

#### Westlake Shared Mobility Hub Wayfinding and Placemaking Project

Project Manager	Joel Miller										
Email	Joel.miller@seattle.gov										
Phone	206-684-7639										
Website	N/A										
High Level Scope	The project goal is to decrease the likelihood of SOV trips into the area near Westlake Station in Downtown Seattle using <b>wayfinding</b> and <b>placemaking</b> elements, and to understand that change through <b>field observations and survey</b> <b>work</b> . This project also seeks to increase the public's understanding of the Westlake Station area's complex transit operating environment, with the ultimate goal of getting more people to take transit for more trips.										
Scope Details	<ul> <li>Project Tasks</li> <li>Task 0 Project Management</li> <li>This is an ongoing task throughout the duration of the project involving key check- in points and channels for ongoing communication between the Consultant and City. It will include: <ul> <li>Mutually agreed upon Project Management Plan in writing by end of Week 1, including:</li> <li>Weekly call and bi-weekly in-person meetings</li> <li>Regular communication channels during business hours (email/phone) with 8-hour response-time during business hours</li> <li>SDOT Project Manager (SDOT PM) has access to all platforms and repositories used in project development</li> <li>Consultant to comply with all documentation and invoicing requirements within the solicitation</li> <li>Stakeholder engagement plan,</li> <li>Plan to incorporate SDOT feedback at each design phase for Tasks 1-4.</li> </ul> </li> <li>Task 1 Westlake Hub Wayfinding Work is meant to highlight these critical transit connections, while also highlighting connections to other transit facilities, shared mobility options, and local destinations. This work should use lighting and projected features to highlight these</li> </ul>										

Seattle Municipal Tower, 700 5<sup>th</sup> Avenue, Suite 3800, PO Box 34996, Seattle, WA 98124-4996 Tel: (206) 684-ROAD Tel: (206) 684-5000 Fax: (206) 684-5180 Web: <u>www.seattle.gov/transportation</u> An equal opportunity employer. Accommodations for people with disabilities provided on request.

8

connections. The wayfinding interventions should be located on Pine St. between 3rd and 4th Avenues and can extend to nearby areas.

#### Task 2 Westlake Hub Placemaking

The Pine St Plaza project, managed by the Downtown Seattle Association, has created a plaza area at these station entrances. This project looks to build upon these successes by creating placemaking elements to be placed in the plaza. These elements should be visually integrated with site elements, and:

- 1. Highlight the tunnel entrances to increase their visibility and legibility as a major transit hub.
- **2.** Increase seating and table capacity in the Pine St Plaza area. This seating should be integrated with a larger more permanent placemaking structure that can be left on site 24/7.
- 3. Add a covered, lockable kiosk area for Downtown Seattle Association staff members to interact with the public and provide directions and assistance as necessary, while remaining protected from inclement weather.
- 4. Protect the plaza area from vehicular traffic. Currently, removable plastic flexi-posts act as a deterrent to keep cars out of the plaza, but these posts are frequently damaged or lost. These placemaking elements should replace the modular function of these posts while providing a more durable solution. They should also enhance the character and sense of space of the area. These modular elements could also replace the planters along the bicycle facility if SDOT chooses this direction.

#### Task 3 Post-installation analysis

SDOT seeks to study the effectiveness of the wayfinding and placemaking elements by conducting a post-installation analysis. This analysis should be through at least the following two measures:

- 1. Direct plaza observation This work should, at a minimum, measure how many people are using the plaza in comparison to before installation using the measures designed by the DSA as part of their stewardship agreement, coordinating with SDOT metrics where appropriate.
- 2. Intercept survey work This survey should gain knowledge from Plaza and transit users to understand the effectiveness of the changes. This survey work should be designed in coordination with SDOT to maximize potential gains, but at a minimum, the work must cover the following questions:
  - **a.** How has the Shared Mobility Hub work changed the likelihood of SOV mode-choice in travelling to or from the project area?
  - **b.** Do they know where the tunnel entrance is? Would they know before the work was completed?

#### Task 4 Outreach and engagement

As this work may have a direct impact on nearby private property owners, all necessary outreach and engagement must be completed to obtain the approval of the affected property owners before installation work begins.
