

## WATER'S EDGE 2015 ENERGY PERFORMANCE PROFILE

9530 RAINIER AVE S, SEATTLE, WA 98118 | Square Feet: 20,967 | Type: Mid-rise Multifamily Building (5-9 Floors)  
Units: 29 | Benchmarking ID: 25530 | EPA Building ID: 3472359

Thank you for benchmarking your building's energy use with the City of Seattle! This energy performance profile shows how your building is doing **year to year**, and how it compares to **similar mid-rise multifamily buildings** in Seattle. We appreciate your continued leadership in helping the City meet its energy reduction targets.

### YOU CURRENTLY SPEND

**\$0.40** / SF

**ANNUALLY ON ENERGY\***

or \$8,410 per year.

Your building's EUI increased  
(0.6 KBTU/SF) from 2014 to  
2015.\*

\* The information in this report is self-reported and subject to verification. Costs and potential savings are estimated at \$0.0156 per kBtu using the average mix of fuel sources (electric, gas, steam) for a mid-rise multifamily building. Average EUI is based on Seattle median EUI, not normalized for weather.

## ENERGY STAR® FOR MULTIFAMILY PROPERTIES

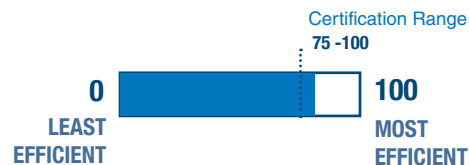

The ENERGY STAR score (for multifamily with 20+ units) shows your building's energy performance as a whole by taking the number of floors, bedrooms and units per SF into account. A recent survey of tenants showed that 75% are interested in the green certifications of their apartment building. Scores of 75 or higher may be eligible to apply for ENERGY STAR certification.
