which expenditures are controlled to meet state budget law provisions.

**Project Type:** Projects are identified as New Facilities, Improvements to Existing Facilities, or Rehabilitation or Restoration of Existing Facilities. Technology projects, or those that do not fit into the categories above, are identified as New Investments.

**Location:** Street address, intersection, or general location of a project. If a project has multiple location entries, only one project location entry will be included in the CIP.

**Start Date/End Date:** Quarter and year a project begins and is expected to finish. Projects that continue from year-to-year are shown as "Ongoing." Projects without a determined start or end date may show as "TBD" or "On Hold."

**Project ID:** Unique number identifying a project in the City's automated financial management system.

**Neighborhood District:** The City is divided into 13 neighborhood districts. This field indicates in which (if any) neighborhood district(s), a project is located. Some projects are located in more than one neighborhood district or outside the city, and are so noted.

**Neighborhood Plan:** If a project supports a neighborhood plan recommendation, the name of the neighborhood plan is indicated. Some projects are in more than one neighborhood plan, or not in a neighborhood plan. The City's 38 adopted neighborhood plans can be viewed online at <http://www.seattle.gov/neighborhoods/npi/plans.htm>.

**Neighborhood Plan Matrix ID:** If a project is identified as being a desired activity within a neighborhood plan, the corresponding matrix ID is captured in this field.

**Urban Village:** This field indicates whether a project is located in an Urban Village, a designated geographic area expected to accommodate future population and job growth, as defined by the Comprehensive Plan's growth management strategy.

**Project Description:** Information about the purpose, scope, and history of the project.

**Revenue Sources:** Revenues are all sources of money supporting a particular project such as grants, private donations, Councilmanic debt, Real Estate Excise Taxes, etc. The Revenue Source Table lists the project's revenue sources, life-to-date (LTD) expenditures through 2011; the 2012 revised budget (including 2012 Adopted Budget, carry-forward balances, abandonments, and supplemental appropriations); Adopted 2013 and Endorsed 2014 appropriations; and estimated appropriation requests for 2015-2018. "TBD" indicates that revenue sources are to be determined.

**Fund Appropriations/Allocations:** This table lists the appropriating funds, which are those funds (with Summit codes) through which the department has legal appropriation authority, and dollar information by year. Note that this level of detail on the project pages is for information only. Funds are appropriated in the 2013 Adopted Budget at the Budget Control Level.

**O&M Costs (Savings):** Estimate of significant increases or decreases in operations and maintenance costs as a result of a capital project. "N/C" denotes that operations and maintenance costs are not calculated.

**Spending Plan:** This field is shown when spending differs from appropriation or allocation for a given year. This is displayed for a limited number of projects in this document.

### **Background**

The City of Seattle owns and operates a variety of physical assets, ranging from community parks, roadways, bridges, office buildings, libraries, open space, fire stations, maintenance yards, facilities at Seattle Center, and more. These assets must be properly maintained in order to ensure they are safe, lasting, and provide a welcoming and usable space to serve the various purposes for which they are intended. The City's utility infrastructure is also included in the Capital Improvement Program (CIP), including electric, solid waste, water and wastewater utility assets. The City's capital facilities serve to support City operations, direct public services and programs, and in some cases provide direct public benefits themselves.

Every year during the annual budget process, the City adopts a six-year Capital Improvement Program (CIP) which outlines anticipated investments over that timeframe. The 2013-2018 Adopted CIP totals \$5.0 billion over six years, with \$775 million of that amount anticipated to be spent in 2013.

### **Capital Planning Policies**

The City historically has based capital planning efforts on a set of criteria that help set priorities among potential capital programs. Resolution 31203, adopted in June 2010, is the most recent update and set out the following policies to guide the City's capital spending:

- Preserve and maintain existing capital assets
- Support the goals of the City's plans
- Support economic development
- Consider external funding possibilities
- Consider revenue-generating possibilities
- Seek regional funding for regional projects
- Pursue cost-saving commitments
- Pursue conservation and sustainability investments

Additional specific considerations include:

- Compliance with regulatory requirements
- Coordination between departments and with other jurisdictions
- Public safety and health

Although departments on an individual basis do a thoughtful job of prioritizing their capital needs, it can be difficult to compare or prioritize needs across departments or to integrate department priorities with Citywide goals. The City Budget Office (CBO), in conjunction with the Mayor's Office, is undertaking a process to provide more clarity and transparency to CIP budget decisions. One outcome of this process is the development of CIP white papers for each department. These white papers describe department-specific funding priorities, funding challenges, and decision-making tools. The ultimate goal is to clearly communicate to all stakeholders about what CIP projects are funded and how and why the mix of projects was selected.

Summary information from these white papers is contained in the narrative sections for each department in this 2013-2018 Adopted CIP. Full versions of the department white papers can be found on the City Budget Office website: <http://www.seattle.gov/financedepartment/>

## Capital Program Funding and Recent Challenges

Like all large municipalities, Seattle relies on a variety of sources to pay for capital projects. These include locally-generated revenues (taxes, fees, voter-approved levies, and user charges), intergovernmental revenues (including state and federal grants), and debt issuance. Unlike pay-as-you-go sources of funding, the issuance of debt requires revenues in future years to repay the principal and interest expenses. These traditional sources continue to provide the majority of funds for capital facility investments. Utility projects (Seattle City Light and Seattle Public Utilities) are funded by revenues from utility rates. The utilities also issue debt to finance a portion of their capital projects. The City’s level of capital investment is based on the mix and level of financial resources available to the City.

Funding for City general government capital needs is limited and has been further hampered by the recent Great Recession. Regular funding of the City’s general government capital program is highly dependent on revenue from real estate excise taxes (REET), transportation-specific taxes, and in some cases relies on General Fund support, as well. REET is a volatile revenue source that tracks closely to local economic activity. As shown in the graph below, REET revenues rose sharply in 2004-2007 during the economic expansion, but plummeted in 2008 and 2009 as activity fell off. While projections for future years anticipate REET revenues to resume growing, large and sudden fluctuations in this revenue source make it difficult to rely upon for ongoing capital needs.

For this reason, the City maintains a reserve of REET funds to help offset fluctuations in revenue. The City dipped into this reserve in 2010, but is rebuilding the reserve over time in order to deal with future unexpected downturns in revenue. Through careful management of capital spending since 2010, current projections anticipate that target reserve levels for REET of \$10 million will be achieved in 2014. This level of REET reserve has not been achieved since 2008 and is critical to ensure the City has sufficient funding to maintain core asset preservation work in the event of a future economic downturn.

### Real Estate Excise Tax Revenue

The City's General Fund also has experienced significant strain in recent years, and while somewhat moderated for the coming 2013-2014 biennium, the General Fund fiscal strain is likely to continue into future years. Use of General Fund for capital programs results in fewer dollars available for direct services or programs; however, successfully functioning capital facilities are essential to enable provision of services using those facilities. For additional detail on General Fund challenges, please see the 2013-2014 Adopted Budget Overview online here:

<http://www.seattle.gov/financedepartment/13adoptedbudget/default.htm>

As described above, the City also relies on other funding sources for its capital program, including locally-generated revenues (taxes, fees, voter-approved levies, and user charges) and intergovernmental revenues (including state and federal grants). Reliance on councilmanic or voter approved debt is another common financing tool, although those obligations must be repaid from the same set of limited resources including REET and General Fund revenues.

Given the volatility of REET revenues, the City has prudent financial policies that limit the use of REET primarily to support cash spending on capital projects in lieu of supporting fixed debt service payments. Under current policy, any REET supporting newly issued debt can only be used in relation to the City's Fire Facilities and Emergency Response Levy (2003). The 2013-2018 Adopted CIP continues this policy, ensuring sufficient flexibility with REET commitments to respond to changing revenue patterns over time.

### **Seattle's Recent History – Major Voter-Approved Capital Projects**

In addition to reliance upon general tax sources, Seattle has undertaken a number of major capital projects during the last two decades using voter-approved funds and Councilmanic (non-voted) debt. Voter-approved projects include improvements to Seattle Center and construction of new or expanded community centers and parks, new or remodeled downtown and branch libraries, new or remodeled fire facilities, parks improvements, funding for low income housing, and funding through the families and education levy. Councilmanic debt has been used to address the City's downtown office space requirements, including purchase of Key Tower, an office tower housing many City employees, in 1996 and purchase of Park 90/5, a complex of office and warehouse buildings used to house Police support facilities and some other City functions. In 2002, the City completed a Justice Center to house Police administration and the Municipal Court. City Hall opened in 2003. The most recent capital project levies are:

- The 1998 Libraries for All Levy – a 30 year, \$196 million dollar voted bond measure that built a new Central Library, four new branch libraries and renovated or replaced 22 branch libraries.
- The 1999 Community Centers and Seattle Center Levy – an eight year, \$72 million levy which renovated and expanded community centers as well as renovations to Seattle Center.
- The 2003 Fire Facilities and Emergency Response Levy – a nine year, \$167 million levy which upgrades or replaces the City's 33 fire stations and renovates the Chief Seattle fireboat, and built a new Emergency Operations Center and a new Joint Training Facility.
- The 2006 Bridging the Gap Levy – a nine year, \$365 million levy for transportation maintenance and improvements.
- The 2008 Parks and Green Spaces Levy – a six year, \$146 million levy to acquire, develop, or restore, existing or new, parks, recreation facilities, cultural facilities, green spaces, playfields, trails, community gardens, and shoreline areas.
- The 2012 Central Seawall Excess Levy – a 30 year, \$290 million bond levy completes funding

necessary to construct Phase 1 the Elliott Bay Seawall Project (from Washington Street to Virginia Street) and funds reconstruction of one of the public piers (Pier 62/63 and Waterfront Park).

### **Funding Dynamics for Significant Future Capital Projects**

Given general resource funding challenges, it will be necessary for the City to continue to rely on voter-approved funding packages to complete major capital projects and to secure needed funding for basic asset preservation. The City has identified several major capital projects for which funding has not previously been identified and also identified a gap between City policies on asset preservation spending and available resources for this purpose. Given funding constraints, not every project can be supported. But priority projects have been identified. In order to fund these projects and raise asset preservation funding levels to at least minimum target levels, additional voter-approved levy authority will be required in addition to support from the City's general tax authority.

#### **Transit**

The Transit Master Plan (TMP) was completed in the fall of 2011. The TMP provides strategic guidance for the City on how best to connect neighborhoods, businesses and people in Seattle. It maps out where investments in more environmentally sustainable modes of transportation can improve mobility and access for all users of the transportation system. The City must embrace the recommendations of the TMP and must find the means to turn those recommendations into action.

The 2013-2018 Adopted CIP adds \$3.85 million in funding over previously planned 2013 and 2014 spending levels to allow for additional planning related to high capacity transit in the five priority corridors identified in the TMP. This will ensure that the City continues to refine plans and move towards implementation of the TMP. In total, the 2013-2018 Adopted CIP includes \$16.5 million over the coming two years for transit related projects, not including the primary route of the First Hill Streetcar, which is funded by Sound Transit.

Funding provided in the 2013-2018 Adopted CIP is critical to advance transit planning in Seattle. This will enable the City to be more competitive in seeking grant funding for these projects in addition to improved coordination with other regional transportation agencies. Improving our regional high capacity transit system is also critical for our local economy to remain competitive and to protect our regional natural resources.

The Citizens' Transportation Advisory Committee (CTAC III) delivered their recommendation in summer 2011 to the mayor and council and agreed that additional investments in our transportation system were prudent and that the time for action is now. While voters did not approve the package in November 2011, this important dialogue continues about how the City can make progress towards an equitable and sustainable transportation system.

#### **Public Safety Facilities**

Several public safety facilities are in need of replacement. Fire Station 5 on Alaskan Way, Fire Station 22 on East Roanoke Street, the Police Harbor Patrol facility on Lake Union and the Police North Precinct on College Way North all are in need of replacement. The Seawall funding package that was approved by voters in November 2012 provides a portion of the resources required for the repair of Piers 62 and 63, but additional funding is also required to complete these projects.

The 2013-2018 Adopted CIP includes General Fund-supported debt to begin due diligence work and land acquisition for a new Police North Precinct facility from which the Seattle Police Department serves the north end of the city. While General Fund resources are currently identified to support initial phases of the project, future phases will require additional funding from sources not yet determined.

### **Parks Asset Preservation**

The 2013-2018 Adopted CIP includes funding for major Parks capital projects, including continuation of the renovation of Building 30 at Magnuson Park and increases to Seattle's Urban Forestry program. Approximately \$19 million will also be spent on a variety of capital maintenance projects in the parks system in 2013 alone. This much-needed injection of resources into basic asset preservation will increase the life and usability of these facilities. In order to avoid the degradation of other community parks facilities, investments need to be maintained and increased in basic asset preservation.

Funding for asset preservation of the City's park system is below target levels and current revenue projections indicate this is unlikely to change over the next decade. The City therefore anticipates the need for renewal of the 2008 Parks Levy with an emphasis on providing needed resources to maintain these valuable public assets. The existing 2008 Parks Levy expires at the end of 2014.

### **Future Strategic Planning Required**

Investments are needed in the City's maintenance shops and only slow progress is currently being made on implementation of the Seattle Center Master Plan. Funding does not exist yet to support replacement of the Magnolia Bridge. While the near-term need for construction of a city jail has been avoided, a longer-term approach should be developed in the context of planning for capital expenditures across all of the areas mentioned. The City must also begin to consider how to address basic transportation funding declines when the Bridging the Gap levy ends in 2015.

## **2013-2018 Adopted Capital Improvement Program Summary**

The 2013-2018 Adopted CIP totals about \$5.0 billion for six years and includes approximately 625 individual projects. About \$2.9 billion of the six-year total, or 58%, consists of utility projects that are managed by Seattle City Light (SCL) and Seattle Public Utilities (SPU), and mostly are funded by utility rates. Approximately \$1.5 billion (31%) is in Seattle Department of Transportation (SDOT) over the six-year period. The remaining departments (Parks and Recreation, Finance and Administrative Services, Seattle Center, Seattle Public Library, and Department of Information Technology) account for approximately \$541 million, or 11% of the six-year CIP. Summaries of spending plans by department and details of individual project spending in the 2013-2018 Adopted CIP are contained in each department section. For informational purposes only, the table on the next page shows the total 2013-2018 allocations by department and the accompanying pie chart displays the allocations for 2013 only.

2013-2018 Adopted CIP by Department (dollars in thousands)

Department	2012 Adopted <sup>1</sup>	2013 Adopted	2014 Endorsed	2015-18 Total	2013-18 Total
Finance and Administrative Services	28,069	52,865	42,201	139,480	234,546
Information Technology	7,906	12,509	44,292	46,259	103,060
Parks and Recreation	52,283	39,147	25,861	70,783	135,791
Seattle Center	3,878	8,980	5,151	32,135	46,266
Seattle Public Library	1,783	3,425	3,556	13,713	20,694

Real Estate Excise Tax	31,365	44,044	34,781
Bond Financed	49,977	83,282	78,727
Voter-approved Funds (Seattle and King Co.)	63,377	87,316	119,203
To Be Determined	0	0	2,820
<b>Grand Total</b>	<b>711,009</b>	<b>774,886</b>	<b>900,759</b>

**2013 Adopted CIP by Revenue Source - \$ 775 Million**

**Asset Preservation**

A 2002 Asset Preservation Study found that, despite achieving targets recommended by the Citizens' Capital Investment Committee in 1994, the City still lagged behind industry-recommended levels of investment in asset preservation. The four general government departments involved in the study (Finance and Administrative Services, Library, Parks and Recreation, and Seattle Center) are responsible for about of 6.9 million square feet of building space, 2.6 million square feet of parking space, and 240 million square feet of grounds (primarily green space) and work yards. These assets have a replacement value of approximately \$5 billion. Assuming an annual asset preservation funding target of 1.0% of the replacement value for buildings and 0.5% of the replacement value for other assets, the City should be investing about \$49 million (2012 dollars) per year in asset preservation. These percentage targets are consistent with those used by other jurisdictions that were polled as part of this study's review of best practices.

## Overview

In 2013, the City is spending \$28.6 million from the Cumulative Reserve Subfund (CRS) and approximately \$45.7 million overall on asset preservation of general government infrastructure, including rehabilitation or restoration projects in parks, libraries, civic buildings, and on the Seattle Center campus. In SDOT, about \$91.8 million is allocated to asset preservation of infrastructure in 2013. In the 2013-2018 Adopted CIP, the City continues to fund projects in the Finance and Administrative Department through space rent charges, as recommended by the 2002 Asset Preservation Study.

Resolution 31083 outlines asset preservation spending guidelines for the Cumulative Reserve Capital Projects Account for departments other than Transportation and Utilities. The resolution establishes desired target spending as well as minimum spending levels. The table below displays budgeted spending from the Capital Projects Account compared to those guidelines.

The 2013-2018 Adopted CIP increases Capital Projects Account funding for asset preservation from 2012 levels and reduces the gap between funding and target levels. However, given general revenue constraints, there is still a shortfall from needed levels. This gap between available resources and needed funding levels is an issue that the City will continue to grapple with over time unless additional funding sources are identified.

<b>Capital Projects Account Funding for Asset Preservation in Departments Other than Transportation and Utilities</b>						
<b>\$ Million</b>	<b>2010 Adopted</b>	<b>2011 Adopted</b>	<b>2012 Adopted</b>	<b>2013 Adopted</b>	<b>2014 Endorsed</b>	<b>Cumulative (2010 Through 2014)</b>
Budget <sup>1</sup>	\$15.3	\$17.1	\$24.2	\$28.6	\$27.5	\$112.6
Target	\$47.4	\$48.1	\$49.1	\$50.2	\$51.1	\$245.9
Budget minus Target	(\$32.2)	(\$31.0)	(\$24.9)	(\$21.6)	(\$23.6)	(\$133.3)
Minimum (= 65% of Target)	\$30.8	\$31.3	\$31.9	\$32.6	\$33.4	\$160.0
Budget minus Minimum Funding Requirement	(\$15.6)	(\$14.2)	(\$7.8)	(\$4.0)	(\$5.8)	(\$47.4)
1) Budget represents funding levels from the Cumulative Reserve Subfund Capital Projects Account						

### **2013 Cumulative Reserve Subfund Appropriations**

The Cumulative Reserve Subfund (CRS) is a significant source of ongoing local funding to support capital projects in general government departments. This subfund is a reserve fund authorized under State law and is used primarily for maintenance and development of City capital facilities. Recent declines in REET revenue have drastically reduced resources available in CRS to support capital maintenance projects.

## Overview

The table below (dollars displayed in thousands) shows department allocations from CRS along with other special programs, including debt service payments, support for the Design Commission, Artwork Conservation and the City's Tenant Relocation Assistance Program. Further explanations of these special programs can be found in the 2013 Adopted and 2014 Endorsed budgets.

<b>2013 CRS Capital Spending by Department (000's)</b>	<b>CRS Direct</b>	<b>Capital</b>	<b>Total</b>
Seattle Center	\$0	\$8,135	\$8,135
Seattle Public Library	\$0	\$677	\$677
Seattle Department of Transportation	\$15,138	\$0	\$15,138
Department of Parks & Recreation	\$0	\$17,308	\$17,308
Finance & Administrative Services Department	\$0	\$13,395	\$13,395
Cumulative Reserve Subfund Direct Spending	\$3,685	\$0	\$3,685
<b>Total</b>	<b>\$18,823</b>	<b>\$39,515</b>	<b>\$58,338</b>

### Neighborhood Projects

#### **Support for Neighborhoods and Neighborhood Plan Projects**

The 2013-2018 Adopted CIP contains more than 133 projects, totaling approximately \$161 million, in support of neighborhood plans in 2013. The plans, created with input from 20,000 citizens and approved by the City Council, identify actions desired to ensure the City's neighborhoods continue to thrive and improve as Seattle grows over the next 20 years, as well as meet commitments under the State's Growth Management Act. Projects supporting neighborhood plan recommendations are found throughout the CIP and include parks, street and pedestrian improvements, libraries, community centers, drainage improvements, and pedestrian and safety lighting. When a project's location is included in a neighborhood plan's geographic parameters, the neighborhood plan is indicated. If the project is specifically identified as a desired activity within the neighborhood plan, a corresponding matrix number will be indicated. Funding for these projects comes from voter-approved levies, the Neighborhood Matching Subfund, the Cumulative Reserve Subfund, utility funds, Community Development Block Grant funds, and other public and private sources.

#### **Neighborhood Project Fund<sup>1</sup>**

Beginning in 1999, the City set aside approximately \$1 million per year from the Cumulative Reserve Subfund (CRS) for major maintenance projects identified in neighborhood plans. These neighborhood projects are identified and prioritized by the community, and selected for funding by the Department of Neighborhoods, SDOT, Parks, and the City Budget Office. The most recent selection process was completed in August 2012, resulting in the project list below. The Department of Parks and Recreation budget includes \$248,000 of CRS REET II funding and SDOT's budget includes \$752,000 of CRS REET II funding. See SDOT project TC365770 (NSF/CRS Neighborhood Program) and Parks project K732376 (Neighborhood Capital Program) for more detail.

<sup>1</sup> Formally known as the Neighborhood Street Fund/CRS Neighborhood Program – Small Projects

<b>2013 Neighborhood Projects Funds – Small Projects</b>				
<b>District Council</b>	<b>Project ID #</b>	<b>Project Description</b>	<b>Dept</b>	<b>CRS/NSF Amount</b>

Southwest	2012-021	Repave Lincoln Park tennis courts	Parks	\$ 63,500
<b>Subtotal Southwest</b>				<b>\$ 114,500</b>
<b>GRAND TOTAL</b>				<b>\$ 1,200,000</b>

### **Large Neighborhood Street Fund Projects**

The Bridging the Gap Levy provides approximately \$1.5 million per year on a triennial basis for larger neighborhood projects estimated to cost over \$100,000. The third, and final, round of project selection began in fall 2012, with design expected in 2013 and construction in 2014 and 2015. The following projects were constructed in 2012:

- Fairview Ave E and Fairview Ave N Intersection
- Maynard Ave S between S King Street and Weller Street
- Ravenna Ave NE between 85th Ave NE and Lake City Way
- NW 90<sup>th</sup> Street between 13<sup>th</sup> Avenue NW and 14<sup>th</sup> Avenue NW
- S Orcas Street between Beacon Ave S and 28<sup>th</sup> Avenue SW
- 25th Avenue SW between SW Brandon St and SW Findlay Street
- S Othello Street between Seward Park Ave S and Beacon Avenue S
- 33rd Avenue NE between NE 125th St and NE 130th St

### **Neighborhood Matching Subfund**

A number of CIP projects, particularly in the Department of Parks and Recreation CIP, include funding from the Neighborhood Matching Subfund (NMF), a subfund of the City's General Fund. The NMF was created in 1988 to provide funding to Seattle neighborhood groups and organizations for a broad array of neighborhood-initiated improvement, organizing, or planning projects. Many of these projects also support specific citywide initiatives such as Race and Social Justice, Youth Violence Prevention, Environment and Sustainability, and Neighborhood Planning. The total amount of funding awarded to groups ranges from a few thousand dollars up to \$100,000, and NMF funds are eligible to cover all phases of a capital project except property acquisition. The NMF program requires a 1:1 match for capital projects, which means all awards leverage other private and public contributions by requiring organizations to match the City's contribution with volunteer labor, donated materials, professional services, or money. The Department of Neighborhoods (DON) administers the granting process.

For 2013 and 2014, the Neighborhood Matching Fund maintains previous funding levels for neighborhood projects. Please see the Department of Neighborhoods section in the 2013 Adopted and 2014 Endorsed budgets for additional information about NMF.

### **Art and Design Funding for City Capital Projects**

#### **One Percent for Art Program**

The One Percent for Art program, established by Seattle Municipal Code Chapter 20.32, requires that one percent of eligible CIP project budgets be deposited in the Municipal Arts Fund for the commission, purchase, and installation of artworks throughout Seattle. The Office of Arts and Cultural Affairs (OACA) manages the One Percent for Art program and the Municipal Art Fund. Public art projects funded through the One Percent for Art program are developed in the annual Municipal Art Plan (MAP), which is prepared by OACA. The MAP establishes the scope of work and budgets for new art projects and describes the status of ongoing public art projects.

Municipal Art Fund revenues from the One Percent for Art program can fluctuate significantly from year-to-year depending on changes in City capital investments. In 2013, the Municipal Art Fund is expected to receive approximately \$2.1 million from capital departments for the One Percent for Art program, as described below.

<b>One Percent for Art Revenues</b>	<b>2011 Actuals</b>	<b>2012 Adopted</b>	<b>2013 Adopted</b>	<b>2014 Endorsed</b>
City Light	\$192,085	\$303,073	\$374,785	\$345,022
Seattle Public Utilities	\$1,120,493	\$923,169	\$1,136,000	\$1,166,000
Finance & Admin. Services	\$58,740	\$140,099	\$14,651	\$8,650
Seattle Center	\$36,220	\$1,180	\$1,500	\$3,500
Parks & Recreation	\$353,430	\$184,540	\$148,710	\$35,000
Transportation	\$605,710	\$465,808	\$473,820	\$196,450
<b>Totals</b>	<b>\$2,366,678</b>	<b>\$2,017,869</b>	<b>\$2,149,466</b>	<b>\$1,754,622</b>

In addition to the One Percent for Art revenues identified above, OACA receives \$187,000 in 2013 from the Cumulative Reserve Subfund for repair of all sited and portable artworks.

**Design Commission**

Established in 1968, the Seattle Design Commission advises the Mayor, the City Council and appropriate City departments on design and environmental aspects of the City’s Capital Improvement Program. Commission members are appointed by the Mayor for a renewable two-year term. Membership is comprised of two licensed architects, one professional fine artist, one youth member, one lay member, and at least one and no more than two from each of the following categories, for a maximum total of five (professional urban planner, professional environmental or urban designer, landscape architect, and licensed professional engineer). The Design Commission is fully funded with funds from the Cumulative Reserve Subfund.

Projects eligible for review include any on-or above-grade structure, including buildings and additions to buildings, bridges, park developments, street furniture, and all similar installations. The Commission reviews below-grade structures such as tunnels, arcades and underground passageways that are regularly visible to the public. Projects reviewed by the Commission must be financed in-whole or in-part with City funds, be on land belonging to the City, or be subject to approval by the City. Commission involvement in capital improvement projects begins as early in the planning process as possible, starting with participation in the consultant selection process and continuing through the many stages of project development. This includes project reviews at the scope briefing or pre-design stage, conceptual design, schematic design, design development, and sometimes construction documents stages.

**Background of Capital Improvement Program Policy Drivers**

As described above, City investments in capital projects are guided by a set of key policies reflecting the City’s values and priorities. These policies shape how the City takes care of buildings and infrastructure, invests in capital projects in areas that have accepted growth as envisioned in the City’s Comprehensive Plan, preserves the City’s and greater Seattle’s historic buildings, supports sustainable building practices, and ensures that all members of the community have access to the economic opportunities capital projects create. The following section details some of these key policies.

**Sustainable Building Policy**

In February 2000, the City Council adopted a Sustainable Building Policy for the City of Seattle (Resolution 30121) which articulates the City’s commitment to environmental, economic and social stewardship and sets the expectation that new municipal facilities meet established green building standards. Specifically, it calls for all new construction and major remodel projects over 5,000 square

feet to achieve a LEED Silver rating. When adopted, this policy was the first of its kind in the nation and represented a ground-breaking approach to demonstrating City leadership and transforming the marketplace.

Since 2000, the green building community has experienced exceptional growth in expertise and capacity. Recognizing this change, in 2011 the Executive proposed an updated Sustainable Building Policy which the Council unanimously passed in October of 2011 (Resolution 31326). The update represents a comprehensive approach that reflects advances in the green building industry, aligns the policy with the City's increased attention to climate change, addresses a greater range of project types, and ensures that Seattle continues to provide leadership that advances sustainable development in both the public and private realms.

As a result of the 2011 Sustainable Buildings and Sites Policy now in place, in 2013-2014:

- For new construction, additions and major renovation projects 5,000 square feet or greater
  - The minimum required green building rating is LEED Gold;
  - There are minimum requirements for energy and water efficiency, construction waste reductions, and bicycle amenities;
- For tenant improvement projects 5,000 square feet or greater, where the scope includes mechanical, electrical, and plumbing
  - The minimum required green building rating is LEED Gold;
  - There are minimum requirements for water efficiency and construction waste reductions;
- Completion of a Capital Green checklist is required for smaller projects;
- Pilot projects are being pursued to test new approaches and standards, such as the Living Building Challenge and the Sustainable Sites Initiative;
- Guidelines, procedures, and responsibilities to facilitate implementation are being updated; and
- Annual reporting of performance under the policy and ongoing program evaluation is required.

Additionally, the resolution directs City departments to evaluate and improve existing standards and processes that relate to tenant improvements, leasing, and site management.

### **City of Seattle Comprehensive Plan**

Development of the 2013-2018 Adopted CIP was informed by the City of Seattle's Comprehensive Plan, which had its required 10-year update in 2004. Departments have taken special note of capital projects in neighborhoods targeted for substantial growth in the future or that have received substantial growth in the last few years. This effort is intended to make sure areas receiving growth have the appropriate physical infrastructure to accommodate such growth, while balancing the City's other major maintenance needs of existing facilities, such as power distribution systems, pipes, community centers, swimming pools, libraries, and streets that are located throughout the City, not just in targeted growth areas.

### **Federal and State Regulatory Requirements**

The City's utilities have several facility projects in their Capital Improvement Programs to meet federal and state regulatory requirements. The City of Seattle must abide by the City's two National Pollutant Discharge Elimination System (NPDES) permits, one for storm water and one for combined sewer system. The City is required, for example, to invest hundreds of millions of dollars in the combined sewer/storm water system over the next several years to control the number of combined sewer overflows (CSOs) into receiving bodies of water, including Lake Washington and Puget Sound. City Council recently approved a CSO Consent Decree with Environmental Protection Agency (EPA) and the

Department of Ecology (DOE). This Consent Decree outlines how the City will become compliant with EPA and DOE regulatory requirements regarding sewage releases from the city conveyance system.

### **Endangered Species Compliance**

The Cedar River Watershed Habitat Conservation Plan (HCP) is a 50-year, ecosystem-based plan that was prepared to address the declining populations of salmon, steelhead and other species of fish and wildlife in the Cedar River basin. The HCP was prepared under the Endangered Species Act and is designed both to provide certainty for the City of Seattle's drinking water supply and to protect and restore habitats of 83 species of fish and wildlife that may be affected by the City of Seattle's water supply and hydroelectric operations on the Cedar River. Seattle Public Utilities is continuing to implement its commitments under the HCP, which include downstream habitat protection and restoration, upland forest restoration, logging road decommissioning, and ongoing monitoring. City Light and Seattle Public Utilities are also acquiring salmon habitat in the Green/Duwamish, Cedar/Lake Washington, Skagit, and Snohomish watersheds.

### **Americans with Disabilities Act**

The United States Department of Justice (DOJ) conducted an audit of select City of Seattle facilities, practices and procedures, in order to assess City compliance with the Americans with Disabilities Act (ADA), and reported its findings to the City. While the City is largely in compliance, there are some elements within facilities that the DOJ has requested that the City update or alter in order to improve accessibility for individuals with disabilities. In 2013, the City continues to appropriate funds to alter or address items where the City agrees accessibility can be improved. In addition, the City will undertake a comprehensive survey of City facilities to continually ensure the City's Programs and Facilities are accessible per the requirements of the ADA Regulations. A project manager added in 2011 will continue to coordinate and oversee implementation of ADA improvements in certain City facilities; determine and report compliance to DOJ; and review and modify as needed the facilities design and construction process with regard to the ADA. Additionally, a citywide prioritization process was developed to allocate ADA funding among the four implementing departments: Parks and Recreation, Seattle Center, Seattle Public Library and Finance and Administrative Services (FAS). Among other criteria, the process aimed to identify the highest-use facilities and those where ADA work could be done at the same time as other planned remodeling.

In order to provide additional proactive monitoring of compliance with ADA standards for new capital projects, the City will be adding additional staff dedicated to monitoring ADA compliance of new projects. These positions will be funded by capital projects.

### **Small and Economically-Disadvantaged Business Assistance**

The City continues to successfully address contracting equity for minority- and women-owned businesses (WMBE). In August 2011, FAS implemented a City-wide requirement on all public work bids and contracts above \$300,000 that has very effectively encouraged and enforced commitments by general contractors to use WMBE firms. FAS has also launched a major initiative to improve workforce diversity on public work projects. The first step was implementation of a Community Workforce Agreement for the Elliott Bay Seawall that includes unprecedented workforce diversity provisions; substantial work will continue throughout 2013-2014 and beyond.

### **Historic Preservation**

Seattle's commitment to historic preservation began with citizen efforts in the 1960s to block the demolition of two of Seattle's oldest neighborhoods - the Pike Place Market and Pioneer Square. Both neighborhoods were threatened with proposals that would have irreversibly changed the character of the districts. The Pike Place Market was faced with an Urban Renewal Plan that would have demolished it, while Pioneer Square was threatened with a major roadway project. In 1970, the Seattle City Council

## Overview

created the Pioneer Square Preservation District, Seattle's first historic district. Then, in 1971, voters approved an initiative to create the Pike Place Market historical district. In 1973, the Seattle City Council adopted a Landmarks Preservation Ordinance to safeguard properties of historic and architectural significance throughout the City, and more than 450 buildings, sites, and objects have now been designated as City landmarks. The City of Seattle currently owns or maintains many of those landmarks, including libraries, park buildings, and fire stations. In 2001, the City began a comprehensive effort to survey and inventory both City-owned properties and privately-owned properties throughout the City. To date, the Department has completed surveys and inventories in 20 of the City's neighborhoods including Belltown, Cascade, Central, Columbia City, Denny Triangle, Downtown, Fremont, Georgetown, Mount Baker, North Beacon Hill, North Rainier, Pike-Pine, Pioneer Square, Queen Anne, South Lake Union, South Park, South Seattle, University, Wallingford, Waterfront, as well as city-owned properties, pre-1906 residential buildings, and neighborhood commercial buildings throughout the City. The results of those efforts are available in a searchable database on the Department of Neighborhoods website.

# **PARKS AND RECREATION**

## Overview

The Department of Parks and Recreation's (Parks) vision statement is: "Seattle Parks and Recreation will work with all citizens to be good stewards of our environment, and to provide safe and welcoming opportunities to play, learn, contemplate, and build community." Achievement of this statement is manifest in a park system with more than 430 parks and open areas totaling over 6,200 acres of property throughout the City, amounting to almost 11% of the City's land area. It includes approximately 488 buildings and 430 parks that feature 185 athletic fields, 130 children's play areas, 27 community centers, 151 outdoor tennis courts, 25 miles of boulevards, an indoor tennis center, two outdoor and eight indoor swimming pools, five golf courses, performing and visual arts studios, boat ramps, moorages, fishing piers, trails, camps, viewpoints, open spaces, a rock climbing site, a conservatory, a state-of-the art zoo, a classical Japanese garden, and a waterfront aquarium.

## Funding Sources

Funds for the development of the system and for ongoing asset management come from a variety of sources, including three levies, the Cumulative Reserve Subfund, the Shoreline Park Improvement Fund, Councilmanic debt, and many other special fund sources, grants, and private donations. The funding sources used to cover annual debt service vary depending on the projects being debt financed, Golf revenues are used to repay all Golf related debt; Aquarium revenues pay for a portion of the debt service on the bonds used to renovate Pier 59; revenue from Magnuson Park Building 30 rentals is expected to pay most of the debt service for its renovation; and the General Fund covers debt service for the rest of the Pier 59 bonds and on other Parks-related bond funds.

### Levies

The most recent levy is the 2008 Parks and Green Spaces Levy, which is a six-year \$145.5 million levy intended "to acquire, develop, or restore, existing or new, parks, recreation facilities, cultural facilities, green spaces, playfields, trails, community gardens, and shoreline areas." The levy package, largely modeled after the successful 2000 Pro Parks Levy, provides for acquisition of new parks and green space and for development and improvement of the various parks throughout the City. This includes renovation of 23 play areas, park development atop lidded reservoirs, renovation of several existing neighborhood and major parks, significant investments in the Seattle Asian Art Museum and the Langston Hughes Performing Arts Center, and an environmental category to provide funding for the Green Seattle Partnership, community gardens, trails, and improved shoreline access at street ends. An Opportunity Fund Category funds other community-identified projects. Through 2012, \$108 million has been appropriated from this Levy.

The 2000 Parks Levy was an eight-year, \$198.2 million levy that funded more than 100 projects to acquire, improve, and develop parks, playfields and trails, improve maintenance, increase environmental stewardship programs, and enhance recreational programming for teens and seniors. The Levy closely follows the plan forged by the Pro Parks 2000 Citizens Planning Committee. The remaining projects to be completed are the First Hill Park acquisition; development of First Hill and University Heights Parks; and three trail projects managed by the Seattle Department of Transportation. Any remaining funds in this Levy will be reallocated via the Opportunity Fund process.

### Cumulative Reserve Subfund

The basic funding for Parks' capital improvement program is the Cumulative Reserve Sub-Fund, (CRS) that is earmarked for asset management purposes. This funding is provided by revenues from Real Estate Excise Tax (REET) revenues. It is used to address various capital programs, such as boiler replacement, electrical system upgrades, small irrigation upgrades, small ballfield improvements, small roofing replacement, paving restoration, landscape and forest restoration, and others. It also funds replacement of aging ball field lighting systems and certain Aquarium infrastructure projects. In past years the REET

## Department of Parks and Recreation

revenues were such that the CRS funded a number of larger, individual projects related to asset management, but such funding is now in decline.

Historically, the CRS funding provided for a fairly significant number of individual projects to be undertaken each year to address the larger asset management needs. In the period from 2000 to 2006, the annual allocation of CRS funding ranged from nearly \$10 million to \$13 million; it was \$21 million in 2007 and \$22 million in 2008. Due to the downturn in the real estate market, REET revenues are depressed and consequently CRS funding has been in short supply.

### Shoreline Park Improvement Fund

The Shoreline Park Improvement Fund (SPIF) funded ten projects as a result of a \$5 million settlement from King County for mitigation of the West Point Treatment Plant at Discovery Park. These projects were identified in Ordinance 121488, and were the result of an extensive planning effort by several community organizations and Parks. These funds have accomplished several building and road demolitions and partially funded the purchase and restoration of the Capehart Housing property in Discovery Park.

### LTGO Bond Financing

Bond funding has been allocated for:

- Replacing the Rainier Beach Community Center and Swimming Pool. Construction began in 2011 and the project will be completed in 2013.
- Implementation of the Golf Master Plan that will provide major improvements at three of the City-owned golf courses (Jackson, Jefferson and West Seattle), including a clubhouse building replacement, driving ranges, cart path improvements, and course and landscaping renovation. General obligation bonds will fund the projects and future revenue from the golf courses will cover associated debt service payments. These improvements are being phased over six years. Certain capital asset management work at the courses is also funded with direct golf revenues.
- Renovation of Magnuson Park Building 30 to bring it to code compliance.

## 2013-2018 CIP

The 2013-2018 Adopted CIP for Parks reflects a wide range of projects. With \$39.1 million appropriated in 2013, Parks will continue to have a robust capital improvement program, despite the economic downturn. The 2008 Parks Levy provides \$3.9 million of this funding, in addition to that already appropriated from the Levy in Parks' CIP since 2009. The Cumulative Reserve Subfund (CRS) provides a total of \$15.3 million, through a combination of \$4.3 million in REET I, \$9.3 million in REET II, and \$1.7 million in CRS-Unrestricted. Approximately \$3.7 million of the total CRS funding is budgeted for debt service.

Asset Management is a vital component of Parks' Capital Improvement Program, with \$18.1 million funded in 2013. The funding sources for capital maintenance are:

<b>Fund Source</b>	<b>2013 (Millions)</b>
Bonds	\$ 5.2
2008 Parks Levy	\$ 1.6
Grants and other	\$ 1.2
REET	\$ 10.1
<b>Total Major Maintenance Funding</b>	<b>\$18.1</b>

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Parks and Recreation

Capital maintenance projects address basic infrastructure across the Parks system, such as electrical system replacement, environmental remediation, landscape restoration, synthetic ballfield replacement, irrigation system replacement, and replacing major roof and HVAC systems.

The 2013-18 Proposed CIP increased REET funding for the Urban Forestry Green Seattle Partnership project (GSP) by \$500,000 for both 2013 and 2014. As part of the Council phase, the City Council increased REET funding by an additional \$500,000 in both years for a total project budget of \$1.9 million in 2013 (\$1.6 million REET and \$330,000 Levy) and \$2 million in 2014 (\$1.6 million REET/\$425 million Levy). The additional REET support in 2013 and 2014 will ensure that the program will be able to maintain current reforestation goals over the biennium.

Parks will use federal Community Development Block Grant (CDBG) funds for the Seattle Conservation Corps in 2013 and 2014 and for accessibility improvements in 2014. The Seattle Conservation Corps (SCC) executes Parks improvement projects in low to moderate-income neighborhoods, while at the same time provides training and employment for formerly homeless adults. In 2013, \$508,000 will be used to fund the SCC to improve approximately 15 parks. In 2014, the SCC program will be expanded with \$300,000 in additional CDBG funds, bringing the total to \$808,000, to improve approximately 25 parks.

In order to make parks more accessible to all residents, \$732,000 in CDBG funds will be used in 2014 to remove architectural and material barriers that restrict the mobility and accessibility of elderly or severely disabled persons in public facilities in parks throughout the City.

Seattle Aquarium major maintenance funding (\$1.2 million per year from REET through 2015) fulfills the \$8 million funding committed to in the 2010 transition agreement. As part of the agreement, the Aquarium reimburses the City for some of the debt service paid via CRS Unrestricted (\$1.3 million in 2013). In conjunction with the REET funded project to address Pier 60 corrosion and pier piling problems, the Aquarium will renovate the Harbor Seal Exhibit at a projected cost of \$3 million with funds raised by the Seattle Aquarium Society. Approval of this project in the CIP is intended to satisfy the requirement in section 7.2.4(b) of the Operations and Management Agreement between the City and the Seattle Aquarium Society that "Any Capital Improvement projected to cost more than three million dollars (\$3,000,000), measured in 2008 dollars, shall require the City's approval, by ordinance."

The 2013 Adopted Budget also establishes a reserve for the future funding of additional parking capacity at Seattle's Woodland Park Zoo. Additional parking spaces would help mitigate the impacts of Zoo patrons parking in nearby neighborhoods and fits within the spirit of the operating agreement between the Zoo and the City for operations of the Woodland Park Zoo. Various options are being explored and further consideration, including completion of an environmental review, is necessary prior to moving forward with a specific appropriation. Council action will be required before funds can be spent from this reserve.

The 2008 Parks and Green Spaces Levy projects continue to comprise a significant portion of Parks CIP. Highlights include:

- Acquisition of neighborhood parks and green spaces continues. To date, five Neighborhood Park Acquisitions have been completed, and a total of 27.6 acres have been added to the parks system (10.1 acquired and 17.5 via transfer of jurisdiction from other City Departments).
- The Development Category is winding down, with 42 of the 59 development projects completed and most of the rest underway in 2013. The three trail projects are being managed by the Seattle Department of Transportation.

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Parks and Recreation

- Implementation of the environmental projects continues with restoration of forests, development of community gardens and increasing shoreline access. Per the recommendation of the Levy Oversight Committee, the \$1.4 million inflation adjustment for the Environmental Category is being appropriated in the 2013-2018 for Urban Forestry and Community Garden projects. (Note: These inflation adjustments were included in the previously indicated figures for levy funding for the Urban Forestry-Green Seattle Partnership).
- Approximately \$20.6 million has been allocated for Opportunity Fund projects through 2012. Thirteen development projects and two acquisitions were designated in the first round of the Opportunity Fund. Two play field renovations were funded with savings from the Playfield sub category and \$9.8 million was appropriated for 17 major maintenance projects with inflation reserve funding reallocated from the development category. Appropriations for projects from the second round of the Opportunity Fund are expected to be requested in late 2012.

Park development continues for reservoir lids at Maple Leaf, and West Seattle. Construction of the new Rainier Beach Community Center and Pool is expected to be completed in 2013. Also in 2013, the City will continue implementation of the Golf Master Plan which will provide major improvements at three City-owned golf courses ( Jackson, Jefferson, and West Seattle), including building replacements, driving ranges, cart path improvements, and course and landscaping renovation. Future revenue from the golf courses will cover associated debt service payments. These improvements will be phased over six or more years.

The 2012 Adopted Budget and the 2012-2017 Adopted Capital Improvement Program (CIP) included funding for the first of two phases of improvements planned for Building 30 at Magnuson Park. The first phase was planned for 2012, with the second phase following in 2015. However, in early 2012, the decision was made to proceed with both phases of the project in 2012 and 2013 rather than in two separate phases. This option provides construction efficiencies and lowers overall borrowing costs for the project.

The total cost to fully renovate the building is approximately \$8.6 million. Improvements will include exiting upgrades, seismic upgrades, installation of fire suppression sprinklers and fire alarm systems in the hangar and buildings east and west wings, as well as lighting, heating and ventilation upgrades, an elevator, and ADA toilet room upgrades, and other related work, depending on permitting requirements. Water service, natural gas systems, and primary electrical services to the building may also be upgraded to support the building renovations.

An additional \$1 million in REET funding will be used for shell and core renovations to stabilize building 18 in Magnuson Park.

One remaining 2000 Pro Parks Levy acquisition remains to be completed.

In 2013, several projects are being consolidated in other BCLs to streamline the CIP. The changes include:

- The Debt Service and Contract Obligation BCL has been renamed the Debt Service and Special Funding BCL, and four projects have been moved here (Gas Works Park – Remediation, Golf - Capital Improvements, Golf Master Plan Implementation, and Puget Park - Environmental Remediation).
- The Parks Upgrade Program project has been moved from its own BCL to the Parks Infrastructure BCL.

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Parks and Recreation

- The Opportunity Fund Acquisitions- 2008 Parks Levy project has been moved from its own BCL to the renamed 2008 Parks Levy- Opportunity Fund BCL which now includes all Opportunity Fund projects.

Finally, the 2013-2018 Adopted CIP includes \$75,000 (REET I) in 2013 to conduct an architectural and engineering study of the Lake City Community Center and \$425,000 (REET I) in 2014 to construct necessary improvements to comply with the Americans with Disabilities Act.

### Summary of Upcoming Budget Issues and Challenges

At the most fundamental level, the amount of funding available for ongoing asset management of the Seattle Parks system is inadequate to keep pace with the growth and aging of the system. The current Parks Asset Management Plan identifies \$240 Million in needed improvements over the next six years, with much of that work actually considered a backlog due to deferred maintenance over the years. Recent allocations of CRS funds have provided funding for programs as described above, and only a small handful of individual capital projects. The park levies have provided for some degree of reinvestment in park facilities (e.g., the redevelopment of 23 of the oldest play areas with the current levy), but many critical infrastructure needs, especially those that are off-view from the public, such as roofs, water and sewer systems, and the like have gone unaddressed.

Parks also has several very large assets that are in need of attention but are beyond the capacity of the typical annual outlay of CRS funding. Waterfront Park is deteriorated and load limits placed on its use. The metal reinforcement of the concrete promenade and gallery structures are so deteriorated as to make them seismically unsound (note: these are the platforms that previously formed the bridge abutment to Pier 57 at the south end and the area that supports the fountain and other spaces near the Aquarium adjacent Pier 59). Parks staff has proposed to remove most of this structure and re-build areas adjacent to the Aquarium while also improving near shore marine habitat at this location. The high costs of addressing these assets and the ongoing public debate about the future Alaskan Way Viaduct and seawall have combined to defer attention to these matters. The Seawall Bond issue may include funding for renovating Piers 62 and 63, which deteriorated to the point that the popular Summer Nights on the Pier concert series were cancelled after the 2004 season.

Equally troublesome to the saltwater piers is the collection of large and aging buildings at Magnuson Park owned by Parks and that at one time were part of the old Sand Point Naval Air Station. While tenants have been found for several buildings that have been or are proposed for renovation, others have not. Only a part of Building 2 is used by the Seattle Conservation Corps; the two large hangars are empty. Portions of the roof on Building 18 have collapsed, and the building is dangerous to enter. Building 138 is occupied by several tenants but is in deteriorated condition. Over \$50 million would be needed to address code deficiencies in these buildings. Their removal is possible but would involve serious discussions about the City's obligations to support an historic district.

### Thematic Priorities

Parks analyzes and prioritizes projects generated in the identification stage using the priority ranking based on Parks management guidance and the City Council's "Basic Principles Underlying Strategic Capital Planning," policies established in Resolution 30365:

*Policy 1. Preserve and maintain existing infrastructure. While building new infrastructure is often seen as more glamorous, maintaining existing infrastructure is critical to ensuring continued service and protection of previous capital investments...*

## Department of Parks and Recreation

*Policy 2. Support the goals of the City's functional plans. Capital investments will be targeted to support the goals of the Comprehensive Plan, recognized neighborhood plans, adopted facility, department, or sub-area Master Plans, and other adopted City functional plans...*

*Policy 3. Support economic development. The City's ability to fund major maintenance and capital development in the long run depends on the strength of the City's economy and tax base...*

Seattle Parks and Recreation is committed to development and management of an environmentally sustainable park system that is safe and welcoming for all users, including residents of the City and visitors to Seattle. This means effective use of energy and utilities in all of our facilities, being efficient in the use of water for irrigation and other uses; creating landscapes that can be efficiently maintained; and operating park facilities that are clean and safe.

These principles have led us to use available resources to undertake energy conservation improvements to various facilities, to continue to make investments that preserve the integrity of facilities; to make improvements that ensure public safety in our parks, and to address various code deficiencies. Examples of this last principle include upgrades to play areas to meet modern play area safety guidelines as well as Americans for Disability Act (ADA) guidelines to ensure safe access to park and recreation opportunities.

### Project Selection Criteria

Parks' project selection process for the capital improvement program is founded in two basic approaches. First, for the various levy projects, projects are implemented essentially as described in the ballot measure. In most cases the project scope and budget have been determined during the planning for the ballot measure but in some cases allowances are made that allow for choices to be made within a programmatic direction. An example of this includes the current levy's allowance for acquisition of neighborhood park sites in urban villages that are deficient in open space. Second, Parks uses the Asset Management Plan to identify needed capital improvement projects that are funding by CRS.

The Parks Asset Management Plan (AMP) is a compendium of projects to address facility needs. Projects are identified through ongoing condition assessments, consultant studies, six-year facility plans, work order analyses (to identify key problem areas), and intradepartmental information sharing of facility maintenance issues and needs. Every two years, the AMP is reviewed and updated. While Parks planning staff prepares and coordinates the Asset Management Planning process and document development, the process involves a collaborative approach throughout the Department. These resources are used to develop information to develop project scopes and budget estimates.

Typically, all of the projects included in the asset management plan (are scored and ranked with the six overarching criteria that most closely match the need for the project. The following six criteria are used to rank the projects:

**Priority 1 – Code Requirements (100 points)** The project brings a facility or element up to federal, state, and Seattle code requirements (such as ADA, water quality, fire suppression, and seismic), or meets other legal requirements. (Note: Projects that primarily are ADA-focused fall under this priority. ADA elements will be completed as part of projects that fall under other priorities.)

**Priority 2 – Life Safety (35 points)** The project will eliminate a condition that poses an imminent threat of injury. Examples of safety hazards are lack of seismic elements, failing piling, outdated play equipment, emergency management, or a documented environmental health hazard.

**Priority 3 – Facility Integrity (30/25/20 points)** The project will keep the facility operational and extend its life cycle by repairing, replacing, and renovating systems and elements of the facility, including

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Parks and Recreation

building envelope (roof, walls, windows), electrical, plumbing, storm and sewer line replacement, and synthetic turf replacement.

30 points: Extends life cycle, high usage/heavily programmed, underserved area, community center, emergency shelters.

25 points: Extends life cycle, high usage/programmed.

20 points: Extends life cycle.

**Priority 4 – Improve Operating Efficiency (25 points)** The project will result in the reduction of operating and maintenance costs, including energy and water savings.

**Priority 5 – Other (5 Points)** Projects that have a unique element (e.g., leverage other funds) and/or are known needs that do not fit the other priorities.

**Priority 6 – Project Necessary in Next Biennium (5 points)** Projects identified in plans and other documents that require being done in the upcoming biennium. (e.g., scheduled synthetic turf replacement or regulatory deadlines).

As indicated in the preceding section, the application of these criteria results in project lists that first address code and life safety issues. These could include ADA improvements, roof replacement, seismic upgrades, and piling replacement, among other types of code and life safety issues. If there are sufficient funds available, the next highest priorities are facility integrity-related projects. Protection of the exterior “skin” of a building by replacing roofs, walls, and windows will maintain the viability of the facility and ensure its usefulness for programs and staff. The Green Lake Community Center/Evans Pool Roof Replacement and Solar Hot Water is an example of such a project. Other investments that extend the life of the building such as renovation or replacement of electrical, plumbing, and heating systems are also given priority. Work that reduces operating and maintenance costs or produces water and energy savings are also priorities. Finally, if a project leverages other funds or should be done in the biennium such as planned turf replacements are the next priorities.

### Aligning Infrastructure with Planned Growth

Both the 2000 Pro Parks Levy and the 2008 Parks and Green Spaces Levy have allowed for investment in the City’s Urban Villages. Criteria used to allocate Opportunity Funds provide by these levies focused expenditures in underserved parts of Seattle. At the outset of that levy, money was set aside in the Opportunity Fund to acquire parkland on First Hill, University, and International District where there was little parkland to serve resident populations of those neighborhoods. A “gap analysis” was used to identify areas of these and other urban villages that were deficient in open space and led to other acquisition and subsequent park development in the Ballard, Fremont, and Belltown urban villages.

An update of the Gap Analysis formed the basis for neighborhood park acquisition for the 2008 Parks and Green Spaces Levy, in which \$24 Million is allocated to acquire new parkland in any of the 18 urban villages projected to meet less than 50% of the City’s open space goals by 2024. To date, new parkland has been acquired in Capitol Hill, Fremont, and Lake City urban villages and property acquisition is being pursued in several others, including the International District, Bitter Lake and North Rainier urban villages.

Parks has leased commercial property in Belltown for a new community center for the northerly part of downtown Seattle. Belltown is already the City’s most dense Urban Center Village and is projected to be the densest in 2024 in terms of numbers of households per acre.

## Department of Parks and Recreation

It should be noted that while the creation of new parks is focused on meeting needs as expressed in the Gap Analysis and focused in the City's urban villages, the vast majority of future capital needs will be on maintenance of existing assets. Seattle's parks tend to be sited predominantly in single family residential areas away from the denser downtown neighborhoods/urban villages due to the historical development of the City. These parks, including Seattle's flagship Olmsted era parks (Seward, Volunteer, Green Lake, and other Parks), as well as newer Discovery Park and Cal Anderson Park are dispersed throughout the entire city. Many parks with major maintenance needs are in areas of Seattle that are experiencing growth, even though they are outside of urban villages.

### **Future Projects/What is on the Horizon**

Not addressed in the six-year CIP, but addressed in previous section of this paper are both the need for increased funding for basic and ongoing asset management throughout the park system as well as resolving very high costs issues associated with development of the Central Waterfront, replacement of the saltwater piers on the City's central waterfront (to the extent not covered by the Seawall project) and the various aging buildings at Magnuson Park.

Continued deterioration of saltwater piers and some of the Magnuson Park buildings will likely mean that restrictions to any use may ultimately be needed if renovation or replacement cannot be undertaken, followed by demolition at some point.

Investments in modifications to make our parks, community centers and swimming pools will continue to be needed for full compliance with the Americans for Disabilities Act.

Priority unfunded capital needs for Parks include sewer and storm drain line replacements, path and parking lot paving, and other work as detailed in the Asset Management Plan. Some of these may be addressed if sufficient CRS funding is available in the next biennium. Funding is needed to continue to meet public expectations for ongoing and expanded forest restoration under the Green Seattle Partnership as was planned in recent years. And, as synthetic turf ballfield surfaces age and deteriorate, they will need to be replaced. While much less costly than initial installation, their replacement is needed on an approximately 10-year cycle.

### **City Council Provisos to the CIP**

There are no Council provisos.

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Parks and Recreation

### 12th Avenue Square Park Development - 2008 Parks Levy (formerly East James Court)

<b>BCL/Program Name:</b>	2008 Parks Levy- Opportunity Fund	<b>BCL/Program Code:</b>	K720041
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q2/2011
<b>Project ID:</b>	K730145	<b>End Date:</b>	Q3/2013
<b>Location:</b>	12th AVE/E James CT		
<b>Neighborhood Plan:</b>	Central Area	<b>Neighborhood Plan Matrix:</b>	NA-16
<b>Neighborhood District:</b>	East District	<b>Urban Village:</b>	12th AV

This project, part of the 2008 Parks Levy Opportunity Fund, converts an existing street and sidewalk into a park boulevard which invites and accommodates joint pedestrian and vehicular use. It will serve as a park-like extension of the adjacent, newly-acquired 12th Ave Park which is in the planning stage. The additional open space will provide green space and enhance neighborhood circulation in this dense neighborhood.

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Parks and Recreation

### 12th Avenue Square Park Development - Pro Parks (Formerly 12th Avenue Park)

<b>BCL/Program Name:</b>	2000 Parks Levy - Acquisition Opportunity Fund	<b>BCL/Program Code:</b>	K723007
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q4/2008
<b>Project ID:</b>	K733239-02	<b>End Date:</b>	Q3/2013
<b>Location:</b>	564 12th AVE		
<b>Neighborhood Plan:</b>	Capitol Hill	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	Central	<b>Urban Village:</b>	Capitol Hill

This project provides for the development of a small urban park, in conjunction with adjacent private development (Seattle University), and conversion of E. James Court into a pedestrian environment. This project enhances a site that was transferred from Department of Neighborhoods to Department of Parks Recreation in 2007. This property was acquired under the Pro Parks Opportunity Fund program and development is funded from other sources.

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Parks and Recreation

### 14th Avenue NW Park Boulevard Development (NW 58th to NW 62nd)

<b>BCL/Program Name:</b>	2008 Parks Levy- Neighborhood Parks and Playgrounds	<b>BCL/Program Code:</b>	K720020
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q3/2012
<b>Project ID:</b>	K730176	<b>End Date:</b>	Q4/2014
<b>Location:</b>	14th AVE NW/NW 58th ST/NW 62nd ST		
<b>Neighborhood Plan:</b>	Crown Hill/Ballard	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Ballard	<b>Urban Village:</b>	Not in an Urban Village

This project develops 14th Avenue NW between NW 58th and NW 62nd as a Park Boulevard. After transfer of jurisdiction for this portion of 14th Avenue NW from the Seattle Department of Transportation to the Seattle Department of Parks and Recreation, a new park space will be created for the Ballard neighborhood. The Park Boulevard will provide usable park space while continuing to provide two traffic lanes and reduced parking. This project is part of the 2008 Parks Levy.

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Parks and Recreation

### ADA Compliance - Parks

<b>BCL/Program Name:</b>	Building Component Renovations	<b>BCL/Program Code:</b>	K72444
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q2/2011
<b>Project ID:</b>	K732434	<b>End Date:</b>	TBD
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project provides for corrections of ADA deficiencies at a number of parks facilities as identified in a recent Department of Justice audit. Work will be focused on selected community centers (e.g., Bitter Lake, Delridge, Garfield, Jefferson, Meadowbrook, Miller and others) and will consist of adjustments to signage, door closures, restroom fixtures, and other features. Signage will be added where needed as well. Similar work will be undertaken at Discovery Park Environmental Learning Center and other facilities to the degree that funding allows.

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Parks and Recreation

### Aquarium - Pier 59 Piling Replacement and Aquarium Redevelopment Debt Service

<b>BCL/Program Name:</b>	Debt and Special Funding	<b>BCL/Program Code:</b>	K72440
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2005
<b>Project ID:</b>	K732283	<b>End Date:</b>	Q4/2025
<b>Location:</b>	1483 Alaskan Wy		
<b>Neighborhood Plan:</b>	Commercial Core	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Commercial Core

This project supports debt service payments on 20-year Limited Tax General Obligation (LTGO) bonds that were issued in 2005 to pay for the replacement of the entire pier piling system of Pier 59, interior infrastructure improvements, and development of portions of the Aquarium by the Seattle Aquarium Society. The pier and Aquarium work was part of an overall plan to repair and redevelop the Aquarium and the Central Waterfront area, and to construct a new Aquarium entrance, exhibits, and visitor services on a portion of the pier. This work enhanced and extended the useful life of Pier 59 and the Aquarium.

<b>Location:</b>	1483 Alaskan WAY		
<b>Neighborhood Plan:</b>	Commercial Core	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Commercial Core

This project provides for capital maintenance to the building envelope, roof, pier supports and decking, HVAC, sewer, water, and electrical systems, elevator, structural elements to the exhibits, fire alarm and suppressions systems, emergency lighting, safety improvements, and other related work at the Aquarium on Piers 59 and 60 which will extend the useful life of the facility. This project funds the remaining portion of the City obligation to provide \$8 million for agreed capital maintenance at the Seattle Aquarium. This agreement between the City of Seattle and the Seattle Aquarium Society was authorized by Ordinance 123205. Consistent with the agreement, this project is expected to be carried out by the Seattle Aquarium Society and funding will be transferred to the Seattle Aquarium Society for that purpose via an agreement with the Department of Parks and Recreation.

<b>Location:</b>	1483 Alaskan Wy	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood Plan:</b>	Commercial Core	<b>Urban Village:</b>	Commercial Core
<b>Neighborhood District:</b>	Downtown		

This project replaces the finger pier X-braces and deficient piles; repairs damaged concrete deck panels, beams, and selected wood decking; adds cathodic protection; and other related repairs. This project extends the useful life of the pier. Consistent with the agreement authorized by Ordinance 123205 between the City of Seattle and the Seattle Aquarium Society for the operation and management of the Seattle Aquarium, this project is expected to be carried out by the Seattle Aquarium Society and funding will be transferred to the Seattle Aquarium Society for that purpose via an agreement with the Department of Parks and Recreation.

In conjunction with this project the Aquarium will renovate the Harbor Seal Exhibit at a projected cost of \$3 million with funds raised by the Seattle Aquarium Society. Approval of this project in the CIP is intended to satisfy the requirement in section 7.2.4(b) of the Operations and Management Agreement between the City and the Seattle Aquarium Society that "Any Capital Improvement projected to cost more than three million dollars (\$3,000,000), measured in 2008 dollars, shall require the City's approval, by ordinance."

<b>Neighborhood Plan:</b>	Crown Hill/Ballard	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Ballard	<b>Urban Village:</b>	Ballard

This project, funded with the 2008 Parks Levy Inflation Adjustment funds, , replaces the roof at the community center. The existing 8,250 square foot roof will be removed, and a single-ply roof assembly, flashing, and related elements will be installed. This project will eliminate leaks in the building which degrade the structure and disrupts programming in the building.

<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	Not in an Urban Village

This project provides funding to conduct core testing of wood light poles at various ballfields, replace deteriorated wooden poles with metal poles, install new electrical systems, and perform other related work. The new lighting systems will reduce light spillover and energy efficient. This is a long-term program to replace all deteriorated wood light poles over the next several years at a total estimated cost of \$6 million. Future funding for this program depends on available resources.

This ongoing project provides small-scale renovations and minor improvements to athletic fields throughout the City. Typical improvements include, but are not limited to, repairs to fencing and backstops, renovations to dugouts and playing surfaces, modifications and improvements to irrigation systems and replacement of goal posts and nets. Future funding for this project depends on specific projects and available resources, including grants. This project extends the useful life of the various elements of athletic fields. This project was formerly project number K73507. A new project number has been created for this project to comply with new accounting procedures, therefore life to date and 2009 revised dollar amounts do not appear in the table below.

<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Denny Triangle

This project develops Bell Street between 1st Avenue and 5th Avenue as a Park Boulevard. After transfer of jurisdiction for this portion of Bell Street from the Seattle Department of Transportation to the Seattle Department of Parks and Recreation, a new park space will be created for the Belltown neighborhood. The Park Boulevard will provide usable park space while continuing to provide one traffic lane and reduced parking. This project is part of the 2008 Parks Levy.

<b>Location:</b>	2407 1st Ave		
<b>Neighborhood Plan:</b>	Belltown	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Belltown

This project provides for the long-term lease (or purchase) of approximately 6,000 square feet of street level space, and build-out of that space if required, in the Belltown area. Potential elements of the new space may include a multi-purpose room, a kitchen, as well as spaces for classes, community meetings, and celebrations. This project provides community center space that serves as a civic focal point for the Belltown area. It is the ninth, and final, community center to be funded by the 1999 Seattle Center and Community Centers Levy.

## Department of Parks and Recreation

### Boat Moorage Restoration

<b>BCL/Program Name:</b>	Docks/Piers/Floats/Seawalls/Shorelines	<b>BCL/Program Code:</b>	K72447
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2010
<b>Project ID:</b>	K732408	<b>End Date:</b>	ONGOING
<b>Location:</b>	4400 Lake Washington BLVD S		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Southeast	<b>Urban Village:</b>	Not in an Urban Village

This project renovates City-owned boat moorages throughout the park system. Work includes, but is not limited to, repairs to the piles, caps, stringers, decking, and breakwater structures. These repairs extend the useful life boat moorages, many of which generate revenues to the Department each year. This project was formerly project number K732338. A new project number has been created for this project to comply with new accounting procedures, therefore life to date amounts do not appear in the table below.

### Bobby Morris Playfield Turf Replacement

<b>BCL/Program Name:</b>	Ballfields/Athletic Courts/Play Areas	<b>BCL/Program Code:</b>	K72445
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2017
<b>Project ID:</b>	K732452	<b>End Date:</b>	Q4/2017
<b>Location:</b>	1635 11th AVE		
<b>Neighborhood Plan:</b>	Capitol Hill	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	East District	<b>Urban Village:</b>	Capitol Hill

This project replaces the 100,000 square foot synthetic turf field surfacing which was installed in 2005, and performs related work. The surfacing material is near the end of its lifecycle. This improvement allows the continued use and scheduling of the playfield for soccer, baseball, and other activities.

<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	Not in an Urban Village

This ongoing project replaces boilers, mechanical systems, and any related work necessary in facilities throughout the Parks system. Costs for certain boiler and mechanical systems replacements may be eligible for reimbursement from Seattle City Light or Puget Sound Energy. This project extends the useful life of the boilers and assures that Department facilities are not closed due to boiler and mechanical systems failure.

### Comfort Station Renovations

<b>BCL/Program Name:</b>	Building Component Renovations	<b>BCL/Program Code:</b>	K72444
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2015
<b>Project ID:</b>	K732453	<b>End Date:</b>	TBD
<b>Location:</b>			
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project renovates selected comfort stations for improved ADA access, ventilation and finishes (walls and floors), and security. The renovations also may include reconfigured stalls, new toilets, urinals, and sinks, ADA accessories, paint and finishes, and related work, depending on the needs of a particular site. In some cases, a comfort station may be replaced with a prefabricated unit. More park users will have access to these facilities, and the improvements will make them more inviting and comfortable. Specific sites will be determined in early 2013.

### David Rodgers Park Comfort Station Sewer Replacement

<b>BCL/Program Name:</b>	Building Component Renovations	<b>BCL/Program Code:</b>	K72444
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	K732450	<b>End Date:</b>	Q4/2013
<b>Location:</b>	2800 1st Ave W		
<b>Neighborhood Plan:</b>	Queen Anne	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Magnolia/Queen Anne	<b>Urban Village:</b>	Not in an Urban Village

This project replaces the sanity sewer line from the comfort station to the street, adds one manhole, eliminates a manhole that is no longer needed, and related work. The line was filmed in 2012 and pinpointed issues with a crack in the clay tile pipe and root intrusion. This new pipe will reduce closures of the comfort station due to sewer backups.

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Parks and Recreation

### Discovery Park Water Line Modification and North Forest Road Removal

<b>BCL/Program Name:</b>	West Point Settlement Projects	<b>BCL/Program Code:</b>	K72982
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2012
<b>Project ID:</b>	K732439	<b>End Date:</b>	Q1/2013
<b>Location:</b>	3801 Discovery Park BLVD		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Magnolia/Queen Anne	<b>Urban Village:</b>	Not in an Urban Village

This project will relocate the existing 8" water meter serving the north part of Discovery Park from its Idaho Avenue location to a new location at Kansas Avenue, install 500 lineal feet of new 8" water main to connect to an existing water main in Kansas Avenue, and allow abandonment of over 1100 lineal feet of water main in Idaho Avenue and forested areas between Idaho and Kansas Avenues. Included in the project will be removal of over 500 lineal feet of the remainder of Idaho Avenue. This portion of the roadway corridor will then be reforested. This project will allow abandonment of a second water line that feeds the northern portion of the park and that has leaked so badly as to necessitate its shutdown. Parks will seek concurrence with the West Point Oversight Committee for this project.

### Electrical System Replacement Program

<b>BCL/Program Name:</b>	Building Component Renovations	<b>BCL/Program Code:</b>	K72444
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	K732307	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Urban Village:</b>	In more than one Urban Village
<b>Neighborhood District:</b>	In more than one District		

This ongoing project renovates electrical systems throughout the park system to reduce fire hazards and performs other related work. Future funding depends on specific projects and available resources, including grants. This project extends the useful life of electrical systems in various Parks facilities and increases the safety of these systems.

### Emergency Shelter Generator Renovations

<b>BCL/Program Name:</b>	Building Component Renovations	<b>BCL/Program Code:</b>	K72444
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2012
<b>Project ID:</b>	K732440	<b>End Date:</b>	Q1/2013
<b>Location:</b>			
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project provides emergency systems as necessary to priority 1 emergency shelters in Parks community centers. The priority 1 shelters are Bitter Lake CC, Delridge CC, Garfield CC, Meadowbrook CC, Rainier CC, and Southwest CC. Initial funding will replace emergency generators as necessary and renovate electrical systems for one to three shelters. This work ensures that the emergency shelters can function in the event of a natural disaster.

<b>Neighborhood Plan:</b>	Wallingford	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Lake Union	<b>Urban Village:</b>	Not in an Urban Village

This project provides ongoing monitoring efforts to ensure the measures constructed for remediation of soils at Gas Works Park were effective. Monitoring activities include maintenance and operation of the air sparging, SVE systems, soil cap, and other institutional controls; groundwater testing; quarterly reports; and other related work. The project also provides for ongoing monitoring for as long as 20 years from installation, effectively until 2021. All measures of the Compliance Monitoring Project must be executed in accordance with the Consent Decree established in 1998, requiring the Seattle Department of Parks and Recreation, Puget Sound Energy, and the Department of Ecology to implement a Cleanup Action Plan. REET funds are to be used to reimburse the trust fund for expenses already incurred and to pay for state required air monitoring and other costs not considered eligible expenses under rules governing the Gas Works Contamination Remediation Trust Fund (10220).

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Parks and Recreation

### Georgetown Playfield Turf Replacement

<b>BCL/Program Name:</b>	Ballfields/Athletic Courts/Play Areas	<b>BCL/Program Code:</b>	K72445
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2018
<b>Project ID:</b>	K732456	<b>End Date:</b>	TBD
<b>Location:</b>	750 S hOMER ST		
<b>Neighborhood Plan:</b>	Georgetown	<b>Neighborhood Plan Matrix:</b>	GC-2B.2
<b>Neighborhood District:</b>	Greater Duwamish	<b>Urban Village:</b>	Not in an Urban Village

This project replaces the 109,000 square feet synthetic turf field surfacing which was installed in 2008 and is near the end of its lifecycle. This improvement allows the continued use and scheduling of the playfield for soccer, baseball, and other activities.

## Department of Parks and Recreation

### Gilman Playground Shelterhouse Sewer Replacement

<b>BCL/Program Name:</b>	Building Component Renovations	<b>BCL/Program Code:</b>	K72444
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2014
<b>Project ID:</b>	K732457	<b>End Date:</b>	TBD
<b>Location:</b>	923 NW 54TH ST	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood Plan:</b>	Crown Hill/Ballard	<b>Urban Village:</b>	Not in an Urban Village
<b>Neighborhood District:</b>	Northwest		

This project replaces the sewer line from the shelterhouse, underneath the tennis courts, and to the street, it repairs the impact to the tennis court (crack repair and new color coat), and performs related work. The clay tile sewer line was filmed in 2012 and the specific defect location within the line was identified. It likely caused by tree intrusion from adjacent trees.

### Green Lake CC - Evans Pool Roof Replacement & Solar Hot Water

<b>BCL/Program Name:</b>	Building Component Renovations	<b>BCL/Program Code:</b>	K72444
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	K732448	<b>End Date:</b>	TBD
<b>Location:</b>	7201 E Green Lake Dr N		
<b>Neighborhood Plan:</b>	Greenlake	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Northwest	<b>Urban Village:</b>	Green Lake

This project demolishes the existing 15,130 square foot Evans Pool roof and the 13,625 Community Center roof and replace them with a rubberized membrane roofing/EPDM system and solar panels to supplement the pool hot water system, seismic improvements, and related work. The flat roof section of the roof will accommodate a 1,000,000 Btu/day system and will help to reduce pool heating costs.

### Green Lake Park Alum Treatment

<b>BCL/Program Name:</b>	Docks/Piers/Floats/Seawalls/Shorelines	<b>BCL/Program Code:</b>	K72447
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2017
<b>Project ID:</b>	K732460	<b>End Date:</b>	Q4/2018
<b>Location:</b>	7201 E Green Lake WAY N		
<b>Neighborhood Plan:</b>	Greenlake	<b>Neighborhood Plan Matrix:</b>	C13
<b>Neighborhood District:</b>	Northwest	<b>Urban Village:</b>	Green Lake

This project treats Green Lake with Alum to continue to maintain water quality and control algae growth. The water quality of the lake has remained stable since the first alum treatment was done in 2004. The treatment will help Parks meet the adopted goal to maintain an average summer Secchi depth of eight feet.

<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project provides for acquisition of properties to fill gaps in existing public ownership and preserve continuity in existing public ownership. The project scope targets acquisitions in the following designated green spaces: Arroyos Natural Area, East Duwamish Greenbelt, Northeast Queen Anne Greenbelt, Ravenna Woods, Thornton Creek Watershed, and West Duwamish Greenbelt. These acquisitions will enhance livability and increase opportunities for the public to enjoy nature. They also implement the Parks Strategic Action Plan by encouraging long-term stewardship of natural resources. Levy funds are expected to be supplemented by grants and funds from other sources for these acquisitions. This project is part of the 2008 Parks Levy.

This project provides for the development of the Northgate Urban Center Park. The scope of the project provides for removal of the asphalt parking and other features; the development of open lawns, tree plantings, pathways, and park furniture; use of spring water for irrigation; art work in collaboration with artists; and other improvements. This project is part of the 2008 Parks Levy. See also related project Hubbard Homestead Park (Northgate) Development (K732348).

### HVAC System Duct Cleaning Program - Large Buildings

<b>BCL/Program Name:</b>	Building Component Renovations	<b>BCL/Program Code:</b>	K72444
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2010
<b>Project ID:</b>	K732421	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing project provides periodic (every two to five years) cleaning of the air ducts in the heating, ventilation, and air conditioning (HVAC) systems in pool natatoriums, community centers, and other Department-owned buildings. This maintenance increases the lifespan of these systems and reduces potential future major maintenance projects. This project was formerly project number K73669. A new project number has been created for this project to comply with new accounting procedures, therefore life to date and 2009 revised dollar amounts do not appear in the table below.

## Department of Parks and Recreation

### Interbay Stadium Synthetic Turf Replacement

<b>BCL/Program Name:</b>	Ballfields/Athletic Courts/Play Areas	<b>BCL/Program Code:</b>	K72445
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2014
<b>Project ID:</b>	K732451	<b>End Date:</b>	TBD
<b>Location:</b>	3027 17th Ave W		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Magnolia/Queen Anne	<b>Urban Village:</b>	Not in an Urban Village

This project replaces the synthetic turf field surfacing (91,000 square feet) which was installed in 2004 and is near the end of its lifecycle. This improvement allows the continued use and scheduling of the playfield for soccer and other activities. The total cost of this project may be shared with Seattle Pacific University per a current operating agreement that Parks has with the University.

## Department of Parks and Recreation

### Irrigation Replacement and Outdoor Infrastructure Program

<b>BCL/Program Name:</b>	Parks Infrastructure	<b>BCL/Program Code:</b>	K72441
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2010
<b>Project ID:</b>	K732406	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Urban Village:</b>	In more than one Urban Village
<b>Neighborhood District:</b>	In more than one District		

This ongoing project funds engineering and other studies of the Department's park irrigation and outdoor infrastructure systems (e.g., water mains, irrigation and drainage lines, sanitary and storm sewers, electrical utilities, roads, paths, trails, retaining walls, bridges, and related infrastructure); associated cost estimating; related staff and consultant support for developing and prioritizing projects within the Department's Asset Management Plan; and implements replacement projects at various sites. Specific projects are determined by the study and operational considerations.

This project provides conservation benefits by reducing water loss due to leaking systems, allocating water flow more efficiently through improved technology, and implementing other related work. It also extends the useful life of the infrastructure.

<b>Neighborhood Plan:</b>	North Beacon Hill	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	Greater Duwamish	<b>Urban Village:</b>	Not in an Urban Village

This project, part of the 2008 Parks Levy Opportunity Fund, restores the steep slope area of the urban forest, by removing invasive plants and re-establishing native plants and tree cover. These efforts to restore the native vegetation will help to ensure that the forested trees and plants are healthy and continue to contribute to the long-term viability of the City's urban forests.

<b>Neighborhood District:</b>	Northeast		

This project replaces the Built Up Roofing (BUR) system with a rubberized/EPDM roofing system with 20KW photovoltaic panels. The system will supply power into the electrical system for the building, which will reduce the amount of utility power used. At certain times, the system may produce more power than is being used by the building, resulting in a credit for power used.

## Maple Leaf Play Area Renovation

<b>BCL/Program Name:</b>	2008 Parks Levy- Neighborhood Parks and Playgrounds	<b>BCL/Program Code:</b>	K720020
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q2/2011
<b>Project ID:</b>	K730098	<b>End Date:</b>	Q4/2013
<b>Location:</b>	1020 NE 82nd ST		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	North	<b>Urban Village:</b>	Not in an Urban Village

This project provides for replacement of play equipment, access improvements, and other work at the existing Maple Leaf Playground play area. The scope of this project brings the play area into compliance with current play area safety standards and guideline efforts of the American Society of Testing and Materials (ASTM) and the Consumer Project Safety Commission (CPSC) as well as meets the requirements of the Americans with Disabilities Act (ADA). This project is part of the 2008 Parks Levy.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Northeast	<b>Urban Village:</b>	Not in an Urban Village

This project provides for new park development on the Maple Leaf Reservoir. Seattle Public Utilities will develop a new covered reservoir in the footprint of the existing open reservoir during 2010-2011. The scope for this project includes the development of a master plan for the new park space and the existing Maple Leaf Playground, and implementation of the plan as funding allows. This project is part of the 2008 Parks Levy.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Greater Duwamish	<b>Urban Village:</b>	Not in an Urban Village

This project provides for development of Marra-Desimone Park, which includes the Marra Farm, Seattle’s largest site for urban gardening. It implements elements of the “Long-Range Development Plan for Marra-Desimone Park” (2008), and may include enhancement of the existing farm area, development of community and recreation space on the eastern side of the park, paths, and gateway features. This project is part of the 2008 Parks Levy.

### Matthews Beach Park Bathhouse Renovation

<b>BCL/Program Name:</b>	2008 Parks Levy- Opportunity Fund	<b>BCL/Program Code:</b>	K720041
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q2/2012
<b>Project ID:</b>	K730170	<b>End Date:</b>	Q1/2013
<b>Location:</b>	9300 51st AVE NE		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Northeast	<b>Urban Village:</b>	Not in an Urban Village

This project, funded with the 2008 Parks Levy Inflation Adjustment funds, renovates the 3,000 square foot bathhouse for ADA access and improved ventilation and finishes. Specific renovations may include reconfigured stalls, new toilets and urinals, ADA accessories, new paint and finishes, and related work. The renovations will improve access to the facility and make it more inviting and comfortable.

<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project provides for investment in more energy efficient building systems and other facility efficiency improvements. By making these investments the City expects future savings in utility and labor costs, and significant progress toward carbon neutrality. This program is intended to fund facility retrofit projects identified by energy audits conducted in 2010 (funded by the City's Energy Efficiency and Conservation Block Grant) and similar projects identified by the department. Depending on project demand and available funding, additional resources may be added in the future.

<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This project provides for acquisition of property to create new urban parklands in Seattle's most densely-developed neighborhoods as identified in Seattle Parks and Recreation's 2006 Gap Analysis. New park land acquisition enhances livability and increases opportunities for the public to enjoy the outdoors. The acquisitions also implement the Parks Strategic Action Plan. Levy funds are expected to be supplemented by grants and funds from other sources and are not expected to be sufficient to complete acquisitions in all the targeted areas. This project is part of the 2008 Parks Levy.

This ongoing program provides funding for small projects identified by citizens, neighborhood groups, or other community organizations. Projects address requests which are typically under \$50,000, and may be used for major maintenance activities performed in conjunction with development-oriented Neighborhood Matching Fund (NMF) projects. This program enables the Department to respond quickly to community requests for repairs in neighborhood parks. This project was formerly project number K73508. A new project number has been created for this project to comply with new accounting procedures, therefore life to date and 2009 revised dollar amounts do not appear in the table below.

## Department of Parks and Recreation

### North Service Shops (Densmore) Roof Replacement

<b>BCL/Program Name:</b>	Building Component Renovations	<b>BCL/Program Code:</b>	K72444
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	K732446	<b>End Date:</b>	Q4/2013
<b>Location:</b>	8061 Densmore Ave N		
<b>Neighborhood Plan:</b>	Greenlake	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Northwest	<b>Urban Village:</b>	Not in an Urban Village

This project removes the existing roof system at the Densmore building and replaces it with either a flat rubberized/EPDM system or a sloped metal roof. Both roofing options will be constructed to current code with insulation, ventilation, and related improvements. This improvement will protect the entire building shell, and improve the crew and office setting.

<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program provides minor capital improvements to low-income area parks throughout the City. Conservation Corps Program staff perform this work, providing training opportunities for low-income, homeless, and other at-risk community members. Program elements include provision of ADA improvements to parks and park restrooms, accessible drinking fountain installation, basketball court construction, bench and picnic table installation, tree purchase and planting, and other small-scale capital projects. Funding is also targeted to projects that can be integrated with other community-identified amenities. This project was formerly project number K73861. A new project number has been created for this project to comply with new accounting procedures, therefore life to date amounts do not appear in the table below. For 2013-2014, this program is funded with federal Community Development Block Grant funds.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program renovates play areas, makes ADA improvements, installs safety upgrades, and performs other related work. The program focuses on addressing safety issues at two to four play areas per year. Primarily, the program is focused on installing proper safety surfacing at children's play areas throughout the parks system. Future funding for this program depends on specific projects and available resources, including grants. This program extends the useful life and improves the safety of the play areas. This project was formerly project number K732218. A new project number has been created for this project to comply with new accounting procedures, therefore life to date and 2009 revised dollar amounts do not appear in the table below.

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Parks and Recreation

### Pool Plaster Liner Replacements

<b>BCL/Program Name:</b>	Pools/Natatorium Renovations	<b>BCL/Program Code:</b>	K72446
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2018
<b>Project ID:</b>	K732455	<b>End Date:</b>	TBD
<b>Location:</b>			
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project replaces pool plaster liners at five pools: Pop Mounger, Southwest, Ballard, Evans, and Evers. Pool plaster liners typically last approximately 15 to 20 years, depending on the specific conditions at a pool. New pool liners protect the pool shell, make the pool brighter, and improve underwater visibility. They also have smoother finishes than older ones, which can minimize potential abrasions for the users.

## Department of Parks and Recreation

### Queen Anne Bowl Playfield Turf Replacement

<b>BCL/Program Name:</b>	Ballfields/Athletic Courts/Play Areas	<b>BCL/Program Code:</b>	K72445
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2018
<b>Project ID:</b>	K732470	<b>End Date:</b>	TBD
<b>Location:</b>	2806 3rd AVE W		
<b>Neighborhood Plan:</b>	Queen Anne	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Magnolia/Queen Anne	<b>Urban Village:</b>	Not in an Urban Village

This project replaces the synthetic turf field surfacing (60,000 square feet) which was installed in 2007, and is near the end of its lifecycle. This improvement allows the continued use and scheduling of the playfield for soccer, LaCrosse, and other activities.

## Department of Parks and Recreation

### Rainier Beach Community Center Redevelopment

<b>BCL/Program Name:</b>	Building Component Renovations	<b>BCL/Program Code:</b>	K72444
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	K732337	<b>End Date:</b>	Q1/2014
<b>Location:</b>	8802 Rainier Ave S		
<b>Neighborhood Plan:</b>	Rainier Beach	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Southeast	<b>Urban Village:</b>	Rainier Beach

This project provides for planning, preliminary design, and redevelopment of a new facility to replace the existing Rainier Beach Community Center and swimming pool. This project was developed by Parks in response to the Seattle School District's decisions about the future of Southshore Middle School, since the school shares a building with the existing community center and pool. A new facility will provide the public with improved and updated recreational opportunities and will complement the two new schools on the site. The specific scope of work for this project is being developed through a community process.

### Seattle Asian Art Museum Restoration

<b>BCL/Program Name:</b>	Building Component Renovations	<b>BCL/Program Code:</b>	K72444
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q4/2007
<b>Project ID:</b>	K732369	<b>End Date:</b>	TBD
<b>Location:</b>	1400 Prospect ST		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	East District	<b>Urban Village:</b>	Not in an Urban Village

This project funds initial planning and design work for mechanical, electrical, seismic, and other improvements to the Seattle Asian Art Museum (SAAM), which is a City-owned building located in Volunteer Park originally constructed in 1933. In 2007, the Seattle Art Museum (SAM), which operates SAAM, completed a study which identified improvements needed to update the building's climate control infrastructure and improve its seismic and fire/life safety features.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Southeast	<b>Urban Village:</b>	Not in an Urban Village

This project provides for the restoration of old growth forest in Seward Park as part of the Green Seattle Partnership. The restoration work will be guided by the established vegetation management plan for Seward Park. This additional work is being funded by a private donation of \$1 million. The donation will be made to the Seattle Foundation over the course of 3 to 4 years and dispersed to Parks over a period of 10 to 11 years.

<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	Not in an Urban Village

The project renovates shorelines, docks, piers, and boat ramps, and performs related work at selected sites in the park system. Work includes, but is not limited to, repairs of the piles, caps, stringers, decking, breakwater structures, and boat ramp structures. It also provides for shoreline improvements such as laying sand and gravel to replenish beaches that have eroded and planting to protect the shoreline. These improvements extend the useful life of these facilities, many of which generate revenues to the Department each year. The funding source for this project is SPIF funding.

This project provides funding for implementation of the Citywide Skatepark Plan throughout the City. The plan provides a long-term vision for the development of a network of safe and accessible skateparks of various sizes throughout the City of Seattle. Delridge Skatepark and Dahl Skatespot are the two projects being developed in this implementation phase. Future funding depends upon specific projects and available resources.

<b>Location:</b>	Citywide	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Urban Village:</b>	Not in an Urban Village
<b>Neighborhood District:</b>	In more than one District		

This ongoing project renovates tennis and basketball courts throughout the City. The program focuses on crack repair, color coating, providing new posts, standards, and nets, and completing less expensive repairs. Between one and three courts are renovated each year that are selected based on user complaints and staff evaluation of conditions. The Tennis Committee of the Seattle Sports Advisory Committee reviews the proposed project list and helps prioritize court repairs.

This ongoing project implements a comprehensive trail renovation strategy. Funding addresses trail failures throughout the park system to correct safety problems, prevent further erosion and deterioration, and perform other related work. The project leverages community support by providing technical assistance, training, and materials to district staff and volunteers who are engaged in other trail-related projects. This project was formerly project number K73513. A new project number has been created for this project to comply with new accounting procedures, therefore life to date and 2009 revised dollar amounts do not appear in the table below.

<b>Neighborhood Plan:</b>	Fremont	<b>Neighborhood Plan Matrix:</b>	D3.U.3
<b>Neighborhood District:</b>	Lake Union	<b>Urban Village:</b>	Fremont

This project, part of the 2008 Parks Levy Opportunity Fund, creates a sustainable park space in the Aurora Avenue N. (adjacent to the Aurora Bridge) on the north side of N. 36th St. Proposed sustainable design features include the use of recycled materials, native plants, tree retention, pedestrian paths, storm water management, and other related work. These improvements will provide better pedestrian access and promote the use of "green" infrastructure.

<b>Location:</b>	Citywide	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Urban Village:</b>	Not in an Urban Village
<b>Neighborhood District:</b>	In more than one District		

This program develops forest and vegetation management plans, implements restoration projects at sites throughout the City's park system, removes hazardous trees, and performs other related work. Restoration projects, with much of the work being performed by citizen volunteers, may include removal of invasive plants, such as English ivy and Himalayan blackberry, followed by replanting with native plants. Future funding for this program depends on available resources. This project enhances Seattle's urban forest and supports the Green Seattle Partnership to increase overall City tree canopy and the Restore Our Waters Strategy to improve Seattle's aquatic environments. This project was formerly project number K732410. A new project number has been created for this project to comply with new accounting procedures, therefore life to date and 2009 revised dollar amounts do not appear in the table below.

<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing project is a collaborative effort between the City of Seattle and the Cascade Land Conservancy to restore 2,500 acres of forested park lands in Seattle by 2025. Restoration for each acre occurs over a three-year period and includes clearing invasive plants, replanting the area with native plants, caring for the plants through establishment, and other related work. This project supports the Green Seattle initiative.

<b>Neighborhood District:</b>	Magnolia/Queen Anne	<b>Urban Village:</b>	Not in an Urban Village

This project funds the restoration of the forest in Kiwanis Ravine which is declining due to invasive Alder and Big Leaf Maple trees. The project will include forest and creek restoration and provide native habitat for the heron rookery. The Kiwanis Ravine is home to Seattle's largest nesting colony of Great Blue Herons. This project is part of the 2008 Parks Levy.

<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing project implements energy conservation projects in collaboration with Seattle City Light, Seattle Public Utilities, and Puget Sound Energy. Projects may include lighting, heating, and water use renovations at various facilities throughout the Parks system. These projects result in energy savings and better air and water quality, and support the Climate Protection Initiative by reducing greenhouse gas emissions. The cost of these projects is expected to be recovered within approximately five years through reduced utility costs and rebates from the three utilities. Rebates and other additional resources will be pursued to fund future conservation projects.

This project provides for new park development on the West Seattle Reservoir. Seattle Public Utilities will develop a new covered reservoir in the footprint of the existing open reservoir during 2009-2010. The scope of this project includes the development of a master plan for the new park space and the surrounding portions of the existing Westcrest Park, and implementation of the plan. This project is part of the 2008 Parks Levy.

This project provides for replacement of play equipment, access improvements, and other work at the existing Woodland Park play area located near the Zoo. The scope of this project brings the play area into compliance with current play area safety standards and guideline efforts of the American Society of Testing and Materials (ASTM) and the Consumer Product Safety Commission (CPSC) as well as meets ADA requirements. This project is part of the 2008 Parks Levy.

### 2013 - 2018 Adopted Capital Improvement Program

# SEATTLE CENTER

### Overview

The place that we know today as Seattle Center has a long history as a gathering place for our city and region. It was a location where Native American tribes gathered for talk, ceremony and celebration. In the 1920's a civic campus was created with the construction of the Civic Auditorium, Civic Ice Arena, and Civic Field, with Mayor Bertha Landes presiding over the ground breaking in 1927. In the 1930's the Washington State Armory (later called Center House and recently renamed the Armory) was built. Memorial Stadium was constructed in the 1940's. In the late 1950's and early 1960's the site for the 1962 Seattle World's Fair was created, expanding the size of the campus to roughly what we know today. One result of this long history as a gathering place is an aging infrastructure. Some facilities have been significantly renovated (e.g., Civic Auditorium into the Opera House for the World's Fair, and into McCaw Hall in 2003), while others remain in need of major renovation/redevelopment (e.g., the Armory and Memorial Stadium).

Today, Seattle Center is a 74-acre campus in the middle of the city. It is the largest visitor destination in the State, attracting an estimated 12 million visits each year to arts, sporting, educational, and cultural events and festivals, and to enjoy the grounds and open spaces. There are 24 buildings and three parking garages on the campus. Seattle Center is also a major urban park with lawns, gardens, fountains, a skatepark, and a variety of plazas and open spaces. The Seattle Center Monorail runs between the Seattle Center campus and downtown Seattle. The Monorail is owned by the City and operated by a private contractor. Also part of the campus, but privately owned and operated, are the Space Needle, the Pacific Science Center, the EMP Museum, the Chihuly Garden and Glass Exhibition, and Seattle Public Schools' Memorial Stadium and an adjacent parking lot. The City's 2003 Asset Preservation Study valued Seattle Center's capital assets at \$777 million (this number does not include the Monorail, Mercer Arena, or the Blue Spruce Building, all planned to go away at the time of the study, or the new Fifth Avenue Parking Garage, completed in 2008.)

Seattle Center's Capital Improvement Plan (CIP) is at the heart of the Center's vision to be the "premier urban park," a place "to delight and inspire the human spirit in each person and bring together our rich and varied community." The Center's CIP repairs, renews, and redevelops the facilities and grounds of the Center in order to provide a safe and welcoming place for millions of annual visitors. Seattle Center's CIP is funded from a variety of revenue sources including Real Estate Excise Tax (REET), the City's General Fund, voter-approved property tax levies, State, County, and federal funds, proceeds from property sales, and private funds. Following the adoption of the Seattle Center Master Plan in 1990, two voter-approved levies raised \$62 million for Seattle Center's redevelopment. This amount in turn, leveraged \$500 million in non-City funds, including \$440 million from private sources. In August of 2008 the City Council adopted a new master plan for Seattle Center, the Seattle Center Century 21 Master Plan, which will guide development of the Seattle Center campus over the next 20 years.

Seattle Center's Adopted 2013-14 CIP is \$14.1 million. The 2015 to 2018 Seattle Center CIP spending plan averages \$8.0 million per year. However, actual out-year spending is dependent upon the availability of various revenue sources, in particular REET revenue. A slower than anticipated economic recovery will reduce the Center's CIP spending accordingly.

As a general rule, capital projects at Seattle Center are planned and implemented to minimize the impact on events that occur all throughout the year, including four major festivals between May and September.

### Summary of Upcoming Budget Issues and Challenges

The biggest challenges facing Seattle Center's CIP are the inter-related challenges of aging infrastructure, an increasingly competitive environment for the sports and entertainment business that provides roughly two-thirds of the revenue which supports Seattle Center, and a lack of funding. The City's 2003 Asset

#### 2013 - 2018 Adopted Capital Improvement Program

Preservation Study looked at best practices in the public and private sectors and set an initial annual asset preservation funding target of 1% of the replacement value for buildings and 0.5% for other assets (e.g., grounds and open space). By that calculation, the annual investment number for Seattle Center was \$6.8 million (not including the Monorail, Mercer Arena, or the Blue Spruce). This \$6.8 million number in 2003 dollars inflated at 3% per year calculates to roughly \$9 million in 2013 dollars. Center's annual CIP spending over the last seven years has averaged \$8.1M (including a major renovation of the monorail). To achieve this level of spending, what was an annual allocation of REET and CRS Unrestricted funding of roughly \$3M per year prior to 2009, has been augmented by bond funds in 2003 (roof replacements and seismic improvements) 2007 (monorail rehabilitation) and 2011 (Armory renovation). The 2003 and 2011 bonds are being repaid with REET funds, and the 2007 monorail bonds through CRS Unrestricted funds and federal grant funds. The City also allocated \$8M from the sale of a Seattle Center surface parking lot to the Bill & Melinda Gates Foundation for capital improvements at Seattle Center, and \$4.7M from the settlement with the Sonics for capital improvements in KeyArena and elsewhere on the grounds.

Due to economic impacts of the Great Recession, from 2009-12, Seattle Center's annual CRS REET and Unrestricted CIP funding (exclusive of debt service) dropped from \$2.8M to \$1.0M per year. Economic recovery has allowed REET funding levels to increase, which is particularly critical for Seattle Center, as the one-time funding sources listed above (land sale to Gates Foundation, KeyArena Settlement Funds, and City-issued bonds) are nearly all expended by the end of 2012. Another important part of Seattle Center capital funding is the intermittent infusion of a significant amount of capital dollars every 7-10 years from a bond issue (1977, 1984) or a levy (1991, 1999). As Seattle Center celebrates its 50th anniversary, it will continue to work with City officials to determine how best to meet its future capital needs.

Seattle Center continues to draw millions of visitors each year and provides green and open space in an increasingly dense center of the city. The Seattle Center Century 21 Master Plan, adopted by the City Council in 2008 following a two-year community process, provides a roadmap for the redevelopment of Seattle Center around a set of design and planning principles including increased open space, sustainable design and operations, opening the edges of the campus to the surrounding community, enlivening the campus throughout the day, being pedestrian friendly and accessible to all, and continuing to provide a diversity of programming and attractions for all parts of our community. Seattle Center has used mostly one-time funding sources to complete initial Master Plan capital projects: Broad Street Renovation Phase I (2009), new Seattle Center Skatepark (2009), Theater Commons (2010), Campus Signage Renovation (2011), and Armory (2012). The challenge in the coming years is how to fund the vision of the Master Plan and to maintain existing assets.

### Thematic Priorities

The thematic priorities for Seattle Center's 2013-2014 CIP are as follows:

Safety and Security – The safety of Seattle Center visitors and staff is always the first priority. In 2013-14, Seattle Center replaces automatic security bollards at three campus entry locations and makes improvements to the fire alarm system in the Armory.

Disabled Access – In 2013, Seattle Center continues a program to improve disabled access to the campus and to individual buildings, including the Armory, the Exhibition Hall, McCaw Hall, KeyArena, Fisher Pavilion, the 1<sup>st</sup> Avenue North Garage, and the entry to the Upper Northwest Rooms breezeway.

Asset Preservation – In 2013-2014, Seattle Center prioritizes asset preservation investments in our primary public assembly facilities – McCaw Hall, KeyArena, the Armory, and campus open spaces. Consistent with the City's 2003 Asset Preservation Study, Seattle Center has prioritized capital investments in existing facilities. Asset preservation work in 2013-14 builds on the 2012 renovation of the

### 2013 - 2018 Adopted Capital Improvement Program

Armory Atrium with renovation work in the heavily used public restrooms in the Armory, as well as in the third floor Conference Center. Asset preservation work in McCaw Hall and KeyArena continues in 2013-14 and is overseen by the McCaw Hall Operating Board and the KeyArena Operating Board, respectively. An ongoing program of renovation of the Seattle Center Monorail continues in 2013-14, primarily funded with Federal Transit Administration (FTA) grant funds. Also in 2013-14, Seattle Center makes asset preservation investments in campus HVAC infrastructure and campus open spaces. Allocation levels for asset preservation in the out years, 2015-18, will depend on available resources.

Energy Efficiency and Sustainability – Sustainability is a key principle of the Seattle Center Century 21 Master Plan. In 2013 Seattle Center utilizes utility incentive payments resulting from energy saving capital projects to support additional energy savings investments.

Implementation of the Seattle Center Century 21 Master Plan – In 2013-14, a primary focus of Seattle Center is to continue progress on the Memorial Stadium project, which is the centerpiece of the Century 21 Master Plan. The Center will build on the momentum of the privately funded International Design Competition during the 2012 Next 50 celebration, as well as the expected passage of Memorial Stadium legislation by 2013, to continue planning and design efforts for this transformative project.

Revenue Generation – Capital improvements which maintain and/or enhance a facility's ability to generate revenue are critical to the financial health of Seattle Center, where roughly two-thirds of the Seattle Center's budget comes from revenue generated by operations. Maintenance and improvement of revenue generating capacity can be as important as maintenance and improvements to building systems. In 2013 Seattle Center is prioritizing infrastructure investments to help attract a full-service restaurant and increase food service revenue potential in the Armory. Also in 2013, the Center will renovate the Armory Conference Center and invest in event-related infrastructure that supports the revenue generating capacity of facilities throughout the campus.

Leverage Non-City Funds – In McCaw Hall, the City's \$250,000 allocation for the McCaw Hall Capital Reserve Fund is matched by a combined equal investment from the building's resident tenants, Seattle Opera and Pacific Northwest Ballet. A portion of monorail system revenues provides the 20% local match for FTA capital grant funds for monorail renovation and additional investments in the Armory Atrium leverage private investments by food service providers. The ability to use City investment to leverage non-City funds is a fundamental part of the history of the redevelopment and renewal of Seattle Center.

### **Project Selection Criteria**

For each two-year budget cycle, a broad cross-section of Seattle Center staff members are engaged in the process of identifying the highest priority asset preservation and improvement needs on the campus. This includes staff members who maintain facilities, rent facilities to clients, provide technical support for events, manage parking and public assembly facilities, and manage capital projects. Projects are prioritized around a set of criteria, including public and staff safety, regulatory requirements, failing building systems, asset preservation, Master Plan implementation, reducing operating costs and/or increasing revenue potential, and leveraging non-City funds. Projects are first prioritized within work groups, and then a group of managers and directors work to prioritize projects across the Center. Seattle Center does not use a point system to prioritize projects, but looks across all the project selection criteria to determine project priorities for anticipated available funding.

Major maintenance funding has fallen far short of the levels recommended in the City's 2003 Asset Preservation Study, especially over the previous four years due to dramatic reductions in Real Estate Excise Tax (REET) revenues, a major source of major maintenance/asset preservation funding for Seattle Center. To allocate limited major maintenance funding, Seattle Center prioritizes projects which cannot be delayed due to safety concerns or system failure, and allocates some level of annual asset preservation

### **2013 - 2018 Adopted Capital Improvement Program**

investment in the major public assembly facilities, including McCaw Hall, KeyArena, Fisher Pavilion, the Armory, and campus grounds.

### **Future Projects/What is on the Horizon**

The Seattle Center Century 21 Master Plan, adopted by the City Council in 2008, is a roadmap for the redevelopment of Seattle Center over the next 20 years. The total estimated cost of Master Plan improvements is \$567 million (in 2007 dollars). The Master Plan addresses Seattle Center's aging infrastructure, the Center's critical role as a cultural and recreational center for the city and region, and the need for the Center to remain competitive in the marketplace and grow its revenue potential. The expectation is that the Master Plan will be implemented incrementally, as funds, partners, and opportunities become available. This was the experience with the 1990 Master Plan. Between 1990 and 2005, \$700 million was invested in the redevelopment of Seattle Center, including \$440 million in private funds, voter-approved levies in 1991 and 1999, and funding from King County, the State, and the Federal government.

Looking ahead, Seattle Center has identified the following items for future capital investment (costs are in 2011 dollars):

- Memorial Stadium Property Acquisition (\$45 million)
- Memorial Stadium Site Redevelopment (\$188.5 million)
- Development of the North Fun Forest area (\$6.5 million)
- Northwest Rooms (technology infrastructure for KEXP and courtyard repairs, \$0.65 million)
- Armory Conference Center Improvements (\$1.9 million)
- KeyArena Major Maintenance (\$20 million)

### **City Council Provisos to the CIP**

There are no Council Provisos.

## 2013 - 2018 Adopted Capital Improvement Program

**Bagley Wright Theatre Maintenance Fund**

<b>BCL/Program Name:</b>	Bagley Wright Theatre Maintenance Fund	<b>BCL/Program Code:</b>	S9606
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/1996
<b>Project ID:</b>	S9606	<b>End Date:</b>	Q4/2014
<b>Location:</b>	151 Mercer St		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Magnolia/Queen Anne	<b>Urban Village:</b>	Uptown

This project provides for interior major maintenance needs at the Bagley Wright Theatre as stipulated in the use agreement between the Seattle Repertory Theatre (SRT) and Seattle Center. The agreement is structured to transfer financial responsibility for interior major maintenance of the facility from the City to the SRT after the year 2009. The City's maintenance fund primarily pays for the planned replacement of theatrical equipment, but also is intended to fund certain carpeting, seating, and mechanical improvements.

## Lot 2 Development

<b>BCL/Program Name:</b>	Lot 2 Development Project	<b>BCL/Program Code:</b>	S0501
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q4/2004
<b>Project ID:</b>	S0501	<b>End Date:</b>	Q4/2016
<b>Location:</b>	5th Ave N/Republican St		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Magnolia/Queen Anne	<b>Urban Village:</b>	Uptown

This project provides for activities related to the sale of Seattle Center Parking Lot 2 to the Bill & Melinda Gates Foundation. The property sale closed in November 2006, but sale-related activities will continue for a number of years. Activities include, but are not limited to, relocation of facilities, groundwater remediation, construction oversight, and development of a replacement skateboard park.

**McCaw Hall Asset Preservation Fund**

<b>BCL/Program Name:</b>	McCaw Hall Maintenance Fund	<b>BCL/Program Code:</b>	S0303
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	S0303	<b>End Date:</b>	ONGOING
<b>Location:</b>	321 Mercer St		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Magnolia/Queen Anne	<b>Urban Village:</b>	Uptown

This project provides for the development, updating, and implementation of an Asset Preservation Plan for McCaw Hall, a facility completed in 2003. The plan provides a long-term road map for future major maintenance investments in the facility. Contributions come from the City and from the two resident tenants of McCaw Hall, Seattle Opera and Pacific Northwest Ballet.

## Monorail Improvements

<b>BCL/Program Name:</b>	Monorail Improvements	<b>BCL/Program Code:</b>	S9403
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	S9403	<b>End Date:</b>	ONGOING
<b>Location:</b>	Seattle Center Monorail System		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Magnolia/Queen Anne	<b>Urban Village:</b>	Uptown

This project provides for the renovation of the Seattle Center Monorail, including the two trains, the two stations and the guideways that run in between. The City operates the Monorail through its contractor, Seattle Monorail Services. Monorail improvements may include, but are not limited to, door replacement, renovation of pneumatic and electrical systems, guideway renovation, and station upgrades.

### Roof/Structural Replacement and Repair - Debt Service

<b>BCL/Program Name:</b>	Facility Infrastructure Renovation and Repair	<b>BCL/Program Code:</b>	S03P02
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2003
<b>Project ID:</b>	S0304	<b>End Date:</b>	Q3/2013
<b>Location:</b>	Seattle Center Campus		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Magnolia/Queen Anne	<b>Urban Village:</b>	Uptown

This project funds debt service on 10-year LTGO bonds issued in 2003 to fund roof replacement and seismic and structural rehabilitation work on the Seattle Center Campus. LTGO bonds are one funding source for the work described in the Department's Roof/Structural Replacement and Repair CIP project (S9701).

### 2013 - 2018 Adopted Capital Improvement Program

**SEATTLE PUBLIC  
LIBRARY**

## Overview

The Seattle Public Library's facilities include 26 branch libraries and the Central Library, as well as a storage facility and leased shops space. In 2008, the Library completed the final building projects of a system wide capital program, known as "Libraries for All" (LFA). As a result of this \$290.7 million program, which was funded by a combination of public and private sources, Seattle has a new Central Library and four new branch libraries at Delridge, International District/Chinatown, Northgate and South Park. In addition, each of the 22 branch libraries that were in the system as of 1998 was renovated, expanded or replaced. The LFA program increased the amount of physical space that the Library maintains by 80 percent to a total of over 600,000 square feet.

The Library's buildings can be divided into four major categories. We have ten buildings that are designated historic landmarks, including 7 Carnegie-era libraries, built in the early 1900s, and three landmark modern buildings. Most of the remaining branch libraries are either LFA new construction (eight buildings) or non-landmarked buildings developed between the 1950s and the 1970s (three buildings). An additional five small library branches are essentially storefronts, four of which are part of larger buildings. In a class by itself is the Central Library. This 12-story 363,000 square foot building serves as headquarters and hub of the library system, housing the materials distribution system, Library administration, a 425-seat auditorium and public meeting rooms, large public areas for reading and access to 412 public computers, a data center housing system-wide servers, and the Central Library collection of books and materials.

The Library's ongoing major maintenance program, largely put on hold during the ten-year LFA capital renewal program, was reinstated in 2007 when the majority of new or refurbished libraries had reopened. Like other general government departments, Library's capital program is highly dependent on the City's real estate excise taxes (REET). As a result of the Great Recession available REET resources have been greatly constrained which resulted in reduced funding levels available for Library's major maintenance program. In recognition of this, the City augmented Library's REET funding levels in 2011 and 2012 with an additional \$220,000 of General Fund support.

During 2012 the Library worked with the Mayor and City Council to develop a Library Levy proposal that the voters approved on August 7, 2012. One of the core areas funded by this proposal is major maintenance. The Library Levy will provide funding of approximately \$2.79 million in 2013, and City REET will provide funding of \$500,000 for total 2013 funding of approximately \$3.29 million for general major maintenance. The 2013-2018 CIP will sustain LFA improvements with appropriate asset management in this critical period when all our buildings pass the ten year mark from their LFA construction/renovation.

The Library Major Maintenance BCL is the primary capital project, providing ongoing funding for work that preserves or improves building integrity, efficiency and functionality. The Adopted CIP also provides \$177,000 in 2013 REET funding for ADA access improvements in the ADA Improvements – Library BCL.

## 2013-2018 CIP

The Library's spending falls under two major categories – Major Maintenance and ADA Improvements - Library. Otherwise defined as "asset management," Major Maintenance covers the core stewardship of library buildings to ensure building integrity and functionality. Even with the addition of Levy funds, the Library's capital program is still small compared to most other departments, and the Major Maintenance BCL provides the flexibility to enable the Library to combine careful advance planning with the flexibility to respond to maintenance issues that arise during the course of a year.

## The Seattle Public Library

Levy funding will become the Library's major CIP revenue source, with important contributions from REET both for general major maintenance and ADA improvements. The 2013 Adopted budget shifts \$820,000 from the 2012 level of City REET/General Fund support for the Library's capital program to the Levy, which will provide a total \$2.79 million for core major maintenance. A new REET allocation of \$500,000 in both 2013 and 2014 will fund efforts to restructure Library spaces to support new uses of libraries as places for community engagement and learning.

The City is making a smaller reduction to the Library's operating budget than anticipated in the original levy plan in exchange for shifting full funding of core maintenance activities to the Levy. The net impact on the Library is the same as established in the Levy financial plan – about \$5 million. The additional allocation of \$500,000 of REET funds in each year of the biennium provides a new opportunity to make strategic improvements to Library facilities. The Library's 2013 allocation of \$177,000 in REET funding for ADA access improvements is part of a citywide effort that is prioritized separately.

### Summary of Upcoming Budget Issues and Challenges

The Library Levy provides critical resources that will support a responsible capital program and preserve welcoming Library spaces throughout the city. The Library prepared a seven-year asset management plan to guide the capital element of the Levy proposal. The 2013 CIP major maintenance budget of \$2.7 million matches the projection of need calculated in that plan, as do the amounts indicated for 2014-2018. The Library is grateful for the opportunity to avoid deferred maintenance, keeping these community hubs in excellent condition.

Library buildings are probably the most intensively-used public facilities in Seattle. The Central Library hosts approximately 2 million visitors annually, and library branches see another 5 million visitors. Even the quietest branch has more than 70,000 people walk through the door each year. The Library's historic landmark buildings have unique features such as brick facades, slate roofs and other details, and it is important to use designs and materials consistent with their landmark status – all factors that increase major maintenance costs. The Central Library poses a different set of challenges. A building of its size, complexity and intensity of use requires significant annual major maintenance to preserve core functionality and continually improve building efficiency. All of these factors were considered in establishing the major maintenance component of the Library Levy.

The LFA improvement projects were completed on a rolling basis over the course of a decade. The Library has developed a projection of annual asset preservation requirements by focusing on the year in which each building reaches the 10-year mark from its LFA construction or expansion/renovation. This juncture provides a critical milestone for renewal of mechanical systems, building envelopes/roofs, and interiors. We do not anticipate needing to fund many wholesale replacements of systems at this point, but will need to replace, repair or upgrade components in order to maximize the useful life of the systems.

### Thematic Priorities

#### Asset Preservation

The overriding priority of the Library's capital program is extending the useful life of buildings for as long as possible. Major repairs and replacement to roofs, building envelopes, HVAC and other critical building systems, doors, windows, flooring and casework are examples of the asset preservation items that must be funded through the Library's CIP budget. The Library has allocated approximately \$1,650,000 of its 2013 CIP to branch asset preservation work, including a package of modest but important refurbishment work at the NewHolly and Capitol Hill branches, both of which were among the earliest Libraries for All (LFA) construction projects. As buildings reach the ten year mark, they generally require attention to flooring, casework, finishes and restroom fixtures. The Green Lake Branch is due for some major roof and building envelope repairs, and the Douglass-Truth Branch is slated for more minor

## The Seattle Public Library

roof work. At the Ballard Branch the Library will install a code-required noise shield for the HVAC system. Restrooms at several branches will be refurbished. Additional branch asset preservation work addresses doors, windows and parking lot maintenance.

The Library has allocated approximately \$460,000 in 2013 for asset preservation work at the Central Library. The Library will replace the uninterruptible power supply (UPS) in the data center that serves the entire system, to ensure it can be serviced safely. Additional asset preservation work will address finishes, casework and minor restroom refurbishment.

### Library Operational Efficiency, Environmental Sustainability and Public Service Improvements

The Library delivers direct services to the public, who expect highly functional and welcoming library buildings. Major maintenance work carried out under this priority supports (1) implementation of new service models to help the library reduce operating costs while minimizing impact to the public; (2) improvements to enhance the environmental sustainability of Library buildings; and (3) efforts to better tailor services to neighborhood needs and changes in how people access and use information. In 2013 the Library expects to spend about \$73,000 improving lighting at the Broadview Branch and making various lighting and signage improvements in branch locations. The Library has allocated about \$335,000 to efficiency and sustainability improvements at the Central Library, focused on the next phase of mechanical, engineering, plumbing and control system improvements to bolster fire safety and building efficiency. An allocation of approximately \$45,000 will support operational efficiency improvements to the Library's shops space.

The Library will allocate \$500,000 to planning and implementation of improvements to address changes in usage patterns and enhance public use of Library spaces. Strategic changes to branch and Central Library spaces will focus on increasing flexibility, expanding learning opportunities and encouraging interaction.

### Safety and Security of Public and Staff

Repairs and building improvements that enhance the safety of library buildings are the third main priority guiding the Library's decision-making regarding allocation of its capital resources. ADA access improvements are one aspect of safety considerations. In 2013 the Library will allocate approximately \$183,000 under the Major Maintenance CIP Project to branch-related safety and security work, such as parking lot safety improvements at the Columbia and Southwest Branches. In addition, the entire 2013 allocation of \$177,000 to the ADA Improvements Project will be allocated to branches for a variety of building access improvements. The Library expects to allocate approximately \$45,000 under the Major Maintenance CIP for security improvements at the Central Library.

## **Project Selection Criteria**

In selecting major maintenance work to accomplish each year, the Library evaluates the impact on safety to the public and staff, preservation of building integrity, importance of the work to core library building functions, operational efficiency gains (both economic and environmental), and opportunities to improve or preserve service to the public.

The Library conducts condition assessments and updates information based on inspection by our capital program manager and facilities maintenance staff. The Library obtains professional evaluations of roofs, mechanical, HVAC and lighting systems to flag deficiencies and identify areas where the capital program may be able to reduce operating costs. Proposals for work designed to change the functional use of space are developed by Library public services managers. Such proposals are evaluated for feasibility, cost and urgency. The capital program works with library services managers to scope alternatives. The Library Leadership Team has ultimate responsibility for authorizing and prioritizing functional building modifications.

## **2013 - 2018 Adopted Capital Improvement Program**

## **The Seattle Public Library**

The Library is unlike other CIP departments in that it has only one relatively small CIP project composed of numerous small-scale work items that address standard asset management objectives. Many of our facilities are open seven days per week, which requires careful planning and staging of projects to keep libraries open as much as possible while capital improvement work is underway. Having the flexibility to respond to emerging building issues is crucial.

### **Aligning Infrastructure with Planned Growth**

The Library's facilities bring crucial services and provide a civic/cultural hub to 27 neighborhoods throughout the city. No new facilities are currently planned.

### **Future Projects/What is on the Horizon**

The Library's shops, storage and materials handling are currently spread across two facilities and a leased space. The Library operates its automated materials handling (processing and sorting of returned collection items to fill holds and return items to their "home" location) out of the Central Library. Although the Library's current processing facility has almost reached its growth limit, a needs assessment is particularly critical as the nature of Library materials (paper versus electronic) is undergoing a sea change, while public use of Library facilities for a range of services is high.

More fundamentally, the Library will need to work with the Mayor and City Council prior to the end of the seven year Library Levy to develop a strategy for continuing capital improvement program support for the Library, whether in the form of a renewed Levy, re-instituted REET support, or some other mechanism.

### **City Council Provisos to the CIP**

There are no Council Provisos.

The United States Department of Justice (DOJ) conducted an audit of some, but not all, City of Seattle facilities, practices and procedures, in order to assess City compliance with the Americans with Disabilities Act (ADA), and reported its findings to the City. While the City is largely in compliance, there are some elements that the DOJ has requested the City update or modify in order to be improve accessibility. This project represents ADA improvements for the Seattle Public Library.

This ongoing project provides for major maintenance to Library facilities, which include the 363,000 square foot Central Library and 26 branch libraries as well as storage/shops facilities. Typical improvements may include, but are not limited to, structural and mechanical repairs or improvements, safety and security upgrades, lighting and signage improvements, wall and floor surface repairs, landscape and exterior hard surface repairs, and projects that enhance service delivery or facilitate operational cost-savings at our libraries. This project preserves building integrity and improves functionality, and provides responsible management of the Library's building assets to ensure their long-term operational use. The project was created in 2009 in connection with midyear budget reductions to facilitate efficient asset management.

## 2013 - 2018 Adopted Capital Improvement Program

## Overview

The Seattle Department of Transportation (SDOT) develops, maintains, and operates a transportation system that promotes the safe and efficient mobility of people and goods, and enhances the quality of life, environment, and economy of Seattle and the surrounding region. The transportation infrastructure is valued at over \$13 billion. Major system assets include: 1,540 lane-miles of arterial streets, 2,412 lane-miles of non-arterial streets, 135 bridges, 494 stairways, 587 retaining walls, 22 miles of seawalls, 1,060 signalized intersections, 47 miles of bike trails, more than 200 miles of on-street bicycle facilities, 35,000 street trees, 2,150 pay stations, 40 parking meters, and 26,200 curb ramps.

Transportation activities in the City of Seattle reflect its role as a mature major city. Roughly a quarter of the land area within city limits is dedicated to travel. As a mature city, Seattle rarely creates new road transportation facilities. The City optimizes or redevelops existing facilities to make them safer, more efficient and supportive of diverse urban needs. The City also maintains or improves critical transportation infrastructure of regional, statewide and national significance in cooperation with external partners.

## 2013-2018 CIP

The Transportation Capital Improvement Program includes planned spending of \$1.54 billion over the 2013-2018 six-year period. Highlights of the Adopted CIP include the following:

- **Walk Bike Ride**

The 2013-2018 Adopted CIP includes several projects that are consistent with the Mayor's Walk Bike Ride initiative, which aims to make walking, biking, and riding transit the easiest ways to get around in Seattle. Over the six-year period, the CIP includes over \$36 million for implementation of the Bicycle Master Plan and \$40.6 million for implementation of the Pedestrian Master Plan. The Transit Master Plan was completed in early 2012, and the CIP includes investments to implement key components of the plan. The CIP includes the following new pedestrian, bicycle, and transit investments:

- **Safe Routes to School**

- The CIP includes \$800,000 of Real Estate Excise Tax (REET) in 2013 for three new Safe Routes to School projects: sidewalk extension and curb bulb installation at McGilvra Elementary, intersection redesign and curb bulb installation at Beacon Hill Elementary, and traffic signal intersection improvements at West Woodland Elementary.

- **Sidewalk Safety Repair**

- Using one-time Bridging the Gap Levy fund balance, the CIP programs \$200,000 in 2013 and \$400,000 in 2014 for Sidewalk Safety Repair, emphasizing projects located in Urban Villages and supporting low-income communities. This investment will increase the delivery of sidewalk repair in 2013 and 2014 by 5,000 feet annually.

- **Sound Transit North Link Station Bike and Pedestrian Improvements**

- The 2013-2018 Adopted CIP adds this new project, which will construct pedestrian and bicycle improvements to enhance access to the planned Sound Transit Light Rail station at Northgate. The improvements include a cycle track along 1st Avenue NE that is planned to begin design in 2013, and additional pedestrian and bicycle improvements that will begin design in 2015.

- **3rd Avenue Corridor Improvements**

- The CIP invests \$1 million of REET in 2013 to make important capital upgrades to Third Avenue downtown. These improvements include a major sidewalk expansion and enhancement near

## 2013 - 2018 Adopted Capital Improvement Program

## Seattle Department of Transportation

Macy's department store, upgrading all remaining pedestrian signals to countdown signals, and re-marking all faded crosswalks in the corridor.

### **Eastlake High Capacity Transit**

The CIP includes a \$2 million investment beginning in 2014 to develop a conceptual design, scope of work, and cost estimate for a high-capacity transit route between Downtown Seattle and the University District along Eastlake Avenue, eventually extending to the Roosevelt neighborhood, consistent with recommendations in the Transit Master Plan. Development of the conceptual design report will include engagement of transit agencies, stakeholders and the general public to discuss corridor design options and tradeoffs.

### **Madison Corridor Improvements**

The 2013-2018 Adopted CIP adds \$500,000 in 2013 and \$500,000 in 2014 to the Transit Corridor Improvements project, with a focus on the Madison corridor as identified in the Transit Master Plan. This funding will support conceptual design work and environmental review of the corridor.

### **Transit Corridor Improvements**

In addition to the Madison Corridor Improvements, the 2013-2018 Adopted CIP includes another \$22 million – including \$8 million in the 2013-2014 biennium – to implement other projects that improve transit speed, reliability, access, and convenience, consistent with the Transit Master Plan.

### **Seattle Center City Connector Transit Analysis**

Using unrestricted Cumulative Reserve Subfund dollars, the CIP includes \$1.5 million in 2014 to examine the benefits, costs and impacts of implementing an urban circulator in the downtown corridor.

### **Fauntleroy Green Boulevard**

The 2013-2018 Adopted CIP includes \$250,000 to continue planning work on the transformation of Fauntleroy Way SW into a green boulevard.

- **Enhanced Paving Plan**

In recognition of the significant street surface repair needs throughout the city, the 2013-2018 Adopted CIP continues the Enhanced Paving Plan that began mid-year 2011. Through the Arterial Major Maintenance program, the CIP includes \$1.65 million of annual funding for this purpose, funded by REET in 2013 and by the Commercial Parking Tax in 2014 through 2018. In addition, a further \$3.04 million of REET is allocated in 2013 and \$4.04 million in 2014 to this project. Finally, the CIP adds \$1.15 million annually for non-arterial street repair, with an additional one-time funding increase of \$1 million in 2014 only.

- **Alaskan Way Viaduct & Seawall Replacement Program (AWVSRP)**

The Alaskan Way Viaduct & Seawall Replacement Program (AWVSRP) is a series of sub-projects pertaining to the replacement of State Route 99 along the Seattle waterfront. The program includes the City's involvement in the viaduct demolition and removal, the SR-99 Bored Tunnel, the Elliott Bay Seawall, Waterfront Seattle Public Space and Surface Streets, Battery Street Tunnel decommissioning, and the Holgate to King South End project. In SDOT's 2013-2018 Adopted CIP, the AWVSRP has been reorganized by creating new projects for the Elliot Bay Seawall and the Waterfront Improvement Program. These components were previously incorporated into the Alaskan Way Viaduct & Seawall Replacement project. The AWVSRP is now comprised of four projects in SDOT's CIP:

## 2013 - 2018 Adopted Capital Improvement Program

## Seattle Department of Transportation

### **Alaskan Way Viaduct & Seawall Replacement**

The Alaskan Way Viaduct & Seawall Replacement project includes SDOT's costs for the SR-99 / Bored Tunnel, the Battery Street Tunnel decommission, the Holgate to King south end projects, the parking program, program management services, and related components. This project also incorporates costs for the Waterfront and Seawall prior to 2013.

### **Elliott Bay Seawall Project**

The Elliott Bay Seawall is essential both to public safety and to the local and regional economy. The current aging Seawall is not designed to withstand seismic events and failure could lead to widespread property damage, injury and loss of life while severely disrupting public transportation and commerce. Replacement of the Seawall from Washington to Virginia streets (also known as the Central Seawall) is estimated to cost \$300 million. Project design is expected to be completed in 2013. For more information about the Seawall project, visit <http://www.seattle.gov/transportation/seawall.htm>.

### **Waterfront Improvement Program**

The Central Waterfront Public Spaces and Surface Streets component, also known as Waterfront Seattle, has reached conceptual planning milestones, and the Central Waterfront Concept Design and Framework Plan has been developed. Among other considerations, the next phases of design will reflect improved connections between Downtown, Pioneer Square and the waterfront, and the opportunity to integrate the connection between the Pike Place Market and Seattle Aquarium. In 2013 and 2014, the Waterfront Improvement Program includes support for preliminary design collaboration with the Market's "PC-1" north site development and the Aquarium's future renovation. The estimate for Waterfront Seattle, including surface street costs funded by the State, is \$769 million. For more information about Waterfront Seattle, visit <http://waterfrontseattle.org>.

### **Mercer Corridor Project - West Phase**

The Mercer Corridor Project - West Phase project will convert Mercer Street to a two-way street between Dexter Ave and Elliott Ave West. The project supports vehicular mobility in the vicinity of the north tunnel portal and completes the vital east-west corridor from Elliott Bay to I-5. SDOT has completed final plans, specifications and cost estimates for the project and has secured all of the necessary local, state and federal funding to fully fund construction. Construction is expected to be completed in 2015 and is estimated to cost \$95.1 million.

Revenue supporting the AWVSRP corresponds with the strategic recommendations submitted by the Central Waterfront Partnerships Committee (CWPC) in July 2012. Although not secured, the funding plan anticipates a Seawall Bond Levy, the formation of a local improvement district, partnerships with the Pike Place Market and Seattle Aquarium, a future waterfront levy, and private philanthropic support. Major City funding sources in 2013 and 2014 include the following:

#### *Seawall Bond Levy*

The Adopted CIP includes revenue from the \$290 million bond measure that was approved on the November 6 General Election ballot. The bond levy will fund construction of the new seawall from South Washington Street to Virginia Street and provide funds toward replacing the deteriorated pilings and decking of the two City-owned piers that extend from the seawall: Pier 58, known as Waterfront Park, and Pier 62/ 63, both of which are owned and operated by the Seattle Parks Department.

#### *Local Improvement District*

## **2013 - 2018 Adopted Capital Improvement Program**

## Seattle Department of Transportation

The Adopted CIP includes revenue from a future Local Improvement District (LID) to help fund portions of the Waterfront Improvement Program envisioned in the Central Waterfront Concept Design. The City intends to form and confirm the assessment roll for a local improvement district in 2014. In anticipation of the creation of the LID, an interfund loan was established in 2012 to support costs eligible for funding by a future Local Improvement District. The Adopted Budget increases the size of the interfund loan to support anticipated 2013 costs.

### *Commercial Parking Tax*

Certain AWVSRP costs are supported by Commercial Parking Tax (CPT) revenue authorized in 2011 at a 2.5% rate. AWV-CPT supports approximately \$70 million in expenditures for the Mercer Corridor West Phase, the Parking Program, and Project Services components and pre-construction costs for the Waterfront Seattle and Seawall components. The majority of these expenditures are bond-financed with debt service supported by CPT receipts.

- **First Hill Streetcar**

The Adopted CIP includes \$133 million of Sound Transit ST2 funding for the First Hill Streetcar project under an interlocal agreement signed in 2009. This project constructs a modern, low-floor streetcar system connecting First Hill employment centers to the regional Link light rail system, including but not limited to the International District/Chinatown Station, and Capitol Hill Station at Broadway and John Street. The system will provide reliable, frequent service and operate the same hours as the light rail system. Construction is underway and substantial completion is anticipated in spring 2014.

In 2013 and 2014, preliminary engineering and design will occur on the Broadway Streetcar Extension project, which will extend the First Hill Streetcar to the north end of Broadway. Funding for construction of the extension has not been determined.

- **South Lake Union Streetcar**

Due to the City's vacations of rights-of-way to Amazon.com, Inc., the company is providing a public benefits package that includes the purchase of a new streetcar for the South Lake Union line. The 2013-2018 Adopted CIP includes a new project with \$3.7 million in the 2013-2014 biennium to represent this purchase.

- **Bridging the Gap Major Projects**

Construction activities on major transportation projects, supported in-part by the Bridging the Gap funding package, are winding down. The Spokane Street Viaduct and King Street Station Phase II are expected to reach substantial completion prior to 2013, and the CIP reflects their closeout. The Mercer Corridor Project - East Phase, which implements a comprehensive package of transportation improvements in the Mercer Corridor in South Lake Union, will be in the final construction phases with substantial completion anticipated in 2013.

- **Vehicle Licensing Fee**

The 2013-2018 CIP continues the allocation of the \$20 Vehicle License Fee (VLF) as recommended by the Citizens Transportation Advisory Committee (CTAC 3). Funding totals over \$7 million annually, and reflects the committee's recommendations, which add significant funding to pavement preservation, sidewalk safety access, transit corridors, and bicycle improvements.

## CIP Revenue Sources

Funding and financing for the projects in SDOT's 2013-2018 Adopted CIP comes from the following sources:

### 2013 - 2018 Adopted Capital Improvement Program

## Seattle Department of Transportation

- **Bridging the Gap (\$221 million, 14%)**  
In 2006, Seattle voters approved the Bridging the Gap (BTG) initiative to repair and improve Seattle's streets, bike trails, sidewalks, and bridges. The funding package includes a commercial parking tax and a property tax levy. In addition to direct cash expenditures, BTG funds also support some long-term financing, listed below.
- **Other Local Revenues (\$502 million, 33%)**  
In addition to Bridging the Gap, other local funding sources for the Transportation CIP include the City's General Fund, Gas Tax, Real Estate Excise Tax (REET), the \$20 Vehicle License Fee, surplus property sales, a portion of the Commercial Parking Tax, and a proposed property tax levy for the Elliott Bay Seawall.
- **Long-Term Financing (\$286 million, 19%)**  
Several major projects are partially financed with general obligation bonds. The debt service on these bonds is supported by the Commercial Parking Tax, anticipated local improvement district revenues, and other sources.
- **External Funding (\$477 million, 31%)**  
SDOT is highly successful in securing competitive state and federal grants. This category also includes partners in regional efforts, such as King County, Sound Transit, the Port of Seattle, and the Washington State Department of Transportation, and funding from the city's utilities for utility relocations and betterments in association with transportation projects.
- **To Be Determined (\$51 million, 3%)**  
A small portion of the CIP requires funding sources that have not yet been identified.

### Thematic Priorities and Project Selection

The role of the transportation system is to connect people, places and products. To accomplish this, SDOT's thematic priorities for building and maintaining its capital infrastructure are:

- **Productivity** – shared prosperity and economic security
- **Livability** – support for neighborhoods as safe and healthy places to live, work, learn, and play
- **Equity** – fairness and inclusiveness for all
- **Sustainability** – stewardship of the natural and built environments as well as financial stewardship

Projects are initiated through a number of methods including planning processes (modal, subarea, neighborhood planning), preservation, operations and safety needs assessment, regulatory requirements, elected official direction and, in some instances, from neighborhood input such as the Neighborhood Street Fund program. Stakeholders have significant input in development of all SDOT plans through public involvement processes. Seattle's Pedestrian, Bicycle and Freight Advisory Boards also provide input on project needs.

A number of factors can impact SDOT's project and funding decisions. These can include regulatory requirements, state and federal law (such as the Americans with Disabilities Act) and construction seasons. Opportunities to leverage the City's limited funding with grants or coordinated projects with other agencies can also affect SDOT's decisions.

Each program area uses different criteria to rank and select projects, based on the thematic priorities as tailored to the specific program purposes. For example, assessment of Bridge Rehabilitation and Replacement projects begin with an inspection in compliance with national standards, and then also

## Seattle Department of Transportation

considers public safety, economic benefits, social equity, and support for all transportation modes. Potential neighborhood traffic circles are ranked based on the number of documented collisions, traffic speeds, and traffic volumes.

In every case SDOT strives to implement the City's policy goals laid out in Seattle's Comprehensive Plan and individual policy initiatives such as Complete Streets, the Race and Social Justice Initiative and the Environmental Management Initiative. SDOT's Transportation Strategic Plan, modal plans and subarea plans provide an overall framework for implementing these goals.

### City Council Provisos to the CIP

Council adopted the following capital budget provisos:

Of the appropriation in the 2013 budget for the Seattle Department of Transportation's Mobility-Capital and Major Maintenance and Replacement BCLs, \$1,075,000 is appropriated solely for design and construction of an initial 2.1 mile segment of the Ballard Neighborhood Greenway and \$100,000 is appropriated solely to complete 10% concept design with cost estimates for the remaining portions of the Ballard Neighborhood Greenway, and may be spent for no other purpose.

Of the appropriation in the 2013 budget for the Seattle Department of Transportation's Mobility-Capital and Major Maintenance and Replacement BCLs, \$525,000 is appropriated solely for design and construction of an initial 1.25 mile segment of the Delridge Neighborhood Greenway and \$100,000 is appropriated solely to complete 10% concept design with cost estimates for the remaining portions of the Delridge Neighborhood Greenway, and may be spent for no other purpose.

Of the appropriation in the 2013 budget for the Seattle Department of Transportation's Mobility-Capital BCL, \$750,000 is appropriated solely for 30% design, including identifying specific routes and improvement types and cost estimates for the Downtown cycle track network, and may be spent for no other purpose.

Of the appropriation in the 2013 budget for the Seattle Department of Transportation's Mobility-Capital BCL, \$725,000 is appropriated (and of the amount endorsed for 2014, \$250,000 is expected to be appropriated) solely for final design and construction of an initial .25 mile segment of the Downtown cycle track network, and may be spent for no other purpose.

Of the appropriation in the 2013 budget for the Seattle Department of Transportation's Mobility-Capital BCL, \$75,000 is appropriated solely for 10% concept design with cost estimates for intersection and access improvements to the West Seattle lower bridge multimodal trail, and may be spent for no other purpose.

Of the appropriation in the 2013 budget for the Seattle Department of Transportation's (SDOT's) Major Projects BCL, \$200,000 is appropriated solely for contracted outreach services for CIP Project # TC 367330 - Waterfront Improvement Program and may be spent for no other purpose. Furthermore, none of the money so appropriated may be spent until authorized by future ordinance. The Council anticipates that such authority will not be granted until SDOT reports to the Council and Council approves an outreach program for the formation of a Waterfront Improvement Program local improvement district.

Of the appropriation for 2013 for the Seattle Department of Transportation's Mobility-Capital BCL, \$250,000 is appropriated solely for the Fauntleroy Way SW Green Boulevard project (TC367200) and may be spent for no other purpose.

### 3rd Avenue Corridor Improvements

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q4/2012
<b>Project ID:</b>	TC367370	<b>End Date:</b>	Q4/2014
<b>Location:</b>	3rd AVE/S Jackson ST/Denny WAY		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Commercial Core

This project makes multimodal improvements in the Third Avenue downtown corridor. Improvements include expanding the northbound bus stop area at Pine Street adjacent to Macy's department store, designing additional streetscape improvements, remarking numerous crosswalks, and installing pedestrian countdown signals.

## 5th Ave Streetscapes Improvements

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2009
<b>Project ID:</b>	TC367080	<b>End Date:</b>	Q4/2013
<b>Location:</b>	5th Avenue NE/NE 112th Street		
<b>Neighborhood Plan:</b>	Northgate	<b>Neighborhood Plan Matrix:</b>	I.G. 13.1
<b>Neighborhood District:</b>	Northeast	<b>Urban Village:</b>	Northgate

This project will remove pavement and install a landscaped median and stamped concrete crosswalks at NE 112th Street, construct new sidewalk and curb ramps on the west side of 5th Avenue NE, and remove concrete planting strips and replace with landscaping on the east side of 5th Avenue NE. Poles will be painted to match the 5th Avenue NE project completed in 2006. There are minor close-out and landscape establishment costs in 2011-2013.

# Seattle Department of Transportation

## Alaskan Way Viaduct & Seawall Replacement

<b>BCL/Program Name:</b>	Major Projects	<b>BCL/Program Code:</b>	19002
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2001
<b>Project ID:</b>	TC366050	<b>End Date:</b>	Q4/2018
<b>Location:</b>	ALASKAN WY VI SB/BATTERY ST TUN OFF RP		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project funds the City's involvement in the replacement of the Alaskan Way Viaduct, with the bored tunnel hybrid alternative. Replacement of this structure will enhance overall safety, as this structure is seismically vulnerable. In prior years, this project included design of the Central Seawall and Waterfront Improvements. In 2013, for transparency purposes, the Seawall and Waterfront work is reflected in two new capital projects, Elliott Bay Seawall Project (TC367320) and Waterfront Improvement Program (TC367330).

## Arterial Asphalt and Concrete Program

<b>BCL/Program Name:</b>	Major Maintenance/Replacement	<b>BCL/Program Code:</b>	19001
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC365440	<b>End Date:</b>	ONGOING
<b>Location:</b>	Various		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

The Arterial Asphalt and Concrete Program maintains Seattle's 1,581 lane miles of arterial streets through resurfacing and reconstruction projects. The Department uses a pavement management system to track the condition of arterial street pavement, to develop maintenance needs and establish priorities, and to select the streets to be rehabilitated each year. This project improves the quality and condition of the City's arterials.

## Arterial Major Maintenance

<b>BCL/Program Name:</b>	Major Maintenance/Replacement	<b>BCL/Program Code:</b>	19001
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC365940	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing project repairs and/or replaces deteriorated pavement on arterial streets. Arterial Major Maintenance paving work typically spans one to three city blocks. It allows the City to respond quickly and cost effectively to pavement issues that are too large to be addressed with a pothole repair, yet are too small to be efficiently contracted. Project prioritization is based on pavement condition; cost; transit, bicycle, pedestrian and freight use; traffic volume; coordination opportunities; complaints and claims; and geographic balance across the city. The work extends the service life of existing pavement structures.

## Aurora Rapid Ride Improvements

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q3/2012
<b>Project ID:</b>	TC367220	<b>End Date:</b>	Q4/2014
<b>Location:</b>	Various		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	Northwest	<b>Urban Village:</b>	In more than one Urban Village

This project constructs approximately forty small to medium sized projects on Aurora Avenue between the Shoreline City Limits and Downtown Seattle to support Metro's new Rapid Ride service in that corridor. Approximately 35 projects will be reimbursed by Metro through an FTA grant to initiate Rapid Ride service; and additional five will be constructed with city funds that will provide Metro with the required matching funds. The five City projects are elements of existing annual programs funded through the 2012-2017 Adopted TCIP.

# Seattle Department of Transportation

## Aurora Transit, Pedestrian, and Safety Improvements

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q2/2003
<b>Project ID:</b>	TC366250	<b>End Date:</b>	ON HOLD
<b>Location:</b>	Aurora Ave N/N 110th St/N 145th St		
<b>Neighborhood Plan:</b>	Broadview-Bitter Lake-Haller Lake	<b>Neighborhood Plan Matrix:</b>	B-46
<b>Neighborhood District:</b>	Northwest	<b>Urban Village:</b>	In more than one Urban Village

This project funds improvements to Aurora Avenue North between N 110th and N 145th Streets. Typical improvements may include, but are not limited to, a business access/transit lane; a left turn lane/landscaped center median; and a curb, gutter, and sidewalk/amenity zone to include sidewalks and landscaping. This project improves pedestrian safety, access, and transit service in the corridor. Design was put on hold in 2008 due to lack of funding.

## Ballard to Downtown High Capacity Transit and Ship Canal Crossing Project

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	TC367390	<b>End Date:</b>	Q3/2014
<b>Location:</b>	Downtown Ballard/Downtown Seattle		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project will develop recommendations for implementation of high capacity transit alternatives between Ballard and Downtown Seattle. The project will build on the Ballard-Fremont-South Lake Union-Downtown corridor identified in the Transit Master Plan. The work will be done in conjunction with Sound Transit. The project will also develop conceptual designs and cost estimates for a new ship canal crossing for transit, pedestrians and bicycles.

### 2013 - 2018 Adopted Capital Improvement Program

# Seattle Department of Transportation

## Bike Master Plan Implementation

<b>BCL/Program Name:</b>	Major Maintenance/Replacement	<b>BCL/Program Code:</b>	19001
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC366760	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program implements the Seattle Bicycle Master Plan. Typical improvements may include installing bike lanes and sharrows, bicycle route signing, completing key links in the urban trails network, adding bicycle/pedestrian signals to complete the network, and reconstructing key sections of the trails. The goals of the program are to increase bicycle safety and access, while reducing bicycle crashes. This program includes funding for street improvement and trail construction and is consistent with the focus in the City's Transportation Strategic Plan (TSP) on encouraging walking and biking. In 2010, this project has been restructured to include, as sub-projects, the funding and scope from two former projects: the Bike Spot Safety Improvements and the Urban Trail and Bikeways Spot Improvements. This program supports Walk Bike Ride by implementing the Bicycle Master Plan. In the 2012 budget process, Council adopted a related proviso.

This ongoing asset preservation project provides for the periodic painting of each of the City's 20 structural steel bridges. The painting cycle is initially determined by applying Federal Highway Administration standards for coating life, and is supplemented by annual physical inspections to assess the actual rate of deterioration.

## Seattle Department of Transportation

### Bridge Seismic - Phase III

<b>BCL/Program Name:</b>	Major Maintenance/Replacement	<b>BCL/Program Code:</b>	19001
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	TC367300	<b>End Date:</b>	Q4/2013
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	Not in an Urban Village

This project will develop a proposal for the next phase of bridge seismic upgrades. Due to changes in bridge standards, seismic codes, and city policies and expectations, previously used criteria and methodology for prioritizing bridges for seismic upgrades need to be updated and reapplied to the city's current inventory of bridges. The outcome from this work will provide a prioritized and accurate assessment of the city's bridge seismic retrofit needs.

# Seattle Department of Transportation

## Bridge Seismic Retrofit Phase II

<b>BCL/Program Name:</b>	Major Maintenance/Replacement	<b>BCL/Program Code:</b>	19001
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC365810	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

The program prioritizes and implements seismic upgrades to bridges based on traffic importance and seismic vulnerability. On the highest ranked bridges, conceptual level analysis is performed to develop a retrofit strategy and cost estimate. As funding allows, full retrofit design and construction phases are implemented. The project enhances the safety of City bridges in lieu of substantial rehabilitation or replacement.

# Seattle Department of Transportation

## Broadway Streetcar Extension

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q3/2012
<b>Project ID:</b>	TC367240	<b>End Date:</b>	Q3/2016
<b>Location:</b>	Broadway E/E Denny Way/E Roy ST		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	East District	<b>Urban Village:</b>	Capitol Hill

This project extends the First Hill Streetcar to the north end of Broadway (approximately Denny Way to Roy Street). The First Hill Streetcar line is currently under construction and will connect First Hill employment centers to the regional Link light rail system, including but not limited to the International District/Chinatown Station, and Capitol Hill Station at Broadway and John Street. This half-mile extension to the retail core of Broadway will reach a high density residential area with reliable frequent service (approximately 10 minute headways) mirroring the hours of operation of Link light rail system.

## Burke-Gilman Trail Extension

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/1995
<b>Project ID:</b>	TC364830	<b>End Date:</b>	Q4/2016
<b>Location:</b>	Various		
<b>Neighborhood Plan:</b>	Crown Hill/Ballard	<b>Neighborhood Plan Matrix:</b>	BGT-1
<b>Neighborhood District:</b>	Ballard	<b>Urban Village:</b>	Ballard

This project extends the Burke-Gilman Trail from its current terminus at Eighth Avenue NW to Golden Gardens Park. The segment from Eighth Avenue NW to 11th Avenue NW was constructed in 2001. The Ballard Locks to NW 60th Street segment was constructed in 2005. The NW 60th Street to Golden Gardens segment was constructed in 2008. The "Missing Link" segment from 11th Avenue NW to the Ballard Locks was planned for construction in 2011 and 2012, but has been delayed due to ongoing litigation.

## Cheshiahud Lake Union Trail Project

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2009
<b>Project ID:</b>	TC367070	<b>End Date:</b>	Q4/2012
<b>Location:</b>	Lake Union		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Lake Union	<b>Urban Village:</b>	South Lake Union

This project completes Fairview trail improvements and establishes the History Trail. The project addresses the challenges presented along the Fairview Avenues N and E corridors. This may include implementing a new separated bike/pedestrian path along Fairview Avenue N to the south of the old steam plant to Lake Union Park, and improving the shared route along Fairview Avenue E to the University Bridge. This will substantially complete the needed physical improvements along the trail. Three street-end parks will be improved through volunteer efforts. The Museum of History and Industry (MOHAI) and the Center for Wooden Boats (CWB) will implement interpretive elements for the History Trail.

### 2013 - 2018 Adopted Capital Improvement Program

# Seattle Department of Transportation

## Chief Sealth Trail

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q2/2000
<b>Project ID:</b>	TC365690	<b>End Date:</b>	Q4/2012
<b>Location:</b>	Southeast		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	Greater Duwamish	<b>Urban Village:</b>	MLK Jr. @ Holly

This project constructs 3.6 miles of the Chief Sealth Trail, the first off-street, multi-use trail in southeast Seattle. The work includes the design and construction of a pedestrian/bicycle asphalt trail located in the City Light transmission corridor between Interstate 5 and the Rainier Valley. The trail provides access to Sound Transit Link Light Rail stations at S Othello and S Henderson Streets. Phase II of the project constructs a new section of trail to connect the existing Chief Sealth Trail to the intersection of South Myrtle Place and Holly Park Drive South, and installs a new traffic signal at that intersection to facilitate the safe crossing of bicycles and pedestrians. A retaining wall is constructed along the north side of the bicycle path to bring the grade up to sidewalk level. This phase also includes construction of a bicycle ramp, sidewalk improvements, installation of pedestrian signals, vehicle and pedestrian detection, crosswalk markings, and warning strips for bicycles. Phase III, known as the Northern Extension, spans from Beacon Avenue South to South Angeline Street/15th Avenue South. This project includes feasibility studies, conceptual design, and preliminary engineering for future projects to fill gaps in the trail and extend the trail further south.

## Collision Evaluation Program

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC323860	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This program identifies locations that have high numbers of collisions; performs reviews of high collision locations; identifies and designs improvements to enhance safety at these locations; and facilitates installation of these improvements. High collision locations identified include signalized and unsignalized intersections, mid-block locations, locations having high numbers of pedestrian collisions and locations having high numbers of bike collisions. Improvements identified by this program tend to be low-cost. They tend to involve signal modifications or changes to signs and striping.

This project will explore the development of high capacity transit, including street improvements, in the Eastlake Avenue corridor connecting the University District, Roosevelt, Eastlake, and South Lake Union neighborhoods with Downtown. The project is identified as a priority in the Transit Master Plan. This project will consider rail and bus options in determining the most effective approach to transit service within a project area.

## Elliott Bay Seawall Project

<b>BCL/Program Name:</b>	Major Projects	<b>BCL/Program Code:</b>	19002
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	TC367320	<b>End Date:</b>	Q4/2016
<b>Location:</b>	Alaskan WAY/S Washington ST/Virginia ST		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	In more than one Urban Village

This project is a critical public safety project and will replace the existing seawall, from S. Washington Street to Virginia Street (Central Seawall), with a structure that meets current safety and design standards. The project will also improve the nearshore ecosystem of Elliott Bay and provide opportunities for recreation and shoreline access. This project was created in 2013. Costs incurred prior to 2013 are included in the Alaskan Way Viaduct & Seawall Replacement project (TC66050). The total estimate for this project is \$300 million.

On October 25, 2012, the City Council budget committee held a special public hearing on this project. Special public hearings, also known as "CLEAN" hearings, are held for certain major capital projects on which the City spends or is authorized to spend \$5 million or more in City money.

### 2013 - 2018 Adopted Capital Improvement Program

# Seattle Department of Transportation

## Fauntleroy Way SW Green Boulevard

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2012
<b>Project ID:</b>	TC367200	<b>End Date:</b>	Q4/2012
<b>Location:</b>	Fauntleroy WAY SW/35th AVE SW/SW Alaska ST		
<b>Neighborhood Plan:</b>	West Seattle Junction (FOJ)	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	Southwest	<b>Urban Village:</b>	West Seattle Junction

This project transforms Fauntleroy Way SW into a green boulevard. Preliminary engineering will address project elements identified during conceptual design, including: a planted median with signature lighting fixtures, a pedestrian zone with sidewalks and planting areas including street trees, pedestrian lighting, potential green stormwater infrastructure and art, and safety improvements for crossing movements for all modes, including bicycle improvements and pedestrian crossings, signals, and reconfigured intersections and bulbs. 2012 funding was used for preliminary engineering, including public outreach, preliminary design, and construction cost estimates. Alternative project designs were developed (with and without the relocation of a 28' drainage and wastewater main) that seek to balance green boulevard design elements with Major Truck Street treatments. In the 2012 budget process, Council created this project and adopted a related proviso. By the end of 2012 SDOT will complete a feasibility analysis, conceptual plans and cost estimates. In 2013, a project design will be chosen from the identified alternative designs. Funding in 2013 will be used to continue project planning and design, survey work, update the project cost estimates and do additional public outreach.

### 2013 - 2018 Adopted Capital Improvement Program

**Seattle Department of Transportation**  
**First Hill Streetcar**

<b>BCL/Program Name:</b>	Major Projects	<b>BCL/Program Code:</b>	19002
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q2/2009
<b>Project ID:</b>	TC367100	<b>End Date:</b>	Q4/2014
<b>Location:</b>	Various		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project constructs a modern, low-floor streetcar system connecting First Hill employment centers to the regional Link light rail system, including but not limited to the International District/Chinatown Station, and Capitol Hill Station at Broadway and John Street. The system will provide reliable, frequent service (headways of approximately 10 minutes during peak periods) and operate the same hours as the light rail system (at least 20 hours per day Monday through Saturday and at least 12 hours per day Sundays). A light maintenance vehicle storage base and procurement of a six-vehicle streetcar fleet is also included in the scope of the project.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project includes small scale mobility improvements to the City's street system to improve connections between port facilities, railroad intermodal yards, industrial businesses, the regional highway system, and the first and last miles in the supply chain. Project types include turning radius adjustments, channelization changes, left-turn improvements, and signage to direct freight to destinations and alert drivers to steep grades or sharp turns.

## Greenwood Avenue N Street Improvements

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q4/2005
<b>Project ID:</b>	TC366380	<b>End Date:</b>	Q4/2013
<b>Location:</b>	Greenwood Ave N/N 105th St/N 112th St		
<b>Neighborhood Plan:</b>	Broadview-Bitter Lake-Haller Lake	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	Northwest	<b>Urban Village:</b>	Not in an Urban Village

This project widens the existing four lanes and adds a center two-way left-turn lane on Greenwood Avenue N between N 105th Street and N 112th Street. Improvements include parking, curb, planting strips, and concrete walkways on both sides of the street. All intersections are improved for pedestrian safety. Signals, street lighting, and drainage systems are upgraded as needed. There are minor close-out and landscape establishment costs in 2011-2013.

## Hazard Mitigation Program - Areaways

<b>BCL/Program Name:</b>	Major Maintenance/Replacement	<b>BCL/Program Code:</b>	19001
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC365480	<b>End Date:</b>	ONGOING
<b>Location:</b>	Various		
<b>Neighborhood Plan:</b>	Pioneer Square	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Pioneer Square

This ongoing program implements inspection and repair of areaways in the Pioneer Square District to reduce risks to City facilities and the general public. Areaways are usable space, generally in the street right-of-way, constructed under sidewalks between a building foundation and the street wall. Typical improvements may include, but are not limited to, repairs to the existing areaway and/or filling the areaway with lightweight concrete. Improving these areaways is an action included in the South Downtown Strategic Plan.

## Hazard Mitigation Program - Landslide Mitigation Projects

<b>BCL/Program Name:</b>	Major Maintenance/Replacement	<b>BCL/Program Code:</b>	19001
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC365510	<b>End Date:</b>	ONGOING
<b>Location:</b>	Various		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	Not in an Urban Village

This project enables SDOT to address and repair landslide concerns that affect the right-of-way. The Landslide Mitigation Program provides SDOT with staff and resources to identify and prioritize landslide concerns, to undertake reconnaissance engineering and geotechnical studies of problem areas, and to make repairs at the highest priority locations, usually where landslide concerns have caused the roadway to be partially or completely closed.

## Linden Avenue North Complete Streets

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2008
<b>Project ID:</b>	TC366930	<b>End Date:</b>	Q4/2016
<b>Location:</b>	Linden Ave N/N 128th St/N 145th St		
<b>Neighborhood Plan:</b>	Broadview-Bitter Lake-Haller Lake	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Northwest	<b>Urban Village:</b>	Bitter Lake Village

This project constructs road improvements on Linden Avenue North from N 128th Street to N 145th Street. Improvements include, but are not limited to concrete sidewalks, curb and gutters, pedestrian crossings and curb ramps, buffered bicycle lanes, and asphalt road replacement. The improvements will provide pedestrian, drainage and roadway improvements, and complete the final link in the Interurban Trail North.

## Magnolia Bridge Replacement Project

<b>BCL/Program Name:</b>	Major Projects	<b>BCL/Program Code:</b>	19002
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2002
<b>Project ID:</b>	TC366060	<b>End Date:</b>	TBD
<b>Location:</b>	W Garfield St/15th Ave W/Thorndyke Ave W		
<b>Neighborhood Plan:</b>	BINMIC (Ballard Interbay Northend)	<b>Neighborhood Plan Matrix:</b>	T-21
<b>Neighborhood District:</b>	Magnolia/Queen Anne	<b>Urban Village:</b>	Ballard Interbay

The environmental analysis for replacing this bridge evaluated several possible alternatives including rehabilitation of the existing structure. In 2007, an environmental assessment was published and described the preferred alternative, a new bridge south of and adjacent to the existing bridge. The Type, Size and Location (TS&L) Report was completed in 2007, selecting a concrete box girder supported on flared columns as the appropriate structure type for this new bridge. The structure will be a haunched concrete box at the highly visible section of the bridge over 15th Avenue NW and at the westerly high level bluff section. Current available funds will only allow completion of 50% of the design and contract plans. Funding to complete the design, purchase the necessary right-of-way, and construct the new bridge has not been identified. The estimate to complete the project is \$300-350 million.

## Mercer Corridor Project

<b>BCL/Program Name:</b>	Major Projects	<b>BCL/Program Code:</b>	19002
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/1999
<b>Project ID:</b>	TC365500	<b>End Date:</b>	Q4/2016
<b>Location:</b>	Mercer St/Fairview Ave N/Dexter Ave N		
<b>Neighborhood Plan:</b>	South Lake Union	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	Lake Union	<b>Urban Village:</b>	In more than one Urban Village

This project, part of the Bridging the Gap funding package, implements a comprehensive package of transportation improvements in the Mercer Corridor in South Lake Union. Improvements include, but are not limited to, a widened two-way Mercer St., improved pedestrian safety and access to Lake Union Park, and enhanced neighborhood circulation for all modes. The project aims to use existing street capacity more efficiently and enhance all modes of travel, including pedestrian mobility.

## Mercer Corridor Project West Phase

<b>BCL/Program Name:</b>	Major Projects	<b>BCL/Program Code:</b>	19002
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2010
<b>Project ID:</b>	TC367110	<b>End Date:</b>	Q4/2015
<b>Location:</b>	Mercer ST/Elliott AVE W/Dexter AVE N		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project converts Mercer Street to a two-way street between Dexter Ave and Elliott Ave West. The Mercer underpass at Aurora Ave will be widened to allow for six travel lanes and a bicycle/pedestrian shared use path between Dexter Ave and 5th Ave North. Roy Street, between Aurora and Queen Anne Ave., will also be converted to a two-way street with on-road bicycle lanes.

### 2013 - 2018 Adopted Capital Improvement Program

# Seattle Department of Transportation

## Neighborhood Large Projects

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC367250	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This program enhances the safety, quality and condition of the pedestrian and neighborhood environments. Typical improvements may include, but are not limited to, sidewalk construction, repairs and replacement, installation of curb bulbs or other traffic calming devices, and improvements to crosswalks. The Neighborhood Street Fund is funded by the Bridging the Gap (BTG) transportation levy and is a triennial program. The projects funded are identified by the community and prioritized by the District Councils and the BTG Oversight Committee. Prior to 2013, the elements of this project were included in the NSF/CRS Neighborhood Program. Beginning in 2013, the NSF/CRS Neighborhood Program will only reflect improvements that can be completed by City crews, and improvements that are contracted out will be covered by this project.

## Neighborhood Traffic Control Program

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC323250	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program installs traffic calming devices citywide, primarily neighborhood traffic circles, in response to investigations of citizen requests. The program also installs some mid-block traffic calming devices such as speed humps, as well as residential street speed limit signs and warning signs.

# Seattle Department of Transportation

## New Traffic Signals

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC323610	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing project installs new traffic signals to improve traffic flow, reduce the frequency and severity of traffic collisions, and support pedestrian activity. Location choices are based upon pedestrian and vehicle volumes; school, senior citizen, and handicapped accessible crossing requirements; and collisions frequency criteria. More than half of the new signal needs are to support pedestrian mobility and safety. SDOT has adopted a new “pedestrian friendly” criteria for installation of new pedestrian signals, which has resulted in more locations being added to the unfunded list for new signals.

# Seattle Department of Transportation

## Non-Arterial Asphalt Street Resurfacing

<b>BCL/Program Name:</b>	Major Maintenance/Replacement	<b>BCL/Program Code:</b>	19001
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC323920	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing project repairs and/or replaces deteriorated asphalt pavement on non-arterial streets. Project locations are chosen annually, based upon the degree of deterioration as confirmed by Department staff field observation, citizen service requests, claims, and potential City liability. High priority is given to non-arterial streets used by transit, in areas with heavy pedestrian and bicycle traffic, and which serve business and industry.

## NSF/CRS Neighborhood Program

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC365770	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program has two elements: an annual program that identifies projects estimated less than \$100,000 that are prioritized by each of the 13 district councils; and a triennial program that identifies projects estimated between \$100,000 and \$500,000 that are prioritized by the community at large and a project review team. Typical improvements may include, but are not limited to, sidewalk construction, repairs and replacement, installation of curb bulbs or other traffic calming devices, and improvements to crosswalks. The program enhances the safety, quality and condition of the pedestrian and neighborhood environments. Beginning in 2013, the NSF/CRS Neighborhood Program will only reflect improvements that can be completed by City crews, and improvements that are contracted out will be covered by a new project named Neighborhood Large Projects.

## Pay Stations

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	New Investment	<b>Start Date:</b>	Q1/2004
<b>Project ID:</b>	TC366350	<b>End Date:</b>	ONGOING
<b>Location:</b>	Various		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project funds the installation of parking pay stations to manage on-street parking. To date, this project has installed over 2,200 pay stations citywide. In future years, funding requirements for new installations will be identified as parking plans are developed. A funding plan for replacement will be developed and reflected in the 2014-2019 Capital Improvement Program.

## Pedestrian Master Plan - School Safety

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC367170	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project improves pedestrian and bicycle safety around schools. The work includes school zone signing, crosswalk installation and maintenance, changes to traffic circulation around schools, school walking route maps, and bike parking at schools. The current level of funding provides improvements at approximately three to four schools per year. A separate O&M budget funds safe biking and walking education and outreach campaigns at the schools where improvements are made.

## Pedestrian Master Plan Implementation

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2010
<b>Project ID:</b>	TC367150	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program implements the Pedestrian Master Plan. Typical improvements may include the construction of new sidewalks, the installation of curb ramps at high priority pedestrian locations, the installation of pedestrian lighting, and the rehabilitation or replacement of stairways. The goals of the program are to reduce the number and severity of crashes involving pedestrians; make Seattle a more walkable city for all through equity in public engagement, service delivery, accessibility, and capital investments; develop a pedestrian environment that sustains healthy communities and supports a vibrant economy; and raise awareness of the important role of walking in promoting health and preventing disease. This program supports Walk Bike Ride by implementing the Pedestrian Master Plan. In the 2012 budget process, Council adopted a related proviso.

## Railroad Crossing Signal Improvements

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2009
<b>Project ID:</b>	TC367090	<b>End Date:</b>	Q4/2012
<b>Location:</b>	Broad St B/Alaskan Way/Elliott Ave		
<b>Neighborhood Plan:</b>	Commercial Core	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Commercial Core

This project provides railroad crossing gates and flashing lights at key railroad crossings in the Seattle Waterfront Quiet Zone: at Broad Street, Clay Street, Vine Street and Wall Street. By federal law, without these improvements, trains must sound their horn whenever they approach the crossings. The gates and flashing lights will be installed by Burlington Northern Santa Fe (BNSF) Railroad and SDOT will install other elements including curbs and signage. In addition, SDOT will install improvements for bicycle access to the Olympic Sculpture Park and Myrtle Edwards Park at the intersection of Alaskan Way and Broad Street.

## S Lander St. Grade Separation

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2001
<b>Project ID:</b>	TC366150	<b>End Date:</b>	TBD
<b>Location:</b>	S Lander St/1st Ave S/4th Ave S		
<b>Neighborhood Plan:</b>	Duwamish	<b>Neighborhood Plan Matrix:</b>	TP-2
<b>Neighborhood District:</b>	Greater Duwamish	<b>Urban Village:</b>	Not in an Urban Village

This project develops a grade separation of the S Lander St. roadway and the Burlington Northern mainline railroad tracks between First Avenue S and Fourth Avenue S. Previously, City staff evaluated traffic conditions and identified an initial design concept. During the preliminary engineering phase of the project, a consultant conducted a Type, Size, and Location study to develop more detailed plans and cost estimates. The project design recommenced in November of 2006, and in January of 2007, survey, geotechnical, and scoping of the design work began. Design was put on hold in 2008 due to lack of funding. The estimated cost to design and construct this project is \$180-\$200 million.

### Sidewalk Safety Repair

<b>BCL/Program Name:</b>	Major Maintenance/Replacement	<b>BCL/Program Code:</b>	19001
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC365120	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing project rehabilitates sidewalks damaged by street trees or where there are serious safety concerns as evidenced by claims, service requests, and potential City liability. The project includes opportunities for public/private partnerships with citizens, property owners, and businesses. Asset management principles are used to guide repair needs and establish priorities for maintaining the sidewalk (or walkway), curbs, curb ramps, and in some cases, a filler strip between the sidewalk and curb.

### Spokane St. Viaduct

<b>BCL/Program Name:</b>	Major Projects	<b>BCL/Program Code:</b>	19002
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q2/1994
<b>Project ID:</b>	TC364800	<b>End Date:</b>	Q3/2015
<b>Location:</b>	S Spokane St/6th Ave S/E Marginal Wy S		
<b>Neighborhood Plan:</b>	Morgan Junction (MOCA)	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	Duwamish

This project, part of the Bridging the Gap funding package, builds a new structure that will be parallel and connected to the existing one, and will widen the existing viaduct by about 41 feet. The project also includes construction of new ramps at First Avenue South and an eastbound Fourth Avenue off-ramp. This project improves the safety of the Spokane Street Viaduct through the addition of shoulders, a wider median, and a westbound "weave-lane." The project also reconstructs lower Spokane Street in concrete, including a 10 foot wide sidewalk/bike path along the north side of the street.

<b>Project Type:</b>	New Investment	<b>Start Date:</b>	Q1/2002
<b>Project ID:</b>	TC365880	<b>End Date:</b>	Q4/2018
<b>Location:</b>	SR520 WB/Montlake Bv Off Rp/I5 NB On Rp		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project provides policy, planning, and technical analysis support to the Seattle Department of Transportation Director and elected officials to review and comment on the Environmental Impact Statement and the design for SR-520. This regional project may include replacement of the SR-520 bridge with a six-lane bridge, new freeway interchanges at Montlake Boulevard and Lake Washington Boulevard, and other improvements.

### Street Lighting Program

<b>BCL/Program Name:</b>	Major Maintenance/Replacement	<b>BCL/Program Code:</b>	19001
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	TC366900	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project provides funding for the street lighting components of transportation projects, where the cost of those components will ultimately be borne by the City's General Subfund. The project enables the Seattle Department of Transportation, the Department of Finance, and Seattle City Light to plan for these costs. Funding is provided from the Light Fund, which recovers these costs through street light rates charged by Seattle City Light to the City's General Subfund. SDOT develops project specific estimates of the cost of lighting components in the year prior to construction. For 2012, funds are budgeted under the individual transportation projects in which the spending will occur. For 2013 through 2017, the funds displayed below have not yet been allocated to specific projects, but will be allocated once detailed project cost estimates are developed.

### Thomas St Pedestrian Overpass (formerly Belltown/Queen Anne Waterfront Connections-Thomas St.)

<b>BCL/Program Name:</b>	Mobility-Capital	<b>BCL/Program Code:</b>	19003
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2003
<b>Project ID:</b>	TC366210	<b>End Date:</b>	Q2/2013
<b>Location:</b>	Elliott Ave W/W Thomas St		
<b>Neighborhood Plan:</b>	Queen Anne	<b>Neighborhood Plan Matrix:</b>	Multiple
<b>Neighborhood District:</b>	Magnolia/Queen Anne	<b>Urban Village:</b>	Not in an Urban Village

This project consists of constructing a pedestrian/bicycle overpass across the Burlington Northern Railroad tracks and continuing across Elliott Ave along the W Thomas Street cul-de-sac to connect lower Queen Anne to Myrtle Edwards Park with either elevators and stairs or ramps. The overpass allows pedestrian and bicycle access to Myrtle Edwards Park, creating a vital central link from the park to the west side of the Uptown and Belltown neighborhoods.

## Waterfront Improvement Program

<b>BCL/Program Name:</b>	Major Projects	<b>BCL/Program Code:</b>	19002
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	TC367330	<b>End Date:</b>	Q4/2018
<b>Location:</b>	Various		
<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

The Waterfront Improvement Program includes a number of elements including demolishing the existing Alaskan Way Viaduct, constructing a new Alaskan Way surface street and decommissioning the Battery Street Tunnel. In addition, new public space, from the Olympic Sculpture Park to Pioneer Square, will be created including parks and paths, access to the water, places to enjoy views, vibrant public and cultural spaces, and a new urban street that will accommodate all modes of travel and provide an important connection in the City's transportation system. This project was created in 2013. Costs incurred prior to 2013 are included in the Alaskan Way Viaduct & Seawall Replacement project (TC66050). The total estimate for this project, including costs prior to 2013 and beyond 2018, is \$769 million. In the 2012 budget process, Council adopted a related proviso.

On October 25, 2012, the City Council budget committee held a special public hearing on this project. Special public hearings, also known as "CLEAN" hearings, are held for certain major capital projects on which the City spends or is authorized to spend \$5 million or more in City money.

### 2013 - 2018 Adopted Capital Improvement Program

## Overview

Seattle City Light (City Light) is a municipal electric utility, owned by the residents of Seattle and run by the City's elected officials. The Utility serves a population of almost 700,000 people living in a 130 square-mile area, which includes the City of Seattle and several adjoining jurisdictions. To serve these customers, City Light owns, maintains, and operates a multi-billion-dollar physical plant. The physical plant includes:

- ◆ A power supply generation system consisting of seven hydroelectric plants on the Pend Oreille (Boundary Dam), Skagit, Cedar, and Tolt Rivers with a combined capacity of almost 2,000 megawatts;
- ◆ 650 miles of high-voltage transmission lines linking these plants to Seattle;
- ◆ A distribution system with 14 major substations and more than 2,500 miles of overhead and underground cable;
- ◆ A state-of-the-art System Control Center coordinating these activities; and
- ◆ Billing and metering equipment tracking approximately 395,000 accounts.

City Light's Capital Improvement Program (CIP) is the vehicle for maintaining, upgrading, and expanding this infrastructure. The CIP also funds a variety of safety improvements, mitigation activities, and licensing requirements. The CIP's overriding goal is to ensure that the facilities required to serve City Light customers with low-cost, reliable power, are in place when and where the power is requested. In 2009 and 2010, City Light received significantly less net wholesale revenue than anticipated due to lower precipitation levels and falling energy prices for the Utility's surplus power. This revenue shortfall required City Light to reduce spending on planned maintenance and capital improvement projects. In response to the revenue shortfall, the City Council and the Mayor undertook a series of actions to help strengthen oversight and the financial management of the Utility. The Rate Stabilization Account was created to protect against future fluctuations in wholesale revenues, the City Light Review Panel was established to advise elected officials on rate and Utility issues, and City Light was directed to develop a Strategic Plan with input from the Review Panel and the public.

In July 2012, City Council adopted the City Light 2013-2018 Strategic Plan, which identified capital projects and spending priorities for the Utility (Resolution 31838). The Strategic Plan was used to guide development of City Light's 2013-2014 Adopted Budget and 2013-2018 Adopted CIP, and is available on-line at: <http://clerk.ci.seattle.wa.us/~ordpics/31383AttA.pdf>.

## 2013-2018 CIP

The Strategic Plan identified baseline capital expenditures and developed strategic initiatives for replacing aging infrastructure, automating electrical system control, and leveraging new technology to meet the expectations of City Light customers. The Strategic Plan also identified projects to address regional transmission congestion and regulatory requirements to improve the security and reliability of the transmission grid. These investments are included in the 2013-2018 Adopted CIP and have been summarized into functional categories so that similar or related projects can be easily identified and viewed together. This document details changes from the 2012-2017 Adopted CIP, and provides a breakdown of project allocations to match the appropriations for CIP Budget Control Levels in the 2013-2014 Adopted Budget.

The 2013-2018 Adopted CIP outlines \$1.9 billion in capital spending over six years for a variety of power supply, transmission, distribution, customer services, and central utility needs. Approximately \$190 million of this spending is in response to external projects, including suburban undergrounding requests,

## 2013-2018 Adopted Capital Improvement Program

maintenance of the streetlight system, infrastructure relocations due to transportation projects, and other reimbursable customer-requested work.

City Light monitors and refines CIP project spending plans throughout the year, and reports progress to the Mayor and City Council quarterly. Any significant project changes are submitted for Council approval through the Quarterly Supplemental budget process.

### CIP Revenue Sources

Funding for City Light's CIP comes primarily from retail electricity sales and surplus energy sales on the wholesale market. A minor amount of additional revenue come from direct customer billing (including service connections and other customer requested work) and assorted fees, grants and transactions. City Light also finances a portion of the CIP through the sale of revenue bonds. City Light's policy is to limit debt financing to 60% of any given six-year CIP period (Resolution 31187).

### Thematic Priorities and Project Selection

Projects included in the CIP meet a variety of thematic needs:

- ◆ **Maintain existing infrastructure and support basic operations** – The majority of City Light's CIP projects provide for the maintenance and upkeep of existing systems and equipment, and support the on-going daily operations of the Utility. These projects include major maintenance work to extend the life of facilities and equipment, scheduled replacement of old and failing equipment, and capital programs to support customer connections and repair unexpected system outages. Projects are also included in the CIP to respond to external conditions, such as infrastructure relocations due to major transportation projects. The CIP includes new projects to implement Strategic Plan initiatives to renovate streetlights and underground cables.
- ◆ **Upgrade capacity and services to provide new functionality** – Projects included in the CIP may also seek to increase the Utility's generation or distribution capacity, or provide new functionality for the management and customer service systems of the Utility. These projects strive to change the way the Utility operates and delivers service. The CIP includes continued funding for projects such as the Work and Asset Management System, the Customer Information System, and the Energy Management System. In addition, the CIP includes new projects identified by the Strategic Plan, including the Denny Substation and investments in Automated Metering Infrastructure.
- ◆ **Address licensing, regulatory and safety requirements** – Federal licenses governing the operation of the Utility's dams require a number of environmental, historic preservation, and recreation mitigation measures. In addition, federal requirements regulating the transmission grid and energy market transactions require system upgrades and improvements. The CIP also includes projects to improve safety and proactively reduce risk to the Utility's infrastructure. The CIP implements Strategic Plan initiatives addressing transmission grid improvements and regulatory compliance.
- ◆ **Maintain information technology systems** – Over the last several decades, the electric utility industry has come to rely heavily on information technology systems to provide real time management and automation of operations, design and record utility systems and assets, regulate power across the regional transmission grid, manage financial transactions on the energy market, and increase business efficiencies throughout the organization. The CIP includes projects to maintain the hardware and software necessary to provide these functions. The CIP also implements Strategic Plan initiatives to improve cyber security and disaster recovery.

Project ideas are generated from staff throughout the organization and are developed into proposals by the operational divisions of the Utility. Each of the Utility’s organizational lines of business (power supply, transmission and distribution, customer service) prioritizes proposed capital spending within their divisions and submits recommended projects to a centralized capital budgeting system.

City Light management compares proposals against criteria that evaluate the projects’ costs, benefits, and risks. The Utility gives priority to mandatory requirements and projects currently underway, before considering scheduled future projects and new initiatives. Business cases are developed and revised to document the projects’ expectations and rationale, and include a cost benefit analysis of alternatives, including the do-nothing scenario.

The Utility’s CIP is constrained by the availability of funding and labor resources to devote to capital projects. City Light management seeks to balance the overall needs of the Utility within these constraints and may rescope, reschedule, or defer projects to prepare a comprehensive six-year CIP. The Strategic Planning process provides a venue for vetting major capital spending decisions with elected officials and the public. City Light intends to revisit the Strategic Plan every two years to maintain transparency and set direction for future CIP development.

Recent investments in Utility systems will help identify and evaluate future capital proposals. The Work and Asset Management System (WAMS) provides the platform for tracking City Light’s estimated 900,000 assets, as well as generating the associated work orders and maintenance records of the Utility. WAMS was first implemented for distribution operations and engineering groups in 2011, and will be expanded to cover substation operations and power supply assets by Spring 2013. The Utility has prepared a Distribution Outlook report and is expanding this review to include transmission and substation assets.

Tracking asset information will allow the Utility to achieve operational efficiencies, improve maintenance practices on assets, and identify equipment where there is a high risk of failure. Data in WAMS will be used to develop strategic asset management plans for each asset type (generation equipment, large power transformers, substation circuit breakers, poles, underground distribution systems, etc.) and will inform operational/maintenance practices and capital replacement decisions. Through the asset management program, the Utility has conducted condition assessments on 115,000 poles and 28 power transformers, has surveyed 527 miles of overhead transmission lines, and has adjusted the CIP based on the results.

### CIP Expenditures by Major Category

Projects and spending in City Light’s 2013-2018 Adopted CIP are summarized below. The dollar amounts shown in this document are the projects’ total costs to be capitalized, and include both direct costs and associated overhead costs.

	Summary of CIP Project Allocations (in \$1,000s)						
	2013	2014	2015	2016	2017	2018	Total
<b>Power Supply</b>	<b>62,455</b>	<b>56,089</b>	<b>88,360</b>	<b>88,030</b>	<b>67,109</b>	<b>79,473</b>	<b>441,516</b>

### 2013-2018 Adopted Capital Improvement Program

## Seattle City Light

### Summary of CIP Project Allocations (in \$1,000s)

	2013	2014	2015	2016	2017	2018	Total
Network	18,020	21,479	32,232	43,733	23,919	18,877	158,260
Radial	46,243	49,213	51,716	53,847	51,797	52,967	305,783
Service Connections	32,987	33,956	62,735	61,359	61,929	37,731	290,697
Distribution Other	15,339	10,454	8,005	7,280	6,227	6,601	53,906
<b>External Projects</b>	<b>31,211</b>	<b>45,149</b>	<b>47,373</b>	<b>26,289</b>	<b>24,672</b>	<b>25,247</b>	<b>199,941</b>
Local Jurisdictions	16,865	14,496	12,950	13,346	13,680	14,022	85,359
Transportation	14,299	30,615	34,384	12,903	10,923	11,154	114,278
Customer Other	47	38	39	40	69	71	304
<b>Central Utility Projects</b>	<b>52,133</b>	<b>43,789</b>	<b>27,405</b>	<b>23,890</b>	<b>16,256</b>	<b>15,729</b>	<b>179,202</b>
Customer and Billing	16,362	4,004	956	0	0	0	21,322
Finance and IT	9,779	17,500	13,884	11,517	5,317	4,509	62,506
Fleets and Facilities	25,992	22,285	12,565	12,373	10,939	11,220	95,374
<b>Totals:</b>	<b>282,734</b>	<b>299,221</b>	<b>381,322</b>	<b>356,353</b>	<b>292,287</b>	<b>273,490</b>	<b>1,885,407</b>

A more detailed description and summary of each category follows. *In addition, projects are highlighted if their 2013 allocations are more than \$5 million, have changed by more than \$1 million relative to the amount planned for 2013 in the 2012-2017 Adopted CIP, or are new projects in this year's 2013-2018 Adopted CIP.*

**Power Supply:** Projects in this category include improvements to City Light's dams, generators, powerhouses, and other related projects. Projects to comply with federal licensing and environmental mitigation requirements at City Light's dams are also included in this category. City Light sequences work on major power production equipment (i.e., generator rebuilds and runner replacements) to reduce the impact to power generation and level capital spending. The Utility maintains 22 generators in seven power plants that are managed as three separate facilities. The Boundary Facility generates 1,051 megawatts, the Skagit Facility (comprising the Newhalem, Gorge, Diablo, and Ross power plants) generates 823 megawatts, and the Cedar Falls – Tolt Facility generates 47 megawatts.

The 2013-2018 Adopted CIP shows significantly increased spending in Power Supply over the next six years to meet federal relicensing requirements for Boundary Dam. City Light anticipates a new 50-year federal license to operate the facility, and will be required to implement a number of mitigation measures. Boundary Dam provides approximately 40% of the Utility's power needs.

For 2013, the CIP includes \$63.5 million in funding for 62 projects in Power Supply. *Highlights include:*

- ◆ Boundary – Licensing Mitigation (6987): \$16.2 million in 2013 allocations. This project shows a \$15.2 million increase in 2013 allocations from the 2012-2017 Adopted CIP. This reflects a change in accounting practices to capitalize eligible environmental remediation expenses for this project. In addition, the Boundary Dam – Forebay Recreation Area Improvements (6345) and the Boundary Dam – Tailrace Recreation Area Improvements (6346) have been consolidated as related licensing mitigation projects. The allocation increase does not reflect any fundamental change in licensing requirements.

- ◆ Boundary – New Unit – 57 (6533): \$0 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP to develop a new hydro-generator at Boundary Dam. The project requires significant lead-time, and significant construction expense is not anticipated until 2017 and 2018.
- ◆ Boundary Facility – Minor Improvements Program (6401): \$2.5 million in 2013 allocations. This project shows a \$1.9 million increase in 2013 allocations from the 2012-2017 Adopted CIP. The increased funding supports emergent needs, including sluice walkway maintenance, cavitation riser repair, sump pump upgrades, and other small capital projects,
- ◆ Boundary Powerhouse – Transformer Bank Rockfall Mitigation (6485): \$1.3 million in 2013 allocations. This project shows a \$16.3 million decrease in 2013 allocations from the 2012-2017 Adopted CIP. This reflects schedule changes for additional design that delays major construction until 2015, but does not reflect any fundamental change in project scope.
- ◆ Boundary Powerhouse – Unit 53 Generator Rebuild (6352): \$0 in 2013 allocations.
- ◆ Boundary Powerhouse – Unit 55 Generator Rebuild (6303): \$2.8 million in 2013 allocations.
- ◆ Boundary Powerhouse – Unit 56 Generator Rebuild (6354): \$2.2 million in 2013 allocations.
- ◆ Diablo Powerhouse – Rebuild Generator Unit 31 (6422): \$485,000 in 2013 allocations. These generator rebuild projects have been rescheduled to account for available engineering and project management resources over the next 6 years. City Light continually monitors these generators and may further revise schedules to address emerging needs. Project 6352 was decreased by \$7.7 million; project 6303 was increased by \$1.2 million; project 6354 was increased by \$1.5 million; and project 6422 was decreased by \$7.8 million.
- ◆ Boundary Seal Ring and Bushing Improvements (6525): \$2.1 million in 2013 allocations. This project was created in the 2012 First Quarter Supplemental Budget Ordinance. The project rehabilitates seal rings and bushings showing excessive wear in turbine runners. The project shows a \$420,000 reduction in 2013 allocations.
- ◆ Diablo Load Interrupters Replacement (6532): \$3.3 million in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP with \$3.4 million in total project allocations. This project replaces aging 230 kV load interrupters that protect transformer banks at the Diablo Facility.
- ◆ Gorge Powerhouse – Fire Protection Improvements (8326): \$0 in 2013 allocations.
- ◆ Ross Powerhouse – Fire Protection System Modification (6166): \$194,000 in 2013 allocations. These projects have been reinstated in the 2013-2018 Adopted CIP to provide water-spray fire suppression systems at Skagit generators. Project 8326 has \$586,000 in total project allocations and project 6166 has \$194,000 in total project allocations.
- ◆ Ross Rock Slide Area Improvements (6516): \$2.4 million in 2013 allocations. This project shows a \$2.1 million increase in 2013 allocations from the 2012-2017 Adopted CIP. Construction bids for this project were higher than anticipated and the project requires more extensive blasting and rock removal to stabilize the area. This increased scope has extended the schedule for this project.
- ◆ Skagit – Facilities Energy Conservation Program (6515): \$2.1 million in 2013 allocations. This project shows a \$2.1 million increase in 2013 allocations from the 2012-2017 Adopted CIP. This increase reflects higher than anticipated construction bids for the project, which has deferred completion of the work into 2013.
- ◆ Skagit Facility – Minor Improvements Program (6405): \$4.4 million in 2013 allocations. This project shows a \$3.5 million increase in 2013 allocations from the 2012-2017 Adopted CIP. This project has expanded to include minor improvement programs previously listed individually for the three Skagit Facilities (Gorge, Ross, Diablo). The increase also reflects new small capital projects, including boat facility improvements, load interrupter improvements, and CCTV security projects.

- ◆ Cedar Falls – Masonry Dam Stream Flow System Retrofit (6534): \$0 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP with \$160,000 in total project allocations. The project replaces aging water flow sensors at the Masonry Dam.
- ◆ Cedar Falls – New Generator 5/6 Exciters (6531): \$0 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP with \$333,000 in total project allocations. The project replaces the aging excitation system at Cedar Falls to meet regional reliability standards.
- ◆ Cedar Falls Powerhouse – Penstock Stabilization (6358): \$132,000 in 2013 allocations. This project shows a \$3.0 million decrease in 2013 allocations from the 2012-2017 Adopted CIP. This project provides seismic upgrades and repairs to the Cedar Falls penstocks that deliver water to the generators. A detailed risk assessment of the project identified acceptable safeguards that allow this project to be deferred until 2017, or longer if necessary.
- ◆ Cedar Falls Powerhouse – Unit 5/6 Generator Protective Relay (6450): \$471,000 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP with \$538,000 of total project allocations. The project protects the Cedar Falls generators from abnormal changes in frequency and voltage in compliance with regional reliability standards.
- ◆ Hydro Project Spill Containment (6530): \$306,000 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP with \$4.8 million in total project allocations. This project implements oil spill prevention and response improvements at the Utility's powerhouses. The project will reduce the impact of accidental oil spills from power operations and reduce the Utility's environmental liability.

**Transmission:** Projects in this category include transmission capacity and reliability projects to deliver power from City Light's dams to City Light's distribution system and connections to the regional power grid. City Light owns and maintains 650 miles of transmission capacity that connect the Skagit Facilities to Seattle. City Light leases additional transmission capacity to connect to the Boundary, Cedar Falls, and Tolt Facilities.

For 2013, the CIP includes \$4.7 million in funding for six projects in Transmission. **Highlights include:**

- ◆ Transmission Line Inductor Installation (8461): \$227,000 in 2013 allocations.
- ◆ Transmission Line Reconductoring (8462): \$217,000 in 2013 allocations. These are new projects in the 2013-2018 Adopted CIP to relieve power congestion and improve reliability for the Puget Sound Area Northern Intertie. The projects are part of a regional solution in conjunction with the Bonneville Power Administration and Puget Sound Energy. Project 8461 has \$13.7 million in total project allocations and project 8462 has \$6.3 million in total project allocations.
- ◆ Transmission Reliability (7104): \$3.5 million in 2013 allocations. This project shows an increase of \$1.1 million in 2013 allocations from the 2012-2017 Adopted CIP. The project supports the Utility's efforts to meet NERC reliability requirements.
- ◆ Denny Substation Transmission Lines (7125): \$121,000 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP to design and construct transmission lines to the new Denny Substation.

**Distribution:** Projects in this category include improvements to City Light's distribution substations, relays, feeders, network distribution systems, overhead and underground radial distribution systems, service connections, customer meters, and other projects related to the distribution system. The 2013-2018 Adopted CIP shows significantly increased spending over the next six years in support of Strategic Plan initiatives. Three major drivers include Denny Substation Development (7757), Denny Substation – Network (8404), and Advanced Metering Infrastructure (8426).

The Denny Substation will be the Utility's first major substation capacity investment in 30 years. It provides redundancy to feed power to the existing distribution system, and allows for development of a distribution network to support the growth of economic activity in South Lake Union. The Utility also proposes to begin deployment of Advanced Metering (Smart Meters) beginning in 2015. This deployment schedule allows City Light to fully plan for the transition, provide customer education in advance of the project, and ensure that the necessary communication and data systems are in place to implement the project.

For 2013, the CIP includes \$132.3 million in funding for 66 projects in Distribution. **Highlights include:**

- ◆ Bothell Substation – Transformer Replacements (7812): \$0 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP, with projected spending in 2017-2018. This project need was identified based on condition assessments of transformers performed by City Light's Asset Management program.
- ◆ Denny Substation Development (7757): \$2.0 million in 2013 allocations. This project shows an additional \$2.0 million in 2013 allocations from the 2012-2017 Adopted CIP. Budget provisos on this project were lifted by Ordinance 123835, and additional funding has been included to design and build the Denny Substation.
- ◆ Relaying Improvements (7753): \$2.9 million in 2013 allocations. This project shows a reduction of \$2.6 million in 2013 allocations from the 2012-2017 Adopted CIP. This reflects a shift in distribution system priorities to transformer replacements. Some work was shifted to future years.
- ◆ Substation Automation (8424): \$1.0 million in 2013 allocations. This project shows a reduction of \$3.2 million in 2013 allocations from the 2012-2017 Adopted CIP. Project funding has been reduced to account for emerging technologies and anticipated labor efficiencies. Cost estimates for 2015 and beyond may need to be revised based on implementation experience.
- ◆ Substation Equipment Improvements (7752): \$4.2 million in 2013 allocations. This project shows a reduction of \$2.6 million in 2013 allocations from the 2012-2017 Adopted CIP. This reflects a shift in distribution system priorities to transformer replacements and other substation projects. Some work was shifted to future years.
- ◆ Broad Street Substation – Network (8203): \$4.4 million in 2013 allocations. This project shows a \$2.5 million increase in 2013 allocations from the 2012-2017 Adopted CIP. This increase supports recent development and economic growth in the Denny Triangle. Some of this increased power load may shift to the new Denny substation in the future.
- ◆ Denny Substation – Network (8404): \$2.5 million in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP. The project designs and builds a distribution network for the South Lake Union area, served by the new Denny Substation.
- ◆ University Substation – Network (8464): \$371,000 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP. This project will track network improvements in the University District, in anticipation of potential future University of Washington expansion plans. Previously, University District network costs were combined with First Hill network costs in project 8301.
- ◆ Automated Utility Design Implementation (9950): \$1.1 million in 2013 allocations. This project shows an increase of \$1.1 million in 2013 allocations from the 2012-2017 Adopted CIP. This reflects a delay in project implementation, which was originally scheduled for 2011. Cost estimates have increased to account for internal engineering and IT labor resources necessary to implement the project.
- ◆ Mobile Workforce Implementation (8429): \$0 in 2013 allocations. This project shows a reduction of \$1.1 million in 2013 allocations from the 2012-2017 Adopted CIP. This reflects a

delay in project implementation until 2015. The delay will allow for better coordination with the new customer billing and information systems and the Advanced Metering Infrastructure project.

- ◆ PCB Transformer Replacement (8463): \$305,000 in 2013 allocations. This is a new on-going project in the 2013-2018 Adopted CIP to remove transformers containing PCBs from the Utility's distribution system. This project will reduce the Utility's environmental liability.
- ◆ Overhead Equipment Replacements (8351): \$9.2 million in 2013 allocations.
- ◆ Wood Pole Replacement Program (8371): \$9.8 million in 2013 allocations.  
These projects provide funding for replacing poles and associated overhead distribution equipment. The increased funding reflects trends in higher spending for replacement of aging equipment and acceleration of the wood pole replacement program based on condition surveys. Project 8351 has been increased by \$1.8 million, and project 8371 has been increased by \$2.8 million.
- ◆ Advanced Metering Infrastructure (8426): \$0 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP, with project spending anticipated to begin in 2015. The project will design and implement conversion of City Light's mechanical meters to modern digital meters.
- ◆ Customer Portal Development (9944): \$870,000 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP with \$1.8 million in total project allocations. This project will allow for on-line bill payment and other customer service improvements, and leverage the city-wide web-content management system.
- ◆ Large Overhead and Underground Services (8365): \$2.6 million in 2013 allocations
- ◆ Medium Overhead and Underground Services (8366): \$6.8 million in 2013 allocations.
- ◆ Small Overhead and Underground Services (8367): \$5.5 million in 2013 allocations
- ◆ Network Additions and Services: Denny (8405): \$129,000 in 2013 allocations.
- ◆ Network Additions and Services: Broad Street Substation (8363): \$6.7 million in 2013 allocations.
- ◆ Network Additions and Services: First Hill, Mass, Union & University (8364): \$2.2 million in 2013 allocations.
- ◆ Meter Additions (8054): \$4.4 million in 2013 allocations.  
These projects respond to customer requests for service connections and meters. Project funding is based on revised forecasts of customer activity and available staffing. Project 8365 was reduced by \$1.3 million; Project 8366 was reduced by \$1.9 million; Project 8367 was reduced by \$638,000; Project 8405 is a new project for network connections to the Denny Substation; Project 8363 was increased by \$1.0 million; Project 8364 was reduced by \$2.5 million; and Project 8054 was decreased by \$3.8 million.
- ◆ Federal and Regional Reliability Standards Compliance (9963): \$783,000 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP with \$783,000 in total project allocations. The project will develop and implement a compliance tracking system to document the Utility's adherence to federal and regional reliability standards.

**External Projects:** Projects in this category respond to requests from local jurisdictions to relocate distribution services from overhead to underground systems per the terms of franchise agreements, maintain and upgrade the streetlight system, relocate utility infrastructure in response to major transportation projects, and provide capital improvements in response to other customer-requested service needs. Because projects in this category respond to external drivers and specific customer requests, the CIP generally shows a decreased level of spending in future years for External Projects.

For 2013, the CIP includes \$30.7 million for 18 projects in External Projects. *Highlights include:*

- ◆ Shoreline Undergrounding: North City and Aurora Avenue North (8320): \$5.8 million in 2013 allocations. This project shows an additional \$2.8 million in 2013 allocations from the 2012-2017 Adopted CIP, and reflects revised construction schedules for these City of Shoreline transportation projects. Costs for this project are fully recovered through rate adjustments to City of Shoreline ratepayers per the terms of City Light's franchise agreement.
- ◆ Streetlight Infrastructure Replacement (8460): \$2.0 million in 2013 allocations. This is a new on-going program to assess and replace deteriorating underground streetlight infrastructure. Costs for this project are recovered through Streetlight rates.
- ◆ Streetlight LED Conversion Program (8441): \$4.5 million in 2013 allocations. This program shows a reduction of \$1.2 million in 2013 allocations from the 2012-2017 Adopted CIP, reflecting improved pricing in LED technology. Conversion of the entire residential streetlight system will be completed in 2014, and the program will shift to replacing arterial streetlights, beginning with secondary and collector arterial streets. Costs for this project are recovered through Streetlight rates.
- ◆ Alaskan Way Viaduct and Seawall Replacement – Utility Relocations (8307): \$6.2 million in 2013 allocations. This project shows a \$12.8 million decrease in 2013 allocations from the 2012-2017 Adopted CIP. The project provides for the relocation of utility infrastructure in conjunction with the Washington State Department of Transportation project. Allocation changes reflect revised scope and schedule projections driven by the transportation project.
- ◆ Mercer Corridor Relocations (8376): \$1.4 million in 2013 allocations. This project shows a \$1.3 million decrease in 2013 allocations from the 2012-2017 Adopted CIP. This decrease reflects a change in cash flow assumptions related to this Seattle Department of Transportation project, rather than significant changes in project scope.
- ◆ Mercer Corridor West Phase Relocations (8443): \$545,000 in 2013 allocations. This project shows a \$3.5 million reduction in 2013 allocations from the 2012-2017 Adopted CIP. This decrease reflects recent design changes to reduce the number of transmission line relocations and utility undergrounding needed to support this Seattle Department of Transportation project.
- ◆ Sound Transit Northlink – City Light (8427): \$3.2 million in 2013 allocations. This project shows a \$2.7 million increase in 2013 allocations from the 2012-2017 Adopted CIP. This increase reflects refinement of the Sound Transit Northlink project and acceleration of the Utility's work to support the project. Work on this project is fully recovered through construction agreements with Sound Transit.

**Central Utility Projects:** Projects in this category provide for centralized billing and customer service systems, financial and information technology systems that are critical to the Utility's operation, and vehicle fleets and facilities that are not part of the power generating plant (e.g., equipment shops, service centers, and maintenance yards). Several projects implementing Strategic Plan initiatives are included in this category, including development of the new Technical Training Center and a number of information technology system improvements.

For 2013, the CIP includes \$49.3 million for 32 projects in Central Utility Projects. *Highlights include:*

- ◆ Customer Information System (9937): \$13.5 million in 2013 allocations. This project shows an increase of \$5.5 million in 2013 allocations from the 2012-2017 Adopted CIP, reflecting more refined project scope and cost estimates. This project replaces the existing Consolidated Customer Service System (shared with SPU), and accounts for City Light's portion of half the project cost.

- ◆ Energy Management System (9956): \$0 in 2013 allocations. This project shows a decrease of \$8.4 million in 2013 allocations from the 2012-2017 Adopted CIP. This project modernizes controls and data management systems for energy operations. The start of this project has been delayed until 2014.
- ◆ Enterprise Document Management System (9962): \$533,000 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP with \$3 million in total project allocations. This project implements City of Seattle Enterprise Document Management solutions for the Utility.
- ◆ Information Technology Strategic Planning and Disaster Recovery (9964): \$655,000 in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP to develop a disaster recovery plan for the Utility's IT systems, and improve internal procedures and practices. This planning will allow the Utility to participate in the city-wide disaster recovery effort, and clarify the Utility's needs for the city-wide effort. City Light will coordinate with the city-wide IT infrastructure solution for IT disaster response, led by DOIT.
- ◆ IT Security Upgrades (9960): \$887,000 in 2013 allocations. This is a new on-going program to address security vulnerabilities, provide intrusion detection and response, and make other security-related system and procedural improvements.
- ◆ PC, Windows, Software Upgrades (9951): \$1.7 million in 2013 allocations. This project shows an increase of \$1.7 million in 2013 allocations from the 2012-2017 Adopted CIP. This project, originally scheduled to be complete in 2012, has extended into 2013. The increased funding for 2013 does not reflect any fundamental change in project scope or cost.
- ◆ Summit FinMap Upgrade – City Light (9961): \$1.2 million in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP with \$2.5 million in total project allocations. This project implements the citywide upgrade of the Summit financial system.
- ◆ Miscellaneous Building Improvements (9007): \$2.1 million in 2013 allocations. This project shows an increase of \$1.9 million in 2013 allocations from the 2012-2017 Adopted CIP. The increased funding addresses seismic and building structure issues at the service centers and substation buildings.
- ◆ Safety Modifications (9006): \$1.4 million in 2013 allocations. This project shows an increase of \$1.2 million in 2013 allocations from the 2012-2017 Adopted CIP. The increased funding supports the Strategic Plan's safety initiative to replace outdated shop equipment at the South Service Center, Boundary and Skagit facilities.
- ◆ Technical Training Center Development (9230): \$4.8 million in 2013 allocations. This is a new project in the 2013-2018 Adopted CIP with \$6.9 million in total project allocations. The project develops a dedicated training facility on property the utility already owns. The new facility will consolidate training functions for apprentice and journey-level lineworkers, tradeworkers, electricians, and technicians.
- ◆ Vehicle Replacement (9101): \$7.8 million in 2013 allocations. This project shows a decrease of \$1.4 million in 2013 allocations from the 2012-2017 Adopted Budget. The Utility continues to pursue efficiencies in managing the vehicle fleet and expects to reduce the fleet by approximately 200 vehicles in 2012, resulting in a fleet inventory of approximately 900 vehicles and pieces of mobile equipment.
- ◆ Workplace and Process Improvements (9159): \$1.3 million in 2013 allocations. This project shows a reduction of \$1.5 million in 2013 allocations from the 2012-2017 Adopted Budget. The reduction reflects an internal review of current facility needs.

**CIP Budget Control Levels in the 2013-2014 Adopted Budget**

The dollar amounts shown in the CIP are total project costs to be capitalized, and include both direct costs and associated overhead costs. Overhead costs include a share of the department’s support functions (such as finance, administration, and human resources), employee benefits, and interest incurred during construction. City Light applies overhead costs to capital project expenditures only as direct costs are incurred.

Because City Light requests budget authority for indirect overhead costs in Operating Budget Control Levels, the total project allocations in the CIP Programs are higher than the corresponding CIP Budget Control Levels in the 2013-2014 Adopted Budget. A table explaining how the 2013 CIP Program totals align with CIP Budget Control Levels in the 2013 Adopted Budget is shown below.

**CIP Programs – Project Totals for 2013 (\$1,000s)**

<b>Direct Costs (\$1,000s)</b>	<b>Power Supply</b>	<b>Transmission</b>	<b>Distribution</b>	<b>External Projects</b>	<b>Central Utility Projects</b>	<b>2013 Adopted Appropriation</b>

<b>CIP Project Allocations</b>	<b>62,455</b>	<b>4,724</b>	<b>132,211</b>	<b>31,211</b>	<b>52,133</b>	<b>282,734</b>

City Light typically abandons unspent capital appropriation authority in the CIP Budget Control Levels at the end of each year and re-appropriates the necessary capital authority in the following year’s budget. In order to manage total spending on certain high-profile projects, the Utility manages the total “lifetime” appropriations for some projects and carries forward the unspent capital appropriation authority for these projects into subsequent years. This allows for careful review of project changes, and easier tracking of

total budget and spending on these projects. The 2013-2018 Adopted CIP includes 38 “lifetime” appropriation projects. Examples include:

- ◆ Advanced Metering Infrastructure (8426)
- ◆ Alaskan Way Viaduct and Seawall Replacement – Utility Relocations (8307)
- ◆ Boundary – Licensing Mitigation (6987)
- ◆ Denny Substation Development (7757)
- ◆ Mercer Corridor Relocations (8376)
- ◆ Technical Training Center Development (9230)
- ◆ Work and Asset Management System (9941)

Because unspent “lifetime” budget authority is carried forward from year to year, the allocations for these projects can vary significantly from the spending plans shown on the project pages. The spending plans reflect the anticipated scheduled spending on these projects. Other projects may also show variance between allocations and spending plans because of encumbrances for multi-year contracts on the project.

### **Anticipated Operating Expenses Associated with Capital Facilities Projects**

Operations and maintenance costs, where identified, are included in the Department’s operating budget. In some projects, City Light has identified operations and maintenance costs of zero, or has not calculated a number (N/C). In these cases, the cost impacts of the project are either insignificant or are offset by cost savings realized by other projects.

### **City Council Provisos to the CIP**

There are no City Council provisos.

## Advanced Metering Infrastructure

<b>BCL/Program Name:</b>	C4 Distribution - Service Connections	<b>BCL/Program Code:</b>	SCL370-C4
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2015
<b>Project ID:</b>	8426	<b>End Date:</b>	Q4/2020
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project replaces approximately 400,000 existing meters, residential or commercial, with Smart Meters allowing two-way communication between Seattle City Light and its customers. The project deploys a fundamental component of "Smart Grid" technology. Smart Meters continuously record and transmit consumption data to utility. Smart Meters also automate meter reading, increase customer service, heighten billing capacity, reduce energy consumption, improve outage restoration efficiency, and support rate structure flexibility. Implementation of the project positions the utility to comply with NERC and FERC programs and requirements.

This project implements additional information technology tools to facilitate asset inventory, condition assessments, preventative maintenance record keeping, and the development of planning and design standards in support of the Asset Management Program. Project costs to implement the main software platform for asset management are contained in the Work and Asset Management System (9941) project.

## 2013 - 2018 Adopted Capital Improvement Program

**Automated Utility Design Implementation**

<b>BCL/Program Name:</b>	C3 Distribution - Radial	<b>BCL/Program Code:</b>	SCL360-C3
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2011
<b>Project ID:</b>	9950	<b>End Date:</b>	Q4/2014
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project purchases and installs Automatic Utility Design (AUD), a new engineering design software tool to replace outdated drafting software, which is no longer supported by the vendor. The AUD software will provide significant design and production efficiencies at a time when the engineering work load is increasing because of a shift to the engineers of production tasks. Additionally, the AUD software will enforce common North and South Service Center engineering practices and procedures and provide an essential interface with WAMS (Work and Asset Management System) and OMS (Outage Management System).

<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project installs a new sewer system at City Light's Bothell Substation and connects it to the Silver Lake Water District sewer system. It abandons or decommissions the station's septic system. The project includes disconnecting connections, and removing and replacing existing underground electrical safety conductors. The project minimizes the risk that (a) the Snohomish County Health Department will declare the system unsafe and disallow its continued use and/or require immediate repair, replacement or connection to the Silverlake Water District system, and/or (b) the system will cause contamination of the wetlands, thereby necessitating removal and/or other mitigation.

<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

Asset Management has completed a condition assessment of Bothell substation's four autotransformers. These are 300MVA banks vital for power delivery, and the condition assessment shows that Bank 61 may need replacement in near future, followed by Bank 64. The spending plan reflects a tentative replacement schedule based on these priorities.

## Bothell Substation Environmental Remediation

<b>BCL/Program Name:</b>	E3 Central Utility Projects - Fleets and Facilities	<b>BCL/Program Code:</b>	SCL250-E3
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	9231	<b>End Date:</b>	Q4/2014
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This project provides funding for the removal of contaminants, sewer remediation and decommissioning of the water tower at Bothell Substation. Removal of lead and asbestos in the Craneway Area is necessary in order to make the area space useable. The existing septic system does not meet code and needs to be removed or abandoned in place. The sanitary system then needs to be connected with services out to the street. The water tower needs to be deconstructed and removed as it is no longer used or needed and represents a risk to the substation if it deteriorates to the point of collapsing.

<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This project provides funding to build a new Hydrogenerator unit (Unit 57) at Boundary Dam. Unit 57 will have its own powerhouse, intake, powertunnel, etc, on the right bank. The new unit will be used for (1) exclusive load balancing thus reducing the wear and tear on the existing units 51-56 allowing steady-state operation, (2) minimization of Total Dissolved Gas values in certain spill conditions and (3) for more power production instead of wasting water resources to spill.

## Boundary Dam - Outrigger/Transformer Line Replacement System

<b>BCL/Program Name:</b>	A1 Power Supply - Boundary	<b>BCL/Program Code:</b>	SCL250-A1
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2006
<b>Project ID:</b>	6357	<b>End Date:</b>	Q4/2013
<b>Location:</b>	10382 Boundary Rd, Metaline, WA 99153		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project provides methods which allow re-conductoring between the transformer and the outriggers at the top of the cliff without exposing personnel to potential rockfalls. The project also designs and fabricates two replacement outriggers and funds replacement of Unit 55 conductors damaged by several rockfall incidents. This project enhances safety as there will be lesser need to deploy anyone over the side of the cliff to repair damaged conductors. The project further enhances safety as the design provides a safe method for replacement of damaged conductors from within transformer bay and/or from above to avoid or minimize worker's exposure to rockfall hazard.

## Boundary Dam - Units 51-56 Penstock Flow Monitoring

<b>BCL/Program Name:</b>	A1 Power Supply - Boundary	<b>BCL/Program Code:</b>	SCL250-A1
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2014
<b>Project ID:</b>	6383	<b>End Date:</b>	Q4/2014
<b>Location:</b>	10382 Boundary Rd, Metaline, WA 99153		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project installs a permanent means of monitoring water flow in the turbines, either by installing acoustic flow meters or by providing accurate calibration and appropriate instrumentation to support the use of the existing differential pressure monitoring method. This project provides accurate means for real-time monitoring of flow through the turbines which provides information for the System Control Center and diagnosing operational problems. It also provides information to determine changes in turbine performance over time to help develop maintenance and replacement plans, as well as monitor plant flow, estimate tailrace elevations, and aid the monitoring of total dissolved gas.

This project provides electrical upgrades at the Boundary site to increase system redundancy, reduce electrical hazards, comply with the National Electric Code, and integrate systems with the recent Station Service replacement. This project provides system redundancy, reduces electrical hazards, permits compliance with National Electric Code, and better integrates with the recent Station Service replacement.

This project provides financing for unforeseeable, unscheduled capital work. This project covers work specifically related to Boundary Facilities. This project provides financial coverage for emergent capital projects which are, by definition, unpredictable, and which are on a first-come, first serve basis. This project shows increased project allocations in years 2015 to 2018. This increase reflects anticipated baseline CIP spending levels for the Boundary Facility that are in line with Strategic Plan assumptions. These future year allocations will be broken out into specific CIP projects for the 2014-2018 CIP.

## Boundary Powerhouse - Transformer Bank Rockfall Mitigation

<b>BCL/Program Name:</b>	A1 Power Supply - Boundary	<b>BCL/Program Code:</b>	SCL250-A1
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2008
<b>Project ID:</b>	6485	<b>End Date:</b>	Q4/2016
<b>Location:</b>	10382 Boundary Rd, Metaline, WA 99153		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project constructs an intermediate switchyard at Boundary, install new cables routed through tunnels to the surface from the Boundary Dam transformers to the switchyard, and construct a transmission line from the switchyard to the BPA Switching Station. This project mitigates the likelihood of a rockfall damage to a transformer, the "bonnet" over the transformer, transformer equipment, conductors or outriggers. It reduces the likelihood of damage from such an incident which could be catastrophic and could result in extended outages, personal injury, and death.

### 2013 - 2018 Adopted Capital Improvement Program

**Boundary Seal Ring and Bushing Improvements**

<b>BCL/Program Name:</b>	A1 Power Supply - Boundary	<b>BCL/Program Code:</b>	SCL250-A1
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2011
<b>Project ID:</b>	6525	<b>End Date:</b>	Q4/2013
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This project replaces bushings and seal rings on Generator Units 51 through 56. Recent inspections have indicated failure of some of the bushings and problems with failing seals that are designed to maintain cleanliness in the self lubricating bushings. Based on these inspections and testing of the seals, it is clear that the durability of the present seal bushing arrangement will not meet the long term reliability that is needed in these units. The importance of the bushings is to ensure reliable turbine operations.

## Boundary Switchyard - Generator Step-up Transformers

<b>BCL/Program Name:</b>	A1 Power Supply - Boundary	<b>BCL/Program Code:</b>	SCL250-A1
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2010
<b>Project ID:</b>	6493	<b>End Date:</b>	Q4/2019
<b>Location:</b>	10382 Boundary Rd, Metaline, WA 99153		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project replaces existing step-up transformers at Boundary Dam which are 50 years old and have exceeded their reliable service life. This project also includes a spare transformer. The project enhances long term reliability, and allows City Light to avoid a prolonged loss of generation capacity as the normal delivery time for transformers is 18 to 24 months.

## Broad Street Substation - Network

<b>BCL/Program Name:</b>	C2 Distribution - Network	<b>BCL/Program Code:</b>	SCL360-C2
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/1999
<b>Project ID:</b>	8203	<b>End Date:</b>	Q4/2019
<b>Location:</b>	319 6th AV N		
<b>Neighborhood Plan:</b>	South Lake Union	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project funds a programmatic approach for comprehensive management of underground network assets serving customers in the Belltown and Denny Regrade areas. The project enhances network reliability and provides sufficient service capacity for the growing electrical power needs of the Denny Triangle and potentially a portion of South Lake Union area.

## 2013 - 2018 Adopted Capital Improvement Program

**Building Envelope Upgrades**

<b>BCL/Program Name:</b>	E3 Central Utility Projects - Fleets and Facilities	<b>BCL/Program Code:</b>	SCL250-E3
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2004
<b>Project ID:</b>	9072	<b>End Date:</b>	Q4/2018
<b>Location:</b>	500 Newhalem Creek Rd, Marblemount, WA 98267		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This ongoing project replaces or restores exterior moisture and thermal barrier components of buildings such as roofing and insulation systems, exterior siding and cladding systems, windows and exterior doors. This project allows for the proactive replacement of building exteriors in order to avert costly structural damage and prevent the growth of toxic mold inside wall cavities and ceiling spaces that can easily render a building uninhabitable. The project also enhances operational efficiency by mitigating emergency repairs which disrupt utility operations.

## Burien Undergrounding - Phase 2

<b>BCL/Program Name:</b>	D1 External Projects - Local Jurisdictions	<b>BCL/Program Code:</b>	SCL370-D1
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2008
<b>Project ID:</b>	8401	<b>End Date:</b>	Q4/2013
<b>Location:</b>	1st Ave South/145th Street/139th Street		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project provides for the City of Burien to fund undergrounding of electrical distribution facilities during Phase 2 (146th Street to 140th Street) of the First Avenue South road improvement project. Project costs are recovered through adjustments to electrical rates charged to Seattle City Light customers in that jurisdiction. The project enhances regional relationships, and allows SCL to comply with the terms and conditions set forth in the franchise agreement between Seattle City Light and the City of Burien.

## Canal Substation - Transformer Replacements

<b>BCL/Program Name:</b>	C1 Distribution - Substations	<b>BCL/Program Code:</b>	SCL360-C1
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2015
<b>Project ID:</b>	7778	<b>End Date:</b>	Q4/2019
<b>Location:</b>	614 NW 45th Street		
<b>Neighborhood Plan:</b>	Fremont	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	Ballard Interbay

This project funds the review of two power transformers at Canal Substation and determines dissolved gas concentration, insulation aging, oil leaks, maintenance cost, service stress, and fault-interrupting history. The project replaces transformers with the highest failure risk, or those presenting substation capacity limits. The project enhances system reliability by replacing aging substation transformers before they fail in service.

## Cedar Falls Powerhouse - Penstock Stabilization

<b>BCL/Program Name:</b>	A3 Power Supply - Cedar Falls - Tolt	<b>BCL/Program Code:</b>	SCL250-A3
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	6358	<b>End Date:</b>	Q4/2017
<b>Location:</b>	19901 Cedar Falls Rd SE, North Bend, WA 98045		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project installs a seismic upgrade of penstock bridges, repairs sagging or broken penstock support saddles, and refurbishes the exterior surfaces to extend the life of two 78-inch diameter steel penstocks. This project reduces risks of damage from earthquakes. It restores the exterior coating on the pipes in the areas where the penstocks are buried. Any penstock failure will likely damage the environment and Seattle's water supply, and could jeopardize the City's ability to fulfill its obligation to regulate fish flows in the Cedar River.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project replaces existing protective relays for generators 5 and 6. Along with upgrading the generator protection packages, this project replaces the electrical and mechanical lockout relays. This project upgrades the present generator protection, which lacks some basic protection elements, to protect it from abnormal frequency and voltages. The project permits SCL to comply with the North American Electric Reliability Council (NERC) and the Western Electricity Coordinating Council (WECC) regional requirements for maintaining the generator in-service during system disturbances.

## Cedar Falls Powerhouse - Valvehouse Rehabilitation

<b>BCL/Program Name:</b>	A3 Power Supply - Cedar Falls - Tolt	<b>BCL/Program Code:</b>	SCL250-A3
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2015
<b>Project ID:</b>	6324	<b>End Date:</b>	Q4/2015
<b>Location:</b>	19901 Cedar Falls Rd SE, North Bend, WA 98045		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project rehabilitates the Cedar Falls Valvehouse. The exact extent of rehabilitation needed has not been determined, but the project may include replacement of exterior windows, exterior structural improvements, oil spill prevention, and interior remodeling. Rehabilitation ensures that the hoist machinery in the valvehouse (involved with raising and lowering the intake gate) is adequately protected from weather and intrusion.

# Seattle City Light

## Cedar Falls/South Fork Tolt - Minor Improvements Program

<b>BCL/Program Name:</b>	A3 Power Supply - Cedar Falls - Tolt	<b>BCL/Program Code:</b>	SCL250-A3
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2005
<b>Project ID:</b>	6406	<b>End Date:</b>	Q4/2019
<b>Location:</b>	19901 Cedar Falls Rd SE, North Bend, WA 98045		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project provides financing for unforeseeable, unscheduled capital work related to the Cedar Falls and South Fork Tolt Facilities. In addition, it funds scheduled, small capital projects that have cost estimates less than \$25,000. This project provides financial coverage for emergent capital projects which are, by definition, unpredictable, and which are on a first-come, first serve basis. This project shows increased project allocations in years 2015 to 2018. This increase reflects anticipated baseline CIP spending levels for the Cedar Falls/South Fork Tolt Facility that are in line with Strategic Plan assumptions. These future year allocations will be broken out into specific CIP projects for the 2014-2018 CIP.

This project installs a new feeder to supply the Sabey Corporation's Intergate East Internet Center in Tukwila from the Creston-Nelson Substation. This project includes design, permit preparation and evaluates customer load requirements. The project increases system capacity and customer satisfaction.

# Seattle City Light

## Customer Information System

<b>BCL/Program Name:</b>	E1 Central Utility Projects - Customer and Billing	<b>BCL/Program Code:</b>	SCL370-E1
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	9937	<b>End Date:</b>	Q4/2015
<b>Location:</b>	700 5th Avenue		
<b>Neighborhood Plan:</b>	Commercial Core	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Commercial Core

This project replaces the existing Consolidated Customer Service System (CCSS) application, which is no longer supported by the vendor, with a current and viable technology solution. The CCSS provides Customer Information System (CIS) processing and support for Seattle City Light, Seattle Public Utilities, the City's Utility Call Center, and other customer service staff. However, the existing system does not support the current business model and direction of the City of Seattle's utilities. The project preserves and enhances the City's ability to deliver these critical functions.

## Customer Portal Development

<b>BCL/Program Name:</b>	C4 Distribution - Service Connections	<b>BCL/Program Code:</b>	SCL370-C4
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	9944	<b>End Date:</b>	Q4/2014
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project develops a customer portal to facilitate self-service options for City Light’s customers. The portal will provide customers easy access to online tools, forms, and relevant information. The new site will enable customers the convenience of paying bills online, making online payment arrangements, and accessing web tools which will aid them in saving energy. The portal will decrease the volume of phone interactions with both SCL Customer Care and the SPU Call Center, and will interface with the new SCL/SPU billing system - see Customer Information System project (9937).

<b>Location:</b>	Dallas Ave S/14th Ave S		
<b>Neighborhood Plan:</b>	Duwamish	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Greater Duwamish	<b>Urban Village:</b>	South Park

This project reinstalls two 26kV feeders across the Duwamish River. This crossing backs up the Cambridge Corridor Crossing, providing redundant power supply to the area along East Marginal Way South. The area has many large industrial accounts, including Jorgenson Steel, Kenworth Trucking, and a number of Boeing plants.

This project designs and builds a 200 MVA substation on Denny Ave. The project funds site acquisition, and environmental management and remediation of the land, design of the substation, and construction of the substation. It provides capacity to meet load growth, provides the operational flexibility to operate the electrical system to serve new development and existing load, and supports development of an underground network.

### 2013 - 2018 Adopted Capital Improvement Program

**Diablo Camp - Sewer System Rehabilitation**

<b>BCL/Program Name:</b>	A2 Power Supply - Skagit	<b>BCL/Program Code:</b>	SCL250-A2
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	6232	<b>End Date:</b>	Q4/2014
<b>Location:</b>	Milepost 126 State Highway 20		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project replaces or repairs numerous sewer pipe breaks, leaks, and sags in the combined Diablo sewer/drainage collection system, located at the Diablo Dam site. This project eliminates potential overloads in the sewage treatment plant that can cause pollution of the Skagit River and soil contamination. This project is contingent on forthcoming recommendations regarding the Skagit Housing Plan. If a decision is made to abandon the housing in that area, the sewage system will be abandoned and removed, thus rendering this project unnecessary.

This project provides updated line protection schemes on the D1, D2, & D3 Lines (Diablo End) utilizing electro-mechanical relays. The project also replaces existing relays which are approaching the reasonable service life and lack essential fault location capability. The project replacements include microprocessor-based digital relays, fault location and event reporting, lockout and test switching capabilities, and communication-assisted transfer trip utilizing the mirrored bits function of the digital relays.

This project provides financing for unforeseeable, unscheduled capital work related to Diablo Facilities. In addition, it funds scheduled, small capital projects that have cost estimates less than \$25,000. This project provides financial coverage for emergent capital projects which are, by definition, unpredictable, and which are on a first-come, first serve basis. Future work has been merged into project 6405 (Skagit Facility - Minor Improvements Program), in support of the consolidation of Skagit organizational units. This project remains in the CIP to allow work already started under this project to be completed.

# Seattle City Light

## Diablo Switchyard - Controls for Breakers and Switches

<b>BCL/Program Name:</b>	A2 Power Supply - Skagit	<b>BCL/Program Code:</b>	SCL250-A2
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	6417	<b>End Date:</b>	Q4/2014
<b>Location:</b>	Milepost 126 State Highway 20		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project replaces the existing breaker control switches with electrically operated control switch relays, and retrofits three line disconnect switches with motor operators. The project provides remote control operations, by the SCC operators in Seattle, of the switchyard breakers and the three Bothell line disconnect switches. This remote control operation enhances operational uses of the Ross units which eliminates lost revenues.

<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project installs fiber cable and equipment to all City Light dams, substations and service centers to create a secure, reliable, fast and redundant digital communications system for operations command and control. The fiber infrastructure provides a secure path for power distribution system control and dispatch, Energy Management System data, and other City Light communications. This project also supports Substation Automation, Distribution Automation, Distributed Generation, and automated meter reading projects.

## 2013 - 2018 Adopted Capital Improvement Program

# Seattle City Light

## Distribution Automation

<b>BCL/Program Name:</b>	C3 Distribution - Radial	<b>BCL/Program Code:</b>	SCL360-C3
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	8425	<b>End Date:</b>	Q4/2016
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project automates radial distribution feeders. Four feeders will be automated each year from 2014 to 2016. The installation of strategically placed switches will provide the ability to automatically perform outage restoration, shift blocks of load to maximize efficiencies of feeders, and reconfigure the feeder grid. This project includes installation of equipment to provide remote control of operations of switches on power lines and gather real time data on conditions in distribution power lines. Experience in this project will allow development of standards for line switching equipment. Typical operation will involve remotely detecting that a feeder fault has occurred, locating the damaged portion of the feeder between two remote controlled line switches, isolating the damaged portion of the feeder by opening appropriate remote controlled line switches, and re-energizing undamaged portions of the feeder via the primary feeder source and one or more backup sources using automatically controlled tie switches.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project protects and restores fisheries habitat in the Skagit and Tolt basins. It implements the Endangered Species Act (ESA) Program for recovery of listed fish species that are potentially affected by City Light projects. The project includes land purchase, restoration, assessment, and management. This project reduces the likelihood of third party lawsuits under ESA and the reopening by Federal agencies, e.g. the U.S. Fish and Wildlife Service, seeking additional measures to protect and restore the listed species.

This project funds improvements to prevent air and water pollution at City Light facilities. This project implements cost-appropriate solutions for identified environmental programs, and provides facilities for meeting environmental and remediation concerns. Typical projects include ventilation for painting operations, storage equipment for toxic material, containment provisions to provide protection in the event of a spill or leak, and handling equipment to enable safe movement of hazardous items. The project reduces the likelihood of statutory fines for mishandling or releasing hazardous and dangerous materials which can reach tens of thousands of dollars per day and civil liability claims for damages stemming from a release or spill, which can reach into the millions.

This project upgrades and replaces the structural, electrical or mechanical systems or other "base building systems" critical to building operations and site development. Work under this project may include plumbing replacements, HVAC-related systems, power distribution systems, tanks, elevators, fire-suppression systems, drainage systems, exterior and interior lighting, landscaping, irrigation, paving, stairs, and sidewalks. This project is intended for emergent work not yet identified.

<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This project provides an online system that manages workflows and tracks compliance with North American Electric Reliability Corporation (NERC) standards and requirements. This project installs a dynamic customized Compliance Tracking Tool and Standardization Process across critical business units. This system will allow the Utility to prove compliance for all applicable federal standards, at any given day and time (24/7/365). City Light is subject to a federal audit on reliability standards every three years.

## First Hill - Network

<b>BCL/Program Name:</b>	C2 Distribution - Network	<b>BCL/Program Code:</b>	SCL360-C2
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2002
<b>Project ID:</b>	8301	<b>End Date:</b>	Q4/2019
<b>Location:</b>	1100 Madison St		
<b>Neighborhood Plan:</b>	First Hill	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	East District	<b>Urban Village:</b>	First Hill

This project funds a programmatic approach for comprehensive management of underground network assets serving customers in the First Hill area. This project funds annual work required, such as feeder balancing, engineering analysis to determine system feeder assignments for new services, and replacement of cables that fail while in service. This project increases electrical capacity and reliability for First Hill customers in response to increased customer demand. It reduces the probability of cable failures and long costly customer outages.

## Generation Federal Reliability Standards Improvements

<b>BCL/Program Name:</b>	A4 Power Supply - Power Supply Other	<b>BCL/Program Code:</b>	SCL250-A4
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	6470	<b>End Date:</b>	Q4/2016
<b>Location:</b>	500 Newhalem Creek Rd, Marblemount, WA 98267		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This ongoing project provides compliance with emergent power production (Generation) regional reliability standards mandated by the North American Electric Reliability Corporation (NERC) and its regional compliance partner, the Western Electricity Coordinating Council (WECC). Typical improvements may include but are not limited to power system stabilizers, generator and control system testing equipment, cyber security equipment, and system disturbance monitoring equipment. The project mitigates the probability of financial penalties of up to \$1 million per day per violation for failure to comply. Publication of new and revised standards requires an on-going project-level effort to put into service improvements which keep generation equipment and operations in full compliance.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project provides financing for unforeseeable, unscheduled capital work related to Gorge Facilities. In addition, it funds scheduled, small capital projects that have cost estimates less than \$25,000. This project provides financial coverage for emergent capital projects which are, by definition, unpredictable, and which are on a first-come, first serve basis. Future work has been merged into project 6405 (Skagit Facility - Minor Improvements Program), in support of the consolidation of Skagit organizational units. This project has been included in the CIP to allow work already started under this project to be completed.

## Gorge Facility - Second Tunnel Installation

<b>BCL/Program Name:</b>	A2 Power Supply - Skagit	<b>BCL/Program Code:</b>	SCL250-A2
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	6302	<b>End Date:</b>	Q4/2013
<b>Location:</b>	Milepost 121 State Highway 20		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project bores through hard rock and constructs a two-mile, 22 foot diameter power tunnel adjacent to the existing tunnel at the Gorge Dam facility that carries water to the hydroturbine/generator units. The resulting lower water velocity in the two tunnels together increases overall plant efficiency without any change in water flow or plant operations by reducing energy lost in the power tunnels. This improvement is expected to increase annual generation by about 57,700 MWh. The project is currently budgeted for design only. Construction will be dependent on justification of market value of electricity, and other market conditions favorable toward moving forward with construction.

### 2013 - 2018 Adopted Capital Improvement Program

**Hydro Project Spill Containment**

**BCL/Program Name:** A4 Power Supply - Power Supply Other **BCL/Program Code:** SCL250-A4  
**Project Type:** Rehabilitation or Restoration **Start Date:** Q1/2013  
**Project ID:** 6530 **End Date:** Q4/2018  
**Location:**  
**Neighborhood Plan:** Not in Neighborhood Plan **Neighborhood Plan Matrix:**  
**Neighborhood District:** **Urban Village:**

This project implements upgrades that will either prevent spills (from oils, greases, fuels and other petroleum products) through process improvements and equipment replacement or provide additional containment capacity for accidental spills. Options for reducing spills include replacing oil-filled transformers with dry-type transformers, building larger containment basins around oil-filled equipment, reconfiguring powerhouse sumps to separate potentially oily water from non-oily water, installing oil/water separators on transformer and generator cooling water systems and replacing greased valve bushings with greaseless bushings. Because each powerhouse is unique, different solutions will be designed and implemented at each facility.

## Information Technology Disaster Recovery

<b>BCL/Program Name:</b>	E2 Central Utility Projects - Finance and IT Systems	<b>BCL/Program Code:</b>	SCL550-E2
<b>Project Type:</b>	New Investment	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	9964	<b>End Date:</b>	Q4/2014
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project plans, builds, deploys, and provides on-going management of the disaster recovery (DR) program. This project establishes a formal DR program for City Light, placing a recovery version of IT assets in geographically diverse locations. This project develops and implements processes and procedures to exercise DR plans on an annual basis. The project also develops processes and procedures for annual updates of the IT Continuity of Operations (COOP IT Annex). In 2013, City Light will deploy recovery capability at a separate data center for two critical applications, Power Systems and Outage Management. City Light will coordinate these efforts with DOIT's city-wide IT disaster recovery plans.

### 2013 - 2018 Adopted Capital Improvement Program

# Seattle City Light

## Information Technology Infrastructure

<b>BCL/Program Name:</b>	E2 Central Utility Projects - Finance and IT Systems	<b>BCL/Program Code:</b>	SCL550-E2
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/1999
<b>Project ID:</b>	9915	<b>End Date:</b>	Q4/2018
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project funds replacement and improvement of the Utility's information technology infrastructure. This infrastructure provides applications, data storage, and print services to the utility, and supports activities and applications including Microsoft Outlook, remote connectivity, electronic communications/recording of power marketing transactions (E-tagging), the City InWeb and network, common and City Light applications, UNIX services, and infrastructure change management. Components purchased by this project include servers, network and communications equipment, disk storage, and application/operating system software. Infrastructure is upgraded or replaced based upon a combination of factors, such as maintenance schedules, equipment warranties, availability of vendor support, Gartner recommendations, application growth, and security demands.

City Light currently uses four systems to prepare the Department's budget submittal for Mayor and City Council approval. This project replaces existing City Light budget systems and provides automated support for the City's central budget process (including development of Budget Issue Papers and submittals for the City's REM budgeting system). The project provides flexibility to meet management needs in budget structure and reporting.

### 2013 - 2018 Adopted Capital Improvement Program

**Inventory System Redevelopment**

**BCL/Program Name:** E2 Central Utility Projects - Finance and IT Systems **BCL/Program Code:** SCL550-E2  
**Project Type:** New Investment **Start Date:** Q1/2013  
**Project ID:** 9959 **End Date:** Q4/2014  
**Location:**  
**Neighborhood Plan:** Not in Neighborhood Plan **Neighborhood Plan Matrix:**  
**Neighborhood District:** **Urban Village:**

This project selects and implements a Supply Chain Management System software package that manages inventory, logs receipts, issues materials, carries unit cost for valuation, tracks quantities and availability, and forecasts usage of supplies. It replaces existing software, installed in 2002, that has not been updated and is currently unsupported by the vendor. The project also upgrades the existing aging server and operating system which use incompatible JAVA applications and are no longer supported. This project reduces the likelihood of server failure, and provides a reliable modern interface to other City software, including WAMS, OMS, and Summit.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

The project updates or replaces information security systems that are at high risk of failure. The project enhances vulnerability and intrusion detection as well as response capabilities and procedures. The project provides for (by way of illustration but not limitation) implementation of systems to, replacements of, or upgrades to firewalls, routers, switches, operating systems, intrusion detection capabilities, security information and event management, Linux patching procedures, Dynamic Host Configuration Protocol server, Domain Name System server, internal vulnerability scanning, and physical security cameras and networks for SCL locations.

## Ladder Creek Garden - Irrigation and Illumination

<b>BCL/Program Name:</b>	A2 Power Supply - Skagit	<b>BCL/Program Code:</b>	SCL250-A2
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2005
<b>Project ID:</b>	6234	<b>End Date:</b>	Q4/2014
<b>Location:</b>	Milepost 126 State Highway 20		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project provides an assured supply of water to Ladder Creek Garden, including an irrigation system and water features, such as pools and fountains. The electrical upgrade provides improved trail and creek lighting in keeping with the historical conditions. This project brings Seattle City Light into compliance with the Skagit FERC license requirements.

### 2013 - 2018 Adopted Capital Improvement Program

**Lake Forest Park - Feeder Rehabilitation**

<b>BCL/Program Name:</b>	C3 Distribution - Radial	<b>BCL/Program Code:</b>	SCL360-C3
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	8384	<b>End Date:</b>	Q4/2013
<b>Location:</b>	N 205th & I - 5/N 145th & 61st Ave NE		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project rehabilitates the aging distribution system in Lake Forest Park. This project services one feeder each year for four years. This project increases feeder reliability and reduces maintenance costs. Since the project also includes funding for tree trimming, it enhances customer satisfaction by reducing likelihood of outages and reduces emergency repair costs.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project provides large size electric power service connections from Seattle City Light's distribution system to the customer's meter for power requirements of 3 MVA or larger and 26 kV radial service. Most of this related work is billable to the customer. The project allows Seattle City Light to provide service to new customers in a safe, reliable, timely and cost effective manner as a means to fulfill its commitment to be a customer and community-focused organization.

## Laurelhurst - Underground Rebuild

<b>BCL/Program Name:</b>	C3 Distribution - Radial	<b>BCL/Program Code:</b>	SCL360-C3
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	8373	<b>End Date:</b>	Q4/2014
<b>Location:</b>	45th Street/38th Street		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Northeast	<b>Urban Village:</b>	Not in an Urban Village

This project completes the final three phases of a nine phase rebuilding of the underground distribution system in Laurelhurst. It replaces increasingly failure-prone aging 4kV equipment and direct buried cables with a buried conduit system. The project improves service reliability, customer satisfaction, economic operating efficiencies, and safety, and, since PCB transformers are replaced, reduces environmental damage exposure.

## Looped Radial Distribution System GIS Editor Replacement

<b>BCL/Program Name:</b>	C5 Distribution - Distribution Other	<b>BCL/Program Code:</b>	SCL360-C5
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2012
<b>Project ID:</b>	9958	<b>End Date:</b>	Q4/2014
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This project replaces the obsolete Distribution Automated Mapping System hardware and software with modern, configurable, vendor-supported Consumer Off The Shelf (COTS) software and a server to host the software. The replacement provides assurances to the ongoing day to day operation of the radial distribution mapping system at City Light. The project provides stability, availability, and reliability lacking in the current software and hardware. The new system takes advantage of metadata driven configurability to meet changing business needs and streamlines the maintenance of enterprise level GIS data that supports engineering, operations, system control, system planning, outage management, and asset management.

## Massachusetts Street Substation - Networks

<b>BCL/Program Name:</b>	C2 Distribution - Network	<b>BCL/Program Code:</b>	SCL360-C2
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/1999
<b>Project ID:</b>	8202	<b>End Date:</b>	Q4/2019
<b>Location:</b>	1555 Utah AV S		
<b>Neighborhood Plan:</b>	Duwamish	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Greater Duwamish	<b>Urban Village:</b>	Duwamish

The project increases Massachusetts Street Substation network capacity. It funds a programmatic approach for comprehensive management of underground network assets serving customers in Pioneer Square and the area bounded by University Street, Third Avenue, Terrace Street, and the Freeway. The project funds completion of engineering design and analysis work required before construction of any civil facilities into which feeders can be relocated from the Alaskan Way Viaduct. This project defers the need date for a new network substation until no further capacity is available from Union Street and the other network substations. It provides sufficient and reliable electrical capacity for the growing power needs of City Light's customers.

## Mercer Corridor Relocations

<b>BCL/Program Name:</b>	D2 External Projects - Transportation Relocations	<b>BCL/Program Code:</b>	SCL370-D2
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2009
<b>Project ID:</b>	8376	<b>End Date:</b>	Q4/2013
<b>Location:</b>	Mercer Street & I - 5/Dexter Ave N		
<b>Neighborhood Plan:</b>	South Lake Union	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Lake Union	<b>Urban Village:</b>	South Lake Union

This project converts a section of SCL's existing 26kV overhead electrical distribution systems and a section of the existing overhead Broad-University 115kV transmission line to an underground configuration. The project provides for the construction of a manageable and sustainable electrical power distribution infrastructure within this major City of Seattle transportation corridor improvement in the South Lake Union Urban Center.

This project relocates significant transmission and distribution facilities on the west end of the Mercer Street corridor in coordination with the Alaskan Way Viaduct and Seawall Replacement - Utility Relocations (8307) project. The project calls for four overhead feeders and relocation of underground ducts and vaults. The project includes SCL performing follow-up electrical work in concert with the SDOT managed project and WSDOT's Alaskan Way Viaduct replacement program.

## Meter Reading Software Replacement

<b>BCL/Program Name:</b>	C4 Distribution - Service Connections	<b>BCL/Program Code:</b>	SCL370-C4
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2011
<b>Project ID:</b>	9953	<b>End Date:</b>	Q4/2013
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project upgrades City Light's aging Itron's Premier Plus 4(P+4) Meter Reading System. Support for the current meter reading system ceases in 2012. The system consists of electronic, handheld meter reading units used by the meter readers to record a customer's energy use information and a software system which interfaces with the handheld units and the CCSS Billing System. Upgrading City Light's Meter Reading System increases system stability and reliability, while enhancing accurate and timely customer billing.

<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project rejuvenates old cable in numerous Seattle neighborhoods by injecting an approved silicone type fluid that extends the life of the existing stranded power cables. The project extends the life of the old cable which are in danger of failure and need to be replaced or rehabilitated. It significantly reduces the likelihood of feeder outage due to cable failure. It improves customer satisfaction.

This project provides electrical service connections and related improvements in response to customer service within the North Downtown network area. The project provides civil and electrical design assistance to customers to connect existing and proposed buildings to the North Downtown network system. This project performs capacity addition work associated with service connections, and replaces or installs network transformers, network protectors, and bus ties switches. Short-duration system improvement work identified during operations, including retrofitting in-building vaults, is completed. This program fluctuates with land use development. This project is related to Project 7757 (Denny Substation Development) and Project 8404 (Denny Substation - Network).

## Network Hazeltine Upgrade

<b>BCL/Program Name:</b>	C2 Distribution - Network	<b>BCL/Program Code:</b>	SCL360-C2
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/1999
<b>Project ID:</b>	8129	<b>End Date:</b>	Q4/2019
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project upgrades City Light's remote vault monitoring capability. The project enhances the network monitoring capability by allowing an alarm to be sent to the System Control Center within 30 seconds of an abnormal condition occurrence. The project enhances system reliability by avoiding serious and expensive equipment problems and service outages.

This project repairs or replaces damaged electrical manholes, vaults and ducts located in the street right of way within the Downtown Central and Pioneer Square business districts. The project provides reliable and safe electrical service to the Network. This project enhances City Light crew and public safety by reducing the large backlog of old or damaged electrical facilities.

This project rehabilitates the Newhalem Generator 20 turbine runner and penstock. Placed in service in 1921, the turbine runner and penstock have reached the end of their useful life. This system has a 2.5 megawatts generating capacity of clean renewable power. In addition, it provides emergency power backup to Newhalem and Gorge facilities.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Aurora-Licton

This project creates a master plan for the development of City Light's North Service Center (NSC) properties, buildings and workspaces. The plan includes acquiring property abutting the Service Center that is being offered for sale by the University of Washington and will provide improvements to make this property usable for City Light operations. Additional properties will be acquired, if available, between Stone Way and Aurora Ave to allow further development of the NSC to the west. The plan also looks at potential vacation of streets and alleys to combine space into a campus setting that can be secured for SCL security and safety purposes; the addition of parking, warehouse space, customer service center, and engineering and shop space; and improving access and egress to and from the NSC.

## North Substation - Transformer Replacements

<b>BCL/Program Name:</b>	C1 Distribution - Substations	<b>BCL/Program Code:</b>	SCL360-C1
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2011
<b>Project ID:</b>	7777	<b>End Date:</b>	Q4/2014
<b>Location:</b>	814 NE 75th St		
<b>Neighborhood Plan:</b>	Greenlake	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	North	<b>Urban Village:</b>	Not in an Urban Village

This project funds the review of two power transformers at North Substation and determines dissolved gas concentration, insulation aging, oil leaks, maintenance cost, service stress, and fault-interrupting history. The project replaces transformers with the highest failure risk, or those presenting substation capacity limits. The project enhances system reliability by replacing aging substation transformers before they fail in service.

## Overhead System Capacity Additions

<b>BCL/Program Name:</b>	C3 Distribution - Radial	<b>BCL/Program Code:</b>	SCL360-C3
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	8356	<b>End Date:</b>	Q4/2019
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project provides electrical lines from substations to customers' property lines. This project builds new and replaces old line segments, replaces rotten and damaged poles in the distribution system. City Light customers pay for some of this work. This project adds capacity to the distribution system to maintain the reliability level for the existing customers on the system and accommodate the increased load from new services.

## 2013 - 2018 Adopted Capital Improvement Program

# Seattle City Light

## PC, Windows, Software Upgrades

<b>BCL/Program Name:</b>	E2 Central Utility Projects - Finance and IT Systems	<b>BCL/Program Code:</b>	SCL550-E2
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2011
<b>Project ID:</b>	9951	<b>End Date:</b>	Q4/2013
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project upgrades computers and core software applications that are now beyond or approaching end-of-life support from manufacturers. The project upgrades may include (by way of illustration but not limitation): replace all Gateway PCs and laptops (quantity 1800); replace the Windows XP operating system with Windows 7; replace Office 2003 with Office 2010; replace Project 2003 and Visio 2003 with current versions; and replace Novell ZENworks with Microsoft System Center Configuration Manager. The project allows SCL to obtain bug fixes, compatibility updates, and less important security patches. It simplifies purchase of new hardware since manufacturers are no longer developing hardware drivers for Windows XP, which means that new printers and other peripherals are not compatible. This project allows SCL to maintain compatibility with other City departments that upgraded the Microsoft Office software in 2009. It eliminates compatibility problems, workarounds, and emergency fixes to maintain business.

## PCB Transformer Replacement

<b>BCL/Program Name:</b>	C3 Distribution - Radial	<b>BCL/Program Code:</b>	SCL360-C3
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	8463	<b>End Date:</b>	Q4/2019
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This project identifies, removes, and properly disposes of transformers in City Light's system containing known PCB concentrations of 1.0 ppm or greater. The project includes master plan development using GIS technology and physically testing approximately 20,000 transformers and replace about 1,500 transformers with known PCBs. The project implements the processes and procedures for the disposal of the contaminated transformers.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project funds utility crews and engineers to prepare City Light poles for the attachment of other utilities and wireless site construction. This project provides for additional revenues through pole attachment fees and construction costs are fully reimbursable. The project allows City Light to meet its legal obligations to make space available on its facilities to government and private entities for communication and other purposes, according to Section 224 of the Federal Communications Act.

## Pole Yard Relocation

**BCL/Program Name:** E3 Central Utility Projects - Fleets and Facilities      **BCL/Program Code:** SCL250-E3  
**Project Type:** New Facility      **Start Date:** Q1/2011  
**Project ID:** 9226      **End Date:** Q4/2013  
**Location:**  
**Neighborhood Plan:** Not in Neighborhood Plan      **Neighborhood Plan Matrix:**  
**Neighborhood District:**      **Urban Village:**

This project creates a permanent pole storage yard using two rights of ways located just south of Seattle. Funding is needed for engineering design, site surveys, geotechnical, permits, roadways, pile storage, water main protection, drainage, environmental remediation, fencing, lighting, and the purchase and set up of a modular building. The project eliminates the potential of any contamination that may leech from our poles from reaching the Duwamish River through the design of a drainage system that is filtered and then sent directly to the King County Waste Treatment facility.

<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project provides the infrastructure required to install the basic control network and integrate existing, major control systems for a Skagit wide network controls program, to be located at each of the Skagit facilities. This project improves monitoring and control of the Skagit facilities, reduces maintenance and reduced outages, and reduces cost and time of maintenance and outages. This project incorporates features that lead to enhanced data acquisition that is part of the NERC requirements.

## Ross Dam - AC/DC Distribution System Upgrade

<b>BCL/Program Name:</b>	A2 Power Supply - Skagit	<b>BCL/Program Code:</b>	SCL250-A2
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2005
<b>Project ID:</b>	6373	<b>End Date:</b>	Q4/2015
<b>Location:</b>	Milepost 128 State Highway 20		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project upgrades aging AC electrical distribution system at Ross Dam with a new electrical distribution system. It installs conduit, ducting, distribution panels and wire; improves the 4 kV system; improves lighting; and provides improvements on top of the dam, including a center substation room, emergency generator, valve houses, and a 130-volt battery bank. New conduit and conductors improve reliability of spillgate operations and other dam operations requiring electric power. New electrical equipment, new lighting, and the addition of emergency lighting allow staff greater operational flexibility, safety, and efficiency.

## Ross Powerhouse - Fire Protection Systems Modification

<b>BCL/Program Name:</b>	A2 Power Supply - Skagit	<b>BCL/Program Code:</b>	SCL250-A2
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2004
<b>Project ID:</b>	6166	<b>End Date:</b>	Q4/2013
<b>Location:</b>	Milepost 128 State Highway 20		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project provides a water spray generator fire suppression system for Generators 41-44, with installation coinciding with the generator rebuilds. The project replaces the existing carbon dioxide (CO2) system, and improves the sensing, controls, and alarms. The project scope includes design and installation of a water delivery system and a new control system for fire detection, alarming, and suppression. This project is consistent with a 2003 SCL engineering report which recommended conversion of generator fire suppression systems from CO2 to water spray.

## Ross Powerhouse - Programmable Language Controller Upgrade

<b>BCL/Program Name:</b>	A2 Power Supply - Skagit	<b>BCL/Program Code:</b>	SCL250-A2
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2008
<b>Project ID:</b>	6376	<b>End Date:</b>	Q4/2015
<b>Location:</b>	Milepost 128 State Highway 20		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project replaces the five Ross Dam Powerhouse Programmable Logic Controllers (PLC). There is one PLC for each of the four generator units, and a fifth PLC monitoring other critical powerhouse equipment. The project improves City Light's ability to make programming enhancements commensurate with operational and regulatory needs, and assure comprehensive and correct documentation and delivers a 24VDC system that eliminates the need of LOTO (Lock-Out/Tag-Out) safety procedures. It provides redundancy which yields the ability to perform remote start-stop and other control functions of the generators.

## Ross Powerhouse - Replace Governor Oil Pumps

<b>BCL/Program Name:</b>	A2 Power Supply - Skagit	<b>BCL/Program Code:</b>	SCL250-A2
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	6377	<b>End Date:</b>	Q4/2015
<b>Location:</b>	Milepost 128 State Highway 20		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project replaces the governor oil pump systems on all four Ross Powerhouse generator units. The original pump systems are over 50 years old. They are worn and inefficient. Failures have already caused forced outages. Spare parts are not available. Replacement of the governor oil pump systems helps ensure reliable operation for another 20-30 years.

This project re-establishes boat and barge access to the Ross Powerhouse and Dam, and Ross Lake Resort and National Parks Facilities. The project stabilizes the rock slope, re-establishes a road between Ross Powerhouse and Ross Dam, and reconstructs ramps, docks, and loading areas on Diablo Reservoir for Ross Powerhouse, Dam, and Ross Lake access.

This ongoing project modifies City Light's facilities and provides equipment to correct imminent and critical safety hazards. The project protects employees and customers from health and safety hazards, and allows SCL to meet safety and health code requirements. It lowers the risk of WA State compliance penalties and possible costs related to employee or customer injuries. The project includes upgrades and revisions to systems, equipment, and operations, properties and facilities as needed to comply with safety regulations and best practices for a safe, efficient, and secure work environment.

## Security Improvements

<b>BCL/Program Name:</b>	C5 Distribution - Distribution Other	<b>BCL/Program Code:</b>	SCL360-C5
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2005
<b>Project ID:</b>	9202	<b>End Date:</b>	Q4/2018
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This program plans, designs and implements projects, improving the physical security of City Light critical facilities in order to mitigate unauthorized access and criminal activities that could cause significant system damage, power outages, and other related disruptions to the electrical system. The project reduces the risk of sabotage, vandalism, theft, and terrorism that can result in the loss of valuable infrastructure for generation and distribution of power. The project also reduces risk of noncompliance with North American Reliability Council (NERC) 1200 Standards (adopted May 2, 2006) to improve security at critical facilities that house command and control systems. It enhances reliability of the power system in the Pacific Northwest, reduces the risk of lost revenues, and reduces the jeopardy to public safety and emergency response due to loss of lifeline services such as medical services, water and wastewater systems, communications, law enforcement, banking, transportation system, etc.

## Shoreline Substation - Transformer Replacements

<b>BCL/Program Name:</b>	C1 Distribution - Substations	<b>BCL/Program Code:</b>	SCL360-C1
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	7776	<b>End Date:</b>	Q4/2017
<b>Location:</b>	2136 N 163rd St, Shoreline		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project funds the review of three power transformers at Shoreline Substation and determines dissolved gas concentration, insulation aging, oil leaks, maintenance cost, service stress, and fault-interrupting history. The project replaces transformers with the highest failure risk, or those presenting substation capacity limits. The project enhances system reliability by replacing aging substation transformers before they fail in service.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project funds the continuation of Phases Two and Three to convert overhead distribution circuits to underground along Aurora Avenue in the City of Shoreline (Shoreline). The project enhances reliability and public relations by delivering undergrounding service to Shoreline with a coordinated and mutually agreed-upon scope, schedule, cost and rate structure, in compliance with the Shoreline Municipal Code requirement to convert to an underground systems. Per City Light's franchise agreement with Shoreline, the costs for this project are recovered through a surcharge on Shoreline rates.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project funds unforeseeable, unscheduled capital work related to Skagit Facilities. In addition, it funds scheduled, small capital projects that have cost estimates less than \$25,000. This project provides financial coverage for emergent capital projects which are, by definition, unpredictable, and which are on a first-come, first serve basis. This project shows increased project allocations in years 2015 to 2018. This increase reflects anticipated baseline CIP spending levels for the Skagit Facility that are in line with Strategic Plan assumptions. These future year allocations will be broken out into specific CIP projects for the 2014-2018 CIP.

This project upgrades oil containment systems at the Skagit project to comply with the requirements of the Clean Water Act. It provides for secondary containment for oil-filled equipment and storage containers holding greater than 54 gallons of oil. The project brings SCL into compliance with the requirements of the Clean Water Act.

This project extends radio communication to areas inside the dams where service is poor. This project will ensure that personnel can communicate immediately should there be a threat to personnel safety, a failure of mechanical or electrical equipment, or a concern about the dam structure.

This project provides security systems at Skagit camps and generating facilities. Project elements include installation of automated gates, surveillance, and an access control and detection system. This system provides the ability to control access and prevent theft and vandalism, and is a direct result of a vulnerability and threat assessment meeting involving Skagit staff, the State Patrol, and the National Park Service.

The project provides funds to add microprocessor relays to the existing system, adds certain auxiliary protective equipment, and modifies the design of the existing protection system to upgrade functionality. This project enhances generating reliability by adding protective relays to generating systems, since generator protective relaying at the Ross, Diablo, and Gorge plants do not meet present IEEE Standards. This project limits the potential for damage when surges and faults occur in transmission lines due to lightning strikes, load rejections, and other unexpected events. It enhances protection for some equipment faults, which could lead to fire or additional equipment damage, which thereby eliminates generator outages, lost revenues due to loss of generation, longer time to repair, and in some cases, personnel injury.

This project provides small size electric power service connections from Seattle City Light's distribution system to the customer's meter for power requirements of less than 50 KVA and 26 kV radial service. Most of this related work is billable to the customer. The project allows Seattle City Light to provide service to new customers in a safe, reliable, timely and cost effective manner as a means to fulfill its commitment to be a customer and community-focused organization.

This project adds capacity to meet the new power demand along the 3.15 miles of tunnel, containing two additional stations and other supporting facilities from the Convention Place Station to the University of Washington. The project funds the coordination, design, and construction work by project managers, engineers, and crews. The project allows the City of Seattle to be in compliance with several design and construction agreements between City of Seattle and Sound Transit.

<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This project will replace 1603 (or 33%) of the highest priority streetlights and related underground infrastructure identified in the Streetlight Horizon Plan over the six-year planning horizon. Streetlight infrastructure that will be replaced includes poles, fixtures, conduits, hand holes, and wiring. This project will provide the engineering resources needed to prioritize replacements, develop estimates, and manage and track construction. Emphasis will be placed on standardization of fixtures, construction materials, and construction methods. These efforts will be coordinated with loop radial underground replacement projects where possible and the utility will seek opportunities to leverage funds with other city departments and private developments. This project will also look at cost sharing with affected neighborhoods in order to fund the replacement of the streetlight system in the area.

## Streetlight LED Conversion Program

<b>BCL/Program Name:</b>	D1 External Projects - Local Jurisdictions	<b>BCL/Program Code:</b>	SCL370-D1
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2010
<b>Project ID:</b>	8441	<b>End Date:</b>	Q4/2019
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project upgrades streetlights with LED fixtures. Through 2011, 20,000 cobrahead residential fixtures have been installed. In 2012, residential conversion will take place from the southern border of City Light's service area to Brandon St. The 2013 conversion effort includes residential and minor collector arterials in Zone 2 (250 watt High Pressure Sodium replacements), from Brandon St to Denny Way. Complete conversion of the residential streetlights completion anticipated by the end of 2014. Arterial cobrahead luminaire conversion will continue through 2017. Ornamental LED conversion anticipated through 2021.

### 2013 - 2018 Adopted Capital Improvement Program

**Substation Automation**

<b>BCL/Program Name:</b>	C1 Distribution - Substations	<b>BCL/Program Code:</b>	SCL360-C1
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2011
<b>Project ID:</b>	8424	<b>End Date:</b>	Q4/2019
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project replaces and upgrades substation automation systems including Remote Terminal Units (RTU) and annunciators in each of SCL's fourteen substations, upgrading equipment at two substations annually. The project reduces the likelihood of and length of system outages due to their failure as the current equipment is wearing out and cannot be replaced in kind because the equipment is no longer manufactured. The project enhances reliability by increasing the capacity to address the needs of added substation sensors and controls, offering the computerized capabilities of new technology, supporting automation of the distribution system feeders radiating from the substations, increasing speed to meet the speed requirements of new control applications, and supporting modern demands of sophisticated asset management of expensive high-voltage equipment. The Project also enhances energy efficiency, and reduces the probability of fines from the appropriate governing body/bodies if loss of a substation due to equipment failure causes instability of the Western interconnection grid and/or loss of load.

## Substation Breaker Replacements and Reliability Additions

<b>BCL/Program Name:</b>	C1 Distribution - Substations	<b>BCL/Program Code:</b>	SCL360-C1
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2006
<b>Project ID:</b>	7779	<b>End Date:</b>	Q4/2019
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project funds the review of City Light's inventory of approximately 400 transmission and distribution voltage circuit breakers. It determines which have the greatest wear, gas or oil leaks, maintenance cost, service stress, and fault-interrupting history. It replaces those circuit breakers with the highest failure risk. This project also replaces transformer bank breakers at Union Street substation to support load growth. The project enhances system reliability by replacing aging substation circuit breakers before they fail in service.

This project adds, replaces, and upgrades substation equipment, particularly the substation electrical and control equipment. The project maintains or improves system reliability, permits compliance with high voltage and environmental regulations, and ensures safe work sites. The project allows remote control and monitoring of substation equipment from the System Control Center, which facilitates faster response time to correct system instability or outages.

### 2013 - 2018 Adopted Capital Improvement Program

**Technical Training Center Development**

**BCL/Program Name:** E3 Central Utility Projects - Fleets and Facilities      **BCL/Program Code:** SCL250-E3  
**Project Type:** New Facility      **Start Date:** Q1/2013  
**Project ID:** 9230      **End Date:** Q4/2014  
**Location:**  
**Neighborhood Plan:** Not in Neighborhood Plan      **Neighborhood Plan Matrix:**  
**Neighborhood District:**      **Urban Village:**

This project provides a new technical training facility on an approximately 7 acre vacant property on East Marginal Way South in Seattle that is owned by Seattle City Light. The training center will include an approximately 9000 square foot one-story building, which will house classrooms, training laboratories, and a computer lab, as well as office space, locker rooms and storage space. The center will also include extensive outdoor training installations, including two pole-climbing yards, underground training vaults, a tower, and other electrical distribution-oriented training equipment. Also included will be a large open paved area for CDL driving training and crane safety training. The Technical training center will allow Seattle City Light to consolidate the delivery of all apprenticeship training, journey-level skills enhancement training, field and online safety training, Commercial Drivers License training and other technical training activities.

## Transformer and Network Load Management Tools Upgrade

<b>BCL/Program Name:</b>	C5 Distribution - Distribution Other	<b>BCL/Program Code:</b>	SCL360-C5
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2011
<b>Project ID:</b>	9952	<b>End Date:</b>	Q4/2014
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project replaces and upgrades the Transformer and Network Load Management systems and Load Flow software. This project provides modern software capable of performing more robust and accurate system analysis which allows more effective management of distribution system assets for a lower overall cost. The Outage Management System requires this customer to system connectivity information to efficiently locate and manage outages. The project reduces the possibility of costly unplanned outages due to the inability to perform effective design, reduces the possible duration of those outages, and provides the load data required to perform necessary system analysis and planning. The project ensures that SCL can meet the expectations of fully utilizing our system capacity.

This project builds or replaces communications infrastructure consisting of fiber optic rings, digital microwave, telephone networks and two-way radio systems. This project provides City Light with command and control capabilities for the operation of the electrical system. This project ensures the safe, reliable and efficient operation of the system and positions SCL to meet the Federal Energy Regulatory Commission's vital communications systems requirements.

This project provides electrical lines from substations to customers' property lines. This project builds new and replaces old underground line segments and may replace rotten and damaged poles in the distribution system that have underground facilities beneath them. This work is driven by specific customer projects and is for their direct benefit. City Light is reimbursed by the customers for this work. This project enhances distribution system capacity and maintains reliability so that City Light has sufficient capacity to serve its customers.

### 2013 - 2018 Adopted Capital Improvement Program

# Seattle City Light

## Underground Outage Replacements

<b>BCL/Program Name:</b>	C4 Distribution - Service Connections	<b>BCL/Program Code:</b>	SCL370-C4
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	8352	<b>End Date:</b>	Q4/2019
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project supports the capitalized portion of work resulting from unplanned, non-emergency, underground outages. These outages result from events, such as storms, accidents, and equipment failures. The project funds permanent storm repairs, and construction of new infrastructure to bypass failing equipment. The project ensures that customers' electric power is restored as quickly as possible.

### 2013 - 2018 Adopted Capital Improvement Program

**Underground System Capacity Additions**

<b>BCL/Program Name:</b>	C3 Distribution - Radial	<b>BCL/Program Code:</b>	SCL360-C3
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	8361	<b>End Date:</b>	Q4/2019
<b>Location:</b>	System Wide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project provides electrical lines from substations to customers' property lines. This project builds new and replaces old underground lines and may replace rotten and damaged poles in the distribution system with underground facilities beneath them. City Light customers pay for a portion of this work. This project adds capacity to the distribution system to maintain the reliability level for the existing customers on the system and accommodate the increased load from new services.

The project increases Union Street Substation network capacity. It funds a programmatic approach for comprehensive management of underground network assets serving customers in the area bounded by Yesler Street, Alaskan Way, Pike Street, 6th Avenue, Union Street, the Freeway, University Street, 3rd Avenue, and the Waterfront area from Denny to Yesler. This project provides sufficient and reliable electrical capacity for the growing power needs of City Light's customers.

This project funds a programmatic approach for comprehensive management of underground network assets serving customers in the University area. This project funds annual work required, such as feeder balancing, engineering analysis to determine system feeder assignments for new services, and replacement of cables that fail while in service. This project increases electrical capacity and reliability for University customers in response to increased customer demand. It reduces the probability of cable failures and long costly customer outages.

### 2013 - 2018 Adopted Capital Improvement Program

**SPU -  
DRAINAGE AND  
WASTEWATER**

### Overview

Seattle Public Utilities (SPU) is responsible for maintaining the network of sewer and drainage systems throughout the City of Seattle. These systems include approximately:

- 948 miles of sanitary sewers \*
- 477 miles of storm drains
- 472 miles of combined sewers \*
- 68 pump stations
- 90 permitted combined sewer overflow outfalls
- 295 storm drain outfalls
- 189 stormwater quality treatment facilities
- 145 flow control facilities
- 38 combined sewer overflow control detention tanks/pipes

\* Based on Permitted Use. In past years the statistics for Sanitary Sewers and Combined Sewers were determined based on “Probable Flow”, which is a designation used by GIS and engineers for planning purposes and is not a precise classification used for issuing permits. “Permitted Use” is a better measure for statistical data and more accurate because this classification is used by the Department of Planning and Development (DPD) for issuing connection permits.

The Drainage and Wastewater (DWF) CIP is the vehicle for rehabilitating, replacing, improving and expanding this infrastructure, as well as constructing projects that protect, conserve, and enhance our region’s environmental resources. Planned spending in the DWF CIP is approximately \$525 million over the next six years.

Historically, the DWF CIP has been funded primarily by revenue bonds serviced by ratepayers. However, DWF financial policies adopted in 2003 gradually increase cash contributions from the Utility to fund the CIP. By 2007, 25% of total CIP costs were funded by a cash contribution, with the remaining capital needs being debt financed. Overhead costs for the CIP are budgeted in the SPU operating fund and are reimbursed as CIP expenditures are incurred. DWF rates are currently being reviewed by Council for the three-year period of 2013-2015.

### 2013-2018 CIP

The Drainage and Wastewater CIP addresses the challenge of managing large priority projects while still accomplishing Mayoral priorities and complying with U.S. Environmental Protection Agency (EPA) and Washington State Department of Ecology (DOE) National Pollutant Discharge Elimination System (NPDES) permits - all within the financial limitations of the fund.

The City of Seattle negotiated a consent decree this year between the City, the EPA, and the DOE for compliance with the Clean Water Act and state regulations. This requirement will drive spending in the Combined Sewer Overflows (CSO) Reduction Program over the next several years. Additionally, an NPDES permit for stormwater, granted by the State government in 2007, introduced more prescriptive requirements to help protect local waterways and Puget Sound from damaging pollutants and excessive runoff. This increasing regulatory emphasis on protecting and improving water quality has resulted in the need for the City of Seattle to make substantial investments in detention, treatment, CSO retrofits and reductions, and Green Stormwater Infrastructure (GSI).

Detention is the storage of stormwater during a rainfall event and can be accomplished through detention ponds, underground tanks or through infiltration into the ground. Detention can be added to the drainage system to offset the impacts of larger storms that overwhelm the conveyance capacity of the combined

## SPU – Drainage and Wastewater

sewer system and can result in backups of sewage, localized flooding and releases of untreated sewage. Treatment is the removal of pollutants and can be accomplished through infiltration or the use of technology such as specialized media filters. CSO reductions are focused on optimizing the existing collection system using low-cost retrofits and constructing large underground storage facilities to reduce overflows to waterways. GSI is the use of green solutions to help reduce overflows by allowing stormwater to infiltrate slowly into the ground and cutting the volume of stormwater entering the system. GSI includes specific treatments that rely on specialized soils and plants that provide flow control and/or water quality benefits. The use of GSI is required through Seattle's NPDES permit and Stormwater Code.

CIP funding is also needed to improve the existing drainage system so that residents experience less flooding and fewer sewage backups. Sewer backups are prohibited and considered by regulators to be a violation of our federal permits. Prudent investment in capital projects and maintenance moves SPU closer to meeting this standard, and this performance level benefits ratepayers by avoiding costly fines and damages.

The Combined Sewer Overflow (CSO) Reduction Program constitutes one of the major investments and challenges for the Drainage and Wastewater Fund in upcoming years. During heavy rains, the combination of stormwater (about 90 percent of the volume) and sewage may exceed the capacity of the combined sewer system and overflow into local waterways, causing a combined sewer overflow. CSOs spill a mixture of raw sewage and stormwater into local waterways at 90 outfalls throughout the City of Seattle. These spills violate water quality standards, create unacceptable risk to public health, contaminate sediment and habitat for endangered species and pollute Puget Sound. CSO spills are illegal and unacceptable under any standard of environmental care.

While annual overflows have been reduced from 30 billion gallons per year in 1970 to less than 100 million gallons per year today, SPU is still not meeting regulatory mandates which limit overflows to one overflow per outfall location per year. SPU is required by state and federal law to achieve control of CSOs by 2025 through a Long Term Control Plan to be completed by 2015. SPU must also achieve significant permit milestones for the control of CSOs to Lake Washington by December 30, 2015. Most recently, the U.S. Department of Justice on behalf of the U.S. Environmental Protection Agency and the Washington State Department of Ecology finalized a consent decree describing measures U.S. Justice will require of SPU to remedy violations of the Clean Water Act. The consent decree includes, among other significant requirements, completion of a Long Term Control Plan by 2015 and control of all CSOs by 2025. Continuing investments in CSO control will enable SPU to meet these permit requirements.

SPU is expected to spend approximately \$215 million over the next six years (2013-2018) on CSO reduction projects. The projects will include a combination of underground storage tanks, GSI, system retrofits, and the development of a long-range plan for CSO projects to be constructed from 2016-2025. One of the biggest challenges of the program is siting wastewater facilities in a dense urban environment. SPU is addressing that challenge through an early and active community/stakeholder involvement process on each of its projects. SPU must also maintain an active partnership with King County to operate the wastewater system and plan for potential joint CSO reduction projects.

The Drainage and Wastewater CIP must also ensure basic service level programs, such as flooding and system capacity, are not stripped of funding as regulatory requirements continue to grow. The separated drainage and wastewater system is at capacity during storm events at various locations across the City. The impacts can range from very serious (basement sewer back-ups) to nuisance (limited street or yard flooding) issues. SPU is moving forward to address the highest priority locations with capital improvements using available funding and staff resources. These highest priority projects include the

## SPU – Drainage and Wastewater

South Park Pump Station project, the Thornton Confluence Improvement project, and Broadview Sewer and Stormwater Improvements project.

- The South Park Pump Station project will construct a pump station and water quality facility in South Park. The pump station will allow the existing storm drain trunk to meet the level of service adopted in the 2004 Comprehensive Drainage Plan. In turn, this allows for future projects to expand the collection system to address flooding complaints. The water quality facility will treat most stormwater flows from the basin, reducing pollutant loading to the Duwamish River.
- The Thornton Confluence Improvement project will replace the road culvert at 35<sup>th</sup> Ave NE and restore the floodplain area at the confluence of the north and south forks of Thornton Creek. This will reduce local flooding impacts to roads and private property as well as enhance in stream and riparian habitat in a critical segment of the creek.
- The Broadview neighborhood has experienced a long history of capacity-related backups and overflows. The Broadview Sewer and Stormwater Improvements project will test non-traditional solutions to these longstanding issues, with a goal of reducing sewer backups and stormwater flooding in the Broadview basin.

### CIP Revenue Sources

SPU's Drainage and Wastewater CIP is funded largely by drainage and sewer ratepayers. SPU issues bonds serviced by ratepayers that cover approximately 75% of the CIP, with the remainder funded by cash. SPU also actively seeks grants and low interest loans. Recently awarded grants include two low-interest loans from the Washington State Department of Ecology's (DOE) Water Pollution Control Revolving Fund. These loans will help fund construction of the Capitol Hill Water Quality project and South Park Pump Station project. These loans are set at a lower interest rate than what SPU can borrow or issue debt and offset the need to draw down extra dollars from SPU's construction fund.

DWF rates were adopted by Council in 2012 for the three-year period of 2013-2015.

### Thematic Priorities and Project Selection

Many Drainage and Wastewater CIP projects are outlined in the Wastewater System Plan, the Combined Sewer Overflow Reduction Plan, and the Comprehensive Drainage Plan. SPU staff consider three main criteria when prioritizing work: public health and safety (for example, safety from flooding during storm events, such as the Madison Valley Long Term Solution and the North 107<sup>th</sup> Street and Midvale North Drainage projects); environmental protection and regulatory compliance (such as investments to comply with the NPDES CSO Permit); and, Mayor and Council priorities (such as the Venema Natural Drainage System and the Capital Hill Water Quality Facility where green stormwater infrastructure will be used to reduce stormwater impacts while contributing to meeting sustainability goals).

SPU's capital planners identify candidate CIP projects through an awareness of ongoing planning processes (e.g. comprehensive plans, program plans), external projects and opportunities, and emergencies or other unexpected events that indicate specific investments are possibly recommended. SPU's Asset Management system then provides rigorous analysis of projects, using a business case process that establishes whether a problem or opportunity is timely and important, and whether the proposed solution is superior to alternatives based on a triple bottom line analysis (economic, environmental and social) of life cycle costs and benefits – or is a “must do” project (e.g. required by regulation).

## SPU – Drainage and Wastewater

After candidate projects have been identified, SPU prioritizes its projects for inclusion in the CIP based on the following set of criteria:

- **Regulatory Mandates, Legal Agreements:** The degree to which the project is driven by Federal, state, and local laws, permit and regulatory requirements, and consent decrees; as well as by legal agreements with public and private parties. Examples of highly ranked projects in this category include the Windermere, South Genesee and South Henderson CSO projects.
- **External Drivers:** SPU’s responsiveness to, or engagement with, the projects of other departments or jurisdictions, and the specific mandates of the City Council and Mayor. Examples of highly ranked projects in this category include the Alaskan Way Viaduct and Mercer Corridor projects.
- **Infrastructure:** How a project addresses infrastructure conditions or vulnerabilities. Examples of highly ranked projects in this category include the Point Sewer Pipe Rehabilitation and Emergency Rehabilitation programs.
- **Level of Service:** The importance of the project in providing or improving services to customers. Examples of highly ranked projects in this category include the South Park Pump Station, Localized Flood Control program, Sanitary Sewer Overflow Capacity program, Point Sewer Pipe Rehabilitation, and Emergency Rehabilitation programs.
- **Other Factors:** Other important factors include high net present value or cost-effectiveness, social or environmental benefits not otherwise captured, a project already in progress or near completion, limited time opportunity, demonstration projects, community visibility, and outside funding. Examples of highly ranked projects in this category include the North 107<sup>th</sup> and Midvale Drainage project (part of the Densmore Basin Drainage Improvements program) and the Long Term Control Plan.

Every project is rated against each criterion. Criteria ratings are then considered in determining an overall project priority ranking, using expert judgment. Priority rankings for the CIP are determined by the leads for each Line of Business, with review by key internal stakeholders. The ranking scheme and criteria are the same for all Lines of Business, and are approved by the SPU Director and Asset Management Committee.

Project priority rankings are used to clarify and document which projects are most important (and why), to help determine which projects at the margin will be included or excluded (or deferred) from the CIP, and which projects should receive priority attention if a staff or financial resource constraint should arise. This process can also result in project scope changes, as more cost-effective approaches to meeting the business need are identified.

Technology	\$8,880	\$7,613	\$5,154	\$4,720	\$4,821	\$4,942	\$36,129
<b>Total</b>	<b>\$96,131</b>	<b>\$101,373</b>	<b>\$72,484</b>	<b>\$97,032</b>	<b>\$76,956</b>	<b>\$81,085</b>	<b>\$525,061</b>

**Protection of Beneficial Uses:** This program makes improvements to the City’s drainage system to reduce the harmful effects of stormwater runoff on creeks and receiving water bodies by improving water quality and protecting or enhancing creek habitat. The program includes projects to meet regulatory requirements. Funding in 2013 and 2014 will be focused on two cost effective stormwater projects: the Venema Creek Natural Drainage System project and the Capitol Hill Water Quality project. Both of these projects were cancelled in 2009 due to financial constraints, but have since been re-instated. Capital funding is also included to support the Knickerbocker Floodplain Improvement project, which was included in the 2012 2<sup>nd</sup> Quarter Supplemental.

Decreases in the **Protection of Beneficial Uses BCL** in 2013, compared to amounts adopted in 2012 in the 2012-2017 CIP, are primarily the result of the Venema Creek Natural Drainage System project. In 2012, schedule delays driven by community and design concerns shifted project construction costs from 2012-2013 to 2014-2015.

**Sediments:** The City of Seattle is named as a potentially responsible party (PRP) for the Duwamish River Superfund Site because of alleged contamination of sediments in the river from CSO and storm drain discharges. The City continues to work with the Washington State Department of Ecology, King County, and other PRPs on an assessment of contaminants and sources. The Sediments program provides funding for preliminary studies and analysis for cleanup of contaminated sediment sites in which the City is a participant, for actual cleanup of contaminated sites, for preliminary engineering for future cleanup efforts, and for liability allocation negotiations. Funding is used to develop studies and analyses required by regulatory agencies for determining the boundaries and cleanup requirements for specific action sites. The study phase of sediment remediation projects often requires multiple years before specific cleanup actions are defined. As regulatory agency cleanup requirements become clear, additional individual cleanup projects are included in subsequent CIP proposals.

Decreases in the **Sediments BCL** for 2013, compared to amounts adopted in 2012 in the 2012-2017 CIP, reflect the latest schedule and estimates based on negotiations and agreements between parties for proposed actions needed.

**Combined Sewer Overflows:** This program consists of projects that are mandated by state and federal regulations to control CSOs into the City's receiving waters. Projects include large infrastructure projects (e.g., storage structures, pipes, tunnels, wet weather treatment plants, stormwater separation, pump stations, etc.), smaller retrofits, construction of green infrastructure for CSO control, and development of regulatory required plans such as the Long-Term Control Plan. Key projects in the 2013 Budget include

## SPU – Drainage and Wastewater

the Windermere, South Genesee and South Henderson CSO projects. When completed, these projects will result in cutting CSO volumes into Lake Washington by about 14 million gallons per year, a reduction of about 60 percent from current overflows.

Compared to amounts adopted in 2012 in the 2012-2017 CIP, the **Combined Sewer Overflows BCL** is decreasing in 2013 by \$9.4 million reflecting revisions primarily due to the cash flow and schedules for the Windermere and S. Genesee CSO projects. Adjustments for Windermere are the result of delayed construction that was planned to start in April 2012; however, the project experienced permitting delays that have since been resolved. Construction contracts were signed in July 2012, and construction is starting September 2012. The result is a shift of \$7 million from 2012 based on projected spending compared to the adopted CIP amount, a \$7 million decrease compared to the endorsed amount in 2013, followed by a \$17 million increase in 2014. Overall project costs have increased 19% due to increased construction costs determined as design progressed and the project became more defined. The original estimates for S. Genesee were based on high-level planning work, and have been refined to reflect the chosen alternative.

**Rehabilitation:** This program consists of projects to rehabilitate or replace existing drainage and wastewater assets in-kind to maintain the current functionality level of the system. Projects include pump station structures, major mechanical and electrical components, and force mains; drainage and wastewater control structures and appurtenances; and pipes and culverts. Individual projects are defined by the type and method of rehabilitation and/or replacement and include emergency rehabilitation, no-dig pipe and maintenance rehabilitation, point sewer pipe rehabilitation by crews, and point sewer pipe rehabilitation by contract.

Decreases in the **Rehabilitation BCL** for 2013, compared to amounts adopted in 2012 in the 2012-2017 CIP, are driven by the Pump Station and Force Main Improvements program and the Point Sewer Pipe Rehabilitation program. Reductions of \$1.3 million in 2013 in the Pump Station and Force Main Improvements program reflect a recent CIP prioritization that cut the project portfolio to only the most critical projects during the adopted 3-year rate period. SPU will prioritize essential pump station and force main improvements that are highest risk or emergencies and make fewer replacements and upgrades. Similarly, reductions to the Point Sewer Pipe Rehabilitation program of \$2.8 million in 2013 were driven by the recent CIP prioritization process. SPU will use remaining available funds to rehabilitate those sites with the highest risk scores in addition to non-arterial, less complicated sites (e.g., emergencies at the connection, emergencies resulting from void inspections in the right-of-way, or short sections of shallow pipe).

**Flooding, Sewer Back-up, and Landslides:** This program is responsible for preventing and alleviating flooding and sewer backups in the City of Seattle, with a primary focus on the protection of public health, safety, and property. The program area is focused on planning, design, and construction of channels, pipes, roadside ditches, culverts, detention ponds, and natural drainage systems that control and/or convey storm runoff to receiving bodies. This program also involves protecting SPU drainage and wastewater infrastructure from landslides and providing drainage improvements where surface water generated from the City right-of way is contributing to landslides. Finally, this program includes the Broadview Long Term Plan, which aims to reduce sewer backups and stormwater flooding in the Broadview basin.

Decreased funding for the **Flooding, Sewer Back-up, and Landslides BCL** in 2013 compared with amounts adopted in 2012 in the 2012-2017 CIP will delay two projects. The total decrease in 2013 of \$9.6 million is the result of the CIP prioritization to cut back to only the most critical projects. Approximately \$3 million of Culvert Replacement projects was moved out of 2013, only leaving funding to finish current projects in 2013. The Localized Flood Control program was reduced in 2013 in order to focus on only the highest priority flood control projects. A decrease to 2013 Adopted compared to 2012

## SPU – Drainage and Wastewater

Adopted in the South Park Pump Station project resulted from delays related to the re-evaluation of water quality treatment technology and how it impacts and relates to the integrated plan (coordination with other CSO projects). Additionally, the decision was made to fold the Inflow/Infiltration Control program into the programmatic Sanitary Sewer Overflow (SSO) Capacity program and subsequently push funding into 2014.

**Shared Cost Projects:** This program includes individual capital improvement projects which typically benefit multiple lines of business (e.g., the Water line of business and the Drainage and Wastewater line of business) where costs are "shared," or paid for, by more than one of SPU's utility funds. In 2013, the Shared Cost program includes funding for a number of interdepartmental projects including the Alaskan Way Viaduct and Seawall Replacement, Mercer Corridor and Sound Transit University Link. Funding is also included for SPU's Heavy Equipment Purchases, the Integrated Control Monitoring Program and a number of smaller projects.

Reductions in the **Shared Cost Projects BCL** for 2013, compared to amounts adopted in 2012 in the 2012-2017 CIP, are driven by the Drainage and Wastewater Operations Relocation, the Mercer Corridor West Project and the Alaskan Way Viaduct (AWV) programs. The 2013-2018 Adopted CIP for AWV and Mercer Corridor West reflects the latest schedule and more refined cost estimates, which includes construction for the seawall and bored tunnel portals and associated utility relocation. Additionally, the Drainage and Wastewater Operations Relocation project was reduced in 2013 because the project was cancelled after an executive decision was made not to relocate the Drainage and Wastewater Operations Staff out of the Charles Street Complex due to the construction of the First Hill Streetcar maintenance shed.

**Technology:** This program category is presented in the separate "Technology CIP" section of SPU's 2013-2018 Adopted CIP. The 2013-2018 Adopted CIP increases the DWF technology CIP spending by \$1.5 million as compared to the 2012 Adopted Budget in the 2012-2017 Adopted CIP. The Drainage and Wastewater Utility's share of the overall 2013 Technology CIP increase is 36%, or \$1.5 million, based on the Drainage and Wastewater Utility's share of benefit from these projects. SPU will focus technology spending on the highest priority business needs. These include utility asset management (Maximo Upgrade/Technical Information Management), budget and financial management (Budget Planning and Forecasting, Summit Upgrade), customer contact and billing (Utility Customer Billing System/CCSS), and science and system performance (Internet-based Supervisory Control and Data Acquisition Information Management System (I-SCADA IMS) enhancements).

### **Anticipated Operating Expenses Associated with Capital Facilities Projects**

When appropriate, the projects in the Drainage and Wastewater CIP include operations and maintenance cost estimates. These estimates will be refined after project completion and will be included as part of SPU's future budget submittals. Additional stormwater and SCO facilities, both structural and green, will require growing levels of operations and maintenance support for inspection and maintenance.

### **City Council Provisos to the CIP**

There are no Council provisos.

## SPU-Drainage & Wastewater

<b>Project ID:</b>	C4118-DWF	<b>End Date:</b>	ONGOING
<b>Location:</b>	N/A		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This ongoing program provides the Drainage & Wastewater funding for Seattle Public Utilities' 1% for Arts contribution. Eligibility is determined at the individual project level, with payment occurring from this program. Funds contributed to the 1% for Art program allow the commission, purchase, and installation of art in City-owned properties that is accessible to the public. The Municipal Arts Plan, which is prepared annually, describes the status of ongoing art projects and establishes the scope of work and allocations for new art projects.

<b>Neighborhood Plan:</b>	In more than one Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This program relocates, replaces, and protects drainage and wastewater infrastructure affected by the replacement of the Alaskan Way Viaduct and Seawall. This program encompasses many sub-projects which are collectively known as the "Alaskan Way Viaduct and Seawall Replacement Program" (AWVSR Program.) The Washington State Department of Transportation (WSDOT) is the lead for the SR-99 replacement, while the City of Seattle is the lead on development of the waterfront public space, implementation of the new surface Alaskan Way, and design and construction of the seawall.

<b>Neighborhood District:</b>	In more than one District		

This ongoing program provides high priority water quality improvement projects in the Norfolk, South Park, and Densmore drainage basins. Incorporating Best Management Practices (BMP), projects are identified, developed, and implemented. The results will be improved quality of stormwater runoff from City-owned storm drains, discharged to nearby receiving water bodies such as streams and lakes.

This multi-year, multi-project program funds assessments, repairs, and improvements to SPU's drainage and wastewater utility infrastructure at sites chosen by the Seattle Department of Transportation (SDOT) for bridge improvements and pedestrian and bicycle safety improvements within its "Bridging the Gap" program. SPU assesses the condition of its utility infrastructure at SDOT's project sites and conducts repairs and improvements as needed.

### Broadview Long Term Plan

<b>BCL/Program Name:</b>	Flooding, Sewer Back-up, and Landslides	<b>BCL/Program Code:</b>	C380B
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	ONGOING
<b>Project ID:</b>	C3812	<b>End Date:</b>	ONGOING
<b>Location:</b>	Broadview		
<b>Neighborhood Plan:</b>	Broadview-Bitter Lake-Haller Lake	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	Northwest	<b>Urban Village:</b>	Not in an Urban Village

Portions of the Broadview neighborhood suffer from significant capacity limitations of the sanitary sewer resulting in numerous sewer backups into residences during wet weather events upon which the City has paid numerous claims dating to at least 1996. It is thought that this results from a combination of infiltration and inflow into the sanitary sewer system during wet weather. Program will develop and implement a plan with the goal of restoring sanitary sewer system capacity.

## SPU-Drainage & Wastewater

### Combined Sewer Overflow Facility Retrofit

<b>BCL/Program Name:</b>	Combined Sewer Overflows	<b>BCL/Program Code:</b>	C360B
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2002
<b>Project ID:</b>	C3611	<b>End Date:</b>	ONGOING
<b>Location:</b>	Various		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	Not in an Urban Village

This ongoing program retrofits, upgrades, and modifies existing Combined Sewer Overflows (CSO) reduction facilities in Seattle CSO basins. Retrofit projects cost-effectively optimize system operation and storage, mitigate the extent of CSOs, and postpone and/or downsize large CSO reduction projects. This project assists in achieving State Department of Ecology's requirement of an average of no more than one wet-weather overflow event per outfall per year. Although this is an ongoing project, no work is currently planned for 2017 or 2018.

<b>Location:</b>	Various		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program provides for the repair and replacement of stream culverts that are part of SPU's critical drainage infrastructure. Culverts will be repaired or replaced based on risks and benefits of the project, including flooding and public infrastructure risk and benefits. Replacements will be addressed as part of this capital program, while small repairs and retrofits will be covered within the Operations and Maintenance budget. Funding transfers to from the budget placeholder to culvert replacement projects once they are approved through the AMC process.

### 2013 - 2018 Adopted Capital Improvement Program

## SPU-Drainage & Wastewater

### Future CSO Projects

<b>BCL/Program Name:</b>	Combined Sewer Overflows	<b>BCL/Program Code:</b>	C360B
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2016
<b>Project ID:</b>	C3612	<b>End Date:</b>	Q4/2025
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This program is for future combined sewer overflow (CSO) reduction projects that will be identified through the CSO Long-Term Control Plan (LTCP). Future projects are most likely to include underground storage projects, wastewater lift station improvements, and/or wastewater conveyance system improvements. Planning for the projects will begin around 2014, and the projects should complete their construction by 2025.

### Green Stormwater Infrastructure Program

<b>BCL/Program Name:</b>	Combined Sewer Overflows	<b>BCL/Program Code:</b>	C360B
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q1/2011
<b>Project ID:</b>	C3610	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program provides construction of Green Stormwater Infrastructure (GSI) as a component of combined sewer overflow (CSO) reduction within the uncontrolled CSO basins. Work includes roadside raingardens, permeable pavement alleys, and the RainWise program. RainWise provides financial incentives to private property owners within our uncontrolled CSO basins for construction of properly sized and installed raingardens or cisterns. The program supports the City's current regulatory strategy for compliance with CSO National Pollutant Discharge Elimination System (NPDES) permit.

<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This ongoing program provides SPU's Drainage and Wastewater Utility crews with new and replacement heavy equipment that is used throughout Seattle. Typical purchases include vactors, backhoes, loaders, service trucks, "TV" trucks and dump trucks, as well as retrofitting existing equipment to meet SPU operational needs and initiatives. This equipment transports work crews and tools to jobsites and supports the safe and efficient replacement, repair, and maintenance of Seattle's Drainage and Wastewater system. This program is one of three SPU fund-specific heavy equipment CIP programs. No specific equipment purchases have been identified for 2017 or 2018 but once they are appropriate budget authority will be requested.

### 2013 - 2018 Adopted Capital Improvement Program

## SPU-Drainage & Wastewater

### Inflow/Infiltration Control

<b>BCL/Program Name:</b>	Flooding, Sewer Back-up, and Landslides	<b>BCL/Program Code:</b>	C380B
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2011
<b>Project ID:</b>	C3807	<b>End Date:</b>	ONGOING
<b>Location:</b>	Various		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing project reduces inflow and infiltration (I/I) to sanitary sewers from side sewers and other pipe openings. Reductions may result from inspections, repair, and/or enforcement of codes. I/I reduction improves the capacity of the existing sanitary sewer system by removing excess storm flows, thereby reducing the potential for overflows and decreasing quantities going to Metro's treatment facilities. It will be rolled into C3804 - Sanitary Sewer Overflow Cpcity starting in 2013.

<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This ongoing program funds improvements to the centralized monitoring and control of the drainage and wastewater portion of the overall Supervisory Control and Data Acquisition (SCADA) system infrastructure throughout Seattle. Infrastructure affected may include, but is not limited to, pipes related to potential combined sewer overflows, rain gauges, and wastewater pump stations. This program enhances and protects the quality and condition of lakes and streams, and addresses the Environmental Protection Agency's (EPA) National Pollutant Discharge Elimination System (NPDES) permit requirements.

### 2013 - 2018 Adopted Capital Improvement Program

## SPU-Drainage & Wastewater

### Knickerbocker Floodplain Improvements

<b>BCL/Program Name:</b>	Protection of Beneficial Uses	<b>BCL/Program Code:</b>	C333B
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q3/2012
<b>Project ID:</b>	C3383	<b>End Date:</b>	Q4/2014
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This project provides design, permits and construction of a floodplain restoration project on the south branch of Thornton Creek to contribute to reduced system-wide stream-side flooding and improve instream and riparian habitat and water quality. Project elements include stream realignment, floodplain excavation, installation of a hyporheic zone (a subsurface volume of sediment and porous space adjacent to a stream through which stream water readily exchanges), replacement of a pedestrian bridge, and riparian plantings. This project is consistent with a number of long-term plans (including the DWW Urban Watershed Strategy, 2004 Mayor's Aquatic Ecology Strategy, and 1999 Thornton Creek Watershed Action Plan) and follows the path mapped out by the Thornton Creek Confluence project which also increases floodplain area to provide stream water storage.

<b>Neighborhood District:</b>	Northwest	<b>Urban Village:</b>	Bitter Lake Village

This ongoing program provides flood control and local drainage and wastewater projects in under-served parts of Seattle to improve system capacity or increase the existing level of service. Candidate projects are identified through claims, complaints, studies, and field investigations. Drainage and Landslide Spot projects are also included within this program. The Localized Flood Control Program improves Drainage and Wastewater levels of service.

### 2013 - 2018 Adopted Capital Improvement Program

# SPU-Drainage & Wastewater

## Long Term Control Plan

<b>BCL/Program Name:</b>	Combined Sewer Overflows	<b>BCL/Program Code:</b>	C360B
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q3/2008
<b>Project ID:</b>	C3604	<b>End Date:</b>	Q4/2030
<b>Location:</b>	N/A		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This program creates a Long Term Control Plan (LTCP) in accordance with SPU's Combined Sewer Overflow (CSO) National Pollutant Discharge Elimination System (NPDES) permit and the Federal CSO Control Policy. On May 1, 2012, the Environmental Protection Agency/Department of Justice issued a draft Consent Decree to the City of Seattle which requires the development and submission of a Long-Term Control Plan for approval by May 30, 2015. It further stipulates that all CSO Control Measures are to be constructed as expeditiously as practicable, and in no event later than December 31, 2025. The Consent Decree also allows the City to propose storm water control project(s) as part of an Integrated Plan, in addition to the CSO Control Measures. If approved, the storm water projects can be constructed first and the CSO Control Measures deferred beyond the December 2025 due date.

The LTCP will reduce the number and volume of its CSO overflows, meet receiving water quality standards, and protect designated beneficial uses. The LTCP includes, flow characterization, monitoring, and hydraulic modeling; development CSO control alternatives; development of control alternatives that takes into consideration costs and performance; operational plan revisions; public participation; implementation schedule; and post-construction monitoring. The Program also includes a Programmatic SEPA EIS (Note: includes the Alaskan Way Viaduct & Seawall Program C4102). The Plan and EIS will be submitted to EPA/ Washington State Department of Ecology for approval in 2015 and will include all City of Seattle CSO basins except existing CSO Projects at Windermere, Genesee, Henderson and Central Waterfront (except as noted).

No specific work has been identified for the years 2017 and 2018 but once it is appropriate budget authority will be requested.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

The project provides for dredging of sediment in Meadowbrook Pond and modifying existing structures to improve functionality of the facility. These tasks will improve the maintenance operations and the cost efficiency and management of Meadowbrook Pond by reducing flow volume, sediments, and contaminants; capturing sediments more efficiently to improve maintenance and worker safety; improving dredging methods; developing definitive maintenance triggers; modifying structures to manage debris, improving flood control; expanding bypass capacity; and increasing water quality in the pond and downstream.

<b>Neighborhood Plan:</b>	South Lake Union	<b>Urban Village:</b>	South Lake Union
<b>Neighborhood District:</b>	Lake Union		

This program funds the repair, relocation, protection, and upgrade of drainage and wastewater infrastructure related to the redevelopment of the South Lake Union neighborhood. Program work includes, but is not limited to, flow modeling and development of green roofs. This effort identifies SPU drainage and wastewater system direct impacts, opportunities for system improvements, and cost responsibility. This program also funds planning-level coordination with other city departments on projects within the South Lake Union area.

This project provides drainage and wastewater utility improvements and relocations related to the Mercer Corridor project, West phase. The project will convert Mercer Street to a two-way street between Dexter Ave. and Elliott Ave. West. The Mercer underpass at Aurora Ave will be widened to allow for six travel lanes and a bicycle/pedestrian shared-use path between Dexter Ave and 5th Ave North. Roy Street, between Aurora and Queen Anne Ave., will also be converted to a two-way street with on-road bicycle lanes.

<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program funds replacement of existing water meters when they fail or become obsolete. Meters measuring up to two inches are replaced when they stop running. Meters measuring three inches or more are repaired when possible, but are replaced when repair costs exceed replacement costs. Accurate water meters ensure that customers are billed fairly for the water they use. Since water meters also are used to bill customers for their wastewater discharges, 48 percent of the funding is allocated to the Drainage and Wastewater line of business.

<b>Neighborhood District:</b>	In more than one District		

This ongoing project provides trenchless technology to reline wastewater pipe in Seattle. Generally, prioritized critical sewer pipe that is intact though leaking, and very near the end of its useful life, is relined by a specialized vendor. Installation of the liner extends pipe segment life for more than fifty years. No funding has been requested for the 2017-2018 time frame but once specific work is identified, additional spending authority will be requested.

## SPU-Drainage & Wastewater

### Point Sewer Pipe Rehabilitation

<b>BCL/Program Name:</b>	Rehabilitation	<b>BCL/Program Code:</b>	C370B
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2003
<b>Project ID:</b>	C3704	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Urban Village:</b>	Not in an Urban Village
<b>Neighborhood District:</b>	In more than one District		

This ongoing project provides complex point sewer rehabilitation of sewer mains that are greater than seventeen feet deep in the downtown corridor, landslide prone areas, or difficult access areas. Failed or nonfunctional sections of pipe are assessed and prioritized for rehabilitation through one or two public works contracts. This project also provides point sewer rehabilitation of sewer mains that are less than seventeen feet deep in non-arterial Seattle roadways. In these cases, failed or nonfunctional sections of pipe are assessed and prioritized for rehabilitation by Seattle Public Utilities field operation crews. Sewer trouble spots and voids are addressed while increasing the sewer main asset life and function.

The Wastewater Capacity Improvement Program is designed to enhance sanitary sewer service to Seattle customers by addressing current and projected capacity limitations of the wastewater system through structural (CIP) improvements. Such improvements may include demand management measures such as infiltration and inflow (I/I) reduction, increased conveyance capacity, and individual customer measures such as installation of backflow preventers or grinder pumps to reduce the risk that customers will experience backups of sewage into their homes and businesses during storm events.

This ongoing program provides physical integrated security system components throughout the City of Seattle. Typical improvements may include, but are not limited to, fences, gates, access control card readers, intercoms, lighting, door and hatch contacts, CCTV cameras, motion detection devices, and fiber and conduit. This program enhances protection of SPU's critical infrastructure and addresses vulnerabilities identified in U.S. Environmental Protection Agency (EPA) mandated vulnerability assessments.

This ongoing program provides for City of Seattle participation in cleanup of contaminated sediment sites at multiple locations across the city for which the City's drainage and wastewater utilities may have some liability. Typical phases of such projects include preliminary studies and analyses, preliminary engineering for actual cleanup efforts, and liability allocation negotiations. This program enhances the natural environment of Seattle and addresses both state and federal regulatory agency requirements.

<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program provides for replacement of existing sewer lines citywide with pipes of the same diameter and capacity. Closed circuit television inspections identify defects in sewer mainlines, and each mainline defect is catalogued in an SPU database and assigned a priority that reflects the urgency of repair. Replacement is done by pipe-bursting methods that avoid extended pavement cutting. No funding has been requested for the 2017-2018 time frame but once specific replacements are identified, appropriate budget authority will be requested.

### South Park Pump Station

<b>BCL/Program Name:</b>	Flooding, Sewer Back-up, and Landslides	<b>BCL/Program Code:</b>	C380B
<b>Project Type:</b>	New Facility	<b>Start Date:</b>	Q3/2008
<b>Project ID:</b>	C3806	<b>End Date:</b>	Q4/2016
<b>Location:</b>	698 S Riverside DR/Holden/Austin		
<b>Neighborhood Plan:</b>	South Park	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>	Greater Duwamish	<b>Urban Village:</b>	Duwamish

This project constructs a pump station (PS) and water quality facility (WQF) in South Park. The PS allows the existing storm drain trunk to meet the 2004 Comprehensive Drainage Plan level of service and allows future projects expanding the collection system to address flooding complaints. The WQF will treat most stormwater flows from the basin, reducing pollutant loading to the Duwamish. Flows over 11 CFS will bypass the WQF and be pumped directly to the river.

<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This program provides for a cost-effective, significant reduction in the potentially toxic pollutant load carried by stormwater runoff discharged by SPU's storm drain system to Puget Sound using new, high efficiency street sweeping technology. The Program is a partnership between Seattle Public Utilities, who sets the program direction, provides water quality expertise, and funding for the portion of routes that drain to the municipal separate storm sewer system (MS4), which discharges directly to our receiving waters and Seattle Department of Transportation, who provides operational expertise, street sweeping services, and funding for the portion of the routes that drain to the combined sewer system (CSS).

<b>Location:</b>	Thornton Creek		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project provides creek realignment, floodplain excavation, culvert replacement, and riparian plantings at the confluence of the north and south branches of Thornton Creek. SPU has acquired a number of flood prone properties in this area over the last decade. Using these properties, this project increases culvert capacity, floodplain area and flood storage, and provides stream habitat benefits. The project will help alleviate flooding and reduce maintenance at Meadowbrook Pond.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Northwest	<b>Urban Village:</b>	Not in an Urban Village

This project provides stormwater flow control and water quality treatment using a Natural Drainage System approach within the Venema Creek sub basin of Pipers Creek. Proposed design uses the concept developed for the Pinehurst Natural Drainage System project (parking on only one side of road, large bioretention swale on the other side of road). Alley improvements using permeable pavements are also being considered. The project focus is retrofitting stormwater runoff from the 105-acre residential and commercial land area in an effort to reduce the effect of stormwater flow on the aquatic biota within Venema Creek.

### 2013 - 2018 Adopted Capital Improvement Program

**SPU -  
SOLID WASTE**

### Overview

Seattle Public Utilities (SPU) is responsible for the collection and disposal of solid waste generated within the City of Seattle. To fulfill this responsibility the City owns major capital facilities, including two recycling and disposal stations, also known as transfer stations, and two household hazardous waste facilities, and a fleet of trucks and heavy equipment. In addition, the Solid Waste Capital Improvement Plan (CIP) supports post-closure projects on two landfills previously used by the City.

Funding for Solid Waste capital projects comes predominantly from rates charged to customers whose trash, recycling, and composting are handled by the City's solid waste infrastructure and services. Changes to the solid waste rates were adopted in 2012 for the period 2013-2016, and support the 2013-2018 Adopted CIP. There will also be a Solid Waste Fund bond issuance in 2013.

### 2013-2018 CIP

Planned spending in the Solid Waste Fund (SWF) CIP is \$135M over the next six years (excluding Technology). By far the largest projects over this time period are the rebuilding the North Transfer Station between 2013 and 2017, demolishing the old South Transfer Station, and constructing a recycling/re-use facility at the South Transfer Station location between 2015 and 2018. These projects comprise 63% of the total CIP. The other significant projects are the South Park Development project, funding the investigation and closure of the South Park Landfill, and the replacement of the South Household Hazardous Waste facility.

As solid waste management has evolved, the functions of the City's NRDS (North Recycling and Disposal Station) and SRDS (South Recycling and Disposal Station) expanded dramatically, yet the basic buildings and facilities did not change. Today the stations accept more than 10 categories of separated material—from garbage to wood waste to vehicle batteries. Typically, transfer facilities are designed to last for 30 years. Seattle's stations have exceeded this life-span, despite limited maintenance. Overall, they are outmoded and no longer adequately handle current volumes of materials and customers.

Built in the mid-1960s, both transfer stations have experienced close to half a century of hard industrial use that has worn out the buildings considerably and caused significant increases in ongoing maintenance of electrical and other systems. The aged stations are not designed for likely future earthquakes, are overcrowded given the size of Seattle's current population, and have limited space for recycling. The new South Transfer Station will finish construction in 2012. The new North Transfer Station will likely be substantially complete in 2016. Completing both station rebuild projects in a time of declining revenues poses a financial challenge to the utility. SPU has responded by reducing costs and positions in the 2013-2014 Adopted Budget, identifying efficiencies that allow services to be delivered more cost effectively, and pairing these with rate increases for 2013-2016 driven by the capital costs of the new transfer stations.

The schedules for the cleanup of the South Park Landfill and the redevelopment of the old transfer station as a Recycling/Re-use center in the Solid Waste CIP are dependent on the construction schedule for the North Transfer Station project. The demolition of the old South Transfer Station will not occur until the North Transfer Station is rebuilt. This will allow the old South Transfer Station to be kept open along with the new South Transfer station during the period when the North Transfer Station is closed for construction. SPU is deliberately sequencing construction in this manner to ensure that two facilities are open at all times to accommodate anticipated volumes of solid waste from residents and businesses in Seattle. Once the North Transfer Station has been rebuilt, and the new North and South Transfer Stations are both on line, the old South Recycling and Disposal Station will be demolished. Following demolition, landfill closure activities as defined by the South Park Landfill Cleanup Action Plan will be completed on the old South Transfer Station property

The remediation of the historic landfill in the South Park neighborhood poses another challenge for Solid Waste CIP planners. From the early 20th Century until the mid 1960s, a landfill was located in the South Park neighborhood near the location of the old South Transfer Station. The City previously used the site as a landfill, and SPU currently owns a portion of the site. Thus, the City is among the potentially liable parties in the cleanup of the site. The final cost allocation among parties will not be known until later in the project, and the scope of the remediation has yet to be finalized. As a consequence, total project costs and timing are difficult to accurately estimate at this time.

### CIP Revenue Sources

SPU's Solid Waste CIP is funded largely by Solid Waste ratepayers. SPU issues bonds, serviced by ratepayers, that in the current rate period cover 84% of the CIP, with the remainder funded by cash. SPU also actively seeks grants, low interest loans, and other funding sources. The Solid Waste Utility has been under financial stress since 2008 as a result of the economic downturn, which curbed the volume of waste and recyclables, and caused prices for recyclable materials to dip considerably for several months. Rate increases were adopted in 2012 for the period 2013-2016, and include increases for the average residential customer of 6.3%, or \$2.30 per month, in 2013. The rate increases are a response to declining volumes and the capital investments required to rebuild the City's two transfer stations.

### Thematic Priorities and Project Selection Criteria

The SPU Solid Waste Fund has two main priorities; managing environmental issues and regulatory requirements related to current and historic Solid Waste facilities (for example, at the former landfill sites), and protecting human health and safety (for example, incorporation of modern safety standards into the new transfer stations to the benefit of customers and employees). The Mayor's Walk Bike Ride initiative is also supported through design elements of the two transfer station projects that provide trails and public green space.

SPU's capital planners identify candidate CIP projects through an awareness of ongoing planning processes (e.g., comprehensive plans, program plans), external projects and opportunities, and emergencies or other unexpected events that indicate specific investments are possibly recommended.

SPU's Asset Management system then provides rigorous analysis of projects, by using a business case process that establishes whether a problem or opportunity is timely and important, and that the proposed solution is superior to alternatives based on a triple bottom line analysis (economic, environmental and social) of life cycle costs and benefits -- or is a "must do" project (e.g., required by regulation).

After candidate projects have been identified, SPU prioritizes the capital projects for inclusion in the CIP based on the following set of criteria:

- **Regulatory Mandates, Legal Agreements:** The degree to which the project is driven by Federal, State, and Local laws, permit and regulatory requirements, and consent decrees; as well as by legal agreements with public and private parties. Examples of highly ranked projects in this category include the South Park Development and Kent Highlands and Midway Landfill programs.
- **External Drivers:** SPU's responsiveness to, or engagement with, the projects of other Departments or Jurisdictions, and the specific mandates of the City Council and Mayor. Examples of projects in this category include the 1% for Arts program.

## SPU – Solid Waste

- **Infrastructure:** How a project addresses infrastructure conditions or vulnerabilities. Examples of highly ranked projects in this category include the North and South Transfer Station Rebuild projects.
- **Level of Service:** The importance of this project in providing or improving services to customers. Examples of highly ranked projects in this category include the North and South Transfer Station Rebuild projects as well as the Household Hazardous Waste Relocation project.
- **Other Factors:** Other important factors include high net present value or cost-effectiveness, social or environmental benefits not otherwise captured, a project already in progress or near completion, limited time opportunity, demonstration projects, community visibility, outside funding. An example of a project in this category is the SW Comp Plan Update project.

Every project is rated against each criterion. Criteria ratings are then considered in determining an overall project priority ranking, using expert judgment (rather than a formula). Priority rankings for the CIP are determined by the leads for each Line of Business, with review by key internal stakeholders. The ranking scheme and criteria are the same for all Lines of Business, and are approved by the SPU Director and Asset Management Committee. Project priority rankings are used to clarify and document which projects are most important and why, to help determine which projects will be included, excluded, or deferred from the CIP, and which projects should receive priority attention if a staff or financial resource constraint should arise.

### CIP Expenditures by Major Category (in '000s)

Solid Waste Fund	2013	2014	2015	2016	2017	2018	Total
New Facilities	\$8,888	\$32,077	\$35,162	\$23,012	\$20,809	\$2,177	\$122,125
Rehabilitation & Heavy Equipment	\$80	\$45	\$145	\$145	\$95	\$45	\$555
Shared Cost Projects	\$2,179	\$2,357	\$1,492	\$2,207	\$1,951	\$1,879	\$12,066
Technology	\$5,612	\$4,892	\$2,316	\$2,042	\$2,070	\$2,122	\$19,054
Total	\$16,760	\$39,370	\$39,116	\$27,407	\$24,924	\$6,222	\$153,800

The investments in the new transfer stations have caused the Solid Waste CIP to increase materially. In the seven years prior to the initiation of the transfer station rebuild projects, the core Solid Waste CIP Budget averaged \$4.7 million annually. During the years when the transfer station rebuild projects are included in the budget, planned spending in the core Solid Waste CIP averages \$22 million annually. However, once these investments are made and the transfer stations are completed, the Solid Waste CIP is expected to return to lower, historical spending levels.

**New Facilities:** This program plans, designs, and constructs new facilities to enhance solid waste operations. The key project drivers of the New Facilities budget category are the North and South Transfer Station Rebuild projects.

The adopted budget for this BCL decreases by \$2.4M in 2013 and \$13.7M in 2014 as costs shift into future years. Now that a preferred design concept has been recommended by stakeholders and approved by SPU, a design contract for the North Transfer Station (NTS) has been procured and more is known

### 2013 - 2018 Adopted Capital Improvement Program

about the likely construction schedule. This has resulted in a slight shift in construction timing from 2014 to 2015. The South Park Development Project decreased by \$506k in 2013 and \$11.6M in 2014 as a result of these NTS schedule changes.

**Rehabilitation and Heavy Equipment:** This program designs and constructs projects to repair and/or upgrade solid waste facilities. The key driver of this budget category is the Kent Highlands Landfill program. Landfill improvements include replacement of existing flares, drainage improvements, groundwater protection and water treatment as required by State environmental policy.

Most of the changes in this BCL are related to the deferral of the Kent Highlands North Pond Diversion project, which has experienced delays obtaining Department of Health approval.

**Shared Cost Projects:** This program includes individual capital improvement projects which typically benefit multiple Lines of Business (e.g. the Water line of business and the Drainage and Wastewater line of business) and whose costs are "shared," or paid for, by more than one of SPU's utility funds.

The adopted budget for this BCL decreases by \$28,000 in 2013 and increases by \$403,000 in 2014. The key driver is the SWF SCADA program, in which projected spending was delayed one year due to staff resource constraints.

**Technology:** The Technology capital portfolio is managed via six business-focused program areas, which provide an enterprise-wide view of technology investments in the context of SPU's strategic, business, and City-wide priorities. These areas are: Customer Contact and Billing, Enterprise Information Management, IT Infrastructure, Project Delivery & Performance, Science & System Performance and Asset Information Management. Programmatic investments in 2013 and 2014 were prioritized within the context of SPU's key initiatives for information technology projects, which focus on improving internal controls, improving productivity and performance, improving customer service, transitioning from data rich to knowledge rich environment, and improving project delivery.

The 2013-2018 Adopted CIP increases Technology CIP spending for all utility funds by \$4.29 million in 2013 and decreases it by \$261,000 in 2014 compared to the 2012-2017 Adopted CIP. The Solid Waste Utility's Technology CIP amount increased \$1.3 million in 2013 and decreased \$233,930 in 2014. These amounts are based on the Solid Waste Utility's share of benefit from these projects.

### **Anticipated Operating Expenses Associated with Capital Facilities Projects**

When appropriate, the projects in the Solid Waste CIP include operations and maintenance cost estimates. These estimates will be refined after project completion and will be included as part of SPU's future budget submittals.

### **City Council Provisos to the CIP**

There are no Council provisos.

This ongoing program provides the Solid Waste funding for Seattle Public Utilities' 1% for Arts contribution. Eligibility is determined at the individual project level, with payment occurring from this program. Funds contributed to the 1% for Art program allow the commission, purchase, and installation of art in City-owned properties that are accessible to the public. The Municipal Arts Plan, prepared annually, describes the status of ongoing art projects and establishes the scope of work and allocations for new art projects.

This ongoing program provides SPU's Solid Waste Utility crews with new and replacement heavy equipment that is used throughout Seattle and in parts of King County. Typical purchases include loaders, dozers, class 8 trucks, rail container chassis, yard waste and metal trailers, backhoes, and yard "goats" (a type of tractor.) These equipment purchases provide safe and efficient loading, transfer and short haul transportation of garbage, yard waste, metal, and other recyclables to the rail yard for "long haul" to the landfill and to contracted recycling processors. This project is one of four SPU fund-specific heavy equipment CIP projects.

<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

The current telemetry used to monitor the environmental control systems at the Kent Highlands Landfill and the Midway Landfill, both Superfund sites, are nearly obsolete and the equipment is no longer supported. In addition, the current system only transmits alarm conditions and does not have any data acquisition functionality. This program funds a replacement system that will allow remote data acquisition as well as alarm functionality.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This program funds compliance activities related to the Kent Highlands landfill closure project. These activities include environmental and feasibility studies to demonstrate the effectiveness of the Kent Highlands landfill closure project, as well as various landfill improvements. The environmental and feasibility studies are required under the existing Consent Decree with the State Department of Ecology and validate that current environmental controls are effective and reduce the likelihood of additional capital or O&M expenditures. The landfill improvements include replacement of existing flares, drainage improvements, groundwater protection and water treatment.

This program funds compliance activities related to the Midway landfill closure project. These activities include environmental and feasibility studies to demonstrate the effectiveness of the Midway landfill closure project as well as retrofits to the existing Midway flare facility. The studies are required under the existing Consent Decree with the State Department of Ecology and validate that current environmental controls are effective and reduce the likelihood of additional capital or O&M expenditures. The flare improvements are also a regulatory requirement. To ensure that SPU maintains regulatory compliance, a smaller flare or new technology will be required.

This project provides repairs to the existing City solid waste transfer stations. The existing City solid waste transfer stations were constructed in the mid-1960s and are nearing the end of their useful lives. This funding allows short term actions to ensure that these facilities operate reliably and safely, pending construction of the new North and South Transfer Stations. The work includes drainage modifications, emergency equipment rehabilitation, and temporary replacement/refurbishment of aging crew facilities.

This project provides for the replacement of the existing North Recycling and Disposal Station (NRDS) in Wallingford. The existing station was built in 1967 and is outdated and nearing the end of its useful life. The project includes the demolition of the existing transfer station and warehouse building on the adjacent property to the east. The new transfer station campus includes the tipping floor, recycling facility, educational center, new administrative building and employee facilities.

This ongoing facilities program renovates, rehabilitates, replaces existing buildings, and constructs new facilities at various locations within the city limits to address deficiencies, failures, and functional changes in the SPU Lines of Business. Typical improvements include, but are not limited to, roof replacements, exterior wall or cladding replacements, and improvements to administrative office space, crew and shop space, lighting, heating and ventilation systems, and facilities structures. These improvements increase the useful life of the facilities, preserve the value of the assets, and provide a safe working environment.

<b>Neighborhood Plan:</b>	Duwamish	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Greater Duwamish	<b>Urban Village:</b>	Duwamish

This program provides for the replacement of the existing South Recycling and Disposal Station (SRDS) in South Park. The existing solid waste transfer station was built in 1966 and is outdated and nearing the end of its useful life. The design and construction of replacement facilities is a two phase project. The first phase includes the development of a new transfer station and associated facilities adjacent to the existing facility on a 9.1 acre parcel to the northwest of the existing station. The second phase includes demolition of the existing facilities and development of new recycling and reuse facilities, a household hazardous waste facility, and other utility facilities.

This ongoing program provides applications, upgrades and data management tools in support of SPU's work and asset management programs. Several new and updated technology solutions designed to enhance the efficiency and effectiveness of drinking water, sewer, drainage, and solid waste operations are planned. These include the development of an Asset Data Register in support of performance analytics, and dispatch and emergency response systems. Other related, but as yet undetermined projects will be undertaken to further enhance safety and improve responsiveness of SPU's utility operations.

This program will provide technology solutions and business application upgrades in support of SPU's Customer Contact Center and activities carried out by the Customer Service Branch. Planned projects include, but are not limited to, a replacement of the Consolidated Customer Service System and new technology solutions for enhanced customer contact management. This program is intended to enhance customer service, customer contact, and ensure accurate Utility billing.

This program will provide integrated technology solutions in support of the management of SPU's corporate knowledge, including data, information, documents, and web content. Typical improvements may include, but are not limited to, replacement of shared file storage, new online collaboration tools, introduction of workflow, tracking & reporting applications, web content management systems, and an enterprise document management solution. This program enhances SPU's ability to retrieve, share, distribute and manage corporate information.

This ongoing program provides technology applications and application upgrades in support of improvements to project delivery and performance. Planned projects include continued development of an Enterprise Project Management System, replacement of the Engineering Support Contract Payments system, and SPU's share of costs for the City's central financial system upgrades. Future projects may include development of new Enterprise Resource Planning systems such as HR provisioning and financial reporting. This program will result in an improved ability to plan and deliver projects on schedule and within budget.

This ongoing program will provide new and improved technology applications and accompanying data management tools to support the gathering, monitoring, tracking and analysis of science and engineering information. Several planned projects include replacement of obsolete regulatory compliance tracking applications, upgrades to field monitoring equipment, and the integration of SCADA data with other data systems. This program enhances SPU's ability to control water quality and comply with environmental and health regulations.

**2013 - 2018 Adopted Capital Improvement Program**

# **SPU - WATER**

## Overview

SPU delivers an average of 120-130 million gallons of drinking water per day to more than 1.3 million people and businesses in Seattle and 22 surrounding cities and water districts. The water system infrastructure includes:

- The Cedar and South Fork Tolt supply sources
- Two wellfields
- Two primary water treatment plants
- 11 booster chlorination facilities
- 400 million gallons of treated water storage
- 30 pump stations
- Approximately 1,900 miles of transmission and distribution system pipelines
- Over 188,000 meters and service connections
- More than 21,000 distribution system valves
- About 18,000 hydrants
- Monitoring and control systems
- Various buildings and other related facilities

Planned spending in the Water Capital Improvement Program (CIP) is \$374 million over the next six years. Project work includes covering open reservoirs to ensure water purity as required by state regulations; changes to the Morse Lake Pump Plant, which will improve access to water stored in Morse Lake and help the utility respond to drought situations; water system improvements associated with construction projects in the City's streets, highways, and bridges; and, investments in the Cedar River watershed mandated by the federal government as embodied in the Habitat Conservation Plan (HCP).

The 2013-2018 Adopted CIP also includes many ongoing programs, such as improving the distribution system of water mains, valves, and pump stations. The capital program also includes investments in watershed stewardship projects, water conservation programs, vehicles, and heavy equipment. By 2018, the overall CIP will be reduced, and investments will be substantially focused on rehabilitating and replacing infrastructure for delivery of clean drinking water, with continued watershed stewardship.

Funding for Water capital projects comes predominantly from water rates charged to retail and wholesale customers in the region. Water rates were adopted in the fall of 2011 for the period 2012 through 2014. SPU is currently drafting the update of its Water System Plan, a Washington Department of Health (WDOH) regulatory requirement due every six years. The plan is expected to be finalized and approved by WDOH by April 2013.

## 2013-2018 CIP

Three important trends have converged to put financial pressure on the Water Fund and shape this CIP.

The first is conservation. The City of Seattle and Seattle residents have worked together to reduce water consumption. As a result, water consumption has declined since 1990 and is projected to further decline. In 2010, consumption was 33% below 1990 levels, despite serving a larger population. Seattle currently has some of the lowest per capita water consumption in the nation. While this accomplishment helps contribute to a sustainable future for the region, it puts financial pressure on the utility because fixed costs, including the costs of the CIP, need to be distributed across fewer units of water sold. This trend also puts pressure on SPU management and employees to deliver services as efficiently as possible.

The second major trend is the recent history of major infrastructure investments. The Water Fund is transitioning from a period of constructing large capital projects responding to regulatory requirements to a period focused on the rehabilitation of physical infrastructure. Past investments include water treatment facilities on the Tolt and Cedar Rivers, coverings for five open reservoirs in response to federal/state regulations, and investments to meet federal requirements embodied in the Cedar River Watershed HCP. These investments helped secure the supply and distribution of high-quality drinking water and provide appropriate stewardship of the watersheds consistent with federal and state requirements. The City of Seattle is now better positioned than many water utilities in the nation in terms of regulatory compliance, and residents, businesses and rate payers will benefit from these investments for years to come. The financial implications of the major generational investments will likewise continue to be felt for several budget cycles, as the utility pays off the bonds that were issued to finance past investments.

The third major trend shaping the 2013-2018 Adopted Water CIP is recent economic history. Though there are some signs of recovery in the national economy, the overall economic downturn continues to impact new development, which is the main source of CIP-related Water Fund revenue through the New Taps program. When new housing is brought on line, new services (e.g., New Taps) are required to supply those units with water. Since 2008, annual revenue from New Taps has decreased 64% and shows only the slightest signs of uptick in 2012.

The 2013-2018 time period will substantially close out the era of major projects in the Water Fund, including covering or decommissioning of the remaining three open reservoirs (consistent with City Ordinance 120899 which requires the covering of all of the City's reservoirs) and completing a new sockeye salmon fish hatchery, which is a requirement of the Cedar River Habitat Conservation Plan.

The 2013-2018 CIP includes only one remaining large project, the Morse Lake Pump Plant, and a few special mid-range programs, such as those related to transportation projects and improvements to SPU facilities. The Morse Lake Pump Plant project enables the Water Utility to reliably release water from Morse Lake into the Cedar River to maintain the supply of drinking water to the region and meet regulatory minimums for the amount of "instream flows" in the Cedar River to support aquatic habitat, wetlands, riparian vegetation, and water quality. Beyond these projects, emphasis is on asset management-based rehabilitation and replacement of distribution system infrastructure, including mains, valves, hydrants, and meters.

In the years outside of the 2013-2018 planning horizon, the overall CIP is anticipated to trend downwards, and investments will be focused on maintaining the physical infrastructure for distribution and transmission of clean drinking water, with continued watershed stewardship.

### **CIP Revenue Sources**

SPU's Water CIP is funded largely by Water ratepayers. About 71% of the Water Fund's overall revenues come from retail ratepayers, split approximately evenly between residential and commercial customers. Another 23% of the Water Fund's overall revenues come from wholesale purveyors who serve surrounding jurisdictions. The remaining 6% consists of non-rate revenue, which includes such sources as tap fees received and developer watermain reimbursements. SPU issues bonds, serviced by ratepayers, which in the current rate period cover 59% of the CIP, with the remainder funded by cash, i.e. directly by ratepayer revenue. SPU actively seeks grants, low interest loans, and other funding sources whenever possible. And, as mentioned above, SPU also receives payments from developers that are intended to offset the cost of installing new taps when they connect newly constructed buildings to the SPU water mains. These "tap fees" are a volatile revenue source, trending with the construction-related sectors of the economy.

## Thematic Priorities and Project Selection

The overarching goal of the Water CIP is to ensure that the water system is properly upgraded and expanded to reliably deliver high-quality, safe drinking water to customers, protect the environment, and comply with regulations. The primary themes driving the CIP in the next six years are asset preservation, health and human safety, environmental sustainability, and race and social justice.

SPU’s capital planners identify candidate CIP projects through an awareness of ongoing planning processes (e.g., comprehensive plans, program plans), external projects and opportunities, and emergencies or other unexpected events that indicate specific investments are possibly recommended. SPU’s Asset Management system then provides rigorous analysis of projects, by using a business case process that establishes whether a problem or opportunity is timely and important, and that the proposed solution is superior to alternatives based on a triple bottom line analysis (economic, environmental and social) of life cycle costs and benefits -- or is a “must do” project (e.g., required by regulation).

After candidate projects have been identified, SPU prioritizes the capital projects for inclusion in the CIP based on the following set of criteria:

- **Regulatory Mandates, Legal Agreements:** The degree to which the project is driven by federal, state, and local laws, permit and regulatory requirements, and consent decrees; as well as by legal agreements with public and private parties. Examples of highly ranked projects in this category include the Reservoir Covering programs and the Habitat Conservation Program.
- **External Drivers:** SPU’s responsiveness to, or engagement with, the projects of other city departments or public jurisdictions, and the specific mandates of the City Council and Mayor. Examples of highly ranked projects in this category include the Alaskan Way Viaduct and Mercer Corridor projects.
- **Infrastructure:** How a project addresses infrastructure conditions or vulnerabilities. Examples of highly ranked projects in this category include the Watermain Rehabilitation, Distribution System Improvements and Tank Improvements programs.
- **Level of Service:** The importance of this project in providing or improving services to customers. Examples of highly ranked projects in this category include the Water Infrastructure – New Taps and Service Renewals programs.
- **Other Factors:** Other important factors include social or environmental benefits not otherwise captured; is already in progress or near completion; represents a limited time opportunity; has community visibility, or has outside funding. Examples of highly ranked projects in this category include the Cedar Moraine Improvements and Riverton Heights Drainage Improvements projects.

Every project is rated against each criterion. Criteria ratings are then considered in determining an overall project priority ranking, using expert judgment. Priority rankings for the CIP are determined by the leads for each Line of Business, with review by key internal stakeholders. The ranking scheme and criteria are the same for all Lines of Business, and are approved by the SPU Director and Asset Management Committee.

Project priority rankings are used to clarify and document which projects are most important and why, to help determine which projects at the margin will be included, excluded, or deferred from the CIP, and which projects should receive priority attention if a staff or financial resource constraint should arise.

This process can also result in project scope changes, as more cost-effective approaches to meeting the business need are identified.

**CIP Expenditures by Major Category** (in ‘000s)

<b>Water Fund</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>	<b>Total</b>
Distribution	\$19,778	\$20,394	\$22,741	\$24,085	\$25,279	\$25,670	\$137,947
Transmission	\$1,703	\$3,076	\$3,137	\$3,195	\$3,253	\$3,314	\$17,678
Watershed Stewardship	\$3	\$2	\$2	\$2	\$2	\$2	\$13
Water Quality and Treatment	\$3,334	\$5,304	\$4,775	\$326	\$100	\$100	\$13,939
Water Resources	\$6,683	\$8,212	\$17,590	\$14,287	\$9,197	\$3,237	\$59,207
Habitat Conservation Program	\$2,507	\$2,491	\$2,030	\$1,927	\$2,718	\$1,262	\$12,934
Shared Cost Projects	\$15,795	\$19,403	\$18,513	\$13,418	\$16,429	\$6,560	\$90,118
Technology	\$9,174	\$8,596	\$6,355	\$5,933	\$5,965	\$6,114	\$42,137
<b>Total</b>	<b>\$58,977</b>	<b>\$67,477</b>	<b>\$75,142</b>	<b>\$63,174</b>	<b>\$62,943</b>	<b>\$46,259</b>	<b>\$373,972</b>

**Distribution:** Projects and programs in this program category relate to rehabilitation and improvements to the City's water mains and appurtenances, pump stations, and other facilities that are part of the system that distributes treated water throughout the City of Seattle to retail customers.

In total, no changes are reflected in the **Distribution BCL** as compared to the same years in the Adopted 2012-2017 CIP. However, there has been a shift from the creation of new assets to rehabilitation of existing ones. This results in a decrease in the Distribution System Improvements project in the near term and a commensurate increase in the Watermain Rehabilitation project. The total BCL amount remains unchanged.

**Transmission:** The purpose of this program category is to rehabilitate and improve the City's large transmission pipelines that bring untreated water to the treatment facilities, and convey water from the treatment facilities to Seattle and to other local utilities that purchase a portion of SPU's supply for their customers.

Reductions in the **Transmission BCL** of \$1.3 million in 2013 compared to the same year in the Adopted 2012-2017 CIP were due primarily to a shift in the timing of the business case presentation for the Cathodic Protection program, which has affected the expected construction start date for that project.

**Watershed Stewardship:** Projects and programs in this program category improve protection of SPU's sources of drinking water, provide habitat protection and restoration, sustain the environment, and enhance environmental quality, both locally and regionally. Most of the projects in this program category are located within the Cedar and Tolt River municipal watersheds. Three of these projects are being carried out in response to the Endangered Species Act's designation of the Chinook salmon as a threatened species.

The Cedar River Municipal Watershed is 90,638 acres of land owned by the City of Seattle and provides about 70% of the drinking water used by over 1.3 million people in the greater Seattle area. The City of Seattle is required by law to maintain a clean drinking water supply. To that end the City restricts public access and management is guided by a Habitat Conservation Plan. The Cedar River Watershed is an unfiltered surface water supply which produces some of the best water in the world.

The South Fork Tolt River Watershed is the smaller and lesser known but still essential second supply watershed in SPU's freshwater supply system. Located in the foothills of the Cascades in east King County, it first came on-line in 1964, and since 1989 has also supported a small Seattle City Light hydro-electric facility. The Tolt Treatment Facilities can provide up to 120 million gallons of drinking water per day.

The **Watershed Stewardship BCL** decreased \$1 million in 2013 and \$700,000 in 2014 mostly due to elimination of the Kerriston Road project, within which SPU acquired land that is now part of the Cedar River Watershed. Further land acquisitions have been cancelled as SPU believes the benefit from additional property acquisitions does not justify the costs.

**Water Quality & Treatment:** The purpose of this program category is to construct, rehabilitate or improve water treatment facilities, and cover the remaining open water reservoirs. State and federal drinking water regulations and public health protection are key drivers of investments in this program category. To comply with regulations, SPU has invested hundreds of millions of dollars in building two new treatment facilities and burying five reservoirs that contain already treated water that is distributed directly to Seattle residents and wholesale customers for drinking purposes.

The **Water Quality & Treatment BCL** decreases \$2 million in 2013 and increases \$3.8 million in 2014 due to a one-year shift in the projected timing of corrective actions that may need to be taken due to possible design issues in three of the new reservoirs and an increase in cost projections for these actions.

**Water Resources:** The purpose of this program category is to manage the City's water resources to meet anticipated demands and in-stream flow requirements – the amount of water provided to the river to support aquatic habitat, wetlands, riparian vegetation, and water quality – and to promote residential and commercial water conservation. The requirements for in-stream flows are detailed in agreements with state and federal agencies and include provisions for minimum stream flows in the Cedar and South Fork Tolt Rivers. Examples of the types of projects in this category include the Dam Safety Program and the Morse Lake Pump Plant. The Morse Lake Pump Plant is one of the last big investments contemplated in the Water CIP in this decade.

Increases in the **Water Resources BCL** of \$1.1 million in 2013 and reductions totaling \$531,000 in 2014 are a result of two factors. First, the Morse Lake Pump Plant project increases \$1.3 million in 2013 and \$2.6 million in 2014 as selection of the floating axial pump concept for the preferred solution resulted in changes to cost and schedule projections. The 2014 increase is mostly offset, however, by the second factor, which is an almost \$3 million reduction in the Water Supply Flexibility project. This reduction occurred due to delays in the development of construction plans for overflow dike rehabilitation work because of staffing constraints.

**Habitat Conservation Program:** This program category includes projects and programs directly related to implementation of the Cedar River Watershed Habitat Conservation Plan. The Habitat Conservation Plan benefits the utility and the ratepayers it serves by providing legal certainty under the Endangered Species Act for the City's continued operations within the Cedar River Watershed, which supplies 70% of the region's drinking water. The Habitat Conservation Program requires SPU to invest \$100 million over 50 years, with \$60 million in the first decade, on approximately 30 capital projects and 60 O&M activities in three areas: management of in-stream flows for people and fish, forest and land conservation activities, and mitigation for the blockage of salmon and steelhead fish as they return to the Cedar River to spawn. The Water Fund's CIP projects in this area are grouped into eight categories: road improvements and decommissioning, stream and riparian restoration, upland forest restoration, Landsburg fish passage, Cedar River sockeye hatchery, improvements to the Ballard Locks for fish passage and water

conservation, fish habitat protection and restoration in the lower Cedar River below the municipal watershed boundary, and evaluation of Cedar permanent dead storage in Chester Morse Lake.

The size of the **Habitat Conservation Program BCL** decreases over the course of the six-year CIP as major capital projects required under the Habitat Conservation Plan agreement are completed and land-acquisition commitments are satisfied. This BCL will see decreases totaling \$865,000 in 2013 and \$1.2 million in 2014, primarily for this reason.

**Shared Cost Projects:** This program includes individual capital improvement projects which typically benefit multiple lines of business (e.g. the water line of business and the drainage and wastewater line of business) and whose costs are "shared," or paid for, by more than one of SPU's utility funds. In 2012, the Water program includes funding for several transportation-driven projects (the Alaskan Way Viaduct & Seawall Replacement, First Hill Streetcar, Bridging the Gap), Heavy Equipment Purchases, and Security, Facilities and SCADA Improvements. The SCADA system is Supervisory Control and Data Acquisition program, which funds improvements to the centralized monitoring and control of the drinking water system and includes, but is not limited to, flow and pressure sensors, remote control pumps, and valves.

The **Shared Cost Projects BCL** decreases \$2.4 million in 2013 and increases \$1.7 million in 2014. The primary driver of the 2013 decrease is the Heavy Equipment Purchases project (C4116-WF). Spending projections are adjusted in the fall of every year after detailed interviews with end-users and assessments of existing equipment are conducted, and the result of the most recent assessment is that less new equipment is needed in this year. In addition, as part of an overall effort to keep Water Fund expenditures within the level assumed in rates, efforts are being made to extend the useful life of heavy equipment and to downsize wherever possible. The key driver of the 2014 increase is the Regional Facility-WF project (C4107-WF) in which design is now underway for Landsburg Facility Upgrades and schedule adjustments are being made. Total project costs remain unchanged.

**Technology:** The Technology capital portfolio is managed via six business-focused program areas, which provide an enterprise-wide view of technology investments in the context of SPU's strategic, business, and City-wide priorities. These areas are: Customer Contact and Billing, Enterprise Information Management, IT Infrastructure, Project Delivery & Performance, Science & System Performance and Asset Information Management. Programmatic investments in 2013 and 2014 were prioritized within the context of SPU's key initiatives, which focus on improving internal controls, improving productivity and performance, improving customer service, transitioning from data rich to knowledge rich environments, and improving project delivery.

This program category is presented in the separate "Technology CIP" section of SPU's 2013-2018 Adopted CIP. The 2013-2018 Adopted CIP increases Technology CIP spending for all utility funds by \$4.29 million in 2013 and decreases it by \$261,000 in 2014 as compared to the 2012-2017 Adopted CIP. The Water Utility's Technology CIP amount increased \$1.5 million in 2013 and decreased \$89,022 in 2014 when compared to the 2012-2017 Adopted CIP. These amounts are based on the Water Utility's share of benefit from these projects.

### City Council Provisos to the CIP

There are no Council provisos.

This ongoing program provides the Water funding for Seattle Public Utilities' 1% for Arts contribution. Eligibility is determined at the individual project level, with payment occurring from this program. Funds contributed to the 1% for Art program allow the commission, purchase, and installation of art in City-owned properties that are accessible to the public. The Municipal Arts Plan, prepared annually, describes the status of ongoing art projects and establishes the scope of work and allocations for new art projects.

This program relocates, replaces, and protects water infrastructure affected by the replacement of the Alaskan Way Viaduct and Seawall. This project encompasses many sub-projects which are collectively known as the “Alaskan Way Viaduct and Seawall Replacement Program” (AWVSR Program.) The Washington State Department of Transportation (WSDOT) is the lead for the SR-99 replacement, while the City of Seattle is the lead on development of the waterfront public space, implementation of the new surface Alaskan Way, and design and construction of the seawall.

This program provides improvements at the Ballard Locks to upgrade conditions for salmon. Improvements are focused on conserving the amount of freshwater needed to operate the locks to reduce the demand for freshwater from the Cedar River and increase the availability of freshwater for salmon. This program is a requirement of the Cedar River Habitat Conservation Plan (HCP.)

This multi-year, multi-project program funds assessments, repairs, and improvements to SPU's drinking water utility infrastructure at sites chosen by the Seattle Department of Transportation (SDOT) for bridge improvements and pedestrian and bicycle safety improvements within its "Bridging the Gap" program. SPU assesses the condition of its utility infrastructure at SDOT's project sites and conducts repairs and improvements as needed.

This program replaces aging bridges and related structures, such as abutments, asphalt approaches, and guardrails in the Cedar River Watershed. Projects within this program improve aging bridge assets on priority roads in the watershed transportation system to provide City employees, City contractors, and visitors with safe and adequate access to City water supply and hydroelectric assets while minimizing and reducing environmental impacts over time. Work in this program also maintains compliance with state laws, safety and environmental regulations, and tribal access agreements including Washington Department of Natural Resources (WDNR) forest practice regulations, Washington Department of Health (DOH) Watershed Protection Plan regulations, and Cedar River Habitat Conservation Plan (HCP) restoration commitments. No projects are currently planned for the 2013-2018 timeframe but as projects are identified, necessary funding will be requested.

This ongoing project enables the City to evaluate risks to protection and security of the Cedar River Municipal Watershed posed by changes in adjacent and surrounding land uses, and to respond as opportunities arise by acquiring real property. Although the City owns virtually all lands draining to the municipal water supply intake on the Cedar River, some exceptions remain along the boundary. The past decade has seen significant changes in ownership and land use of properties immediately adjoining the City's property. Although this is an ongoing project, no work is currently planned for 2013-2018.

This project installs water quality monitoring equipment throughout the drinking water distribution system and enhances SPU's drinking water quality, security, and public health surveillance system. This effort will improve Seattle's ability to detect and respond appropriately to potential drinking water contamination events as recommended by research produced by SPU and the Environmental Protection Agency (EPA) for online monitoring equipment and SPU's broader efforts to increase the security of the water system. No projects are currently planned for the 2013-2018 timeframe but as projects are identified, necessary funding will be requested.

This ongoing program maintains the safety of SPU's water supply dams in the Cedar River and South Fork Tolt River Municipal Watersheds and the in-town reservoir dams. Typical improvements may include, but are not limited to, upgrades to the dams' failure warning systems, spillways, outlet works, piping, and other civil, mechanical, and structural systems. This program ensures the continuing safe functioning, operation and monitoring of SPU's water supply dams and associated facilities per Federal Energy Regulatory Commission (FERC), state and local regulations, and SPU requirements to prevent loss of life and/or property damage and loss of SPU's ability to deliver reliable drinking water supply to its customers.

**2013 - 2018 Adopted Capital Improvement Program**

**Distribution System Improvements**

<b>BCL/Program Name:</b>	Distribution	<b>BCL/Program Code:</b>	C110B
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2003
<b>Project ID:</b>	C1128	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program improves service reliability, pressure, capacity, and fire flow in the City's water distribution system. Typical improvements may include, but are not limited to, booster pump station installation, creation of new service zones, and tank elevation or replacement, as well as additional watermain pipelines and pressure reducing valves. These improvements to service levels meet Washington Department of Health (DOH) regulations and SPU's Distribution System Pressure Policy to provide greater than 20 psi service pressure. These improvements provide higher flow of water for fire protection which improves public safety and results in smaller and shorter fires.

This ongoing project replaces line valves in the water distribution system throughout the City of Seattle that fail or are obsolete due to age or lack of replacement parts. The replacement of these gate valves extends the useful life of the watermain and restores the performance of the water distribution system. This ongoing project also adds valves within the system to enhance system performance, enhance operational control, and reduce the number of customers whose service is interrupted during a watermain shut down.

This ongoing program funds water infrastructure capital improvement projects resulting from previous and possible future storm events. Projects within this program are potentially Federal Emergency Management Agency (FEMA) reimbursable and need to be separated for tracking and reimbursement purposes. Typical improvements include, but are not limited to, repairing and improving roads, bridges, and other stream crossing structures in the City's Municipal Watersheds, as well as replacing damaged equipment, such as pumps and security gates, and stabilizing debris slide areas and stream banks.

This project plans and relocates water facilities that will be impacted by the SDOT-led First Hill Streetcar project, which will connect major employment centers on First Hill to the regional light rail system stations on Capitol Hill and in the International District. It is currently in the planning phase. No capitalizable betterments have been identified for the 2013-2018 timeframe but if they are, necessary funding will be requested. Operating funding for the project is currently proposed as part of the 2013-2014 Proposed Budget.

This ongoing program provides SPU’s Water Utility crews with new and replacement heavy equipment that is used throughout Seattle and King County. Typical purchases include backhoes, graders, loaders, dozers, service trucks, and dump trucks. This equipment transports work crews and tools to jobsites and supports the safe and efficient replacement, repair, and maintenance of infrastructure that delivers high quality drinking water to 1.5 million customers in King County. This project is one of four SPU fund-specific heavy equipment CIP projects.

This program provides research and monitoring to examine the effects of instream flows on salmon species in the Cedar River. This program monitors flow compliance, verifies accretion flows downstream of Landsburg, improves flow-switching criteria, and develops a better understanding of relationships between stream flow and aquatic habitat. This program is a requirement of the Cedar River Habitat Conservation Plan (HCP.)

This project provides water utility improvements and relocations related to the Mercer Corridor Project, West phase. Work in this project will convert Mercer Street to a two-way street between Dexter Ave and Elliott Ave West. The Mercer underpass at Aurora Ave will be widened to allow for six travel lanes and a bicycle/pedestrian shared use path between Dexter Ave and 5th Ave North. Roy Street, between Aurora and Queen Anne Ave., will also be converted to a two-way street with on-road bicycle lanes.

**Meter Replacement - WF**

<b>BCL/Program Name:</b>	Shared Cost Projects	<b>BCL/Program Code:</b>	C410B
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2004
<b>Project ID:</b>	C4101-WF	<b>End Date:</b>	ONGOING
<b>Location:</b>	Citywide		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program funds replacement of existing water meters when they fail or become obsolete. Meters measuring up to two inches are replaced when they stop running. Meters measuring three inches or more are repaired when possible, but are replaced when repair costs exceed replacement costs. Accurate water meters ensure that customers are billed fairly for the water they use. Since water meters also are used to bill customers for their wastewater discharges, 48 percent of the funding is allocated to the Drainage and Wastewater line of business.

**Morse Lake Pump Plant**

<b>BCL/Program Name:</b>	Water Resources	<b>BCL/Program Code:</b>	C150B
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2003
<b>Project ID:</b>	C1508	<b>End Date:</b>	Q4/2017
<b>Location:</b>	Cedar River Watershed		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This project includes funding to replace the existing barge-mounted pump plants at Chester Morse Lake. The pump plants at Chester Morse Lake are nearing the end of their useful lives. These pumps are designed for drought situations to access so-called "dead storage" at the lake, which is at or below the level that drains by gravity. The improvements enhance the ability to provide reliable water supply and in-stream flows in the Cedar River during drought conditions and to address requirements of the Habitat Conservation Plan. Most pre-2012 costs are deferred costs that will be amortized over ten years.

This ongoing facilities program renovates, rehabilitates, and replaces existing buildings and constructs new facilities at the Operations Control Center located at 2700 Airport Way South to improve the efficiency and effectiveness of the field crews delivering utility services to customers. Typical improvements include, but are not limited to, roof and other exterior replacements, improvements to public spaces, office and crew spaces and lighting, and heating and ventilation systems. These improvements increase the useful life of the facility, preserve the value of the asset, and provide a safe work and public space environment.

This ongoing program funds Water projects that mitigate undesirable impacts and take advantage of opportunities generated by the capital transportation projects of the Washington State Department of Transportation (WSDOT) and the Seattle Department of Transportation (SDOT) throughout the City. Work may include, but is not limited to, physically protecting the infrastructure during the transportation construction process, repairing and replacing damaged infrastructure, and improving existing infrastructure to meet higher standards. Project sites may include, but are not limited to, State Route 520, Interstate 5, and Interstate 90.

This ongoing program provides customer incentives for residential, commercial, institutional, and industrial water efficiency capital improvements. Typical examples include, but are not limited to, water efficient toilets and urinals, clothes washers, landscape irrigation devices, upgrades in industrial process water, and replacing water-cooled equipment with air-cooled versions. The program benefits both existing and future ratepayers. Water conservation provides low-cost options for meeting potential challenges from climate change, managing Seattle's drinking water resources, and customer efficiency and potential cost savings on water bills.

<b>Neighborhood District:</b>	East District		

This project will either reconstruct the 20 million gallon concrete-lined reservoir in compliance with new state and federal regulations, or remove it from service and construct a bypass pipe system around the Reservoir. SPU will be taking the reservoir offline in 2013 to evaluate the impact to the water system. Pending the outcome of the evaluation, the reservoir will either be decommissioned or buried and SPU will seek appropriations for those costs when more information is available. Permanent action is not expected to occur until after Maple Leaf Reservoir is completed and the City has had an opportunity to take the Volunteer Reservoir off-line for a period of time to observe the water system's performance without it. Thus no spending is planned between 2014 and 2016. LTD expenditures in this project are related to preliminary engineering. This effort improves water quality and the security of the drinking water system and is part of the Reservoir burying program which was adopted by Ordinance 120899 in August 2002.

This ongoing program provides water use efficiency resources to the City's low-income customers to implement water conservation measures authorized by Ordinance 120532, adopted in 2001, and supplements funding provided under SPU's Regional Water Conservation Program (C1504). Typical improvements consist of, but are not limited to, installing water-efficient fixtures, such as aerating showerheads and faucets, low water use toilets and efficient clothes washers. The program is cooperatively managed by SPU and the City's Human Services Department and requires an annual report to be provided to Council.

This ongoing program funds physical, integrated security system components on water infrastructure throughout the City. Components may include, but are not limited to, fences, gates, access control card readers, intercoms, lighting, door and hatch contacts, CCTV cameras, motion detection devices, and fiber and conduit. This program enhances protection of SPU's critical infrastructure and addresses vulnerabilities identified in U.S. Environmental Protection Agency (EPA) mandated vulnerability assessments.

This project funds improvements to water mains and appurtenances (hydrants, valves, coatings, cathodic protection, etc.) affected by the development of Sound Transit's Light Rail System. These improvements are "opportunity" projects that become available and are cost effective as Sound Transit constructs Light Rail and rebuilds the street right-of-way. This project covers Sound Transit's alignment within SPU's service area, including the South Link to SeaTac International Airport, the University Link, and the North Link towards Northgate. No specific betterments have been identified over the 2013-2018 time frame but once they are, spending authority will be requested.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This ongoing program implements water quality, seismic, and other improvements to steel water tanks in Seattle. Functional water tanks are essential to public health protection as they assure that the distribution system is under pressure at all times, even when pump stations or control valves malfunction. Depressurization of the water system may result in siphoning back contaminants from faulty private systems and from the ground into the water pipes.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Not in a Neighborhood District	<b>Urban Village:</b>	Not in an Urban Village

This program replaces aging bridges on forest roads in the Tolt River Watershed, including Chuck Judd Creek Bridge and Siwash Creek Bridge. It improves aging bridge assets in the watershed transportation system to provide City employees, City contractors, and visitors with safe and adequate access to City water supply and hydroelectric assets while minimizing and reducing environmental impacts over time. This program maintains compliance with state laws and safety and environmental regulations, including Washington Department of Natural Resources (WDNR) forest practice regulations and Washington Department of Health (DOH) Watershed Protection Plan regulations.

This program provides aquatic and riparian restoration, and funds improvements and decommissioning of the road system in the Tolt River Municipal Watershed. This program improves Tolt Watershed management practices to be consistent with the land management practices in the Cedar River Watershed, the City's other primary water supply watershed. Projects are based upon recommendations of the 2011 Tolt Watershed Management Plan. No work has been identified over the 2013-2018 time frame but once it is appropriate spending authority will be requested.

**Neighborhood District:** **Urban Village:**

This ongoing program provides funding for modifications and relocations of existing Distribution System assets resulting from third party project impacts to Distribution System infrastructure located in the right-of-way or on public property. The costs are recovered from third parties and primarily other public utilities and agencies through Memorandums of Agreement and standard charges. This program covers all Distribution System modifications and relocations that are funded by third parties excluding Water main Extension Program projects. The benefit of this program is accommodation of third party development by relocating or modifying existing Distribution System infrastructure, while retaining a Distribution System that continues to provide cost effective service to the ratepayer.

This ongoing program renews or replaces existing hydrants in the City's water distribution system. In general, hydrant renewal or replacement may occur as a result of hydrant malfunction, catastrophic failure due to vehicle damage, or to meet SPU criticality criteria such as spacing, location, cost, opportunity projects, or flow and pressure problems. This program improves access to fire hydrants for the Seattle Fire Department (SFD) and helps to reduce the damage as a result of fire by locating fire hydrants in alternate or additional locations.

This ongoing program installs new hydrants in the City's water distribution system. In general, new hydrants are installed to meet service requests made by private property owners and to comply with Washington Administrative Code (WAC) or Seattle Fire Department (SFD) requirements. This program helps to reduce the damage as a result of fire by locating new fire hydrants throughout the City's direct service area.

This ongoing program installs new drinking water services throughout the City of Seattle. This program provides new connections to existing water mains with no interruption of service to adjacent existing customers, and the installation of metered water service lines from the new tap to the new customer's property lines. This program meets City responsibility for new service connections in the Seattle Municipal Code (SMC) to provide reliable drinking water supply to customers.

This project installs water quality monitoring equipment throughout the drinking water distribution system and enhances SPU's drinking water quality, security, and public health surveillance system. This effort will improve Seattle's ability to detect and respond appropriately to potential drinking water contamination events as recommended by research produced by SPU and the Environmental Protection Agency (EPA) for online monitoring equipment and SPU's broader efforts to increase the security of the water system.

This ongoing program replaces or rehabilitates existing watermains in Seattle. Replacements occur when leaks become too frequent. Rehabilitation by lining the interior of the pipe with cement mortar restores the capacity of watermains that have degraded due to interior deposits. The benefits of this program are restored quality of the delivered water, lower use of chlorine to maintain required chlorine residual, and restored pressures.

**FINANCE  
AND  
ADMINISTRATIVE  
SERVICES**

# Finance and Administrative Services

## Overview

The Finance and Administrative Services (FAS) Capital Improvement Program (CIP) is the department's blueprint for planning, replacing, maintaining, enhancing, and upgrading FAS-owned and operated general government facilities, owned/leased community-based facilities, and the City's enterprise applications such as the financial management (Summit) and payroll/human resources information (HRIS) technology applications. These assets are used by City departments, including FAS, and by certain non-profit agencies that serve the public, to deliver critical services to Seattle residents.

FAS' general government facilities portfolio encompasses the City's core general facilities (City Hall, the Seattle Justice Center and the Seattle Municipal Tower); fleet vehicle maintenance shops; other City multi-purpose campus support facilities (Haller Lake, Charles Street, and Airport Way Center); and the City's public safety facilities, including 33 fire stations and waterfront marine operations, five police precincts, the mounted patrol facility, the harbor patrol facility, and the Seattle emergency operations and fire alarm centers. Additionally, FAS maintains core building systems for some community-based facilities that are owned by the City and leased to community groups, such as the Central Area and Greenwood Senior Centers, and community service centers, including the South Seattle Health Clinic, the Central Area Motivational Program, and the South Park Area Redevelopment Center. In total, FAS manages approximately 3.2 million square feet of building space.

## 2013-2018 CIP

In 2013, approximately \$53 million in appropriations are made to the following projects in the FAS CIP.

- **Asset Preservation** – FAS' Asset Preservation Program replaces existing systems in FAS buildings as they wear out (e.g., roofs, windows, boilers, etc.). Examples of work to be done in 2013 include replacing aged and leaking roofs, window systems, exterior cladding, and outdated electrical and mechanical equipment in the Animal Shelter, Seattle Municipal Tower, and Airport Way Center buildings A and D.
- **Fire Facilities and Emergency Response Levy Program** – This voter-approved program upgrades or replaces fire stations, and renovates the Chief Seattle fireboat. By the end of the program, all but one of the City's fire stations will have been improved. Fourteen fire stations have been replaced or upgraded, with eighteen more in progress through 2014. Major work in 2013 includes construction on twelve stations and design and permitting work on four stations. In addition, ten interim fire station projects have been completed and ten will be in design or construction through 2013.
- **ADA Upgrades** – This program addresses improvements in City facilities to achieve compliance with the Americans with Disabilities Act.
- **Customer Requested Tenant Improvements** – This program allows improvements to FAS facilities to meet tenants' operational needs. Examples include tenant space remodels, security system upgrades, material installation, and equipment replacement.
- **Maintenance Shops and Yards Facilities General** – Two new projects in 2013 will make repairs at the Charles Street Maintenance Shop. The roof will be replaced on the Materials Testing Lab and outdated piping will be replaced in building 714. Additionally, the building envelope will be replaced at Airport Way Center - Building A and a \$500,000 grant will be used to provide energy efficiency improvements.
- **Police Facilities** – This ongoing project preserves or extends the useful life or operational capacity of FAS-owned Police facilities. Projects have included heating/air conditioning replacement, structural assessments and repairs, and roof replacements. Additionally, FAS will begin work on site selection and acquisition for a new North Precinct, and repair the bulkhead and replace the heating and cooling

## 2013 - 2018 Adopted Capital Improvement Program

## Finance and Administrative Services

equipment at the Harbor Patrol facility. In 2014, the East Precinct parking garage will receive data\telecommunications upgrades that provide for uninterrupted police radio and cell phone coverage, and enhanced garage security.

- **Community Facilities** – Six City facilities are leased to community service providers in exchange for community services: Greenwood Senior Center, NW Senior Center, Central Area Senior Center (CASC), South Park Community Service Center (SPARC), Southeast Health Clinic (Public Health – Seattle & King County and Puget Sound Neighborhood Care), and Central Area Motivation Program (CAMP). Work will continue in 2013 to replace the roofs at four of the six facilities and new funding is added to replace and upgrade several HVAC, electrical, and plumbing systems in the buildings.
- **Garden of Remembrance** – This project meets the City’s obligation to fund certain capital costs for the memorial located at Benaroya Hall. This capital fund pays for major maintenance and replaces garden installations, including irrigation equipment, landscaping, electrical/lighting fixtures, and mechanical water features.
- **Information Technology** – FAS plans two major information technology projects. The Summit Upgrade/FinMAP project, which will upgrade the City’s financial management system (Summit), also includes major standardization and redesign of the City’s accounting structure. The Multi-City Tax Portal Project implements a multi-city business and occupation license and tax filing portal, allowing all businesses operating in multiple cities to register for a business license, file business taxes and make tax payments for multiple cities at one location.
- **Seattle Police Technology** – The video mobile data terminals in the Seattle Police Department vehicles will be replaced and upgraded with funding from general obligation bonds.

### Upcoming Budget Issues and Challenges

The primary CIP budget issues confronting FAS involve the age and condition of many City buildings, tenants’ diverse facility-related needs, community facilities with minimal funding, and the age and condition of technology infrastructure.

- **Asset Preservation**  
FAS’ Asset Preservation Program raises \$4 million in space rent each year for the purpose of replacing building systems in the 95 FAS-managed buildings located outside of the downtown core. Given the number and condition of the buildings, FAS prioritizes the City’s limited funding on those systems that are in such poor repair that they risk shutting down a building.
- **Expanding Needs**  
FAS facilities are used by a wide variety of different City departments, from Police and Fire, to the Seattle Department of Transportation, to Seattle Public Utilities, to the Department of Information Technology. The diverse operations of these departments regularly grow in concert with Seattle’s population, development, more restrictive regulations, and initiatives, such as the Seawall replacement project and the City’s data center infrastructure needs. As growth occurs, FAS works with its tenant departments to propose facility modernization, additions, or expansion to accommodate new operational requirements.

### CIP Revenue Sources

The Department’s 2013-2018 Adopted CIP is FAS’ plan for maintaining, renovating, expanding, and replacing its extensive inventory of buildings and technology systems. The Department’s CIP is financed by a variety of revenue sources, including the City’s General Subfund, the Cumulative Reserve Subfund (including the Unrestricted, REET I, and FAS Asset Preservation subaccounts), voter-approved levy proceeds, general obligation bonds, proceeds from property sales, and grants.

## Thematic Priorities

FAS' CIP addresses and balances the following priorities:

1) **Life/Safety Issues**

Projects intended to ensure continuity of service at facilities that provide emergency or other essential services receive top priority (e.g., replacing generators near the end of their useful lives at essential facilities, such as police or fire stations). Projects that respond to potential threats to human life and safety receive priority (e.g., upgrading aging fire sprinkler systems and water intrusion curtailment would rank high in the selection process).

2) **Investments that Create or Enhance Operational Efficiencies/Effectiveness**

FAS is responsible for a variety of assets as described above. FAS' capital investments must preserve, improve or enhance the operational capacity of these mission-critical systems and facilities.

3) **Asset Preservation**

As authorized in Ordinance 121642, FAS is granted \$4 million annually to support the replacement of existing building systems, guided by strict policies to ensure the funds are used exclusively to replace existing components, such as roofs, boilers, windows, and electrical/plumbing/structural systems when they have reached the end of their useful lives. FAS must also maintain the City's enterprise technology systems.

4) **Sustainability**

Up until now FAS' sustainability efforts have focused on meeting the City's LEED Silver requirements per Resolution 30121; the energy efficiency requirements of the new Seattle Energy Code; cost-effective opportunities to reduce energy use; and other regulatory sustainable strategies. The City is being looked upon to meet newer, higher LEED Gold and energy code sustainability goals, with strict reporting requirements on each project's results and building performance. There are also new sustainability programs, such as "20 by 20" and the "2030 Challenge," which are slated to reduce energy use and greenhouse gas emissions in order to meet sustainability goals.

5) **Race and Social Justice Initiative**

FAS integrates the City's social equity contracting requirements into all aspects of the execution of CIP projects.

6) **Federal or State Requirements**

FAS must consider state and federal requirements in assessing capital needs. For example, addressing facility improvements required by the Americans with Disabilities Act, which meet the dual goals of complying with federal requirements and providing equitable access to all. Another example is the recent revision in the Washington Administrative Code, whereby enhanced fire resistance is required for sleeping quarters in fire stations.

## Project Selection Criteria

Projects to be considered for inclusion in FAS' CIP fall into two categories: projects that create and/or enhance operational effectiveness or asset preservation projects.

## Finance and Administrative Services

Facilities-related projects that **create and/or enhance operational effectiveness** are solicited from FAS tenants on an annual basis, and then internally vetted for timeliness and appropriateness, and evaluated on their own merit. Business Technology-related projects are developed by FAS staff with input from customers and the Department of Information Technology's Enterprise Applications Board.

Facilities-related **asset preservation projects** are compiled from a rolling list of urgent and high-priority building deficiencies maintained by FAS' Facility Operations Division, and from a bi-annually updated plan of FAS' maintenance assessment efforts. FAS annually updates the priority status of facilities-related projects on lists based on maintenance efforts in the prior year and other sources, including federal or state requirements, property managers, tenants/customers and elected officials. FAS relies on the expertise of its technology, maintenance, operations, and capital development staff to review and vet the project list, keeping these criteria in mind: responsiveness to life safety concerns, continuity of essential services, preserving the long-term use of the building/technology, meeting regulatory requirements, compatibility and synergy with other planned projects, and capacity to reduce demand for routine maintenance service and generate resulting dollar savings.

When compiling the facilities project list, sustainability and resource conservation are also considered as a subset for both of these categories, as such projects result in longer useful lives of improvements, increased comfort, and reduced utility bills.

### Looking Ahead

FAS staff will continue to work with their tenants as their operational needs expand and change. Our City facilities and information technology systems must be reliable, well-maintained, and responsive to the needs of operating departments to ensure public safety and the delivery of critical services to the citizens of Seattle. Challenges include the need to address the City's data center infrastructure, the major maintenance program on the City's 23-year old, 62-story Seattle Municipal Tower, and the continued aging of our facilities and information technology systems.

### City Council Provisos to the CIP

There are no Council provisos.

## Asset Preservation - Civic Center

<b>BCL/Program Name:</b>	Asset Preservation - Civic Core	<b>BCL/Program Code:</b>	A1AP1
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q1/2005
<b>Project ID:</b>	A1AP101	<b>End Date:</b>	ONGOING
<b>Location:</b>	Multiple Downtown City facilities		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Commercial Core

This ongoing project provides for long term preservation and major maintenance to the City's Civic Center facilities: Seattle City Hall and the Justice Center. Typical improvements may include, but are not limited to energy efficiency enhancements through equipment replacement, upgrades to heating, ventilation, air conditioning, and repairs to fire suppression systems. This work ensures the long-term preservation of the operational use of the facilities.

## Charles Street Master Facilities Planning

<b>BCL/Program Name:</b>	General Government Facilities - General	<b>BCL/Program Code:</b>	A1GM1
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2012
<b>Project ID:</b>	A1GM116	<b>End Date:</b>	Q4/2013
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

The Charles Street Campus is the primary maintenance facility for City vehicles ranging from police cars and other sedans to vactor trucks and other heavy equipment. Campus buildings are occupied by SDOT, SPU, and FAS, in support of their specific operations. The 1950s vintage facilities have very inefficient envelopes, poor insulation, worn building systems and are seismically vulnerable. This project would include updating the existing Master Plan and may involve an operational study, building condition assessments and on-site test-to-fit analyses to improve existing operations.

<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This project provides for investment in more energy efficient building systems and other facility efficiency improvements. By making these investments the City expects future savings in utility and labor costs, and significant progress toward carbon neutrality. This program is intended to fund facility retrofit projects identified by energy audits conducted in 2010 (funded by the City's Energy Efficiency and Conservation Block Grant), and similar projects identified by the department. Depending on project demand and available funding, additional resources may be added in the future. Projects include but are not limited to review of the energy efficiency of a building and upgrades and/or replacement of mechanical equipment and distribution systems, electrical equipment and distribution systems, building envelopes (walls, windows, and roofs), lighting systems, plumbing equipment and distribution systems, and building controls systems.

## Fire Station 06

<b>BCL/Program Name:</b>	Neighborhood Fire Stations	<b>BCL/Program Code:</b>	A1FL1
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q2/2009
<b>Project ID:</b>	A1FL106	<b>End Date:</b>	Q4/2014
<b>Location:</b>	2615 S Jackson St		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Central	<b>Urban Village:</b>	23rd Ave. @ Jackson

This project, part of the 2003 Fire Facilities and Emergency Response Levy Program, rebuilds Fire Station 6 at a new site. The existing Fire Station 6 is a historic landmark, seismically vulnerable, and cannot feasibly be renovated to provide the space necessary to support modern firefighting equipment and emergency functions. The project protects firefighters in the event of an earthquake and allows them to provide high-quality emergency services to the Central District community.

<b>Project ID:</b>	A1FL109	<b>End Date:</b>	Q4/2014
<b>Location:</b>	3829 Linden Ave N		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Lake Union	<b>Urban Village:</b>	Fremont

This project, part of the 2003 Fire Facilities and Emergency Response Levy Program, rebuilds Fire Station 9 at its existing site. It also provides temporary quarters for firefighters while the fire station is under construction. At 50 years of age, the station building has reached the end of its useful life, and cannot feasibly be renovated to provide the space necessary to support modern firefighting equipment and emergency functions. The project protects firefighters in the event of an earthquake and allows them to provide high-quality emergency services to the Fremont community.

## Fire Station 14

<b>BCL/Program Name:</b>	Neighborhood Fire Stations	<b>BCL/Program Code:</b>	A1FL1
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q1/2007
<b>Project ID:</b>	A1FL114	<b>End Date:</b>	Q4/2014
<b>Location:</b>	3224 4th Ave S		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Greater Duwamish	<b>Urban Village:</b>	Duwamish

This project, part of the 2003 Fire Facilities and Emergency Response Levy Program, provides for a major renovation and expansion of Fire Station 14, which is a historic landmark. It also provides temporary quarters for firefighters while the fire station is under construction. The improved building will be seismically safe and accommodate modern emergency equipment and functions. The project protects firefighters in the event of an earthquake and allows them to provide high-quality emergency services to the SoDo District.

## Fire Station 25

<b>BCL/Program Name:</b>	Neighborhood Fire Stations	<b>BCL/Program Code:</b>	A1FL1
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q2/2010
<b>Project ID:</b>	A1FL125	<b>End Date:</b>	Q4/2015
<b>Location:</b>	1300 E Pine St		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	East District	<b>Urban Village:</b>	Pike/Pine

This project, part of the 2003 Fire Facilities and emergency Response Levy, provides a seismic and safety upgrade for Fire Station 25 and makes minor functional improvements to the facility. The project protects firefighters in the event of an earthquake and allows them to provide high-quality emergency services to the Capitol Hill community.

## Fire Station 28

<b>BCL/Program Name:</b>	Neighborhood Fire Stations	<b>BCL/Program Code:</b>	A1FL1
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q4/2009
<b>Project ID:</b>	A1FL128	<b>End Date:</b>	Q4/2016
<b>Location:</b>	5968 Rainier Ave S		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Southeast	<b>Urban Village:</b>	Not in an Urban Village

This project, part of the 2003 Fire Facilities and Emergency Response Levy Program, rebuilds Fire Station 28 and associated facilities on its existing site. The existing building is not seismically sound and is too small to support modern firefighting operations. The project ensures that firefighters will not be hurt in an earthquake and can continue to provide high-quality, modern emergency services to the Rainier Valley community.

## Fire Station 32

<b>BCL/Program Name:</b>	Neighborhood Fire Stations	<b>BCL/Program Code:</b>	A1FL1
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q4/2010
<b>Project ID:</b>	A1FL132	<b>End Date:</b>	Q4/2016
<b>Location:</b>	3715 SW Alaska St		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Southwest	<b>Urban Village:</b>	West Seattle Junction

This project, part of the 2003 Fire Facilities and Emergency Response Levy Program, rebuilds Fire Station 32 in a three story structure at its existing site. It also provides temporary quarters for firefighters while the fire station is under construction. The existing Fire Station 32 is seismically vulnerable, and cannot feasibly be renovated to provide the space necessary to support modern firefighting equipment and emergency functions. The project protects firefighters in the event of an earthquake and allows them to provide high-quality emergency services to the West Seattle community.

## Fire Station 40

<b>BCL/Program Name:</b>	Neighborhood Fire Stations	<b>BCL/Program Code:</b>	A1FL1
<b>Project Type:</b>	Rehabilitation or Restoration	<b>Start Date:</b>	Q2/2010
<b>Project ID:</b>	A1FL140	<b>End Date:</b>	Q4/2014
<b>Location:</b>	9401 35th Ave NE		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Northeast	<b>Urban Village:</b>	Not in an Urban Village

This project, part of the 2003 Fire Facilities and Emergency Response Levy, provides a seismic and safety upgrade for Fire Station 40 and makes minor functional improvements to the facility. The project protects firefighters in the event of an earthquake and allows them to provide high-quality emergency services to the Wedgwood community.

## Fire Station Emergency Generators

<b>BCL/Program Name:</b>	Neighborhood Fire Stations	<b>BCL/Program Code:</b>	A1FL1
<b>Project Type:</b>	Improved Facility	<b>Start Date:</b>	Q3/2007
<b>Project ID:</b>	A1FL151	<b>End Date:</b>	Q4/2013
<b>Location:</b>	Multiple Fire Station locations		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project provides funding for emergency generators at fire stations including Fire Station 8 (Queen Anne), Fire Station 11 (Highland Park), Fire Station 24 (Bitter Lake), Fire Station 34 (Madison Park), Fire Station 36 (Delridge), and Fire Station 40 (Wedgwood). The project installs generators for these fire stations in advance of the 2003 Fire Facilities and Emergency Response Levy seismic retrofit projects scheduled for these stations, where feasible, in order to improve disaster preparedness.

<b>Location:</b>	1301 3rd Ave		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Commercial Core

This ongoing project provides an annual contribution (including increases for inflation) to a capital renewal fund for the Garden of Remembrance, located next to Benaroya Hall, per an agreement with Benaroya Hall Music Center (BHMC), a private, non-profit affiliate of the Seattle Symphony. This fund pays for major maintenance and replaces garden installations including, but not limited to, irrigation equipment, landscaping, electrical/lighting fixtures, and mechanical water features. The project is managed by the BHMC and is displayed within FAS's CIP for informational purposes only.

This ongoing project preserves or extends the useful life or operational capacity and provides for improvements to FAS-owned Police facilities including, but not limited to, the East Precinct, the North Precinct, the Mounted Patrol Facility, the Harbor Patrol Facility, and the K-9 Facility. Typical work may include, but is not limited to upgrades to heating, ventilation, air conditioning upgrades, equipment replacement, siting, pre-design, test-to-fit analyses, and structural assessments and repairs. These improvements support police service by extending the operational life of old police facilities, complying with regulatory requirements, or addressing capacity problems.

### 2013 - 2018 Adopted Capital Improvement Program

# Finance and Administrative Services

## Seattle License Management System Upgrade

<b>BCL/Program Name:</b>	Information Technology	<b>BCL/Program Code:</b>	A1IT
<b>Project Type:</b>	New Investment	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	A1IT03	<b>End Date:</b>	Q4/2014
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

The Seattle License Information System (SLIM) manages the issuance and renewal of business licenses; and the collection of revenue from fees and taxes. The system was originally implemented in 1996 at a cost of \$1.2 million and was developed in-house. SLIM is outdated and can no longer adequately meet the needs of expanding business license, tax collection and enforcement processes. The City needs a revenue collection that is more user friendly, flexible, allows integration of newer technology, requires fewer manual processes and workarounds, and supports data needs, such as GIS, real-time processing and reporting capabilities. While the preference is to purchase off-the-shelf software, the City would also consider hiring an outside vendor to build a new system.

### Summit Upgrade

<b>BCL/Program Name:</b>	Information Technology	<b>BCL/Program Code:</b>	A1IT
<b>Project Type:</b>	New Investment	<b>Start Date:</b>	Q3/2013
<b>Project ID:</b>	A1IT01	<b>End Date:</b>	Q4/2015
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

Summit is the City's financial management system, used to manage Citywide general ledger, accounts payable, purchasing, asset management, labor distribution, accounts receivable, billing, project costing, and budgeting. Vendor support for the City's current version expired on December 31, 2011. Upgrading to the most current version offered by the vendor ensures vendor support through 2021.

### 2013 - 2018 Adopted Capital Improvement Program

# **INFORMATION TECHNOLOGY**

# Department of Information Technology

## Overview

The Department of Information Technology (DoIT) builds, manages and maintains the City's government information technology infrastructure – radio, data, communications, and computer networks – used by other City departments to serve constituents. DoIT also manages the Seattle Channel and the City's central data center, which houses most of the computer servers and the computing architecture that operate City department software applications. DoIT also directs the development of certain computer application projects on behalf of other City departments.

The Capital Improvement Program (CIP) supports DoIT's mission by providing for major technology upgrades, major maintenance and improvements to the City's existing networks, computing architecture and systems. This includes: enhancements and upgrades to the data and communications infrastructure; build out of fiber optic links; and upgrades and improvements to the public safety radio network, the enterprise computing system, and the television channel infrastructure.

DoIT's CIP has grown steadily over the eleven years of its existence, in line with the City's growing investment in information technology during that time period. Projects have been completed successfully on time and within budget. Close fiscal stewardship has allowed DoIT to make the most of the available CIP funds. Savings have been used to expand scope and/or complete additional efforts, and City funds have been used to leverage grant and external funding to maximum benefit.

## 2013-2018 CIP

The DoIT 2013-2018 Adopted CIP includes two new projects: (1) the Next Generation Data Center and (2) the Electronic Records Management System.

The Next Generation Data Center is a new project of paramount importance to the City. In 2012, the City identified a power transmission problem in the Seattle Municipal Tower (SMT) that directly impacted the City's primary data center, and therefore affected the business operations of all City departments. In addition, separate IT infrastructure that is housed in the SMT but managed by City Light and the Department of Transportation was also affected. Although the problem has been repaired, it underscored the need to upgrade the City's systems. The 2013- 2018 DoIT CIP includes funding to plan for the next generation data center. In 2013, the City will begin planning and designing alternatives for a new data center that will provide more capacity, redundancy and resiliency.

An engineering consultant report completed in 2012 developed preliminary options and costs for an upgraded system of data centers. The preliminary recommendation is to develop an integrated system with a new more redundant and reliable main data center, upgrade two existing City data centers to enhance redundancy and reliability, and to repurpose or decommission the remaining data centers. Preliminary estimates suggest the costs to range from \$29 million to \$49 million depending on which choices are made to meet the City's needs. The project is expected to take three years to complete. In planning for the City's future data center needs, DoIT and the Department of Finance and Administrative Services, working in conjunction with other City departments, will take a holistic look at the City's comprehensive data center needs and assess the potential of serving those needs in facilities already maintained by the City. This options analysis will determine: which systems should be housed in City facilities, which systems could be best accommodated in leased data center space, which applications may be candidates for cloud computing, and where the City needs redundancies to ensure reliable access to the City's business systems.

## Department of Information Technology

The Electronic Records Management System will be a multi-year initiative to address the City's need for a system that will manage the retention of electronic records and provide efficient search and e-delivery tools for responding to business needs, public records requests, and other legal matters. The project will begin in 2013 with the replacement of the City's current email archiving system and will be followed in future years by additional phases expanding electronic records management capabilities to other types and formats of records.

The remainder of the DoIT 2013-2018 Adopted CIP focuses on routine maintenance, replacement and upgrades for existing systems. The 2013 projects include:

- Replacement of the City's data center;
- Infrastructure maintenance in the 800 MHz radio network program;
- Upgrades to the alternate data center;
- Replacement, maintenance and upgrades of software and hardware in the City's computing services architecture environment;
- Replacement and upgrades of equipment for the Seattle Channel;
- Installation and maintenance of fiber optic cable links and spurs to various locations.

### Summary of Upcoming Budget Issues and Challenges

While DoIT's CIP Program has been highly successful overall, the nature of technology ensures that there will be ongoing new investments and requirements. Upcoming challenges for the CIP include:

- The City's growing investment in and dependency on IT requires an increasing commitment to fund associated support and replacement costs. New technologies are rapidly being developed and adopted in the general economy and constituents have expectations that government will use the same kinds of technologies that are adopted and used by private companies.
- The rapid and major changes in technology present a major challenge for the City. User demands (both internal staff and constituents) around technology continue to grow as available functionality expands exponentially. Additionally, user expectations continue to grow while resources are constrained to invest in new technologies.
- The City is part of a tri-county public safety radio system. The current technology platform is approaching phased obsolescence and will need to be replaced or upgraded. A three-county committee is exploring options for this effort, including funding strategies. The current CIP does not assume outside funding to replace or upgrade the radio system. The City's Radio Reserves, managed within DoIT's CIP, have through the recession received curtailed funding to help balance the budget. In order to ensure adequate funding for the next planned replacement of public safety radios in the 2020 timeframe, increased collections will be required if the regional funding initiative does not address this.

### Thematic Priorities

In addition to supporting Mayoral and Council goals for the City, DoIT has several thematic priorities which drive its work and consequently its operating and CIP budgets.

- **Ensure reliable maintenance and operation of the technology tools and systems supporting City Departments' staff, missions, and services.** The reliable and continued operation of these systems is critical to the ability for City employees in all departments to perform their work. As such, a majority of DoIT's CIP is expended on "Asset Preservation" and keeping these tools and systems up and operating.

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Information Technology

- **Keep City Technology and Data safe, secure and compliant.** The increasing “computerization” of the City’s information and operations has been paralleled by a similar growth in the threats and risks to those systems and in laws and regulations associated with electronic data and systems. As a result, there is a steady increase in the need for investments related to security and/or compliance with state/federal regulations/laws/requirements.
- **Use Technology to make City government more accessible/accountable/transparent.** With the rapid growth in the Internet and the associated tech-savvy nature of the population, there is an increasing expectation that the City’s information and processes will be readily available via technology in near-to-real time.
- **Improve Efficiency & Effectiveness.** From its earliest stages, the City has invested in technology to improve the efficiency and effectiveness of its staff in doing their jobs, and this continues to be a key driver for our investments. In addition, some technology investments can result in monetary savings and/or the ability to stretch limited resources further (e.g., virtualization of servers).
- **Investments/Foundations for the Future.** A key part of DoIT’s mission is to perform strategic planning for the City within the technology sector and to ensure that the City’s technology investments move in sync with what is happening in the broader industry and world. This includes planning for and investing in key technology trends and emerging technologies as appropriate.

### Project Selection Criteria

DoIT uses a multi-step process to identify and prioritize projects for inclusion in their CIP.

#### STEP 1: Identification of Technology Needs and Opportunities

In this step, needs and opportunities for technology investments are identified. Information is drawn from a number of sources, including:

- The Citywide Enterprise Technology Multi-Year Strategic Plan
- Citywide Technology Roadmaps (updated annually)
- Customer Requirements/Requests
- Asset Replacement Schedules
- Coordination with partners (regional efforts, vendor partners, etc.)

This step includes development of initial cost estimates & other resource requirements, potential timing, and dependencies.

#### STEP 2: Identification of CIP and Non-Discretionary Projects

In this step, items identified in Step 1 are filtered to determine if they are (1) CIP appropriate or not and (2) discretionary or not. Criteria for determining if they are CIP appropriate or not include:

- Overall dollar value
- Timeframe of implementation (e.g., multi-year project)
- Lifespan of investment
- Investment in/preservation of long-term infrastructure

Projects which are determined to be non-CIP in nature are moved over for consideration and ranking with other Department Budget Issue Paper Proposals as part of the normal budget cycle.

## Department of Information Technology

Criteria for determining if they are non-discretionary include:

- Legally mandated (e.g., debt service, federal or state law/regulation changes, court orders, etc.)
- Urgent security or risk mitigation needs (e.g., major system failure, major security breach)
- Reimbursable services to others (e.g., DoIT manages a regional fiber consortium where the partners contract with/through us to get work done).

Projects which are determined to be non-discretionary are automatically included in the Department's CIP and Budget Proposal. Some examples of this type of project in the 2013-2018 CIP include maintenance of existing fiber optic networks and completion of currently contracted work for fiber partners due to reimbursable contracts with regional partners.

Discretionary projects proceed to Step 3.

### **STEP 3: Prioritization of CIP Appropriate Discretionary Projects:**

The projects remaining after Step 2 are then screened to determine if they are a match for DoIT's normal maintenance/upgrade/replacement programs within the CIP. Projects such as these tend to be smaller in scale (<\$250,000), "like for like" replacements (e.g., old equipment replaced by new equipment with little to no functionality change) etc. These projects are rated by program managers based on criteria tailored to each program and implemented as annual funding allows.

Larger capital projects which are best implemented on a stand-alone basis due to the size and complexity of the project are evaluated and ranked separately based on the following criteria:

- Asset Preservation/Replacement/Maintenance
- Product Lifecycles
- Legal Requirements/Mandates
- Security/Risk Mitigation
- Reimbursable from other sources (other depts. or outside entities, grants, reserves?)
- Leveraging Opportunities
- Dependencies (on other Products, Equipment, etc.; also on staff/resource availability/long-term supportability)
- Internal Customer Demands (including capacity) – including Mayoral/Council Priority
- External Customer Demands – Citizens, businesses, etc.
- External Drivers (vendor changes, regional commitments, etc.)
- Efficiency/Effectiveness Improvements/Resource Savings/ROI
- Key Future Trend/Forward-Looking/Pro-active

The final result is a list of prioritized large capital projects which are included in DoIT's Adopted Budget for inclusion in the CIP. The major new initiative is the new project to replace the City's existing Data Center. Other examples of discretionary projects chosen for inclusion in the 2013-2018 CIP budget include telephone, Enterprise Computing, and Seattle Channel asset replacement work which were included because equipment is at the end of its viable lifecycle and needs replacing before it fails.

### **City Council Provisos to the CIP**

There are no Council provisos.

<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Commercial Core

This project funds the upgrades and replacement of software and hardware for the City of Seattle's portion of the King County Regional 800 MHz radio system. The 800 MHz radio system provides the communication infrastructure required for public safety operations such as 911, Medic One, Fire and Police.

### 2013 - 2018 Adopted Capital Improvement Program

## Department of Information Technology

### Computing Services Architecture

<b>BCL/Program Name:</b>	Technology Infrastructure	<b>BCL/Program Code:</b>	D3300
<b>Project Type:</b>	New Investment	<b>Start Date:</b>	Q1/2008
<b>Project ID:</b>	D300CSARC	<b>End Date:</b>	ONGOING
<b>Location:</b>	700 5th AVE		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Commercial Core

This project funds the regular replacement of server, data storage equipment and data center facilities operated on behalf of City departments by DoIT's computing services group. Timely replacement of this equipment provides stable infrastructure for the City. Equipment is replaced when it reaches the end of its useful life, which is typically no more than 5 years per industry standards.

This project provides funds to maintain, replace, and upgrade software and major hardware for the City's data and telephone switching systems. Updated technology and mandated manufacturer requirements often require changes to software and hardware. The selected projects focus on preventing unscheduled service disruption and system failures and also work to minimize the City's overall costs, increase reliability, and provide features that improve end-user productivity.

## Electronic Records Management System

<b>BCL/Program Name:</b>	Finance and Administration	<b>BCL/Program Code:</b>	D1100
<b>Project Type:</b>	New Investment	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	D102TC008	<b>End Date:</b>	Q4/2014
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This project is a multi-year initiative to address a citywide need for an electronic records management system that will manage the retention of electronic records in all formats, provide efficient search and delivery tools for responding to business needs, public records requests and other legal matters, and allow direct online access to records of wide public interest. The project will begin with the the replacement of the City's current email archiving system and be followed by additional phases expanding electronic records management capabilities.

## Fiber-Optic Communication Installation and Maintenance

<b>BCL/Program Name:</b>	Technology Infrastructure	<b>BCL/Program Code:</b>	D3300
<b>Project Type:</b>	New Investment	<b>Start Date:</b>	Q1/2004
<b>Project ID:</b>	FIBER	<b>End Date:</b>	ONGOING
<b>Location:</b>	Various Locations		
<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	In more than one District	<b>Urban Village:</b>	In more than one Urban Village

This project provides for the installation and maintenance of a high-speed fiber-optic communication network for the City and its external fiber partners. The fiber network includes sites such as libraries, public schools, fire and police stations, community centers, and other City facilities. The use of fiber optics in communications increases the volume of transmission - the amount of data and video, the use of two-way radios for public safety, and the number of telephone calls - that can be conveyed. A fiber-optic network also allows for interconnectivity in the event of an emergency to other agencies and executives at the federal, state and local levels, increases the efficiency of City staff, and provides residents greater access to the City and external agencies that contribute to the network.

## Next Generation Data Center

<b>BCL/Program Name:</b>	Finance and Administration	<b>BCL/Program Code:</b>	D1100
<b>Project Type:</b>	New Investment	<b>Start Date:</b>	Q1/2013
<b>Project ID:</b>	D102TC007	<b>End Date:</b>	Q4/2015
<b>Location:</b>			
<b>Neighborhood Plan:</b>	Not in Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	
<b>Neighborhood District:</b>		<b>Urban Village:</b>	

This project provides a multi-year plan to collect requirements, assess options, and develop and implement a plan to upgrade/replace the City's data center environments. The City's main data center facility is over ten years old and would require significant capital investments to address existing issues and would still not meet current standards for mission critical systems. The project will replace aging data center facility systems with more efficient environments that provide the increased resilience, maintainability, and disaster recover/business continuity to the City's information technology systems.

<b>Neighborhood Plan:</b>	Not in a Neighborhood Plan	<b>Neighborhood Plan Matrix:</b>	N/A
<b>Neighborhood District:</b>	Downtown	<b>Urban Village:</b>	Commercial Core

This project provides funds to maintain, replace, and upgrade the cablecasting and production systems for the Seattle Channel. This includes replacement of the channel's remaining analog equipment with digital ready gear and the on-going replacement of equipment that has reached the end of its useful life. The current replacement cycle will provide a new routing system, graphics generators, web interface equipment, studio control components, and equipment for coverage of council meetings. This plan will provide the Seattle Channel with an all digital, HD-ready infrastructure.

**2013 - 2018 Adopted Capital Improvement Program**

## Finance and Administrative Services

### New or Expanded Capital Facilities

Proj. ID	Project Title	Capacity	2013* Location
A1PS107	North Precinct	The North Precinct serves all of Seattle north of the ship canal. The existing facility was built for a staff of 115 and is severely undersized for its current staffing of more than 200. SPD expects that the staffing for this precinct will continue to rise to meet public safety needs in the north end. Expanding the facility beyond the existing footprint is not feasible because of environmental concerns on the existing site. SPD would prefer to keep the precinct facility as a single command to minimize command and administrative costs. Conceptual planning considers replacing the existing facility with a new 60,000 square foot facility at a different location, adding approximately 43,000 square feet of precinct space, including holding cells and locker rooms, and a parking structure.	5,000
A1PS203	One Hour Fire Separations in Fire Stations	This project will correct L&I citations at twenty six Fire Stations to meet compliance with the Washington Administrative Code requirement for providing a one-hour fire resistive assembly between the apparatus bay and all sleeping areas. The Department of L&I has notified SFD & FAS of the non-compliance and has been working with the City to develop appropriate corrective approaches. L&I's willingness to continue partnering with the City depends on the City's actions towards correcting the problem.	0

**1% for Art:** A program administered by the Office of Arts and Cultural Affairs that sets aside one percent of City capital improvement project funds for the commission, purchase, and installation of artworks.

**2000 Parks Levy (“Neighborhood Parks, Green Spaces, Trails, and Zoo Levy”):** A \$198.2 million, eight-year levy lid lift passed by Seattle voters in November 2000. The levy is designed to fund more than 100 park, open space, and recreation projects throughout the city.

**2008 Parks Levy (“Parks and Green Spaces Levy”):** A \$145.5 million, six-year levy lid lift passed by Seattle voters in November 2008. The levy is designed to fund park and green space acquisition, capital expansion and renovation of parks, and park facilities throughout the city.

**Americans with Disabilities Act (ADA):** A comprehensive civil rights law for people with disabilities, passed by the federal government in 1990.

**Allocation:** The expenditure amount planned for a particular project or service that requires additional legislative action or “appropriation” before expenditures are authorized.

**Appropriation:** A legal authorization granted by the City’s legislative authority (the City Council) to make expenditures and incur obligations for specific purposes.

**Asset Preservation (also known as Major Maintenance):** Capital improvement projects that involve major repairs or rehabilitation of existing City facilities.

**Bridging the Gap (BTG):** A nine-year transportation funding initiative to repair and improve Seattle's streets, bike trails, sidewalks, and bridges. The program raises approximately \$545 million between 2007-2015 from a commercial parking tax, an employee hours tax, and a \$365 million 9-year levy lid lift approved by voters in November 2006 for transportation maintenance and improvement. The employee hours tax was repealed at the beginning of 2010.

**Capital Improvement Program (CIP):** Annual appropriations from specific funding sources are shown in the City’s budget for certain capital purposes such as street improvements, building construction, and some types of facility maintenance. The CIP is a six-year allocation plan, presented as a document separate from the Budget, that details all projects, fund sources, and expenditure amounts, including many multi-year projects that require funding beyond the one-year period of the annual Budget.

**Capital Projects Funds:** Funds with resources set aside to acquire or construct major capital facilities that allow the monitoring of revenues and expenditures of authorized voter approved, and Councilmanic, bonds and levies.

**Community Development Block Grant (CDBG):** A U.S. Department of Housing and Urban Development annual grant to Seattle and other local governments to support economic development projects, low-income housing, and services in low-income neighborhoods.

**Comprehensive Drainage Plan:** A Citywide drainage management program for capital improvements and ongoing maintenance. It establishes a monitoring program and identifies measures to control flooding and pollution such as regulatory controls and public education.

**Cumulative Reserve Subfund (CRS):** A significant source of ongoing local funding to support capital projects in general government departments. The CRS consists of two accounts: the Capital Projects Account and the Revenue Stabilization Account. The Capital Projects Account has six subaccounts:

REET I, REET II, Unrestricted, South Lake Union Property Proceeds, Street Vacation, and Asset Preservation. The Real Estate Excise Tax (REET) is levied on all sales of real estate with the first .25% of the locally imposed tax going to REET I and the second .25% for REET II.

**Design Build Operate (DBO):** A non-conventional approach to implementation of major capital projects wherein a single vendor is responsible for design, construction, and long-term operation of a facility.

**Debt Service:** Annual principal and interest payments that local government owes on money that it has borrowed.

**Endangered Species Act (ESA):** Legislation passed by the federal government in 1973 to conserve the ecosystems upon which endangered species depend upon, and to conserve and recover listed species.

**Fire Facilities and Emergency Response Levy:** A \$167 million, eight-year levy lid lift, approved by voters on November 4, 2003. The Levy includes funds for more than 40 projects to upgrade, renovate, or replace most of the City's fire stations; construct new support facilities for the Fire Department; construct a new Emergency Operations Center and Fire Alarm Center; and procure two new fireboats and rehabilitate an existing one.

**Fund Balance:** The difference between the assets and liabilities of a particular fund. This incorporates the difference between the revenues and expenditures each year.

**General Subfund (also known as General Fund):** A central fund into which most of the City's general tax revenues and discretionary resources are pooled, which is allocated to support many of the operations of City government. General Subfund dollars appear in the CIP in two places: the General Subfund contribution to the Cumulative Reserve Subfund (if any), and appropriations to capital projects from a department's operating budget.

**Geographic Information System (GIS):** A tool that enables users to analyze and understand the spatial relationships among things that exist and occur in a given location. The results of geographic analysis can be communicated with maps, reports, or both.

**Growth Management Act (GMA):** Passed by the legislature in 1990, the Growth Management Act encourages strategic land use planning and provides protection for environmentally sensitive areas.

**Habitat Conservation Plan (HCP):** A 50-year commitment by the City and its Seattle Public Utilities to protect and restore the Cedar River Watershed.

**Leadership in Energy and Environmental Design (LEED):** A green building rating system for new and existing commercial, institutional, and multi-family residential buildings that evaluates environmental performance from a "whole building" perspective. There are four rating levels: Bronze, Silver, Gold, and Platinum.

**Levy Lid Lift:** An increase in regular property taxes for a general or designated purpose. (See 2008 Parks Levy and Bridging the Gap for examples)

**Limited Tax General Obligation ("LTGO," or "Councilmanic") Bonds:** Bonds that are issued by the City Council without voter approval. The debt service on these bonds is typically repaid from existing general government revenues or from revenues generated by the project(s) financed with the bonds.

**Major Maintenance:** See “Asset Preservation” above.

**Municipal Art Plan:** A plan prepared by the Office of Arts and Cultural Affairs that establishes budgets for new 1% for Art program projects and describes the status of existing projects.

**Neighborhood Matching Subfund (NMF):** A fund administered by the Department of Neighborhoods to provide money to Seattle neighborhood groups and organizations for neighborhood-initiated improvement, organizing, or planning projects. The community’s contribution of volunteer labor, materials, professional services or cash is “matched” by cash from the fund.

**Operating Budget:** That portion of a budget that deals with recurring expenditures such as salaries, electric bills, postage, printing, paper supplies, and gasoline.

**Public Works Trust Fund:** A low-interest state revolving loan fund designed to help local governments with the repair, replacement, and rehabilitation of public works infrastructure.

**REET I and REET II:** The Real Estate Excise Tax (REET) is levied on all sales of real estate with the first .25% of the locally imposed tax going to REET I and the second .25% for REET II.

**Unlimited Tax General Obligation (“UTGO” or “voted”) Bonds:** Bonds issued after receiving approval by 60% of the voters in an election with at least a 40% turn-out. The debt service on these bonds is repaid from additional (“excess”) property tax revenues that voters approve as part of the bond measure.
