Demographic and Housing Estimates (DP05)

2009-2013 American Community Survey 5-Year Estimates (Not decennial census counts. See notes after table.)

Council District # 5

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
SEX AND AGE					
Total population:	92,818	+/- 1,684	100%	X	High
Male	45,481	+/- 1,246	49.0%	+/-1	High
Female	47,337	+/- 1,181	51.0%	+/- 0.9	High
Under 5	4,748	+/- 503	5.1%	+/- 0.5	High
5 to 9	4,482	+/- 460	4.8%	+/- 0.5	High
10 to 14	3,568	+/- 431	3.8%	+/- 0.5	High
15 to 19	3,444	+/- 461	3.7%	+/- 0.5	High
20 to 24	6,739	+/- 907	7.3%	+/- 1	High
25 to 34	18,434	+/- 1,000	19.9%	+/- 1	High
35 to 44	14,305	+/- 780	15.4%	+/- 0.8	High
45 to 54	11,858	+/- 710	12.8%	+/- 0.7	High
55 to 59	7,341	+/- 592	7.9%	+/- 0.6	High
60 to 64	5,380	+/- 456	5.8%	+/- 0.5	High
65 to 74	5,785	+/- 483	6.2%	+/- 0.5	High
75 to 84	4,079	+/- 387	4.4%	+/- 0.4	High
85 and over	2,655	+/- 331	2.9%	+/- 0.4	High
Median Age (years)	39.3	+/- 0.7	X	X	High
18 and over:	77,905	+/- 1,316	83.9%	W	High
Male	37,459	+/- 1,040	48.1%	+/- 1.1	High
Female	40,446	+/- 953	51.9%	+/- 0.9	High
21 and over	75,725	+/- 1,220	81.6%	W	High
62 and over	15,467	+/- 628	16.7%	+/- 0.6	High
65 and over:	12,519	+/- 549	13.5%	+/- 0.5	High
Male	4,686	+/- 351	37.4%	+/- 2.3	High
Female	7,833	+/- 455	62.6%	+/- 2.4	High
RACE					
Total population:	92,818	+/- 1,684	100%	X	High
One Race	87,976	+/- 1,718	94.8%	+/- 0.7	High
Two or More Races	4,842	+/- 675	5.2%	+/- 0.7	High
One Race:	87,976	+/- 1,718	94.8%	+/- 0.7	High
White	67,282	+/- 1,560	72.5%	+/- 1	High
Black or African American	4,655	+/- 794	5.0%	+/- 0.9	High
American Indian and Alaska Native:	889	+/- 299	1.0%	+/- 0.3	Moderate
Blackfeet	17	+/- 69	0.0%	+/-0.1	Low
Cherokee	76	+/- 122	0.1%	+/- 0.1	Low
Chippewa	21	+/- 66	0.0%	+/-0.1	Low
Navajo	15	+/- 67	0.0%	+/-0.1	Low
Puget Sound Salish	161	+/- 137	0.2%	+/- 0.1	Low
Sioux	18	+/- 66	0.0%	+/-0.1	Low
Tlingit-Haida	0	+/-123	0.0%	+/-0.6	NC
Yakama	23	+/- 72	0.0%	+/-0.1	Low
Asian:	12,363	+/- 1,065	13.3%	+/- 1.1	High
Asian Indian	765	+/- 313	0.8%	+/- 0.3	Moderate
Chinese	3,759	+/- 626	4.0%	+/- 0.7	High
Filipino	2,365	+/- 642	2.5%	+/- 0.7	Moderate
Japanese	1,346	+/- 282	1.5%	+/- 0.3	Moderate
Korean	1,065	+/- 309	1.1%	+/- 0.3	Moderate
Vietnamese	1,125	+/- 360	1.2%	+/- 0.4	Moderate
Other Asian	1,938	+/- 556	2.1%	+/- 0.6	Moderate

Council District # 5

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
Native Hawaiian and Other Pacific Islander:	520	+/- 267	0.6%	+/- 0.3	Moderate
Native Hawaiian	63	+/- 90	0.1%	+/-0.1	Low
Guamanian or Chamorro	88	+/- 131	0.1%	+/- 0.1	Low
Samoan	245	+/- 197	0.3%	+/- 0.2	Low
Other Pacific Islander	124	+/- 138	0.1%	+/- 0.1	Low
Some Other Race	2,267	+/- 648	2.4%	+/- 0.7	Moderate
Two or More Races:	4,842	+/- 675	5.2%	+/- 0.7	High
White and Black or African American	841	+/- 334	0.9%	+/- 0.4	Moderate
White and American Indian and Alaska Native	734	+/- 218	0.8%	+/- 0.2	Moderate
White and Asian	1,835	+/- 350	2.0%	+/- 0.4	High
Black or African American and American Indian and Alaska Native	137	+/- 180	0.1%	+/- 0.2	Low

RACES ALONE OR IN COMBINATION WITH ONE OR MORE OTHER RACES

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
Total population:	92,818	+/- 1,684	100%	X	High
White	71,614	+/- 1,528	77.2%	+/- 0.9	High
Black or African American	6,001	+/- 894	6.5%	+/- 1	High
American Indian and Alaska Native	2,066	+/- 444	2.2%	+/- 0.5	Moderate
Asian	14,854	+/- 1,153	16.0%	+/- 1.2	High
Native Hawaiian and Other Pacific Islander	1,028	+/- 345	1.1%	+/- 0.4	Moderate
Some Other Race	2,706	+/- 698	2.9%	+/- 0.8	Moderate

HISPANIC OR LATINO AND RACE

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
Total population:	92,818	+/- 1,684	100%	X	High
Hispanic or Latino (of any race):	6,810	+/- 1,036	7.3%	+/- 1.1	High
Mexican	4,628	+/- 921	5.0%	+/- 1	High
Puerto Rican	107	+/- 86	0.1%	+/-0.1	Low
Cuban	36	+/- 68	0.0%	+/-0.1	Low
Other Hispanic or Latino	2,039	+/- 471	2.2%	+/- 0.5	Moderate
Not Hispanic or Latino:	86,008	+/- 1,625	92.7%	+/- 0.5	High
White alone	63,580	+/- 1,452	68.5%	+/- 1	High
Black or African American alone	4,418	+/- 748	4.8%	+/- 0.8	High
American Indian and Alaska Native alone	639	+/- 245	0.7%	+/- 0.3	Moderate
Asian alone	12,297	+/- 1,066	13.2%	+/- 1.1	High
Native Hawaiian and Other Pacific Islander alone	520	+/- 267	0.6%	+/- 0.3	Moderate
Some other race alone	92	+/- 75	0.1%	+/-0.1	Low
Two or more races:	4,462	+/- 664	4.8%	+/- 0.7	High
Two races including Some other race	90	+/- 90	0.1%	+/-0.1	Low
Two races excluding Some other race and Three or more races	4,372	+/- 658	4.7%	+/- 0.7	High

HOUSING

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
Total Housing Units:	46,185	+/- 262	100%	X	High

Notes:

This is one of four reports that have been adapted from the ACS "Data Profile" (DP) Series. The four DP tables published by the Census Bureau are:
DP02 Selected Social Characteristics; DP03 Selected Economic Characteristics; DP04 Selected Housing Characteristics; DP05 Demographic and Housing Estimates.

DPD has adapted these DP tables for reporting ACS estimates for locally-defined geographies. The locally defined areas covered in these reports are made up of multiple census tracts (except for a few Community Reporting Areas that are made up of only one Census Tract each), therefore estimates shown for these geographies are based on aggregating estimates for multiple census tracts. For ease of calculation, medians are the average of the medians.

[1] The ACS is a sample survey and as such, estimates carry sampling error. Margins of error (MOEs) provide a measure of sampling error

The MOEs displayed for the aggregated estimates in these reports could only be approximated using the formulas provided by the Census Bureau. These formulas do not account for "covariance" (or inter-relationship) between the aggregated estimates, and can understate or—more commonly—overstate the margins of error. In some cases, actual MOEs may be much different than approximated.

MOEs of +/- 0.1 and below are displayed as +/- 0.1 based on Census Bureau convention.

[2] The reliability indicator of High, Moderate, or Low is meant to provide a general sense of an estimate's reliability. Data users will need to use discretion in identifying the leve of reliability appropriate for their purposes.

"High" reliability: MOE is less than or equal to 20% of the estimate. Indicates that sampling error is small relative to the size of the estimate. Flagged green.
"Moderate" reliability: MOE is between 20% and 66.7% of the estimate. Flagged yellow to indicate that the estimate should be used with caution.
"Low" reliability: MOE is over 66.7% of the estimate. Flagged red to warn that sampling error is large relative to the estimate and that the estimate is very unreliable.
"NC": Estimate is 0. Reliability cannot be calculated.

Percent Margin of Error "W" value indicates the standard formula for estimating the percent MOE could not be applied (due to negative value under square root).

For more about MOEs, see Census Bureau notes below. For formulas, see "American Community Survey Multiyear Accuracy of the Data (3-year 2008-2010 and 5-year 2006 2010)," http://www.census.gov/acs/www/Downloads/data_documentation/Accuracy/MultiyearACSAccuracyofData2010.pdf.)

Census Bureau notes for DP05:

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological difference in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see
http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see
http://www.census.gov/population/www/socdemo/hispanic/reports.html.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:
1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of median cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small
8. An '(X)' means that the estimate is not applicable or not available."

Selected Social Characteristics (DP02)

2009-2013 American Community Survey 5-Year Estimates (Not decennial census counts. See notes after table.)

Council District # 5

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
HOUSEHOLDS BY TYPE					
Total Households:	43,363	+/- 510	100%	X	High
Family Households (families)	21,353	+/- 679	49.2%	+/-1.5	High
With Own Children under 18 years	8,794	+/- 482	20.3%	+/-1.1	High
Married-Couple Family	16,663	+/- 643	38.4%	+/-1.4	High
With Own Children under 18 years	6,649	+/- 411	15.3%	+/-0.9	High
Male householder, no wife present, family	1,195	+/- 256	2.8%	+/-0.6	Moderate
With Own Children under 18 years	468	+/- 177	1.1%	+/-0.4	Moderate
Female householder,no husband present,family	3,495	+/- 428	8.1%	+/-1	High
With Own Children under 18 years	1,677	+/- 307	3.9%	+/-0.7	High
Nonfamily Households	22,010	+/- 747	50.8%	+/-1.6	High
Householder Living Alone	17,029	+/- 722	39.3%	+/-1.6	High
65 years and over	5,087	+/- 415	11.7%	+/-0.9	High
Households with one or more people under 18 years	9,313	+/- 483	21.5%	+/-1.1	High
Households with one or more people 65 years and over	9,345	+/- 415	21.6%	+/-0.9	High
Average Household Size:	2.11	+/- 0.04	X	X	High
Average Family Size:	2.81	+/- 0.04	X	X	High
RELATIONSHIP					
Population in Households:	91,553	+/- 1,655	100%	X	High
Householder	43,363	+/- 510	47.4%	W	High
Spouse	16,682	+/- 634	18.2%	+/-0.6	High
Child	18,739	+/- 943	20.5%	+/-1	High
Other Relatives	3,186	+/- 470	3.5%	+/-0.5	High
Nonrelatives	9,583	+/- 975	10.5%	+/-1	High
Unmarried Partner	3,150	+/- 389	3.4%	+/-0.4	High
MARITAL STATUS					
Males 15 and over:	38,563	+/- 1,058	100%	X	High
Never married	15,666	+/- 986	40.6%	+/-2.3	High
Now married, except separated	17,823	+/- 656	46.2%	+/-1.1	High
Separated	611	+/- 202	1.6%	+/-0.5	Moderate
Widowed	825	+/- 187	2.1%	+/-0.5	Moderate
Divorced	3,638	+/- 408	9.4%	+/-1	High
Females 15 and over:	41,457	+/- 989	100%	X	High
Never married	14,041	+/- 823	33.9%	+/-1.8	High
Now married, except separated	17,624	+/- 658	42.5%	+/-1.2	High
Separated	599	+/- 196	1.4%	+/-0.5	Moderate
Widowed	3,610	+/- 407	8.7%	+/-1	High
Divorced	5,583	+/- 525	13.5%	+/-1.2	High
FERTILITY					
Number of women 15 to 50 years old who had a birth in the past 12 months:	1,044	+/- 241	100%	X	Moderate
Unmarried women (widowed, divorced, and never married)	223	+/- 152	21.4%	+/-13.7	Low
Per 1,000 unmarried women	16	+/- 297	X	X	Low
Per 1,000 women 15 to 50 years old	72	+/- 202	X	X	Low
Per 1,000 women 15 to 19 years old	5	+/- 1,622	X	X	Low
Per 1,000 women 20 to 34 years old	59	+/- 515	X	X	Low
Per 1,000 women 35 to 50 years old	30	+/- 321	X	X	Low

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
GRANDPARENTS					
Number of grandparents living with own grandchildren under 18 years:	844	+/- 219	100%	X	Moderate
Responsible for grandchildren	183	+/- 103	21.7%	+/-10.8	Moderate
Responsible less than 1 year	41	+/- 86	4.9%	+/-10.1	Low
Responsible 1 to 2_years	49	+/- 70	5.8%	+/-8.2	Low
Responsible 3 to 4 years	55	+/- 74	6.5%	+/-8.6	Low
Responsible 5 or more years	38	+/- 72	4.5%	+/-8.5	Low
Number of grandparents responsible for own grandchildren under 18 years:	183	+/- 103	100%	X	Moderate
Who are female	123	+/- 80	67.2%	+/-21.9	Moderate
Who are married	111	+/- 93	60.7%	+/-37.6	Low
SCHOOL ENROLLMENT					
Population 3 years and over enrolled in school:	20,225	+/- 1,078	100%	X	High
Nursery school, preschool	1,604	+/- 266	7.9%	+/-1.2	High
Kindergarten	970	+/- 182	4.8%	+/-0.9	High
Elementaryschool (grades 1-8)	6,113	+/- 552	30.2%	+/-2.2	High
High school (grades 9-12)	2,657	+/- 373	13.1%	+/-1.7	High
College or graduate school	8,881	+/- 753	43.9%	+/-2.9	High
EDUCATIONAL ATTAINMENT					
Population 25 years and over:	69,837	+/- 1,228	100%	X	High
Less than 9th grade	1,661	+/- 366	2.4%	+/-0.5	Moderate
9th to 12th grade, no diploma	2,972	+/- 447	4.3%	+/-0.6	High
High school graduate (includes equivalency)	9,825	+/- 833	14.1%	+/-1.2	High
Some college, no degree	13,410	+/- 840	19.2%	+/-1.2	High
Associate's degree	5,495	+/- 549	7.9%	+/-0.8	High
Bachelor's degree	21,836	+/- 966	31.3%	+/-1.3	High
Graduate or professional degree	14,638	+/- 798	21.0%	+/-1.1	High
Percent high school graduate or higher:	X	X	93.4%	+/- 0.8	High
Percent bachelor's degree or higher:	X	X	52.2%	+/- 1.5	High
VETERAN STATUS					
Civilian population 18 years and over:	77,785	+/- 1,316	100%	X	High
Civilian veterans	5,622	+/- 503	7.2%	+/-0.6	High

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION					
Total Civilian Noninstitutionalized Population	92,173	+/- 1,679	100%	X	High
With a disability	9,624	+/- 693	10.4%	+/-0.7	High
Under 18 years	14,878	+/- 777	100%	X	High
With a disability	346	+/- 150	2.3%	+/-1	High
18 to 64 years	65,214	+/- 1,300	100%	X	High
With a disability	4,491	+/- 502	6.9%	+/-0.8	High
65 years and over	12,081	+/- 533	100%	X	High
With a disability	4,787	+/- 429	39.6%	+/-3.1	Moderate
RESIDENCE 1 YEAR AGO					
Population 1 year and over:	91,858	+/- 1,663	100%	X	High
Same house	74,230	+/- 1,693	80.8%	+/-1.1	High
Different house in the U.S.	16,564	+/- 1,289	18.0%	+/-1.4	High
Same county	10,908	+/- 1,066	11.9%	+/-1.1	High
Different county	5,656	+/- 700	6.2%	+/-0.8	High
Same state	3,298	+/- 545	3.6%	+/-0.6	High
Different state	2,358	+/- 464	2.6%	+/-0.5	High
Abroad	1,064	+/- 333	1.2%	+/-0.4	Moderate

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
PLACE OF BIRTH					
Total Population:	92,818	+/- 1,684	100%	X	High
Native	75,286	+/- 1,559	81.1%	+/-0.8	High
Born in the United States	73,308	+/- 1,520	79.0%	+/-0.8	High
State of residence	39,320	+/- 1,394	42.4%	+/-1.3	High
Different state	33,988	+/- 1,288	36.6%	+/-1.2	High
Born in Puerto Rico, U.S. Island areas, or born abroad to American parents	1,978	+/- 336	2.1%	+/-0.4	High
Foreign born	17,532	+/- 1,216	18.9%	+/-1.3	High
U.S. CITIZENSHIP STATUS					
Foreign-born population:	17,532	+/- 1,216	100%	X	High
Naturalized U.S. citizen	9,186	+/- 726	52.4%	+/-2	High
Not a U.S. citizen	8,346	+/- 968	47.6%	+/-4.4	High
YEAR OF ENTRY					
Population born outside the United States:	19,510	+/- 1,249	100%	X	High
Native:	1,978	+/- 336	100%	X	High
Entered 2010 or later	169	+/- 135	8.5%	+/-6.7	Low
Entered before 2010	1,809	+/- 315	91.5%	+/-3.5	High
Foreign born population:	17,532	+/- 1,216	100%	X	High
Entered 2010 or later	1,390	+/- 408	7.9%	+/-2.3	Moderate
Entered before 2010	16,142	+/- 1,155	92.1%	+/-1.6	High
WORLD REGION OF BIRTH OF FOREIGN BORN					
Foreign-born, excluding population born at sea:	17,532	+/- 1,216	100%	X	High
Europe	2,578	+/- 384	14.7%	+/-1.9	High
Asia	9,076	+/- 938	51.8%	+/-4	High
Africa	2,303	+/- 477	13.1%	+/-2.6	Moderate
Oceania	281	+/- 148	1.6%	+/-0.8	Moderate
Latin America	2,414	+/- 592	13.8%	+/-3.2	Moderate
Northern America	880	+/- 243	5.0%	+/-1.3	Moderate
LANGUAGE SPOKEN AT HOME					
Population 5 years and over:	88,070	+/- 1,598	100%	X	High
English only	67,523	+/- 1,502	76.7%	+/-1	High
Language other than English	20,547	+/- 1,435	23.3%	+/-1.6	High
Speak English less than "very well"	8,245	+/- 892	9.4%	+/-1	High
Spanish	4,990	+/- 865	5.7%	+/-1	High
Speak English less than "very well"	1,629	+/- 475	1.8%	+/-0.5	Moderate
Other Indo-European lanugages	4,047	+/- 602	4.6%	+/-0.7	High

Welsh	1,186	+/- 272	1.3%	+/-0.3	Moderate
West Indian (excluding Hispanic origin groups)	335	+/- 233	0.4%	+/-0.3	Low

Notes:

This is one of four reports that have been adapted from the ACS "Data Profile" (DP) Series. The four DP tables published by the Census Bureau are:
DP02 Selected Social Characteristics; DP03 Selected Economic Characteristics; DP04 Selected Housing Characteristics; DP05 Demographic and Housing Estimates.

DPD has adapted these DP tables for reporting ACS estimates for locally-defined geographies. The locally defined areas covered in these reports are made up of multiple census tracts (except for a few Community Reporting Areas that are made up of only one Census Tract each), therefore estimates shown for these geographies are based on aggregating estimates for multiple census tracts. For ease of calculation, medians are the average of the medians.

[1]The ACS is a sample survey and as such, estimates carry sampling error. Margins of error (MOEs) provide a measure of sampling error

The MOEs displayed for the aggregated estimates in these reports could only be approximated using the formulas provided by the Census Bureau. These formulas do not account for "covariance" (or inter-relationship) between the aggregated estimates, and can understate or—more commonly—overstate the margins of error. In some cases, actual MOEs may be much different than approximated.

MOEs of +/- 0.1 and below are displayed as +/- 0.1 based on Census Bureau convention.

[2] The reliability indicator of High, Moderate, or Low is meant to provide a general sense of an estimate's reliability. Data users will need to use discretion in identifying the level of reliability appropriate for their purposes.

"High" reliability: MOE is less than or equal to 20% of the estimate. Indicates that sampling error is small relative to the size of the estimate. Flagged green.
"Moderate" reliability: MOE is between 20% and 66.7% of the estimate. Flagged yellow to indicate that the estimate should be used with caution.
"Low" reliability: MOE is over 66.7% of the estimate. Flagged red to warn that sampling error is large relative to the estimate and that the estimate is very unreliable.
"NC": Estimate is 0. Reliability cannot be calculated.

Percent Margin of Error "W" value indicates the standard formula for estimating the percent MOE could not be applied (due to negative value under square root).

For more about MOEs, see Census Bureau notes below. For formulas, see "American Community Survey Multiyear Accuracy of the Data (3-year 2008-2010 and 5-year 200 2010)," http://www.census.gov/acs/www/Downloads/data_documentation/Accuracy/MultiyearACSAccuracyofData2010.pdf.)

Census Bureau notes for DP02:

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population
Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and
estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using multi-year data containin data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008
or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test,
see the Evaluation Report Covering Disability.

While the 2009-2013 American Community Survey (ACS) data generally reflect the December 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:
1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of median cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small
8. An '(X)' means that the estimate is not applicable or not available."

Selected Economic Characteristics (DP03)

2009-2013 American Community Survey 5-Year Estimates   (Not decennial census counts. See notes after table.)

Produced by: City of Seattle, Department of Planning and Development (DPD)
On the Web at: http:///www.seattle.gov/dpd/cityplanning/populationdemographics/

Notes:
This is one of four reports that have been adapted from the ACS "Data Profile" (DP) Series. The four DP tables published by the Census Bureau are:
DP02 Selected Social Characteristics; DP03 Selected Economic Characteristics; DP04 Selected Housing Characteristics; DP05 Demographic and Housing Estimates.

DPD has adapted these DP tables for reporting ACS estimates for locally-defined geographies. The locally defined areas covered in these reports are made up of multiple census tracts (except for a few Community Reporting Areas that are made up of only one Census Tract each), therefore estimates shown for these geographies are based on aggregating estimates for multiple census tracts. For ease of calculation, medians are the average of the medians.

[1]The ACS is a sample survey and as such, estimates carry sampling error. Margins of error (MOEs) provide a measure of sampling error

The MOEs displayed for the aggregated estimates in these reports could only be approximated using the formulas provided by the Census Bureau. These formulas do not account for "covariance" (or inter-relationship) between the aggregated estimates, and can understate or—more commonly—overstate the margins of error. In some cases, actual MOEs may be much different than approximated.

MOEs of +/- 0.1 and below are displayed as +/- 0.1 based on Census Bureau convention.

[2] The reliability indicator of High, Moderate, or Low is meant to provide a general sense of an estimate's reliability. Data users will need to use discretion in identifying the level of reliability appropriate for their purposes.

"High" reliability: MOE is less than or equal to 20% of the estimate. Indicates that sampling error is small relative to the size of the estimate. Flagged green.
"Moderate" reliability: MOE is between 20% and 66.7% of the estimate. Flagged yellow to indicate that the estimate should be used with caution.
"Low" reliability: MOE is over 66.7% of the estimate. Flagged red to warn that sampling error is large relative to the estimate and that the estimate is very unreliable.
"NC": Estimate is 0. Reliability cannot be calculated.

Percent Margin of Error "W" value indicates the standard formula for estimating the percent MOE could not be applied (due to negative value under square root).

For more about MOEs, see Census Bureau notes below. For formulas, see "American Community Survey Multiyear Accuracy of the Data (3-year 2008-2010 and 5-year 2006-2010)," http://www.census.gov/acs/www/Downloads/data_documentation/Accuracy/MultiyearACSAccuracyofData2010.pdf.)

Census Bureau notes for DP03:
There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Census occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC). The Census occupation codes for 2010 and later years are based on the 2010 revision of the SOC. To allow for the creation of 2009-2013 tables, occupation data in the multiyear files (2009-2013) were recoded to 2013 Census occupation codes. We recommend using caution when comparing data coded using 2013 Census occupation codes with data coded using Census occupation codes prior to 2010. For more information on the Census occupation code changes, please visit our website at http://www.census.gov/people/io/methodology/.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2009-2013 and 2011-2013 tables, industry data in the multiyear files (2009-2013 and 2011-2013) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at http://www.census.gov/people/io/methodology/.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:
1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available."

35.0 percent or more	8,760	+/- 635	43.6%	+/-2.8	High
Not computed	1,194	+/- 309	X	X	Moderate

Notes:
This is one of four reports that have been adapted from the ACS "Data Profile" (DP) Series. The four DP tables published by the Census Bureau are:
DP02 Selected Social Characteristics; DP03 Selected Economic Characteristics; DP04 Selected Housing Characteristics; DP05 Demographic and Housing Estimates.

DPD has adapted these DP tables for reporting ACS estimates for locally-defined geographies. The locally defined areas covered in these reports are made up of multiple census tracts (except for a few Community Reporting Areas that are made up of only one Census Tract each), therefore estimates shown for these geographies are based on aggregating estimates for multiple census tracts. For ease of calculation, medians are the average of the medians.

[1]The ACS is a sample survey and as such, estimates carry sampling error. Margins of error (MOEs) provide a measure of sampling error

The MOEs displayed for the aggregated estimates in these reports could only be approximated using the formulas provided by the Census Bureau. These formulas do not account for "covariance" (or inter-relationship) between the aggregated estimates, and can understate or—more commonly—overstate the margins of error. In some cases, actual MOEs may be much different than approximated.

MOEs of +/- 0.1 and below are displayed as +/- 0.1 based on Census Bureau convention.

[2] The reliability indicator of High, Moderate, or Low is meant to provide a general sense of an estimate's reliability. Data users will need to use discretion in identifying the level of reliability appropriate for their purposes.

"High" reliability: MOE is less than or equal to 20% of the estimate. Indicates that sampling error is small relative to the size of the estimate. Flagged green.
"Moderate" reliability: MOE is between 20% and 66.7% of the estimate. Flagged yellow to indicate that the estimate should be used with caution.
"Low" reliability: MOE is over 66.7% of the estimate. Flagged red to warn that sampling error is large relative to the estimate and that the estimate is very unreliable.
"NC": Estimate is 0. Reliability cannot be calculated.

Percent Margin of Error "W" value indicates the standard formula for estimating the percent MOE could not be applied (due to negative value under square root).

For more about MOEs, see Census Bureau notes below. For formulas, see "American Community Survey Multiyear Accuracy of the Data (3-year 2008-2010 and 5-year 2006-2010)," http://www.census.gov/acs/www/Downloads/data_documentation/Accuracy/MultiyearACSAccuracyofData2010.pdf.)

Census Bureau notes for DP04:
The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with/without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:
1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available."
