# Foreword

---

This report contains selected tables from Summary File 3 for Washington State. Summary File 3 contains sample characteristics from the Census long form that was filled out by approximately 1 in 6 persons nationally. The Washington State file became available on September 17, 2002.

This report includes tables related to the disability status for persons by age and sex, and by employment and poverty status, and are detailed below. See Appendix A for subject and geographic definitions. The geographic coverage is for King, Kitsap, Pierce, and Snohomish counties. There are separate sections for counties, incorporated places and Census Designated Places (CDP), and census tracts.

Appendices document the change in Census Tract geography between 1990 and 2000, and compare 1990 and 2000 population based on 1990 Census Tract geography. The printed report includes Census Tract and Census Designated Place maps. On the PSRC website, electronic versions of these maps are available separately from the downloadable PDF version of this report.

## Tables in this report

- P42. SEX BY AGE BY DISABILITY STATUS BY EMPLOYMENT STATUS FOR THE CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER  
Universe: Civilian noninstitutionalized population 5 years and over
- PCT26. SEX BY AGE BY TYPES OF DISABILITY FOR THE CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER  
Universe: Civilian noninstitutionalized population 5 years and over
- PCT34. SEX BY AGE BY DISABILITY STATUS BY POVERTY STATUS FOR THE CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER  
Universe: Civilian noninstitutionalized population 5 years and over for whom poverty status is determined

## Limitations of the Data

The data contained in this report are based on the Census 2000 sample. The data are estimates of the actual figures that would have been obtained from a complete count. Estimates derived from a sample are expected to be different from the 100-percent figures because they are subject to sampling and nonsampling errors. Sampling error in data arises from the selection of people and housing units included in the sample. Nonsampling error affects both sample and 100-percent data and is introduced as a result of errors that may occur during the data collection and processing phases of the census.

For more information, please refer to Chapter 8., Accuracy of the Data in *TECHNICAL DOCUMENTATION: Census 2000 Summary File 3* available at the Census website <http://www.census.gov/prod/cen2000/index.html>.

## **Data Availability**

Orders for additional printed reports may be directed to the Regional Council Information Center at (206) 464-7532. Electronic data files may also be downloaded from the Regional Council's website at <http://www.psrc.org/>.

# Subject Definitions

## Age

The age classification is based on the age of the person in complete years as of April 1, 2000. The age of the person usually was derived from their date of birth information

## Disability Status

The data on disability status were derived from answers to long-form questionnaire Items 16 and 17. Item 16 was a two-part question that asked about the existence of the following long-lasting conditions: (a) blindness, deafness, or a severe vision or hearing impairment (sensory disability) and (b) a condition that substantially limits one or more basic physical activities, such as walking, climbing stairs, reaching, lifting, or carrying (physical disability).

Item 17 was a four-part question that asked if the individual had a physical, mental, or emotional condition lasting 6 months or more that made it difficult to perform certain activities. The four activity categories were:

- (a) learning, remembering, or concentrating (mental disability);
- (b) dressing, bathing, or getting around inside the home (self-care disability);
- (c) going outside the home alone to shop or visit a doctor 's office (going outside the home disability); and
- (d) working at a job or business (employment disability).

## Noninstitutionalized Population

The noninstitutionalized population includes all people who live in group quarters other than institutions, such as college dormitories, military quarters, and group homes. Also included are staff residing at institutional group quarters.

## EMPLOYMENT STATUS

The data on employment status (referred to as labor force status in previous censuses), were derived from answers to long-form questionnaire Items 21 and 25, which were asked of a sample of the population 15 years old and over. The series of questions on employment status was designed to identify, in this sequence: (1) people who worked at any time during the reference week; (2) people who did not work during the reference week, but who had jobs or businesses from which they were temporarily absent (excluding people on layoff); (3) people on temporary layoff who expected to be recalled to work within the next 6 months or who had been given a date to return to work, and who were available for work during the reference week; and (4) people who did not work during the reference week, who had looked for work during the reference week or the three previous weeks, and who were available for work during the reference week. (For more information, see "Reference Week.")

The employment status data shown in Census 2000 tabulations relate to people 16 years old and over. In the 1940, 1950, and 1960 censuses, employment status data were presented for people 14 years old and over. The change in the universe was made in 1970 to agree with the official measurement of the labor force as revised in January 1967 by the U.S. Department of Labor. The 1970 census was the last to show employment data for people 14 and 15 years old.

**Employed.** All civilians 16 years old and over who were either (1) “at work ”—those who did any work at all during the reference week as paid employees, worked in their own business or profession, worked on their own farm, or worked 15 hours or more as unpaid workers on a family farm or in a family business; or (2) were “with a job but not at work ”—those who did not work during the reference week, but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, industrial dispute, vacation, or other personal reasons. Excluded from the employed are people whose only activity consisted of work around their own house (painting, repairing, or own home housework) or unpaid volunteer work for religious, charitable, and similar organizations. Also excluded are all institutionalized people and people on active duty in the United States Armed Forces.

**Unemployed.** All civilians 16 years old and over were classified as unemployed if they were neither “at work ” nor “with a job but not at work ” during the reference week, were looking for work during the last 4 weeks, and were available to start a job. Also included as unemployed were civilians 16 years old and over who: did not work at all during the reference week, were on temporary layoff from a job, had been informed that they would be recalled to work within the next 6 months or had been given a date to return to work, and were available to return to work during the reference week, except for temporary illness.

## POVERTY STATUS IN 1999

The poverty data were derived from answers to long-form questionnaire Items 31 and 32, the same questions used to derive income data. (The Census Bureau uses the federal government ’s official poverty definition. The Social Security Administration (SSA) developed the original poverty definition in 1964, which federal interagency committees subsequently revised in 1969 and 1980. The Office of Management and Budget ’s (OMB ’s) *Directive 14* prescribes this definition as the official poverty measure for federal agencies to use in their *statistical* work.

### Derivation of the Current Poverty Measure

When the Social Security Administration (SSA) created the poverty definition in 1964, it focused on family food consumption. The U.S. Department of Agriculture (USDA) used its data about the nutritional needs of children and adults to construct food plans for families. Within each food plan, dollar amounts varied according to the total number of people in the family and the family ’s composition, such as the number of children within each family. The cheapest of these plans, the Economy Food Plan, was designed to address the dietary needs of families on an austere budget. Since the USDA’s 1955 Food Consumption Survey showed that families of three or more people across all income levels spent roughly one-third of their income on food, the SSA multiplied the cost of the Economy Food Plan by three to obtain dollar figures for the poverty thresholds. Since the Economy Food Plan budgets varied by family size and composition, so too did the poverty thresholds. For 2-person families, the thresholds were

adjusted by slightly higher factors because those households had higher fixed costs. Thresholds for unrelated individuals were calculated as a fixed proportion of the corresponding thresholds for 2-person families.

The poverty thresholds are revised annually to allow for changes in the cost of living as reflected in the Consumer Price Index (CPI-U). The poverty thresholds are the same for all parts of the country—they are not adjusted for regional, state or local variations in the cost of living. For a detailed discussion of the poverty definition, see U.S. Census Bureau, Current Population Reports, “*Poverty in the United States: 1999*”, P-60-210.

### How Poverty Status is Determined

The poverty status of families and unrelated individuals in 1999 was determined using 48 thresholds (income cutoffs) arranged in a two dimensional matrix. The matrix consists of family size (from 1 person to 9 or more people) cross-classified by presence and number of family members under 18 years old (from no children present to 8 or more children present). Unrelated individuals and 2-person families were further differentiated by the age of the reference person (RP)(under 65 years old and 65 years old and over).

To determine a person’s poverty status, one compares the person’s total family income with the poverty threshold appropriate for that person’s family size and composition (see table below). If the total income of that person’s family is less than the threshold appropriate for that family, then the person is considered poor, together with every member of his or her family. If a person is not living with anyone related by birth, marriage, or adoption, then the person’s own income is compared with his or her poverty threshold.

**Weighted average thresholds.** Even though the official poverty data are based on the 48 thresholds arranged by family size and number of children within the family, data users often want to get an idea of the “average” threshold for a given family size. The weighted average thresholds provide that summary. They are weighted averages because for any given family size, families with a certain number of children may be more or less common than families with a different number of children. In other words, among 3-person families, there are more families with two adults and one child than families with three adults. To get the weighted average threshold for families of a particular size, multiply each threshold by the number of families for whom that threshold applies; then add up those products, and divide by the total number of families who are of that family size.

For example, for 3-person families, 1999 weighted thresholds were calculated in the following way using information from the 2000 Current Population Survey:

Family type	Number of families		Threshold		
No children (three adults)	5,213	*	\$13,032	=	\$67,935,816
One child (two adults)	8,208	*	\$13,410	=	\$110,069,280
Two children (one adult)	2,656	*	\$13,423	=	\$35,651,488
Totals	16,077				\$213,656,584

Source: Current Population Survey, March 2000.

Dividing \$213,656,584 by 16,077 (the total number of 3-person families) yields \$13,290, the weighted average threshold for 3-person families. Please note that the thresholds are weighted not just by the number of poor families, but by all families for which the thresholds apply: the thresholds are used to determine which families are *at* or *above* poverty, as well as below poverty.

**Individuals for whom poverty status is determined.** Poverty status was determined for all people except institutionalized people, people in military group quarters, people in college dormitories, and unrelated individuals under 15 years old. These groups also were excluded from the numerator and denominator when calculating poverty rates. They are considered neither “poor” nor “nonpoor”.

**Specified poverty levels.** For various reasons, the official poverty definition does not satisfy all the needs of data users. Therefore, some of the data reflect the number of people below different percentages of the poverty level. These specified poverty levels are obtained by multiplying the official thresholds by the appropriate factor. For example, the average income cutoff at 125 percent of the poverty level was \$21,286 ( $\$17,029 \times 1.25$ ) in 1999 for family of four people.

## Poverty Threshold in 1999, by Size of Family and Number of Related Children Under 18 Years Old

(Dollars)

Size of family unit	Weighted average threshold	Related children under 18 years old								
		None	One	Two	Three	Four	Five	Six	Seven	Eight or more
One person (unrelated individual) .....	8501									
Under 65 years old ....	8667	8667

## Geographic Definitions

### Census Designated Place (CDP)

Census designated places (CDPs) are delineated for each decennial census as the statistical counterparts of incorporated places. CDPs are delineated to provide census data for concentrations of population, housing, and commercial structures that are identifiable by name but are not within an incorporated place. CDP boundaries usually are defined in cooperation with state, local, and tribal officials. These boundaries, which usually coincide with visible features or the boundary of an adjacent incorporated place or other legal entity boundary, have no legal status, nor do these places have officials elected to serve traditional municipal functions. CDP boundaries may change from one decennial census to the next with changes in the settlement pattern; a CDP with the same name as in an earlier census does not necessarily have the same boundary.

For Census 2000, for the first time, CDPs did not need to meet a minimum population threshold to qualify for tabulation of census data. For the 1990 census and earlier censuses, the U.S. Census Bureau required CDPs to qualify on the basis of various minimum population size criteria.

## FIPS Codes

Federal Information Processing Standard (FIPS, provides a 2-character FIPS State code and a 5-character FIPS numeric code to uniquely identify each entity contained in a list of names of incorporated places, other communities and settlements, primary county divisions (such as townships, New England towns, and census county divisions), American Indian and Alaska Native areas, airports, military bases, national parks, post offices, and other locational entities (except natural or physical features). A 2-character class code distinguishes the different types of geographic entities. The purpose of the codes is to promote the interchange of formatted, machine-sensible data.

## Split Cities

Some cities have extended their boundaries so they cross county boundaries. In the table of Incorporated Places (Table 2), there is a separate listing for each part of such a city located in a single county. Table 4 contains the total population for these split cities. The affected cities are Auburn, Bothell, Enumclaw, Milton, and Pacific.

## Metropolitan Areas

The United States Office of Management and Budget (OMB) defines metropolitan areas (MAs) according to published standards that are applied to Census Bureau data. The general concept of an MA is that of a core area containing a large population nucleus, together with adjacent communities having a high degree of economic and social integration with that core. The collective term "metropolitan area" (MA) became effective in 1990. MAs include metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs).

**Metropolitan Statistical Area (MSA)** — The 1990 standards provide that each newly qualifying MSA must include at least:

- one city with 50,000 or more inhabitants, or
- a Census Bureau-defined urbanized area (of at least 50,000 inhabitants) and a total metropolitan population of at least 100,000.

Under the standards, the county (or counties) that contains the largest city becomes the "central county" (counties), along with any adjacent counties that have at least 50 percent of their population in the urbanized area surrounding the largest city. Additional "outlying counties" are included in the MSA if they meet specified requirements of commuting to the central counties and other selected requirements of metropolitan character (such as population density and percent urban). There

**Consolidated Metropolitan Statistical Area (CMSA)** — An area that meets the requirements for recognition as an MSA and also has a population of one million or more may be recognized as a CMSA if:

- separate component areas (see PMSA below) can be identified within the entire area by meeting statistical criteria specified in the standards, and
- local opinion indicates there is support for the component areas.

**Primary Metropolitan Statistical Area (PMSA)** —The component area(s) of a CMSA. PMSAs, like the CMSAs that contain them, are composed of entire counties. If no PMSAs are recognized, the entire area is designated as an MSA.

The Puget Sound region is covered by the following metropolitan areas:

SEATTLE-TACOMA-BREMERTON,WA CMSA

<i>FIPS code</i>	<i>Area Title</i>	<i>Definition</i>	<i>Central City</i>
1150	BREMERTON,WA PMSA	Kitsap County	Bremerton

# Appendix C: Change in Population

## APPENDIX C: Change in Census Tract Population, 1990-2000

This table provides population for 1990 and 2000 based on 1990 census tract geography.

In most cases where a 1990 tract was split in 2000, the 2000 population for those split tracts were aggregated. In cases where two 1990 tracts were merged in 2000, or where 1990 boundaries were moved in 2000, the 2000 population was obtained by aggregating 2000 block population by the appropriate 1990 geography. Those tracts are in **bold** and the aggregated population is in *italics*.

\* This column shows the number of 2000 tracts formed from the 1990 tract. '0' indicates the tract was merged into a neighboring tract in 2000. See Appendix B for census tract correspondence.
