2025 First Quarter

Surveillance Technology Determination Report

Seattle Information Technology

Summary

The Privacy Office received 45 total requests for privacy reviews during Q1 of 2025. 45 technologies and projects were applicable for this report. 0 of the technologies reviewed during Q1 of 2025 were determined to be surveillance technology.

About This Report

The Seattle City Council passed SMC 14.18 ("Surveillance Ordinance") to provide greater transparency to City Council and the public when the City acquires technology that meets the City's criteria of surveillance. In addition to review and approval requirements for new and existing technologies, the Surveillance Ordinance requires the Chief Technology Officer (CTO) to submit a quarterly report to Council of all technology acquisitions. This report provides a list of all such technology acquisitions, the process followed, and the determinations for each of the technologies reviewed.

Ordinance Requirement

This document is prepared pursuant to SMC 14.18.020.B.3, which states:

The CTO shall, by no later than 30 days following the last day of each quarter, submit to Council, by filing with the City Clerk and providing an electronic copy to the chair of the committee responsible for technology matters, the co-chairs of the Working Group, the City Auditor, the Inspector General for Public Safety, and the Director of Central Staff, a surveillance technology determination list that includes all technology from that quarter that was reviewed under the process established in subsection 14.18.020.B.1, along with supporting information to explain the justification for the disposition of items on the list. The CTO shall also post the list to the City's website.

How This List Was Compiled

City staff must submit a Privacy and Surveillance Assessment (PSA) before new non-standard technology may be acquired. The assessment is used to determine if a given technology meets the City's definition of "surveillance technology" as defined by the City's Surveillance Policy. City staff were informed of this new process through an all-City email, engagement meetings with critical stakeholders such as IT Client Solutions Directors, financial leadership, and project managers. The report includes technologies and projects reviewed through the PSA process between January 1, 2025 and March 31, 2025. If a technology is discovered to have been acquired outside of this process, the CTO will inform Council. Inapplicable requests for review (for example requests for standard software, redundant requests, consultant contracts, etc.) were removed.

Table of Department Acronyms

The following department acronyms are used in this report and are provided as a reference:

Acronym	Department
AUD	Office of the City Auditor
CARE	Community Assisted Response & Engagement (CARE)Department
CEN	Seattle Center
Citywide	Citywide
DEEL	Department of Education and Early Learning
SDOT	Seattle Department of Transportation
FAS	Finance and Administrative Services
OIRA	Office of Immigrant and Refugee Affairs
ITD	Information Technology Department
MOS	Mayor's Office
OCR	Office of Civil Rights
OIG	Office of the Inspector General
SDCI	Seattle Department of Construction & Inspections
SCL	Seattle City Light
SFD	Seattle Fire Department
SPD	Seattle Police Department
SPU	Seattle Public Utilities

Surveillance Technologies

No technologies reviewed and closed during Q1 2025 were determined to be surveillance technologies.

Non-Surveillance Technologies

Technologies that were reviewed and were not determined to be surveillance technologies have their reviews detailed in the supplemental materials appendix.

Seattle IT

Surveillance Technology Criteria Review

1/2/2025

Technology Description

Technology Name	Copilot Studio		
Description	Copilot Studio is a part of Microsoft Power Platform. It is a graphical, low-code tool for creating chat bots and other automations.		
Department	ITD	**Case No.**	5692

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

1/2/2025

Technology Description

Technology Name	Java Development Kit (JDK)		
Description	JDK 21 is the latest Long-Term Support (LTS) release of the Java SE Platform.		
Department	DOT	**Case No.**	5678

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

1/9/2025

Technology Description

Technology Name	BitRecover PST to PDF Wizard		
Description	Software needed for Public Records work.		
Department	OIG	**Case No.**	5656

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

1/9/2025

Technology Description

Technology Name	FetchSRTM software		
Description	The FetchSRTM tool downloads SRTM and NED terrain data. The tool allows the user to batch download larger areas, then saves and decompresses the data to a user defined location. FetchSRTM is a utility that allows you to download terrain data from the USGS site to model radio performance. The terrain data is used to model radio performance in connection with the upgrade of our radio systems. -----		
Department	SCL	**Case No.**	5668

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

1/10/2025

Technology Description

Technology Name	Short Term Rental Ordinance Support Solution		
Description	We are in the process of publishing an RFP for a solution that compiles comprehensive data on Short Term Rentals (STR) operator listings/advertisements to identify operators posting STR units on STR platforms without a City of Seattle Short-Term Rental Operator license. The RFP asks companies for solutions to scrape the publicly available internet for URL and webpage information that Short-term rental platforms advertise on the web. The solution will combine this information from publicly available records from King County parcel data and Seattle licensing data. The combination of this information will allow the City to comply with SMC 6.600 (Short-Term Rental Ordinance).		
Department	FAS	**Case No.**	5630

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

1/13/2025

Technology Description

Technology Name	Bluedot		
Description	This is a smartphone app to authorize charging of city vehicles at public charging sites and provide a map showing where the closest chargers are located.		
Department	FAS	**Case No.**	5686

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

1/13/2025

Technology Description

Technology Name	Sortly Asset Management and Inventory Management Web App		
Description	Sortly is a web application that provides asset management and inventory management through desktop and mobile devices.		
Department	CEN	**Case No.**	5704

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.

N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

1/13/2025

Technology Description

Technology Name	Archer Energy Solutions		
Description	Archer is a Governance, Risk Management and Compliance management solution platform.		
Department	SCL	**Case No.**	5711

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

1/23/2025

Technology Description

Technology Name	Cisco ThousandEyes		
Description	This is a software platform, coupled with end device agent software, that gives the network team the ability to create scheduled or ad-hoc tests that measure the path and latency of specified traffic to/from an internal machine and server, or internet based agents to city provided public services. This is very helpful in troubleshooting and pinpointing problems that would otherwise be difficult to solve. We believe this would be especially useful in P1 scenarios involving slowness in complicated systems and multiple ITD teams. This would help determine specifically what system is at fault. The external agents are created and managed by Cisco and can indicate whether there are problems with the City's ISPs or public websites, or with different customer ISPs (comcast, lumen, Verizon, etc).		
Department	ITD	**Case No.**	5654

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

Surveillance Technology Criteria Review

2/4/2025

Technology Description

Technology Name	Kimley-Horn Intelligent Transportation System software		
Description	The Kimley-Horn Integrated Transportation System (KITS) is an Advanced Traffic Management System (ATMS) designed to optimize traffic signal control across Seattle's transportation network. KITS enables real-time signal timing adjustments based on traffic conditions, improving congestion management and multimodal mobility. It integrates with SDOT's existing Intelligent Transportation Systems (ITS) to enhance coordination between traffic signals, reducing delays and optimizing flow for vehicles, transit, cyclists, and pedestrians. The system also supports data-driven decision-making by collecting and analyzing signal performance metrics, enabling proactive adjustments and long-term planning.		
Department	DOT	**Case No.**	5749

N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

2/13/2025

Technology Description

Technology Name	Entrust KeyControl Vault for Cloud		
Description	One capability of Entrust KeyControl is its support of Double Key Encryption (DKE) with Microsoft Azure Information Protection. Double Key Encryption (DKE) utilizes two component keys to protect highly sensitive data — a key that is in the customer's control and a Microsoft key stored securely in Microsoft Azure.		
Department	ITD	**Case No.**	5769

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.

N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Seattle IT

Surveillance Technology Criteria Review

2/25/2025

Technology Description

Technology Name	Armis		
Description	Armis collects anonymized data about the attributes and behavior of each monitored asset, putting together a baseline profile for each asset type. This includes information such as how often each device communicates with other devices, over what protocols, how much data is typically transmitted, whether the device is usually stationary, what software runs on each device, etc.		
Department	ITD, SPD	**Case No.**	4717

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

3/21/2025

Technology Description

Technology Name	Insta360 Software		
Description	This software is needed to process photos from a 360 camera and convert from proprietary file type to common file types for editing / photo / video storage.		
Department	DOT	**Case No.**	5780

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Surveillance Technology Criteria Review

3/26/2025

Technology Description

Technology Name	EDIrepository.org / SIMS 2.0		
Description	The Environmental Data Initiative (EDI) provides key services and technical expertise to the scientific community that ensure environmental and ecological data are well curated and accessible for discovery and re-use well into the future. EDI assists researchers from field stations, individual laboratories, and research projects of all sizes to archive and publish their environmental data. EDI is committed to make data Findable, Accessible, Interoperable, and Reusable (FAIR).		
Department	SPU	**Case No.**	4094

Criteria

Does the technology meet the definition a Surveillance Technology?

No	Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice.
