I. Introduction

A. Name of Major Institution: Kaiser Permanente of Washington

B. Reporting Year: 2023

C. Major Institution Contact Information:

Gretchen Benzin
Executive Director, Shared Services Operations
Kaiser Permanente Washington
2715 Naches Ave. SW, Renton, WA 98057-9813
206-659-2895 gretchen.l.benzin@kp.org

D. Master Plan Adoption Date and Date of Any Subsequent Amendments: The current Major Institution Master Plan was adopted on October 31, 1988 under Group Health Cooperative. Kaiser Permanente acquired Group Health Cooperative in 2017. The MIMP is now under the name of Kaiser Permanente.

Note: For purposes of ongoing responsibilities and monitoring of the MIMP, the following substitutions are made for outdated terms and parties: "GHC" and "Kaiser Permanente" now refer to Kaiser Permanente (KP); "Seattle Engineering Department" or "SED" now refer to Seattle Department of Transportation (SDOT); and "Department of Construction and Land Use" or "DCLU" now refer to Seattle Department of Construction and Inspections (SDCI).

II. Progress in Meeting Master Plan Conditions

A. Provide a general overview of progress made in meeting the goals and conditions of the approved Master Plan:

Kaiser Permanente has not engaged in any new development identified in the approved Master Planduring the past year. Comments on the status of each condition are noted below.

In 2023, we continue to build upon our successful employee engagement programs and implement new technologies to better monitor, track and provide data informed solutions. Our financial investment in the commute incentive program continues for employees including monthly reward challenges to encourage our employees to try different modes of commuting.

In 2023, we continued on-site Commute Fairs, which had been paused during the COVID pandemic. We encouraged our staff to consider alternate modes of commuting by further expanded our commuter support program through the implementation of a First Mile Last Mile program. This aligns with our commitment to lowering SOV driver rates while providing a safe option for employees that may seek support between commuter hubs and our location.

In 2023 Kaiser Permanente held a Standing Advisory Committee meeting on November 30th. The meeting agenda included a review of the 2022 report, Kaiser Permanente's Capitol Hill operational update, construction activity and a transportation management update including an employee commute return to work plan.

B. In addition, list each condition and provide a brief narrative statement about the progress made towards compliance. This statement should include information explaining progress made (ranging from complete compliance, partial compliance to non-compliance) and strategies used (successful or unsuccessful) in meeting the condition plus, when applicable, what future measures will be pursued to reach compliance:

To date improvements through phase II of the MIMP have been implemented, along with the required conditions. No work identified as phase III of the MIMP has been initiated. See the Final Conditions information for more details.

	Final Conditions of Approval of the Master Plan	2023 Status Update
	Effective Date Condition	s
1.	The Master Plan shall be effective for a period of 10 years from the date of adoption by the City Council (October 3, 1988).	Kaiser Permanente did not pursue any amendments to the MIMP in 2023. The status stays as identified.
	UDATE: Under SMC 23.04.040, the Major Institutions Transition Rule, the development standards and TMP established in the Master Plan do not expire. The development program portion of the approved MIMP expired in 1998.	
	Boundary and Zoning Condit	tions
2.	The boundary of the KP campus shall be extended to incorporate the KP-owned six-unit apartment building at 214 16th Avenue East.	This item is complete and in compliance with no changes.
	UPDATE: The MIMP Boundary was extended in 1988, however, the land and building were sold in 2007 and is no longer owned or occupied by Kaiser Permanente. Although it remains within the MIMP boundary, the existing building is on the historical register and has been redeveloped into housing.	
3.	The proposed boundary extension to incorporate the United Methodist Church at 128 16th Avenue East is denied under the approved 1988 MIMP. KP shall be allowed to use the church's facilities for conference meeting purposes if needed.	Kaiser Permanente does not lease or occupy any portion of this building.
4.	The proposed boundary extensions to incorporate the KP-owned surface parking lots (P-11, P-12 and P-13) is denied under the approved 1988 MIMP. UPDATE: Surface lots P-11, P-12 and P-13 remain outside the MIO. Kaiser Permanente continues to own and operate the surface lots as existing non-conforming uses as allowed under the Seattle Municipal Code.	These lots are designated for use by patients, visitors, and staff. There have been no modifications to the status of these lots since the approval of the MIMP. The MIMP anticipated an additional garage on site as part of phase III, however this final phase has not been pursued so the lots are still required to meet the overall parking need on the campus for patients and visitors.
Parking and Traffic Conditions		
5.	KP shall set biennial goals for reducing the parking shortfall to zero as early as possible but no later than ten years from the date of the approval of this master plan (October 3, 1988). KP shall conduct such studies as are needed to report to the	The 2023 Commute Trip Reduction Survey was not conducted as the WSDOT survey tool was not available. A Program Update was provided in lieu of this requirement. The

	Final Conditions of Approval of the Master Plan	2023 Status Update	
	director every two years regarding progress toward meeting the goals for reducing parking shortfall.	update summarized the increased workplace flexibility and commute benefits to decrease SOV drivers.	
5a.	If needed as part of a Transportation Management Plan (TMP) approved by the Seattle Engineering Department and the Department of Construction and Land Use (DCLU), the DCLU director may approve the leasing of off-site parking lots or the leasing of spaces in existing church parking lots which don't contribute significantly to traffic congestion problems near the Kaiser Permanente campus. Kaiser Permanente shall provide shuttle service between the lots and the campus when the lots are beyond walking distance. Before approving Kaiser Permanente's leasing of off-site parking lots, DCLU shall notify the Kaiser Permanente Citizen Advisory Committee and post a notice at the main entrance to the parking lot. The notice shall allow the Committee and public 15 days to comment to DCLU on the potential impacts. New parking lots must be consistent with zoning restrictions and are subject to applicable environmental review. Kaiser Permanente shall accommodate needed off-street parking in structures within its boundaries to the maximum extent possible. Kaiser Permanente shall maintain its commitment to the goal agreed to in its 1974 agreement with the Capitol Hill Community Council for phasing out the use of surface lots P-7 and P-11 through P-16, and shall relinquish the use of lots P-15 and P-16 no later than the end of Phase III.	KP does not lease any parking in the area outside of the MIO. KP no longer utilizes the lot identified as P-17 in the MIMP. Since there are no lots beyond walking distance there is no longer a shuttle services to parking. KP owns and continues to utilize lots P-7 and P-11 thru P16 for patient, staff and contractor parking. Phase III of the MIMP which included an additional parking garage has not been initiated as described. No new parking has been developed since completion of Phase II in 1992.	
6.	KP shall contribute its fair share of associated costs of improvements of existing signals at 15th Avenue East/ East John Street/East Thomas Street as determined by the City Engineering Department and shall pay for a new signal at 15th Avenue East and East Denny Way, if the future traffic study determines a signal is warranted.	No change.	
7.	The objective of the TMP shall be to reduce the SOV level and parking demand to the lowest level the director and the Seattle Engineering Department (SED) deem reasonably achievable. The TMP shall be annually reviewed for goal attainment by SED and can be amended with the agreement of Kaiser Permanente, SED and DCLU. The TMP enforcement provisions in SMC 23.48.18 (C) (5) shall be applicable to the Kaiser Permanente TMP as part of the requirements of the master plan. The Transportation Management Plan shall include the following incentives to reduce spillover parking in the neighborhood:	The purpose of the TMP is acknowledged. Our KP transportation team staff has been committed to lowering the SOV level. Multiple on-site commute fairs, monthly reward commute challenges, and a personalized commute concierge program were all held to increase employee commuting. KP also began a First Mile/Last Mile program, which subsidizes employee safe rideshares from nearby transit stations to campus. KP continued to attend quarterly Employee Transportation Coordinator webinars, met with ORCA, King County and Sound Transit.	

	Final Conditions of Approval of the Master Plan	2023 Status Update
7a.	KP's Employee Transportation Coordinator shall be given the flexibility and management support needed to implement and enforce all aspects of the TMP.	In compliance with the TMP, Kaiser Permanente has an established department within the organization to coordinate and maintain building transportation.
7b.	KP shall support the current RPZ by monitoring employee violations and instituting remedial action for repeaters; by not issuing RPZ stickers to employees unless they live within the RPZ boundaries; and by financially supporting the cost of RPZ stickers, signs and guest pass monitoring for operation of the zone.	Kaiser Permanente continues to support the current Residential Parking Zone (RPZ) by monitoring employees' parking and financially supporting the cost of RPZ stickers as required by the current MIMP.
7c.	The Transportation Management Plan shall be strengthened by providing parity between HOV subsidies. The public transit subsidy shall be increased to at least 50% and made available to all employees. KP's shuttles shall be priced so that employees do not pay more for this service than they would if they took public transit with a 50% subsidy. Vanpools shall be given free parking and provided a fare subsidy, equivalent to the 50% transit subsidy. Carpools of three (3) or more shall be given free parking in the new garage and carpools of two (2) shall pay a reduced parking fee equivalent to or less than the cost an employee would pay for a 50% subsidized transit pass.	ORCA cards are provided to all KP staff at \$38 per year. This rate represents approximately 92% subsidy for public transportation if fully utilized. KP does not operate a shuttle service. Vanpools and carpools of three or more receive free parking. Carpools of two receive a 50% reduction in daily garage parking fee.
7d.	When the new garage is opened, vanpools and carpools (of three or more) shall be assigned to garage spaces. This would give priority parking to HOV modes and provide a distinct incentive to employees to use those transportation modes. UPDATE: These criteria were met with the opening of the new	In addition to priority parking for HOV, there is secure, covered bicycle parking enclosure in the garage for staff with shower facilities located directly adjacent to the garage on the B level.
7e.	All SOV parking at KP shall be priced to reflect current market rates for commercial lots in the area and to reflect rates currently charged by other hospitals on First Hill. KP shall not provide free parking to any employee or staff commuting by SOV. SOV spaces shall be located in less preferential areas of the campus or in the off-campus parking lots.	Rate adjustments have been initiated over the years to maintain comparable costs for daily parking rates and in response to market conditions. These were amended again in 2023.
7f.	KP shall institute a Guaranteed Ride Home program for employees who use an HOV mode and need to get home for emergencies or need to work late. This program could include providing transit passes or shuttle or taxi service when necessary. (Metro will help set up guidelines for these programs.)	KP continues to have a Guaranteed Ride Home Program, offering up to 12 rides per year, offered at 3 per quarter. This exceeds the typical programs in the area.
7g.	KP shall works closely with Metro to alter routes and timetables such that more shift employees can be served.	KP has met with Metro to review routes and suggest passenger safety improvements. Our commute staff attends quarterly meetings with Metro and other transportation managers to learn about updates to routes and additional program features. We have

	Final Conditions of Approval of the Master Plan	2023 Status Update
		also met with Sound Transit to provide
		updates on additional light rail access points.
7h.	KP shall require its contractors to use off-street parking at	All construction in 2023 was limited to minor
	locations outside of the neighborhood and to use shuttle buses	interior renovations and infrastructure
	to bring construction workers to the site or shall temporarily	repairs. Contractors are required to park in
	relocate SOV parkers to off campus parking lots and provide	the existing remote KP lots or in the service
	those spaces to construction workers.	parking areas. Most of the interior work
	·	occurs at night when parking is available in
		the garage.
	Pedestrian Access Condition	
8.	KP shall, at its expense, provide a handicapped accessible east-	In compliance - no changes.
	west pedestrian access walkway located about mid-block	
	between East Denny Way and East Thomas Street, and	
	connecting 15th and 16th Avenues East, which shall be open to	
	the public for 24 hours per day. The final design of the walkway	
	shall be subject to review and approval by DCLU, Land Use	
	Division, and shall be constructed prior to final occupancy of	
	the new MOB/garage. The design shall include appropriate	
	signs and landscaping and shall be clearly identified as a public	
	way.	
	,	
	UPDATE: Kaiser Permanente maintains an accessible east-west	
	pedestrian path between 15th and 16th Avenues East through	
	the campus. The pathway is located just north of the access	
	drive and is visibly marked as a public pathway. This pathway	
	was established with the construction of the south MOB in 1992	
	and has been maintained since that time.	
	Bulk and Design Conditio	ns
9.	Any new structures at the KP campus shall be designed to	In compliance - no changes.
	minimize glare, bulk and shadow impacts. KP shall consider	
	setting back the upper levels of new buildings to reduce bulk	
	and shadow impacts and shall minimize glare impacts. To	
	reduce the institutional appearance and bulk and scale impacts	
	of the new structures, KP should consider use of building	
	materials consistent with structures in the surrounding	
	neighborhood and by alternating use of glass and non-reflective	
	materials. Large unbroken blank wall surfaces should be	
	discouraged. To ensure that the final design satisfies the intent	
	of these mitigating measures, KP shall submit proposed design	
	drawings to DCLU – Land Use Review for review and approval	
	prior to filing for building permits. DCLU shall consider	
	comments from the Citizens Advisory Committee and the	
	Capitol Hill Community Council in its review and approval of	
	building designs.	
	UPDATE: All relevant development since 1988 has followed this	
	guidance in its design and received review from the City and	

	Final Conditions of Approval of the Master Plan	2023 Status Update
	public. All projects have been reviewed through the Master Use	
	Permit process with the City of Seattle.	
10.	Provisions of retail frontage along 15th Avenue East is an important design element to soften the visual impacts of new large buildings and to maintain a pedestrian scale for this business frontage. KP shall include in the new Medical Office Building retail space fronting on 15th Avenue East which is equivalent in lineal feet to the retail space that would be displaced by construction of the MOB/garage. To assure that this replacement space offers a similar range of goods and services to the community, KP shall advertise its availability in local and daily newspapers, by listing with appropriate marketers experienced in renting commercial space, and by prominent display of for rent signs. KP shall consider further extending its retail frontage in the new West Wing addition. Relocating hospital services such as flower and gift shops and possibly a cafeteria, should be considered during design, to	In both buildings the primary tenants are small local businesses, with some secondary retail space used by Kaiser Permanente for an Eyewear shop and Hearing Center. These spaces are further identified in section III. B. Vacant space is actively being managed by a real estate broker.
	provide direct access onto 15th Avenue East and provide the appearance of a retail, pedestrian-oriented frontage. UPDATE: Retail space was developed along 15th Ave East in the South Medical Office Building in 1992. The retail space was part of the original development as dictated by these MIMP guidelines. The North Medical Office Building continues to have retail space along the 15th Ave. East as it had prior to the development of the current MIMP.	
11 [a]	The provision of quality open space and landscaping is critical in visually integrating the large scale of the campus buildings into the surrounding neighborhood and to maintain a pedestrian friendly environment adjacent to public streets and the replacement walkway. The KP landscape plan shall incorporate a play area for use of	In compliance - no significant changes.
	children visiting the campus at a safe and convenient location. The landscape plan shall also configure available open space into "mini-parks" with suitable seating and seasonal landscaping. Use of street trees and landscaping along the street margins is encouraged to help soften the institutional appearance at ground level. Outdoor areas should be sited to maximize sun exposure and special attention given to the needs of the elderly, handicapped, and children who would visit the hospital. Design of plantings shall also consider safety of pedestrian so that convenient hiding places are not inadvertently placed close to outdoor activity areas.	
	Because the Master Plan development will occur in phases and program decisions may place continued development on hold for long periods, KP shall incorporate interim landscaping which	

	Final Conditions of Approval of the Master Plan	2023 Status Update
	satisfies these design criteria (such as the MOB and West Wing	2023 Status Opuate
	addition). The design and location of the replacement	
	east/west pedestrian access between 15th and 16th Avenues is	
	very important. It must be clearly identified and accessible to	
	serve its intended function. Since all of these plans are still	
	conceptual in the Master Plan, KP shall submit a proposed	
	design for review and approval prior to issuance of building	
	permits for any new structures. The replacement pedestrian	
	walkway shall be approved by DCLU prior to issuance of	
	building permits for the new MOB and its construction	
	completed prior to final occupancy of that building.	
	completed prior to final occupancy of that building.	
	UPDATE: A neighborhood play area was developed as part of	
	the South Medical Office Building development in 1992. This	
	area remains available to the neighborhood. In addition, KP	
	maintains an exterior courtyard with on the campus that is	
	accessible to the public.	
11	The Major Institution Code Noise Development Standards of	In compliance - no changes.
[b]	SMC 23.48.014 are modified to permit a relocated emergency	
	vehicle entrance/exit onto 16th Avenue East.	
	UPDATE: This emergency vehicle location is currently located	
	off Thomas between 15th and 16th Ave East. This is the original	
	location identified in the MIMP. The new location approved off	
	16th Ave East was part of phase III and not implemented. The	
	primary emergency vehicle traffic is out going from the facility.	
	KP operates an Urgent Care facility 24.

g.	Scheduling the noisiest operations near the middle of	
	the day, and notifying nearby residents whenever	
	extremely noisy work will be occurring;	
h.	The use of permanent or portable acoustic barriers	
	around point noise sources.	

- III. Major Institution Development Activity Initiated or Under Construction within the MIO Boundary during the Reporting Period.
 - A. List & Describe Development Activity Initiated or Under Construction (Non-Leased Activity): There was no development activity within the MIO during 2023.
 - B. Non-Major Institution Leasing Activity During the Reporting Period:
 - 1.102 15th Ave E has required retail space per condition 10.
 - 1. Current tenant Salal Credit Union in the process of a four-year renewal.
 - 2. Three vacant spaces. On the market for lease.
 - 2.310 15th Ave East is not part of condition 10 but continues to have leased retail space as follows:
 - 1. Overcast Coffee Company 235 SF Expressed interest in moving to another suite during their 2024 lease renewal.
 - 2. Moli Bento Restaurant 470 SF lease renewal in process for a four-year term.
 - 3. 1-800 flowers- 985 SF Lease expires on 3/11/2024. Does not plan to renew.
 - 3.122 16th Ave East is not part of condition 10.
 - 1. Currently vacant with no immediate plans to lease.
- IV. Major Institution Development Activity Outside but within 2,500 Feet of the MIO District Boundary:
 - A. Land and Building Acquisition During the Reporting Period: None
 - B. Leasing Activity During the Reporting Period: None
- V. General Overview of Progress in Meeting Transportation Management Program (TMP)
 - A. Improved Investment in Commute Solution Team
 - 1. In compliance with the TMP, Kaiser Permanente continues to operate a department within the organization to coordinate and maintain building transportation. Our Commute Solutions Team attended 23 KP new employee Welcome Days to ensure new employees were aware of their benefits and how to engage with the program to reduce SOV trips.
 - 2. The Commute Solutions team continues to improve on outreach to our staff through the Commute Concierge Program and launched a First Mile, Last Mile program to enable commuters to quickly get to campus after taking most of their trip on alternative transportation.
 - 3. Efforts continue to heavily engage the staff to educate and identify alternative commute solutions. Additionally, new commute technology was launched, consolidating the many parking, and commuting benefits for employees onto one online portal for all KP employees. These efforts make it easier for our staff to commute, thus reducing SOV rate for our employees.

4. Commute Solutions has worked with our parking vendor onsite to better employ new parking technologies installed in 2023. Using a License Plate Readers, ticket dispensers, and employee parking permits, these additional measures have worked together to simplify the parking experience for members and employees. This investment has provided KP with better data for us to help ensure appropriate use of the parking available, with the goal of reducing overall congestion.
