2022 Third Quarter

Surveillance Technology Determination Report

Seattle Information Technology

Summary

The Privacy Office received 62 total requests for privacy reviews during Q3 of 2022. 62 technologies and projects were applicable for this report. None of the technologies reviewed during Q3 of 2022 were determined to be surveillance technology.

About This Report

The Seattle City Council passed SMC 14.18 ("Surveillance Ordinance") to provide greater transparency to City Council and the public when the City acquires technology that meets the City's criteria of surveillance. In addition to review and approval requirements for new and existing technologies, the Surveillance Ordinance requires the CTO to submit a quarterly report to Council of all technology acquisitions. This report provides a list of all such technology acquisitions, the process followed, and the determinations for each of the technologies reviewed.

Ordinance Requirement

This document is prepared pursuant to SMC 14.18.020.B.3, which states:

The CTO shall, by no later than 30 days following the last day of each quarter, submit to Council, by filing with the City Clerk and providing an electronic copy to the chair of the committee responsible for technology matters, the co-chairs of the Working Group, the City Auditor, the Inspector General for Public Safety, and the Director of Central Staff, a surveillance technology determination list that includes all technology from that quarter that was reviewed under the process established in subsection 14.18.020.B.1, along with supporting information to explain the justification for the disposition of items on the list. The CTO shall also post the list to the City's website.

How This List Was Compiled

City staff must submit a Privacy and Surveillance Assessment (PSA) before new non-standard technology may be acquired. The assessment is used to determine if a given technology meets the City's definition of "surveillance technology" as defined by the City's Surveillance Policy. City staff were informed of this new process through an all-City email, engagement meetings with critical stakeholders such as IT Client Solutions Directors, financial leadership, and project managers. The report includes technologies and projects reviewed through the PSA process between July 1, 2022 and September 30, 2022. If a technology is discovered to have been acquired outside of this process, the CTO will inform Council. Inapplicable requests for review (for example requests for standard software, redundant requests, consultant contracts, etc.) were removed.

Table of Department Acronyms

The following department acronyms are used in this report and are provided as a reference:

Acronym	Department
SDOT	Seattle Department of Transportation
FAS	Finance and Administrative Services
ITD	Information Technology Department
OH	Office of Housing
OIG	Office of the Inspector General
OLS	Office of Labor Standards
OSE	Office of Sustainability and Environment
OPCD	Office of Planning & Community Development
SDCI	Seattle Department of Construction & Inspections
SCL	Seattle City Light
SFD	Seattle Fire Department
SDHR	Seattle Department of Human Resources
SMC	Seattle Municipal Court
SPD	Seattle Police Department
SPU	Seattle Public Utilities

Surveillance Technologies

No technologies reviewed in Q3 of 2022 met the City's definition of surveillance technology.

Non-Surveillance Technologies

Technologies that were reviewed and were not determined to be surveillance technologies have their reviews detailed in the supplemental materials appendix that follows.

Seattle IT

Surveillance Technology Criteria Review

7/1/2022

Technology Description

Technology Name	Tree Service Provider via Seattle Services Portal via Accela & SLIM		
Description	Council passed new legislation to require tree service provider registration for tree work on private property which SDCI will be managing. Legislation goes into effect on 8/26/22. Processes to support this program are being built/configured within an existing SDCI module in the Accela enterprise platform. An application will be available to customers on the Seattle Services Portal and a list of registered tree providers will be made available to the public. This new program will utilize an existing interface between Accela and SLIM to verify business license status.		
Department	SCI	**Case No.**	3955

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.

N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

7/5/2022

Technology Description

Technology Name	Tic Tie Calculate Software Licenses		
Description	TicTie Calculate allows accounting personnel to create annotated workpapers directly from PDF documents — without the paper. Created by CPaperless, TicTie Calculate works with Adobe Acrobat to let you mark up, review and work with any PDF document, simplifying the review of your tax return workpapers and client source documents. The features are: • Customizable tickmarks that can be added to any PDF page. Check marks, OKs, question marks, and many more symbols are built in. • Page sign-offs and sign-off summaries, with support for up to two reviewers • Hyperlinked cross references to other pages of the PDF • Insertable digital calculator tapes • Automated bookmarking and repagination • One-click page rotation • Support for multiple monitors		
Department	SCL	**Case No.**	3961

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.

N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

7/5/2022

Technology Description

Technology Name	CCB MDM Upgrade Project		
Description	New Testing Environment for System Integration Testing of the Kubra Interface to CCB MDM Upgrade.		
Department	SCL, SPU	**Case No.**	2715

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

7/6/2022

Technology Description

Technology Name	HP Plotters for Skagit Hydro (Newhalem Office & Diablo Powerhouse)		
Description	2 HP Designjet Printer/Plotters		
Department	SCL	**Case No.**	3966

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

7/7/2022

Technology Description

Technology Name	VuSitu		
Description	The app is used to extract data from InSitu level trolls which monitor groundwater.		
Department	SPU	**Case No.**	3967

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

7/15/2022

Technology Description

Technology Name	Geode Connect App for iOS		
Description	Used for high accuracy GPS. GEODE CONNECT is a configuration and communication utility for the GEODE SUB-METER GPS/GNSS Receiver. It provides the ability to change settings on the Geode Sub-Meter GNSS Receivers. The utility may also be used as an NTRIP Client, using your device's network connection to provide correction services to the Geode receiver in a wide variety of RTK data formats including RTCM, CMR, etc. The app displays position, altitude, estimated horizontal error, differential status fix info, speed, heading, satellites in fix, PDOP and correction source. The Skyplot screen shows satellites in use for the various supported constellations and their distribution in the sky. A Terminal screen is included to allow users a "deep dive" into the actual data output from the receiver, and direct command access. Waypoints can be captured and exported for demonstration purposes.		
Department	SPU	**Case No.**	3974

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.

N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

7/15/2022

Technology Description

Technology Name	Docker Desktop		
Description	With the Data Engineering team beginning to create new work within cloud environments much of the local development tools are enhanced by the use of containers. Using the Docker Desktop tool makes it easier to manage these containers on our workstations and build and prep containers to their target location.		
Department	ITD	**Case No.**	3973

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.

N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

8/1/2022

Technology Description

Technology Name	Limeade Mobile App		
Description	Digital engagement with wellness activities including; habit/behavior tracking, reading articles, watching videos, and completing surveys. Communications feeds to City of Seattle resource and links to community and trusted Limeade resources. Wellbeing assessment. Habits Behaviors, lifestyle question. Device enabled activities. Survey responses.		
Department	SHR	**Case No.**	3982

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Technology Description

Technology Name	Zoom		
Description	ZOOM meeting platform for public Design Review Board meetings		
Department	SCI	**Case No.**	3970

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

8/3/2022

Technology Description

Technology Name	Enterprise Zoom License for Public Design Review Board Meetings		
Description	ZOOM for public Design Review Board meetings		
Department	SCI	**Case No.**	4002

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

8/4/2022

Technology Description

Technology Name	Fire Safety & Training LMS (Vector LMS) (AKA TargetSolutions)		
Description	Procurement of a Fire Department specific Learning Management System (LMS). The solution to be used is Vector LMS (also known as TargetSolutions).		
Department	SFD	**Case No.**	3799

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

8/11/2022

Technology Description

Technology Name	Quicken Bookkeeping Software		
Description	Bookkeeping software		
Department	SCL	**Case No.**	4013

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

8/19/2022

Technology Description

Technology Name	Nuance Dragon Law Enforcement- Pilot Project		
Description	Dragon Law Enforcement provides officers with a faster and more accurate way to safely and efficiently improve daily reporting and documentation demands, speed data entry into CAD/RMS systems and perform everyday tasks, like license plate lookups—by voice. Dragon improves in-car documentation and safety while officers are stationary in their patrol cars. Officers can look up license plates simply by saying "Enter license plate Alpha Bravo Charlie 123," or write reports and respond to calls—all while staying heads up and with their eyes on their surroundings. Empower officers to complete reports with a high-quality, handheld microphone. Officers can dictate, edit, navigate and review documents, or switch dictation on and off using a toggle button if they need to exit the vehicle quickly. And with programmable buttons, automate steps such as advancing sequentially through form fields of an incident report.		
Department	SPD	**Case No.**	4009

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Seattle IT

Surveillance Technology Criteria Review

8/31/2022

Technology Description

Technology Name	SCL Crew Callout Automation System		
Description	SaaS vendor that reduces the crew callout time by ~90% for their average customer. Our complex union rules will be entered into the software to assure the right people are called to respond to an outage event in the right order, reducing the potential for grievances. Employee names, job classifications, supervisor structure, location and contact information will be extracted from PeopleSoft (frequency TBD) and a transfer and load process will be created to load it into ARCOS for dispatchers and supervisors to use to call crew members out to work outage events.		
Department	SCL	**Case No.**	3989

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

8/31/2022

Technology Description

Technology Name	Enable Local File Links Browser Extension in Chrome		
Description	Chrome has an extension (Enable Local File Links) that enables access to files and folders (i.e. links to files and folders on network shares). The extension works on the Chromium Edge as well.		
Department	SPU	**Case No.**	4052

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

9/20/2022

Technology Description

Technology Name	Sublime Text		
Description	Sublime Text is the sophisticated text editor for code, markup and prose. It allows large amounts of data to be uploaded and parsed quickly. Additional information can be found here: https://www.sublimetext.com/		
Department	ITD	**Case No.**	4070

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

9/22/2022

Technology Description

Technology Name	SDCI Permit History Research Tool		
Description	SDCI requested a new project aimed at developing a Permit Research Tool to provide internal and external audiences/users (who may have different UI) with queried or filtered comprehensive longitudinal data on the land use and permit history for specific or potentially grouped addresses or parcels.		
Department	ITD, SCI	**Case No.**	4029

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

No	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
No	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
Yes	Technologies used for everyday office use.
No	Body-worn cameras.
No	Cameras installed in or on a police vehicle.
No	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
No	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
No	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

No	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
Yes	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

9/23/2022

Technology Description

Technology Name	Blockwise ZenCity Survey		
Description	Blockwise Survey is a tool for SPD to get feedback on trust and safety perspectives in the community. ZenCity distributes the survey, and provides an aggregate-deidentified report back to the City which includes trust an safety scores and response themes, which are generated analysis of survey responses. The aggregate report data is used for transparency on SPD's Trust and Safety Dashboard, which is available to the public.		
Department	SPD	**Case No.**	4051

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

Seattle IT

Surveillance Technology Criteria Review

9/29/2022

Technology Description

Technology Name	Chart Reuse		
Description	Chart Reuse is a web-based software application developed by the non-profit organization Upstream that makes it possible to project and track the benefits of switching a business or institution from the use of single-use to reusable food service ware. It uses information about single-use food service ware provided by these businesses alongside information gathered directly about reusable alternatives available to estimate cost savings and environmental benefits.		
Department	SPU	**Case No.**	4075

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.
