

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the [SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS \(part D\)](#). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [\[HELP\]](#)

1. Name of proposed project, if applicable:
Little Saigon Park
2. Name of applicant:
City of Seattle, Seattle Parks and Recreation

3. Address and phone number of applicant and contact person:
Roma Shah, Captial Projects Coordinator
c/o Seattle Parks and Recreation
300 Elliott Ave W, Suite 100 Seattle WA 98119
206-790-0744

4. Date checklist prepared:
March 23, 2022

5. Agency requesting checklist:
City of Seattle, Seattle Parks and Recreation (SPR)

6. Proposed timing or schedule (including phasing, if applicable):
Design and Permit Winter 2021 to Winter 2022
Construction End of 2022- Late Summer 2023

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain. Additional activity propoed through increased park activation programming.
No.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.
Geotech report and memo, King County Individual Authorization for Construction Dewatering.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.
The park falls within International Special Review District. The park design is subject to review and approval by the ISRD Board to minimize the potential for adverse impacts to historic properties and structures within the District. The ISRD is one of Seattle's eight historic districts. A Certificate of Approval is required for the construction of the park. The project received ISRD approval on 4/11/2022.

10. List any government approvals or permits that will be needed for your proposal, if known.
City of Seattle, Side Sewer Permit
City of Seattle, Building Permit
City of Seattle, Construction Permit
City of Seattle, International Special Review District (ISRD) Approval
King County, Individual Authorization for Construction Dewatering

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)
Development of an existing gravel parking lot into a park space for passive recreation, play and community events. The park is approximately ~11,750 SF (~.27 acres) and will provide a pedestrian and accessible path between South Jackson Street at the north and

South King Street at the south. Work includes, but is not limited to the following: temporary erosion and sedimentation control, contaminated soil removal, demolition, shoring, earthwork, storm drainage utilities, concrete pavement, reinforced concrete retaining walls, rubber safety surfacing, play feature installation, irrigation, imported soils, planting, site furnishings, and lighting.

Through the Office of Arts and Culture artwork designed by Artist Kalina Chung will be installed by others. Artwork is located at the north end of the site, in the overlook plaza, adjacent to S. Jackson Street

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

Little Saigon Park 1224 South King Street Seattle WA 98144

TaxParcel 817010-0140-06 AND 817010-0175-04

Legal Description:

LOT 6, BLOCK 2 SYNDICATE ADDITION LESS ST;

LOT 13, BLOCK 2 SYNDICATE ADDITION

(PER SPECIAL WARRANTY DEED RECORDING NUMBER 20131109001181)

LOTS 6 AND 13, BLOCK 2, SYNDICATE ADDITION TO THE CITY OF SEATTLE, ACCORDING TO THE PLAT THEREOF RECORDED IN VOLUME 2 OF PLATS, PAGE 44, IN KING COUNTY, WASHINGTON; EXCEPT THE NORTH 15 FEET OF SAID LOT 6 CONDEMNED IN KING COUNTY SUPERIOR COURT CAUSE NUMBER 56407 FOR WIDENING OF SOUTH JACKSON STREET.

B. Environmental Elements [\[HELP\]](#)

1. Earth [\[help\]](#)

- a. General description of the site: **The Little Saigon Park is a landbank site. Currently is being used as a parking lot.** Historical documents indicate that the site's former land uses included a laundry and residential development. Nearby parcels had historic service stations with assumed underground storage tanks (USTs), as well as automobile repair and machining. Lead and PCEs were detected onsite. Partial clean up and soil removal conducted in 10/2014. Lead and HVOCs remain in soils within the slope at the northern end of the site, which could not be excavated without shoring the slope. Ground water beneath the site is still likely impacted by HVOCs. The low concentrations of PCE detected in site soils likely originate from soil vapor migrating from the underlying HVOC-impacted ground water.

(circle one): **Flat**, rolling, hilly, **steep slopes**, mountainous, **other**

- b. What is the steepest slope on the site (approximate percent slope)?
The steepest slopes on the site are 45% at the north end of the site.

- c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Soils observed at the site were primarily fill. The fill deposits consist of very loose to loose sand with silt and silty sand with varying amounts of gravel and organics and soft to medium stiff, silt with sand, few gravel and scattered organics and debris.

Native deposits were encountered below the fill deposits at limited locations, at depths of 9.5 and 4.5 feet bgs respectively. The native deposits consist of loose to very dense sand with varying amounts of silt and gravel and medium stiff to hard silt with varying amounts of sand and gravel.

- d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe. **No.**
- e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill. **The entire site will be regraded in order to make the majority of the site ADA accessible. Extensive excavation is required on the northern end of the site in order to remove contaminated and loose fill soils. Structural fill will be used to provide a suitable base for the accessible ramp to prevent settling. The project will require approximately 420 CY of excavation, 550 CY of borrow/backfill, and 230 CY of planting soils. Structural fill and planting soils will be sourced from local soil distributors such as PacificTopsoils, Cedar Grove, or an approved equal.**
- f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe. **Surface erosion is always a possibility as a result of clearing and grading operations. Minor localized erosion may occur as a result of construction activities, however these impacts will be prevented from extending beyond the project limits, groundwater, or local utilities by best management practices. Use of on-site erosion control measures such as a stabilized construction entrance/exit, catch basin inlet protection, interceptor swales, triangular silt dike, silt fencing, and other standard construction erosion control practices, as well as seasonal limitations of construction will control potential on-site erosion.**
- g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)? **Approximately 60% of the site will be covered with impervious surfaces. This area is mainly composed of concrete ramps, stairs, and pathways, but also includes concrete plazas, amphitheater seating, and a play area with rubber safety surfacing over a concrete base. The rest of the site will be covered by vegetation.**
- h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any: **During the construction phase, appropriate temporary erosion control best management practices will be implemented and maintained to control erosion. New planting will be installed to assist with erosion control.**

2. Air [\[help\]](#)

- a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known. **During construction, emissions to the air in the form of dust and exhaust from transportation and construction equipment can be expected to occur. Earth moving activities and resulting airborne dust are restricted by State and Local Code, however there will be an increase in passenger vehicle trips to and from the site during the construction work week. No additional emissions than currently exist on the site would result following completion of construction.**
- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe. **None known.**
- c. Proposed measures to reduce or control emissions or other impacts to air, if any: **All work will be performed in compliance with State and Local Code, and permitting requirements.**

3. Water [\[help\]](#)

a. Surface Water: [\[help\]](#)

- 1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into. **No.**
- 2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans. **No.**
- 3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material. **There will be no fill or dredging.**
- 4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known. **No.**
- 5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan. **No, the project site is not within a floodplain.**
- 6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge. **No, the project does not propose discharges of waste materials to surface waters.**

b. Ground Water: [\[help\]](#)

- 1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known. **No, there are no onsite wells and water service is through Seattle Public Utilities.**
- 2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the

following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve. **No waste materials will be discharged into the ground water due this project.**

c. Water runoff (including stormwater):

- 1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe. **The source of runoff will come from impervious hardscape areas. All surface runoff will be collected by catch basins, trench drains and area drains, and will be routed via solid pipes to three bioretention facilities. These bioretention facilities will also receive some flow from softscape site areas. The bioretention facilities will drain into an onsite catch basin with a 2' sump and upturned elbow. The catch basin connects to an existing side sewer which drains to the public combined sewer.**
- 2) Could waste materials enter ground or surface waters? If so, generally describe. **No waste material will be discharged to groundwater as a result of the proposed project.**
- 3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe. **The proposal will enhance onsite drainage control by treating and slowing down stormwater leaving the site through the use of bioretention planters.**

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any: **During the construction phase, appropriate temporary erosion control best management practices will be implemented and maintained to control runoff. Permanent measures to reduce and control runoff from the completed project will include catch basins, underground conveyance pipe, and three bioretention facilities.**

4. **Plants** [\[help\]](#)

a. Check the types of vegetation found on the site:

- deciduous tree: alder, maple, aspen, other
- evergreen tree: fir, cedar, pine, other
- shrubs
- grass
- pasture
- crop or grain
- Orchards, vineyards or other permanent crops.
- wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
- water plants: water lily, eelgrass, milfoil, other
- other types of vegetation

b. What kind and amount of vegetation will be removed or altered? **Himalayan blackberry and grasses will be removed from the northern sloped area and pockets along the east edge. An 11" caliper Bradford Pear tree, an 8" caliper Cherry hybrid tree, and eight small 2" caliper Serviceberry trees will be removed where in conflict with the proposed design. The majority of the site is covered in crushed gravel.**

- c. List threatened and endangered species known to be on or near the site. **There are no known threatened or endangered species on or near the site.**
- d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any: **Diverse plantings will be installed per the project's proposed design. This includes multiple deciduous tree species, bioretention plantings, shrubs, perennials and turf grass. Plants are selected based cultural significance to the neighborhood (Little Saigon) and on the principle right plant, right place and their adaptability to the current and future climate of the region. Native and adaptive plants will be used.**
- e. List all noxious weeds and invasive species known to be on or near the site. **Himalayan Blackberry**

5. Animals [\[help\]](#)

- a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:
 mammals: deer, bear, elk, beaver, other:
 fish: bass, salmon, trout, herring, shellfish, other _____

BIRDS: Pigeons, Crows, Seagulls.

- b. List any threatened and endangered species known to be on or near the site. **There are no known threatened or endangered species on or near the site.**
- c. Is the site part of a migration route? If so, explain. **Seattle is within the Pacific Flyway, a major corridor for waterfowl and other migratory birds.**
- d. Proposed measures to preserve or enhance wildlife, if any: **Proposed plants have been selected for cultural significance and to increase the diversity of plant species on the site. The bioretention facilities will consist of native plant species and provide a surface water source for wildlife.**
- e. List any invasive animal species known to be on or near the site. **There are no known invasive animal species on or near the site.**

6. Energy and Natural Resources [\[help\]](#)

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc. **The local utility Seattle City Light provides electricity to the site for lighting and general convenience power. Power to the automatic irrigation system shall also be provided. Perimeter pedestrian pathway lighting is included in the proposal. No other energy sources are used on this site.**
- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe. **No. There are no structures proposed on this site that would obscure adjacent property building roofs from obtaining solar power.**

- c. What kinds of energy conservation features are included in the plans of this proposal?
List other proposed measures to reduce or control energy impacts, if any: **LED lighting would be used for pedestrian light fixtures.**

7. Environmental Health [\[help\]](#)

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe. **Please see B.1.a.**
- 1) Describe any known or possible contamination at the site from present or past uses. **Please see B.1.a.**
 - 2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity. **Please see B.1.a.**
 - 3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project. **None known.**
 - 4) Describe special emergency services that might be required. **The project health and safety plan outlines a protocol for any emergency services that could result from an accident during construction.**
 - 5) Proposed measures to reduce or control environmental health hazards, if any: **None; all appropriate regulatory requirements will be implemented during contaminated soil removal.**

b. Noise

- 1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)? **Existing ambient and peak noise levels produced off site are generally limited to traffic and neighboring commercial use, none of which will affect the project.**
- 2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site. **Short-term noise impacts from the project are all construction related and will occur as allowed under the City of Seattle Construction Permit, 7:00 a.m. - 6:00 p.m., weekdays. 9:00 a.m. - 6:00 p.m., weekends and holidays only with expressed written consent from owner.**
- 3) Proposed measures to reduce or control noise impacts, if any: Long term operation of the facility will not result in significant changes to current noise levels. **As a public park, it will generate noise typically associated with recreational activities such as children yelling and shouting and occasional crowd noise for gatherings such as picnics.**

Public Park operations have certain exemptions from the general noise ordinance. Park operations and park users are subject to Seattle Municipal Code Section 25.08.520.

8. Land and Shoreline Use [\[help\]](#)

- a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe. **Public park with play area that is within a larger commercial and multifamily area.. The project proposal will not change the existing uses. Adjacent properties include a historic Victorian Row Housing, Commercial buildings, Ding How Center and Nisei Veteran's Memorial. Improvements will serve the neighboring community.**
- b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use? **There is no documented farm or forest land use on this site.**
 - 1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how: **There are no nearby working farms or forest lands.**
- c. Describe any structures on the site. **There are no existing structures on the site.**
- d. Will any structures be demolished? If so, what? **N/A**
- e. What is the current zoning classification of the site? ? **Zone:** Downtown Mixed Residential/Commercial **(DMR/C)75/75-95.**
- f. What is the current comprehensive plan designation of the site? **City Owned Open Space**
- g. If applicable, what is the current shoreline master program designation of the site? **N/A.**
- h. Has any part of the site been classified as a critical area by the city or county? If so, specify. **No.**
- i. Approximately how many people would reside or work in the completed project? **None.**
- j. Approximately how many people would the completed project displace? **None**
- k. Proposed measures to avoid or reduce displacement impacts, if any: **None Proposed**
- L. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any: **Proposed project is maintenance and enhancement of existing land use(s).**
- m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any: **None proposed – no potential impacts to agricultural and/or forest lands.**

9. Housing [\[help\]](#)

- a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing. **None**

- b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing. **None**
- c. Proposed measures to reduce or control housing impacts, if any: **None- no impacts to housing**

10. Aesthetics [\[help\]](#)

- a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed? **N/A.**
- b. What views in the immediate vicinity would be altered or obstructed? **The views from the proposed site into the adjacent apartment complex will be buffered with trees and shrubs. The plant species have been selected to maintain sightlines to eliminate places to hide and blind spots.**
- c. Proposed measures to reduce or control aesthetic impacts, if any: **Planting has been used to buffer the proposed programming in the park from adjacent residents.**

11. Light and Glare [\[help\]](#)

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur? **Pedestrian lighting is proposed on perimeter pathway. Lighting will be on at dusk and will be off at dawn.**
- b. Could light or glare from the finished project be a safety hazard or interfere with views? **All proposed light fixtures will have light shields installed to reduce glare. The proposed path lighting is at a pedestrian scale, so it will increase the safety of pedestrians within the park by improving night time visibility.**
- c. What existing off-site sources of light or glare may affect your proposal? **None.**
- d. Proposed measures to reduce or control light and glare impacts, if any: **City of Seattle has light and glare standards (SMC23.47A.022 - Light and Glare standards) that Seattle Parks and Recreation will adhere to. The proposal utilizes high efficiency LED pedestrian lights designed to reduce light and glare impacts.**

12. Recreation [\[help\]](#)

- a. What designated and informal recreational opportunities are in the immediate vicinity? **The existing sidewalks within the neighborhood provide opportunities for walking. The nearest parks are 2-3 blocks away.**
- b. Would the proposed project displace any existing recreational uses? If so, describe. **No.**
- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any: **N/A..**

13. Historic and cultural preservation [\[help\]](#)

- a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers ? If so, specifically describe. **No**
- b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources. **None known.**
- c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.
Research tools used include:
 - **Washington State Department of Archeology and Historic Preservation WISAARD (Washington Information System for Architectural and Archeological Records Data)**
 - **City of Seattle – Seattle Municipal Archive**
 - **City of Seattle Cultural & Historical Database (data.seattle.gov)**
 - **City of Seattle GIS Data**
- d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.
See A.9.

14. Transportation [\[help\]](#)

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any. **Public streets surrounding the site include South Jackson Street to the north, South King Street to the south, Rainier Avenue to the east, and 12th Avenue to the west.**
- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop? **King County Metro serves a street car stop, First Hill line, directly north of the site on South Jackson Street. ~180 feet south of the street car south King County Metro serves a bus stop for routes 7, 14 and 106.**
- c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate? **There are no additional parking spots being provided. The site in its current state is being privately leased for parking. The leasee has not installed striping so a formal stall count is not available.**
- d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private). **ADA accessible pathway provides a mid block connection from South Jackson street, down to South King street. We anticipate this improvement to reduce pedestrian traffic at the intersections of 12th Ave and Rainier Ave.**
- e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe. **No.**

- f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates? **Vehicle trips won't change; the proposed park enhancements, would be used predominantly by local population including the adjacent residents and users of the nearby retail. Very few people drive to the park as it is not a destination facility.**
- g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe. **No - There is no nearby movement of agricultural and forest products.**
- h. Proposed measures to reduce or control transportation impacts, if any: **None.**

15. Public Services [\[help\]](#)

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe. **These services are currently provided and no additional will be needed.**
- b. Proposed measures to reduce or control direct impacts on public services, if any. **None proposed.**

16. Utilities [\[help\]](#)

- a. Circle utilities currently available at the site: **The site currently drains to a combined sewer and storm line.**
- b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed. **Electricity service is proposed for site lighting and will be provided by Seattle City Light. Water service is proposed for irrigation and will be provided by Seattle Public Utilities.**

C. Signature [\[HELP\]](#)

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: _____

Name of signee: Roma Shah

Position and Agency/Organization: Capital Projects Coordinator / Seattle Parks and Recreation
