Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
HOUSEHOLDS BY TYPE					
Total Households:	12,144	+/- 284	100%	X	High
Family Households (families)	5,315	+/- 323	43.8%	+/-2.5	High
With Own Children under 18 years	2,392	+/- 185	19.7%	+/-1.5	High
Married-Couple Family	4,496	+/- 298	37.0%	+/-2.3	High
With Own Children under 18 years	2,097	+/- 180	17.3%	+/-1.4	High
Male householder, no wife present, family	238	+/- 118	2.0%	+/-1	Moderate
With Own Children under 18 years	97	+/- 58	0.8%	+/-0.5	Moderate
Female householder,no husband present,family	581	+/- 142	4.8%	+/-1.2	Moderate
With Own Children under 18 years	198	+/- 86	1.6%	+/-0.7	Moderate
Nonfamily Households	6,829	+/- 373	56.2%	+/-2.8	High
Householder Living Alone	3,807	+/- 343	31.3%	+/-2.7	High
65 years and over	794	+/- 148	6.5%	+/-1.2	High
Households with one or more people under 18 years	2,486	+/- 192	20.5%	+/-1.5	High
Households with one or more people 65 years and over	1,721	+/- 178	14.2%	+/-1.4	High
Average Household Size:	2.32	+/- 0.07	X	X	High
Average Family Size:	2.79	+/- 0.06	X	X	High
RELATIONSHIP					
Population in Households:	28,126	+/- 958	100%	X	High
Householder	12,144	+/- 284	43.2%	W	High
Spouse	4,517	+/- 294	16.1%	+/-0.9	High
Child	4,375	+/- 299	15.6%	+/-0.9	High
Other Relatives	640	+/- 197	2.3%	+/-0.7	Moderate
Nonrelatives	6,450	+/- 739	22.9%	+/-2.5	High
Unmarried Partner	1,410	+/- 261	5.0%	+/-0.9	High
MARITAL STATUS					
Males 15 and over:	13,173	+/- 724	100%	X	High
Never married	7,308	+/- 705	55.5%	+/-4.4	High
Now married, except separated	4,756	+/- 301	36.1%	+/-1.1	High
Separated	116	+/- 108	0.9%	+/-0.8	Low
Widowed	130	+/- 69	1.0%	+/-0.5	Moderate
Divorced	863	+/- 194	6.6%	+/-1.4	Moderate
Females 15 and over:	12,063	+/- 632	100%	X	High
Never married	5,557	+/- 612	46.1%	+/-4.5	High
Now married, except separated	4,662	+/- 306	38.6%	+/-1.5	High
Separated	94	+/- 54	0.8%	+/-0.4	Moderate
Widowed	576	+/- 204	4.8%	+/-1.7	Moderate
Divorced	1,174	+/- 208	9.7%	+/-1.6	High
FERTILITY					
Number of women 15 to 50 years old who had a birth in the past 12 months:	385	+/- 149	100%	X	Moderate
Unmarried women (widowed, divorced, and never married)	8	+/- 32	2.1%	+/-8.3	Low
Per 1,000 unmarried women	1	+/- 90	X	X	Low
Per 1,000 women 15 to 50 years old	63	+/- 83	X	X	Low
Per 1,000 women 15 to 19 years old	13	+/- 1,105	X	X	Low
Per 1,000 women 20 to 34 years old	39	+/- 118	X	X	Low
Per 1,000 women 35 to 50 years old	55	+/- 253	X	X	Low

GRANDPARENTS					
Number of grandparents living with own grandchildren under 18 years:	109	+/- 92	100%	X	Low
Responsible for grandchildren	0	+/-123	0.0%	+/-0.6	NC
Responsible less than 1 year	0	+/-123	0.0%	+/-0.6	NC
Responsible 1 to 2_years	0	+/-123	0.0%	+/-0.6	NC
Responsible 3 to 4 years	0	+/-123	0.0%	+/-0.6	NC
Responsible 5 or more years	0	+/-123	0.0%	+/-0.6	NC
Number of grandparents responsible for own grandchildren under 18 years:	0	+/-123	0%	X	NC
Who are female	0	+/-123	0.0%	+/-0.6	NC
Who are married	0	+/-123	0.0%	+/-0.6	NC
SCHOOL ENROLLMENT					
Population 3 years and over enrolled in school:	7,800	+/- 840	100%	X	High
Nursery school, preschool	517	+/- 130	6.6%	+/-1.5	Moderate
Kindergarten	129	+/- 67	1.7%	+/-0.8	Moderate
Elementaryschool (grades 1-8)	1,430	+/- 208	18.3%	+/-1.8	High
High school (grades 9-12)	635	+/- 146	8.1%	+/-1.7	Moderate
College or graduate school	5,089	+/- 804	65.2%	+/-7.5	High
EDUCATIONAL ATTAINMENT					
Population 25 years and over:	20,028	+/- 816	100%	X	High
Less than 9th grade	79	+/- 67	0.4%	+/-0.3	Low
9th to 12th grade, no diploma	200	+/- 97	1.0%	+/-0.5	Moderate
High school graduate (includes equivalency)	1,523	+/- 305	7.6%	+/-1.5	Moderate
Some college, no degree	2,450	+/- 372	12.2%	+/-1.8	High
Associate's degree	1,107	+/- 400	5.5%	+/-2	Moderate
Bachelor's degree	8,142	+/- 612	40.7%	+/-2.6	High
Graduate or professional degree	6,527	+/- 513	32.6%	+/-2.2	High
Percent high school graduate or higher:	X	X	98.6%	+/- 0.8	High
Percent bachelor's degree or higher:	X	X	73.2%	+/- 2.8	High
VETERAN STATUS					
Civilian population 18 years and over:	24,670	+/- 901	100%	X	High
Civilian veterans	1,141	+/- 211	4.6%	+/-0.8	High

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION					
Total Civilian Noninstitutionalized Population	28,500	+/- 977	100%	X	High
With a disability	1,574	+/- 299	5.5%	+/-1	High
Under 18 years	3,879	+/- 281	100%	X	High
With a disability	26	+/- 43	0.7%	+/-1.1	Low
18 to 64 years	22,330	+/- 915	100%	X	High
With a disability	928	+/- 269	4.2%	+/-1.2	Moderate
65 years and over	2,291	+/- 290	100%	X	High
With a disability	620	+/- 218	27.1%	+/-8.9	Moderate
RESIDENCE 1 YEAR AGO					
Population 1 year and over:	28,252	+/- 959	100%	X	High
Same house	20,536	+/- 882	72.7%	+/-1.9	High
Different house in the U.S.	7,425	+/- 988	26.3%	+/-3.4	High
Same county	5,345	+/- 816	18.9%	+/-2.8	High
Different county	2,080	+/- 593	7.4%	+/-2.1	Moderate
Same state	773	+/- 323	2.7%	+/-1.1	Moderate
Different state	1,307	+/- 516	4.6%	+/-1.8	Moderate
Abroad	291	+/- 151	1.0%	+/-0.5	Moderate

DP02 Selected Social Characteristics, 2009-2013 American Community Survey

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
PLACE OF BIRTH					
Total Population:	28,580	+/- 981	100%	X	High
Native	25,939	+/- 962	90.8%	+/-1.3	High
Born in the United States	25,388	+/- 965	88.8%	+/-1.5	High
State of residence	12,284	+/- 794	43.0%	+/-2.4	High
Different state	13,104	+/- 758	45.9%	+/-2.1	High
Born in Puerto Rico, U.S. Island areas, or born abroad to American parents	551	+/- 174	1.9%	+/-0.6	Moderate
Foreign born	2,641	+/- 371	9.2%	+/-1.3	High
U.S. CITIZENSHIP STATUS					
Foreign-born population:	2,641	+/- 371	100%	X	High
Naturalized U.S. citizen	1,308	+/- 258	49.5%	+/-6.9	High
Not a U.S. citizen	1,333	+/- 290	50.5%	+/-8.4	Moderate
YEAR OF ENTRY					
Population born outside the United States:	3,192	+/- 426	100%	X	High
Native:	551	+/- 174	100%	X	Moderate
Entered 2010 or later	58	+/- 70	10.5%	+/-12.3	Low
Entered before 2010	493	+/- 163	89.5%	+/-8.8	Moderate
Foreign born population:	2,641	+/- 371	100%	X	High
Entered 2010 or later	172	+/- 111	6.5%	+/-4.1	Moderate
Entered before 2010	2,469	+/- 350	93.5%	+/-1.8	High
WORLD REGION OF BIRTH OF FOREIGN BORN					
Foreign-born, excluding population born at sea:	2,641	+/- 371	100%	X	High
Europe	697	+/- 205	26.4%	+/-6.8	Moderate
Asia	1,331	+/- 288	50.4%	+/-8.3	Moderate
Africa	63	+/- 65	2.4%	+/-2.4	Low
Oceania	62	+/- 41	2.3%	+/-1.5	Moderate
Latin America	282	+/- 110	10.7%	+/-3.9	Moderate
Northern America	206	+/- 85	7.8%	+/-3	Moderate
LANGUAGE SPOKEN AT HOME					
Population 5 years and over:	26,984	+/- 932	100%	X	High
English only	23,284	+/- 900	86.3%	+/-1.5	High
Language other than English	3,700	+/- 504	13.7%	+/-1.8	High
Speak English less than "very well"	686	+/- 202	2.5%	+/-0.7	Moderate
Spanish	809	+/- 249	3.0%	+/-0.9	Moderate
Speak English less than "very well"	139	+/- 83	0.5%	+/-0.3	Moderate
Other Indo-European lanugages	1,314	+/- 289	4.9%	+/-1.1	Moderate
Speak English less than "very well"	88	+/- 76	0.3%	+/-0.3	Low
Asian and Pacific Islander languages	1,517	+/- 304	5.6%	+/-1.1	Moderate
Speak English less than "very well"	459	+/- 164	1.7%	+/-0.6	Moderate
Other languages	60	+/- 56	0.2%	+/-0.2	Low
Speak English less than "very well"	0	+/-123	0.0%	+/-0.6	NC

Welsh	336	+/- 127	1.2%	+/-0.4	Moderate
West Indian (excluding Hispanic origin groups)	37	+/- 44	0.1%	+/-0.2	Low

Notes:
This is one of four reports that have been adapted from the ACS "Data Profile" (DP) Series. The four DP tables published by the Census Bureau are:
DP02 Selected Social Characteristics; DP03 Selected Economic Characteristics; DP04 Selected Housing Characteristics; DP05 Demographic and Housing Estimates.

DPD has adapted these DP tables for reporting ACS estimates for locally-defined geographies. The locally defined areas covered in these reports are made up of multiple census tracts (except for a few Community Reporting Areas that are made up of only one Census Tract each), therefore estimates shown for these geographies are based on aggregating estimates for multiple census tracts. For ease of calculation, medians are the average of the medians.

[1]The ACS is a sample survey and as such, estimates carry sampling error. Margins of error (MOEs) provide a measure of sampling error

The MOEs displayed for the aggregated estimates in these reports could only be approximated using the formulas provided by the Census Bureau. These formulas do not account for "covariance" (or inter-relationship) between the aggregated estimates, and can understate or—more commonly—overstate the margins of error. In some cases, actual MOEs may be much different than approximated.

MOEs of +/- 0.1 and below are displayed as +/- 0.1 based on Census Bureau convention.

[2] The reliability indicator of High, Moderate, or Low is meant to provide a general sense of an estimate's reliability. Data users will need to use discretion in identifying the level of reliability appropriate for their purposes.

"High" reliability: MOE is less than or equal to 20% of the estimate. Indicates that sampling error is small relative to the size of the estimate. Flagged green.
"Moderate" reliability: MOE is between 20% and 66.7% of the estimate. Flagged yellow to indicate that the estimate should be used with caution.
"Low" reliability: MOE is over 66.7% of the estimate. Flagged red to warn that sampling error is large relative to the estimate and that the estimate is very unreliable.
"NC": Estimate is 0. Reliability cannot be calculated.

Percent Margin of Error "W" value indicates the standard formula for estimating the percent MOE could not be applied (due to negative value under square root).

For more about MOEs, see Census Bureau notes below. For formulas, see "American Community Survey Multiyear Accuracy of the Data (3-year 2008-2010 and 5-year 2006-2010)," http://www.census.gov/acs/www/Downloads/data_documentation/Accuracy/MultiyearACSAccuracyofData2010.pdf.)

Census Bureau notes for DP02:
Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2009-2013 American Community Survey (ACS) data generally reflect the December 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:
1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available."

Notes:
This is one of four reports that have been adapted from the ACS "Data Profile" (DP) Series. The four DP tables published by the Census Bureau are:
DP02 Selected Social Characteristics; DP03 Selected Economic Characteristics; DP04 Selected Housing Characteristics; DP05 Demographic and Housing Estimates.

DPD has adapted these DP tables for reporting ACS estimates for locally-defined geographies. The locally defined areas covered in these reports are made up of multiple census tracts (except for a few Community Reporting Areas that are made up of only one Census Tract each), therefore estimates shown for these geographies are based on aggregating estimates for multiple census tracts. For ease of calculation, medians are the average of the medians.

[1]The ACS is a sample survey and as such, estimates carry sampling error. Margins of error (MOEs) provide a measure of sampling error

The MOEs displayed for the aggregated estimates in these reports could only be approximated using the formulas provided by the Census Bureau. These formulas do not account for "covariance" (or inter-relationship) between the aggregated estimates, and can understate or—more commonly—overstate the margins of error. In some cases, actual MOEs may be much different than approximated.

MOEs of +/- 0.1 and below are displayed as +/- 0.1 based on Census Bureau convention.

[2] The reliability indicator of High, Moderate, or Low is meant to provide a general sense of an estimate's reliability. Data users will need to use discretion in identifying the level of reliability appropriate for their purposes.

"High" reliability: MOE is less than or equal to 20% of the estimate. Indicates that sampling error is small relative to the size of the estimate. Flagged green.
"Moderate" reliability: MOE is between 20% and 66.7% of the estimate. Flagged yellow to indicate that the estimate should be used with caution.
"Low" reliability: MOE is over 66.7% of the estimate. Flagged red to warn that sampling error is large relative to the estimate and that the estimate is very unreliable.
"NC": Estimate is 0. Reliability cannot be calculated.

Percent Margin of Error "W" value indicates the standard formula for estimating the percent MOE could not be applied (due to negative value under square root).

For more about MOEs, see Census Bureau notes below. For formulas, see "American Community Survey Multiyear Accuracy of the Data (3-year 2008-2010 and 5-year 2006-2010)," http://www.census.gov/acs/www/Downloads/data_documentation/Accuracy/MultiyearACSAccuracyofData2010.pdf.)

Census Bureau notes for DP03:
There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Census occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC). The Census occupation codes for 2010 and later years are based on the 2010 revision of the SOC. To allow for the creation of 2009-2013 tables, occupation data in the multiyear files (2009-2013) were recoded to 2013 Census occupation codes. We recommend using caution when comparing data coded using 2013 Census occupation codes with data coded using Census occupation codes prior to 2010. For more information on the Census occupation code changes, please visit our website at http://www.census.gov/people/io/methodology/.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2009-2013 and 2011-2013 tables, industry data in the multiyear files (2009-2013 and 2011-2013) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at http://www.census.gov/people/io/methodology/.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:
1. An '*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available."

$400 or more	1,220	+/- 175	91.5%	+/-5	High
Median (dollars)	676	+/- 29	X	X	High
SELECTED MONTHLY OWNER COSTS AS A PERCENTAGE OF HOUSEHOLD INCOME (SMOCAPI)					
Housing units with a mortgage (excluding units where SMOCAPI cannot be computed):	4,809	+/- 308	100%	X	High
Less than 20.0 percent	1,936	+/- 243	40.3%	+/-4.3	High
20.0 to 24.9 percent	839	+/- 177	17.4%	+/-3.5	Moderate
25.0 to 29.9 percent	441	+/- 142	9.2%	+/-2.9	Moderate
30.0 to 34.9 percent	429	+/- 144	8.9%	+/-2.9	Moderate
35.0 percent or more	1,164	+/- 199	24.2%	+/-3.8	High
Not computed	0	+/-123	X	X	NC
Housing units without a mortgage (excluding units where SMOCAPI cannot be computed):	1,324	+/- 176	100%	X	High
Less than 10.0 percent	586	+/- 141	44.3%	+/-8.9	Moderate
10.0 to 14.9 percent	249	+/- 84	18.8%	+/-5.8	Moderate
15.0 to 19.9 percent	235	+/- 91	17.7%	+/-6.5	Moderate
20.0 to 24.9 percent	105	+/- 61	7.9%	+/-4.5	Moderate
25.0 to 29.9 percent	65	+/- 49	4.9%	+/-3.6	Low
30.0 to 34.9 percent	45	+/- 59	3.4%	+/-4.4	Low
35.0 percent or more	39	+/- 40	2.9%	+/-3	Low
Not computed	9	+/- 37	X	X	Low
GROSS RENT					
Occupied units paying rent:	5,954	+/- 332	100%	X	High
Less than $200	34	+/- 49	0.6%	+/-0.8	Low
$200 to $299	92	+/- 64	1.5%	+/-1.1	Low
$300 to $499	120	+/- 69	2.0%	+/-1.2	Moderate
$500 to $749	508	+/- 155	8.5%	+/-2.6	Moderate
$750 to $999	1,085	+/- 229	18.2%	+/-3.7	Moderate
$1,000 to $1,499	2,060	+/- 275	34.6%	+/-4.2	High
$1,500 or more	2,055	+/- 304	34.5%	+/-4.7	High
Median gross rent (dollars)	1,308	+/- 78	X	X	High
No cash rent paid:	48	+/- 47	100%	X	Low

Green Lake - Roosevelt

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)					
Occupied units paying rent (excluding units where GRAPI cannot be computed):	5,841	+/- 351	100%	X	High
Less than 15.0 percent	733	+/- 207	12.5%	+/-3.5	Moderate
15.0 to 19.9 percent	823	+/- 205	14.1%	+/-3.4	Moderate
20.0 to 24.9 percent	707	+/- 196	12.1%	+/-3.3	Moderate
25.0 to 29.9 percent	684	+/- 169	11.7%	+/-2.8	Moderate
30.0 to 34.9 percent	605	+/- 182	10.4%	+/-3.1	Moderate
35.0 percent or more	2,289	+/- 277	39.2%	+/-4.1	High
Not computed	161	+/- 101	X	X	Moderate

Notes:
This is one of four reports that have been adapted from the ACS "Data Profile" (DP) Series. The four DP tables published by the Census Bureau are:
DP02 Selected Social Characteristics; DP03 Selected Economic Characteristics; DP04 Selected Housing Characteristics; DP05 Demographic and Housing Estimates.

DPD has adapted these DP tables for reporting ACS estimates for locally-defined geographies. The locally defined areas covered in these reports are made up of multiple census tracts (except for a few Community Reporting Areas that are made up of only one Census Tract each), therefore estimates shown for these geographies are based on aggregating estimates for multiple census tracts. For ease of calculation, medians are the average of the medians.

[1]The ACS is a sample survey and as such, estimates carry sampling error. Margins of error (MOEs) provide a measure of sampling error

The MOEs displayed for the aggregated estimates in these reports could only be approximated using the formulas provided by the Census Bureau. These formulas do not account for "covariance" (or inter-relationship) between the aggregated estimates, and can understate or—more commonly—overstate the margins of error. In some cases, actual MOEs may be much different than approximated.

MOEs of +/- 0.1 and below are displayed as +/- 0.1 based on Census Bureau convention.

[2] The reliability indicator of High, Moderate, or Low is meant to provide a general sense of an estimate's reliability. Data users will need to use discretion in identifying the level of reliability appropriate for their purposes.

"High" reliability: MOE is less than or equal to 20% of the estimate. Indicates that sampling error is small relative to the size of the estimate. Flagged green.
"Moderate" reliability: MOE is between 20% and 66.7% of the estimate. Flagged yellow to indicate that the estimate should be used with caution.
"Low" reliability: MOE is over 66.7% of the estimate. Flagged red to warn that sampling error is large relative to the estimate and that the estimate is very unreliable.
"NC": Estimate is 0. Reliability cannot be calculated.

Percent Margin of Error "W" value indicates the standard formula for estimating the percent MOE could not be applied (due to negative value under square root).

For more about MOEs, see Census Bureau notes below. For formulas, see "American Community Survey Multiyear Accuracy of the Data (3-year 2008-2010 and 5-year 2006-2010)," http://www.census.gov/acs/www/Downloads/data_documentation/Accuracy/MultiyearACSAccuracyofData2010.pdf.)

Census Bureau notes for DP04:
The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with/without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling error, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:
1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available."

HOUSING

Subject	Estimate	Estimate Margin of Error [1]	Percent	Percent Margin of Error [1]	Reliability [2]
Total Housing Units:	12,788	+/- 180	100%	X	High

Notes:

This is one of four reports that have been adapted from the ACS "Data Profile" (DP) Series. The four DP tables published by the Census Bureau are:
DP02 Selected Social Characteristics; DP03 Selected Economic Characteristics; DP04 Selected Housing Characteristics; DP05 Demographic and Housing Estimates.

DPD has adapted these DP tables for reporting ACS estimates for locally-defined geographies. The locally defined areas covered in these reports are made up of multiple census tracts (except for a few Community Reporting Areas that are made up of only one Census Tract each), therefore estimates shown for these geographies are based on aggregating estimates for multiple census tracts. For ease of calculation, medians are the average of the medians.

[1] The ACS is a sample survey and as such, estimates carry sampling error. Margins of error (MOEs) provide a measure of sampling error

The MOEs displayed for the aggregated estimates in these reports could only be approximated using the formulas provided by the Census Bureau. These formulas do not account for "covariance" (or inter-relationship) between the aggregated estimates, and can understate or—more commonly—overstate the margins of error. In some cases, actual MOEs may be much different than approximated.

MOEs of +/- 0.1 and below are displayed as +/- 0.1 based on Census Bureau convention.

[2] The reliability indicator of High, Moderate, or Low is meant to provide a general sense of an estimate's reliability. Data users will need to use discretion in identifying the level of reliability appropriate for their purposes.

"High" reliability: MOE is less than or equal to 20% of the estimate. Indicates that sampling error is small relative to the size of the estimate. Flagged green.
"Moderate" reliability: MOE is between 20% and 66.7% of the estimate. Flagged yellow to indicate that the estimate should be used with caution.
"Low" reliability: MOE is over 66.7% of the estimate. Flagged red to warn that sampling error is large relative to the estimate and that the estimate is very unreliable.
"NC": Estimate is 0. Reliability cannot be calculated.

Percent Margin of Error "W" value indicates the standard formula for estimating the percent MOE could not be applied (due to negative value under square root).

For more about MOEs, see Census Bureau notes below. For formulas, see "American Community Survey Multiyear Accuracy of the Data (3-year 2008-2010 and 5-year 2006-2010)," http://www.census.gov/acs/www/Downloads/data_documentation/Accuracy/MultiyearACSAccuracyofData2010.pdf.)

Census Bureau notes for DP05:

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see http://www.census.gov/population/www/socdemo/hispanic/reports.html.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:
1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available."
