

Director's Rule 22-2013R purpose is to announce the rescission of Director's Rules 10-87 and 12-87 that prohibit the use of the lot boundary adjustments to effect major changes to lot configurations, or to adjust lot lines straddled by structures. Rule 10-87 and 12-87 are repealed as being inconsistent with the Washington State Supreme Court decision in *Seattle v. Crispin*.
